| Signal word                | : Warning                    |

Product code 00220181

Product name SIGMACOVER 456 BASE BROWN 2182

# Section 2. Hazards identification

| Hazard statements               | <ul> <li>Flammable liquid and vapor.<br/>Harmful in contact with skin or if inhaled.<br/>Causes serious eye irritation.<br/>Causes skin irritation.<br/>May cause an allergic skin reaction.<br/>May cause respiratory irritation.</li> </ul>   |
|---------------------------------|---|
|                                 | Harmful to aquatic life with long lasting effects.  |
| Precautionary statements        |   |
| Prevention                      | : Wear protective gloves. Wear eye or face protection. Wear protective clothing.<br>Keep away from heat, hot surfaces, sparks, open flames and other ignition sources.<br>No smoking. Use explosion-proof electrical, ventilating, lighting and all material-<br>handling equipment. Use only non-sparking tools. Take precautionary measures<br>against static discharge. Keep container tightly closed. Use only outdoors or in a<br>well-ventilated area. Avoid release to the environment. Avoid breathing vapor.<br>Wash hands thoroughly after handling. Contaminated work clothing should not be<br>allowed out of the workplace.                                    |
| Response                        | : IF INHALED: Remove person to fresh air and keep comfortable for breathing. Call<br>a POISON CENTER or physician if you feel unwell. IF ON SKIN (or hair): Take off<br>immediately all contaminated clothing. Rinse skin with water or shower. IF ON<br>SKIN: Wash with plenty of soap and water. Call a POISON CENTER or physician if<br>you feel unwell. Take off contaminated clothing and wash it before reuse. If skin<br>irritation or rash occurs: Get medical attention. IF IN EYES: Rinse cautiously with<br>water for several minutes. Remove contact lenses, if present and easy to do.<br>Continue rinsing. If eye irritation persists: Get medical attention. |
| Storage                         | : Store locked up. Store in a well-ventilated place. Keep cool.   |
| Disposal                        | : Dispose of contents and container in accordance with all local, regional, national and international regulations.   |
| Other hannels with the design ( |   |

**Other hazards which do not** : Prolonged or repeated contact may dry skin and cause irritation. result in classification

# Section 3. Composition/information on ingredients

| Substance/mixture | : Mixture        |
|-------------------|------------------|
| Other means of    | : Not available. |
| identification    |                  |

#### **CAS number/other identifiers**

| CAS number<br>EC number                  | <ul><li>Not applicable.</li><li>Mixture.</li></ul> |         |            |
|--|--|---------|------------|
| Ingredient name                          |  | %       | CAS number |
| Epoxy Resin                              |  | 20- <25 | SUB110652  |
| xylene                                   |  | 10- <20 | 1330-20-7  |
| Talc , not containing asbestiform fibres |  | 5- <10  | 14807-96-6 |
| Epoxy resin (MW ≤ 700                    | 0)   | 5- <10  | 25068-38-6 |
| ethylbenzene                             | ,  | 3- <5   | 100-41-4   |
| 2-methylpropan-1-ol                      |  | 1- <3   | 78-83-1    |

There are no ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

SUB codes represent substances without registered CAS Numbers.

# Section 3. Composition/information on ingredients

Occupational exposure limits, if available, are listed in Section 8.

## Section 4. First aid measures

# Description of necessary first aid measures Eye contact : Remove contact lenses, irrigate copiously with clean, fresh water, holding the eyelids apart for at least 10 minutes and seek immediate medical advice. Inhalation : Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. Skin contact : Remove contaminated clothing and shoes. Wash skin thoroughly with soap and water or use recognized skin cleanser. Do NOT use solvents or thinners

|           | water of use recognized skill cleanser. Do not ruse solvents of thinners.         |
|-----------|---|
| Ingestion | : If swallowed, seek medical advice immediately and show this container or label. |
|           | Keep person warm and at rest. Do NOT induce vomiting.                             |

