# **SECTION 2: Hazards identification**

#### 2.1 Classification of the substance or mixture

**Product definition** : Mixture Classification according to Regulation (EC) No. 1272/2008 [CLP/GHS] Not classified.

The product is not classified as hazardous according to Regulation (EC) 1272/2008 as amended.

See Section 16 for the full text of the H statements declared above.

See Section 11 for more detailed information on health effects and symptoms.

## 2.2 Label elements

Signal word

: No signal word.

English (GB)

Europe

| Code : SDS-FI70008<br>FONTEFIRE WF CLEAR  | Date of issue/Date of revision : 6 April 2024   |
|---|---|
| <b>SECTION 2: Hazards</b>   | identification  |
| Hazard statements   | : No known significant effects or critical hazards.   |
| Prevention  | : Not applicable.   |
| Response  | : Not applicable.   |
| Storage   | : Not applicable.   |
| Disposal  | <ul> <li>Dispose of contents and container in accordance with all local, regional, national and<br/>international regulations.</li> <li>P501</li> </ul>   |
| Hazardous ingredients   | : Not applicable.   |
| Supplemental label<br>elements  | <ul> <li>Contains 2,4,7,9-tetramethyldec-5-yne-4,7-diol and reaction mass of 5-chloro-2-methyl-<br/>2H-isothiazol-3-one and 2-methyl-2H-isothiazol-3-one (3:1). May produce an allergic<br/>reaction.</li> <li>Safety data sheet available on request.</li> </ul> |
| Annex XVII - Restrictions<br>on the manufacture,<br>placing on the market and<br>use of certain dangerous<br>substances, mixtures and<br>articles | : Not applicable.   |
| Special packaging requirem  | nents   |
| Containers to be fitted<br>with child-resistant<br>fastenings   | : Not applicable.   |
| Tactile warning of danger   | : Not applicable.   |
| 2.3 Other hazards   |   |
| Product meets the criteria for PBT or vPvB  | : This mixture does not contain any substances that are assessed to be a PBT or a vPvB  |
| Other hazards which do  | Prolonged or repeated contact may dry skin and cause irritation. Contains a substance   |

# **SECTION 3: Composition/information on ingredients**

temperatures greater than 60C/140F.

not result in classification

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment, are PBTs, vPvBs or Substances of equivalent concern, or have been assigned a workplace exposure limit and hence require reporting in this section.

See Section 16 for the full text of the H statements declared

above.

<u>Type</u>

[1] Substance classified with a health or environmental hazard

[2] Substance with a workplace exposure limit

Occupational exposure limits, if available, are listed in Section 8.

SUB codes represent substances without registered CAS Numbers.

# **SECTION 4: First aid measures**

## 4.1 Description of first aid measures

| •                          |  |
|----------------------------|--|
| Eye contact                | : Remove contact lenses, irrigate copiously with clean, fresh water, holding the eyelids apart for at least 10 minutes and seek immediate medical advice.  |
| Inhalation                 | : Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. |
| Skin contact               | : Remove contaminated clothing and shoes. Wash skin thoroughly with soap and water<br>or use recognised skin cleanser. Do NOT use solvents or thinners.  |
| Ingestion                  | : If swallowed, seek medical advice immediately and show the container or label. Keep person warm and at rest. Do NOT induce vomiting.   |
| Protection of first-aiders | : No action shall be taken involving any personal risk or without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation.                       |

