WATERBASED SANDING PASTE

PRODUCT DESCRIPTION

Nexa Autocolor Waterbased Sanding Paste (**P562-100**) is an abrasive paste for use in preparing surfaces for blending or fade-out. This product, used in conjunction with an abrasive pad, provides a fast and effective method of evenly de-glossing and abrading topcoats in preparation for blending. The product is silicone and wax free, and residue can easily be washed off with water for maximum adhesion.

• Fast Surface Preparation = reduced process times

• Fast Quality Repair = customer satisfaction

P562-100

Waterbased Sanding Paste

THESE PRODUCTS ARE FOR THE PROFESSIONAL PAINTING OF AUTOMOTIVE VEHICLES ONLY

PROCESS

APPLICATION

Note: Ensure the whole area to be repaired has been thoroughly cleaned using either Spirit Wipe (P850-1402) or Body Cleaner (P273-901).

1. Apply Waterbased Sanding paste directly onto an scuff pad (ultrafine Grey or equivalent). Use the pad and paste with water to abrade the area to be painted.
2. Wash off all residue with clean water and dry thoroughly. The painted surface should have a uniformly matt appearance.

Note: Failure to remove all residue could result in adhesion failure.

3. Clean the surface thoroughly with either Spirit Wipe (P850-14 or P850-1402) or Waterborne Precleaner (P980-251) prior to overcoating.

2K™ PERFORMANCE SPECIFICATIONS

Product:	P562-100
Category:	Surface Cleaner
VOC As Packaged:	0.0 lbs. per gal
VOC RFU:	Packaged Ready-for-Use