#### Most important symptoms/effects, acute and delayed

# Potential acute health effectsEye contact: Causes serious eye irritation.

| Inhalation                      | Harmful if inhaled. May cause respiratory irritation.   |  |
|---------------------------------|---|--|
| Skin contact                    | : Harmful in contact with skin. Causes skin irritation. Defatting to the skin. May cause an allergic skin reaction.                               |  |
| Ingestion                       | : No known significant effects or critical hazards.   |  |
| <u>Over-exposure signs/symp</u> | <u>otoms</u>  |  |
| Eye contact                     | : Adverse symptoms may include the following:<br>pain or irritation<br>watering<br>redness  |  |
| Inhalation                      | : Adverse symptoms may include the following:<br>respiratory tract irritation<br>coughing   |  |
| Skin contact                    | : Adverse symptoms may include the following:<br>irritation<br>redness<br>dryness<br>cracking   |  |
| Ingestion                       | : No specific data.   |  |
| Indication of immediate mee     | dical attention and special treatment needed, if necessary  |  |
| Notes to physician              | <ul> <li>Treat symptomatically. Contact poison treatment specialist immediately if large<br/>quantities have been ingested or inhaled.</li> </ul> |  |
| Specific treatments             | : No specific treatment.  |  |
| Protection of first-aiders      | : No action shall be taken involving any personal risk or without suitable training. If it  |  |

is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing

thoroughly with water before removing it, or wear gloves.

#### See toxicological information (Section 11)

# Section 5. Fire-fighting measures

| Extinguishing media                               |   |
|---|---|
| Suitable extinguishing media                      | : Use dry chemical, CO <sub>2</sub> , water spray (fog) or foam.  |
| Unsuitable extinguishing media                    | : Do not use water jet.   |
| Specific hazards arising from the chemical        | : Flammable liquid and vapor. Runoff to sewer may create fire or explosion hazard.<br>In a fire or if heated, a pressure increase will occur and the container may burst, with<br>the risk of a subsequent explosion. This material is harmful to aquatic life with long<br>lasting effects. Fire water contaminated with this material must be contained and<br>prevented from being discharged to any waterway, sewer or drain. |
| Hazardous thermal decomposition products          | : Decomposition products may include the following materials:<br>carbon oxides<br>halogenated compounds<br>metal oxide/oxides   |
| Special protective actions for fire-fighters      | : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.  |
| Special protective<br>equipment for fire-fighters | : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.   |

# Section 6. Accidental release measures

#### Personal precautions, protective equipment and emergency procedures

| For non-emergency<br>personnel | : | No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilled material. Shut off all ignition sources.<br>No flares, smoking or flames in hazard area. Avoid breathing vapor or mist.<br>Provide adequate ventilation. Wear appropriate respirator when ventilation is<br>inadequate. Put on appropriate personal protective equipment. |
|--------------------------------|---|---|
| For emergency responders       | : | If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".   |
| Environmental precautions      | : | Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). Water polluting material. May be harmful to the environment if released in large quantities.  |

#### Methods and materials for containment and cleaning up

Small spill: Stop leak if without risk. Move containers from spill area. Use spark-proof tools and<br/>explosion-proof equipment. Dilute with water and mop up if water-soluble.<br/>Alternatively, or if water-insoluble, absorb with an inert dry material and place in an<br/>appropriate waste disposal container. Dispose of via a licensed waste disposal<br/>contractor.

Product name SIGMACOVER 456 BASE BROWN 2182

### Section 6. Accidental release measures

#### Large spill

: Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

# Section 7. Handling and storage

#### Precautions for safe handling

| Protective measures  | : | Put on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Do not get in eyes or on skin or clothing. Do not ingest. Avoid breathing vapor or mist. Avoid release to the environment. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Take precautionary measures against electrostatic discharges. Empty containers retain product residue and can be hazardous. Do not reuse container. |
|--|---|--|
| Advice on general<br>occupational hygiene                          | : | Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.  |
| Conditions for safe storage,<br>including any<br>incompatibilities | : | Store between the following temperatures: 0 to 35°C (32 to 95°F). Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Eliminate all ignition sources. Separate from oxidizing materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.  |

# Section 8. Exposure controls/personal protection

<u>Control parameters</u> <u>Occupational exposure limits</u>

# Section 8. Exposure controls/personal protection

| Ingredient name                      |   | Exposure limits  |  |
|--------------------------------------|---|--|--|
| ₩ylene                               |   | Minister of Labor of the Republic of<br>Indonesia (Indonesia, 4/2018).<br>TWA: 434 mg/m <sup>3</sup> 8 hours.<br>TWA: 100 BDS 8 hours.<br>STEL: 651 mg/m <sup>3</sup> 15 minutes.<br>STEL: 150 BDS 15 minutes.<br>Ministry of Employment and Labor<br>(Indonesia, 2/1997).<br>STEL: 651 mg/m <sup>3</sup> 15 minutes.<br>STEL: 150 BDS 15 minutes. |  |
| Talc , not containing asbestif       | orm fibres  | Minister of Labor of the Republic of<br>Indonesia (Indonesia, 4/2018).<br>TWA: 2 mg/m <sup>3</sup> 8 hours. Form: respirable   |  |