# 4.2 Most important symptoms and effects, both acute and delayed

| Potential acute health ef | i <u>fects</u>  |      |
|---------------------------|---|------|
| Eye contact               | : No known significant effects or critical hazards.             |      |
| Inhalation                | : No known significant effects or critical hazards.             |      |
| Skin contact              | : Defatting to the skin. May cause skin dryness and irritation. |      |
| Ingestion                 | : No known significant effects or critical hazards.             |      |
| Over-exposure signs/sy    | <u>mptoms</u>   |      |
| Eye contact               | : No specific data.   |      |
| Inhalation                | : No specific data.   |      |
| English (GB)              | Europe  | 3/14 |

| Code : SDS-FI700<br>FONTEFIRE WF CLEAR | Date of issue/Date of revision: 6 April 2024  |
|--|---|
| SECTION 4: First                       | aid measures  |
| Skin contact                           | : Adverse symptoms may include the following:<br>irritation<br>dryness<br>cracking  |
| Ingestion                              | : No specific data.   |
| 4.3 Indication of any imm              | nediate medical attention and special treatment needed  |
| Notes to physician                     | <ul> <li>In case of inhalation of decomposition products in a fire, symptoms may be delayed.<br/>The exposed person may need to be kept under medical surveillance for 48 hours.</li> </ul> |
| Specific treatments                    | : No specific treatment.  |

# SECTION 5: Firefighting measures 5.1 Extinguishing media Suitable extinguishing media Unsuitable extinguishing : Use an extinguishing agent suitable for the surrounding fire. Unsuitable extinguishing : None known.

#### 5.2 Special hazards arising from the substance or mixture

media

| Hazards from the substance or mixture          | : In a fire or if heated, a pressure increase will occur and the container may burst.   |
|--|---|
| Hazardous combustion<br>products               | : Decomposition products may include the following materials:<br>carbon oxides<br>nitrogen oxides<br>phosphorus oxides<br>Formaldehyde.   |
| 5.3 Advice for firefighters                    |   |
| Special precautions for<br>fire-fighters       | : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.   |
| Special protective equipment for fire-fighters | : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. Clothing for fire-fighters (including helmets, protective boots and gloves) conforming to European standard EN 469 will provide a basic level of protection for chemical incidents. |

# **SECTION 6: Accidental release measures**

|                                | tective equipment and emergency procedures   |                                    |
|--------------------------------|--|------------------------------------|
| For non-emergency<br>personnel | : No action shall be taken involving any personal risk or without suitab<br>Evacuate surrounding areas. Keep unnecessary and unprotected per<br>entering. Do not touch or walk through spilt material. Avoid breathin<br>Provide adequate ventilation. Wear appropriate respirator when ven<br>inadequate. Put on appropriate personal protective equipment. | ersonnel from<br>g vapour or mist. |
| For emergency responders       | : If specialised clothing is required to deal with the spillage, take note of Section 8 on suitable and unsuitable materials. See also the information emergency personnel".   |                                    |
| 6.2 Environmental precautions  | : Avoid dispersal of spilt material and runoff and contact with soil, wate sewers. Inform the relevant authorities if the product has caused enpollution (sewers, waterways, soil or air).   |                                    |
| English (GB)                   | Europe   | 4/14                               |

# **SECTION 6: Accidental release measures**

### 6.3 Methods and material for containment and cleaning up

| Small spill                     | : Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.  |
|---------------------------------|--|
| Large spill                     | : Stop leak if without risk. Move containers from spill area. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations. Dispose of via a licensed waste disposal contractor. |
| 6.4 Reference to other sections | <ul> <li>See Section 1 for emergency contact information.</li> <li>See Section 8 for information on appropriate personal protective equipment.</li> <li>See Section 13 for additional waste treatment information.</li> </ul>  |

# **SECTION 7: Handling and storage**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### 7.1 Precautions for safe handling

| Protective measures  | : Put on appropriate personal protective equipment (see Section 8).   |
|--|---|
| Advice on general occupational hygiene                                 | : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.   |
| 7.2 Conditions for safe<br>storage, including any<br>incompatibilities | : Do not store below the following temperature: 5°C (41°F). Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use. |

#### 7.3 Specific end use(s)

See Section 1.2 for Identified uses.

# **SECTION 8: Exposure controls/personal protection**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

# 8.1 Control parameters

## **Occupational exposure limits**

| Product/ingredient name         | Exposure limit values  |
|---------------------------------|--|
| (2-methoxymethylethoxy)propanol | EU OEL (Europe, 1/2022). [(2-Methoxymethylethoxy)-propanol]<br>Absorbed through skin.<br>TWA: 308 mg/m <sup>3</sup> 8 hours.<br>TWA: 50 ppm 8 hours. |

|--|

| Code      | : SDS-FI70008 | Date of issue/Date of revision | : 6 April 2024 |
|-----------|---------------|--------------------------------|----------------|
| FONTEFIRE | WF CLEAR      |                                |                |

# SECTION 8: Exposure controls/personal protection

| Recommended monitoring | <b>o i</b>   |
|------------------------|--|
| procedures             | Standard EN 689 (Workplace atmospheres - Guidance for the assessment of exposure   |
|                        | by inhalation to chemical agents for comparison with limit values and measurement  |
|                        | strategy) European Standard EN 14042 (Workplace atmospheres - Guide for the        |
|                        | application and use of procedures for the assessment of exposure to chemical and   |
|                        | biological agents) European Standard EN 482 (Workplace atmospheres - General       |
|                        | requirements for the performance of procedures for the measurement of chemical     |
|                        | agents) Reference to national guidance documents for methods for the determination |
|                        | of hazardous substances will also be required.                                     |

| SECTION 8: Exposure controls/personal protection |  |  |  |  |  |  |  |  |
| Appropriate engineering controls                 | : Good general ventilation should be sufficient to control worker exposure to airborne contaminants. |  |  |  |  |  |  |  |

## Individual protection measures

| Individual protection measu     | res  |
|---------------------------------|--|
| Hygiene measures                | : Wash hands, forearms and face thoroughly after handling chemical products, before<br>eating, smoking and using the lavatory and at the end of the working period.<br>Appropriate techniques should be used to remove potentially contaminated clothing.<br>Wash contaminated clothing before reusing. Ensure that eyewash stations and safety<br>showers are close to the workstation location.  |
| Eye/face protection             | : Safety glasses with side shields. Use eye protection according to EN 166.  |
| Skin protection                 |  |
| Hand protection                 | : Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary.  |
| Gloves                          | : For prolonged or repeated handling, use the following type of gloves:  |
|                                 | Recommended: butyl rubber  |
| Body protection                 | : Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.  |
| Other skin protection           | Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.  |
| Respiratory protection          | : Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator. If workers are exposed to concentrations above the exposure limit, they must use appropriate, certified respirators. Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Wear a respirator conforming to EN140. Filter type: organic vapour (Type A) and particulate filter P3 |
| Environmental exposure controls | : Emissions from ventilation or work process equipment should be checked to ensure<br>they comply with the requirements of environmental protection legislation. In some<br>cases, fume scrubbers, filters or engineering modifications to the process equipment<br>will be necessary to reduce emissions to acceptable levels.  |

# **SECTION 9: Physical and chemical properties**

The conditions of measurement of all properties are at standard temperature and pressure unless otherwise indicated.

| Potential chronic health eff | <u>ects</u>  |
| Not available.               |  |
| Conclusion/Summary           | : Not available.   |
| General                      | : Prolonged or repeated contact can defat the skin and lead to irritation, cracking and/or dermatitis. |
| Carcinogenicity              | : No known significant effects or critical hazards.  |
| Mutagenicity                 | : No known significant effects or critical hazards.  |
| Reproductive toxicity        | : No known significant effects or critical hazards.  |
| Other information            | : Not available.   |

Prolonged or repeated contact may dry skin and cause irritation. Repeated exposure to high vapor concentrations may cause irritation of the respiratory system and permanent brain and nervous system damage. Inhalation of vapour/aerosol concentrations above the recommended exposure limits causes headaches, drowsiness and nausea and may lead to unconsciousness or death. Contains isothiazolinones. May cause allergic reaction. Contains a substance that may emit formaldehyde if stored beyond its shelf life and/or during cure at curing temperatures greater than 60C/140F. Avoid contact with skin and clothing.