| Recommended monitoring<br>procedures | : If this product contains ingredients with exposure limits, personal, workplace<br>atmosphere or biological monitoring may be required to determine the effectiveness<br>of the ventilation or other control measures and/or the necessity to use respiratory<br>protective equipment. Reference should be made to appropriate monitoring<br>standards. Reference to national guidance documents for methods for the<br>determination of hazardous substances will also be required. |  |  |
| Appropriate engineering<br>controls  | : Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapor or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.   |  |  |
| Environmental exposure<br>controls   | : Emissions from ventilation or work process equipment should be checked to ensure<br>they comply with the requirements of environmental protection legislation. In some<br>cases, fume scrubbers, filters or engineering modifications to the process<br>equipment will be necessary to reduce emissions to acceptable levels.   |  |  |
| ndividual protection measu           | res   |  |  |
| Hygiene measures                     | eating, smoking and using the lava<br>Appropriate techniques should be<br>Contaminated work clothing should   | noroughly after handling chemical products, before<br>atory and at the end of the working period.<br>used to remove potentially contaminated clothing.<br>d not be allowed out of the workplace. # Section 8. Exposure controls/personal protection

| Skin | protection |  |
|------|------------|--|
|      |            |  |

| Hand protection        | : Chemical-resistant, impervious gloves complying with an approved standard should<br>be worn at all times when handling chemical products if a risk assessment indicates<br>this is necessary. Considering the parameters specified by the glove manufacturer,<br>check during use that the gloves are still retaining their protective properties. It<br>should be noted that the time to breakthrough for any glove material may be<br>different for different glove manufacturers. In the case of mixtures, consisting of<br>several substances, the protection time of the gloves cannot be accurately<br>estimated. |
|------------------------|---|
| Gloves                 | : butyl rubber  |
| Body protection        | : Personal protective equipment for the body should be selected based on the task<br>being performed and the risks involved and should be approved by a specialist<br>before handling this product. When there is a risk of ignition from static electricity,<br>wear anti-static protective clothing. For the greatest protection from static<br>discharges, clothing should include anti-static overalls, boots and gloves.   |
| Other skin protection  | : Appropriate footwear and any additional skin protection measures should be<br>selected based on the task being performed and the risks involved and should be<br>approved by a specialist before handling this product.   |
| Respiratory protection | : Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator. If workers are exposed to concentrations above the exposure limit, they must use appropriate, certified respirators. Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary.  |

| Route                        | ATE value     |
|------------------------------|---------------|
| ☑ermal                       | 1824.55 mg/kg |
| Inhalation (vapors)          | 16.45 mg/l    |
| Inhalation (dusts and mists) | 2.11 mg/l     |

#### Other information

# Section 11. Toxicological information

There are no data available on the mixture itself. The mixture has been assessed following the conventional method of the CLP Regulation (EC) No 1272/2008 and is classified for toxicological properties accordingly. See Sections 2 and 3 for details.

Exposure to component solvent vapor concentrations in excess of the stated occupational exposure limit may result in adverse health effects such as mucous membrane and respiratory system irritation and adverse effects on the kidneys, liver and central nervous system. Symptoms and signs include headache, dizziness, fatigue, muscular weakness, drowsiness and, in extreme cases, loss of consciousness.

Solvents may cause some of the above effects by absorption through the skin. Repeated or prolonged contact with the mixture may cause removal of natural fat from the skin, resulting in non-allergic contact dermatitis and absorption through the skin.

If splashed in the eyes, the liquid may cause irritation and reversible damage.

Ingestion may cause nausea, diarrhea and vomiting.

This takes into account, where known, delayed and immediate effects and also chronic effects of components from short-term and long-term exposure by oral, inhalation and dermal routes of exposure and eye contact.

Based on the properties of the epoxy constituent(s) and considering toxicological data on similar mixtures, this mixture may be a skin sensitizer and an irritant. It contains low-molecular weight epoxy constituents which are irritating to eyes, mucous membranes and skin. Repeated skin contact may lead to irritation and to sensitization, possibly with cross-sensitization to other epoxies. Skin contact with the mixture and exposure to spray, mist and vapors should be avoided.

Contains Epoxy resin (MW  $\leq$  700), Octadecanoic acid, 12-hydroxy-, reaction products with ethylenediamine. May produce an allergic reaction.

# Section 12. Ecological information

Soil/water partition coefficient (Koc)

: Not available.

Other adverse effects : No known significant effects or critical hazards.

## Section 13. Disposal considerations

**Disposal methods** : The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and nonrecyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapor from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.