#### **11.2 Information on other hazards**

#### **11.2.1 Endocrine disrupting properties**

Not available.

#### 11.2.2 Other information

Not available.

# **SECTION 12: Ecological information**

#### 12.1 Toxicity

| Product/ingredient name         | Result               | Species | Exposure |
|---------------------------------|----------------------|---------|----------|
| (2-methoxymethylethoxy)propanol | Acute EC50 1919 mg/l | Daphnia | 48 hours |

**Conclusion/Summary** : There are no data available on the mixture itself.

# 12.2 Persistence and degradability

**Conclusion/Summary** : There are no data available on the mixture itself.

## 12.3 Bioaccumulative potential

|  | English (GB) | Europe | 10/14 |

|--------------------|--------------------------------|----------------|
| FONTEFIRE WF CLEAR |                                |                |

# **SECTION 12: Ecological information**

| Product/ingredient name         | LogPow | BCF | Potential |  |
|---------------------------------|--------|-----|-----------|--|
| (2-methoxymethylethoxy)propanol | 0.004  | -   | Low       |  |

## 12.4 Mobility in soil

| Soil/water partition coefficient (Koc) | : Not available. |
|--|------------------|
| Mobility                               | : Not available. |

## 12.5 Results of PBT and vPvB assessment

This mixture does not contain any substances that are assessed to be a PBT or a vPvB.

## **12.6 Endocrine disrupting properties**

Not available.

## 12.7 Other adverse effects

No known significant effects or critical hazards.

# **SECTION 13: Disposal considerations**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### 13.1 Waste treatment methods

| Product             |   |
|---------------------|---|
| Methods of disposal | : The generation of waste should be avoided or minimised wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. |
| Hazardous waste     | : Within the present knowledge of the supplier, this product is not regarded as hazardous waste, as defined by EU Directive 2008/98/EC.   |

#### European waste catalogue (EWC)

| Waste code          | Waste designation  |
|---------------------|--|
| 08 01 11*           | waste paint and varnish containing organic solvents or other hazardous substances  |
| Packaging           |  |
| Methods of disposal | : The generation of waste should be avoided or minimised wherever possible. Waste packaging should be recycled. Incineration or landfill should only be considered whe recycling is not feasible.                                |
| Type of packaging   | European waste catalogue (EWC)   |
| Container           | 15 01 06 mixed packaging   |
| Special precautions | : This material and its container must be disposed of in a safe way. Empty containers liners may retain some product residues. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. |

Indicates information that has changed from previously issued version.

#### Abbreviations and acronyms

ATE = Acute Toxicity Estimate CLP = Classification, Labelling and Packaging Regulation [Regulation (EC) No. 1272/2008]

DNEL = Derived No Effect Level

EUH statement = CLP-specific Hazard statement

PNEC = Predicted No Effect Concentration

RRN = REACH Registration Number

PBT = Persistent, Bioaccumulative and Toxic

vPvB = Very Persistent and Very Bioaccumulative

ADR = The European Agreement concerning the International Carriage of Dangerous Goods by Road

ADN = European Provisions concerning the International Carriage of Dangerous Goods by Inland Waterway

IMDG = International Maritime Dangerous Goods

IATA = International Air Transport Association

## Full text of abbreviated H statements

| H301   | Toxic if swallowed.                                   |
|--------|---|
| H310   | Fatal in contact with skin.                           |
| H314   | Causes severe skin burns and eye damage.              |
| H317   | May cause an allergic skin reaction.                  |
| H318   | Causes serious eye damage.                            |
| H330   | Fatal if inhaled.                                     |
| H400   | Very toxic to aquatic life.                           |
| H410   | Very toxic to aquatic life with long lasting effects. |
| H412   | Harmful to aquatic life with long lasting effects.    |
| EUH071 | Corrosive to the respiratory tract.                   |
