## **SAFETY DATA SHEET**

Date of issue/Date of revision 19 September 2022

Version 1.02

| Product code                                    | : 00336210   |
|---|--|
| Product name                                    | : PSX ONE YELLOW TINT  |
| Product type                                    | : Liquid.  |
| Other means of identification<br>Not available. |  |
| Relevant identified uses of th                  | e substance or mixture and uses advised against  |
| Product use                                     | <ul> <li>Coating.<br/>Industrial applications, Used by spraying.</li> </ul>                            |
| Uses advised against                            | : Product is not intended, labelled or packaged for consumer use.                                      |
| Supplier's information                          | : PPG Asian Paints Private Limited<br>6A Shanti Nagar<br>Santa Cruz (East)<br>Mumbai - 400055<br>India |
| Emergency telephone<br>number:                  | : +91 22 6815 8700   |

## Section 2. Hazards identification

|  |   | Page: 1/1          |
|--|---|--------------------|
|  | May be harmful in contact with skin.<br>Causes severe skin burns and eye damage.<br>May cause an allergic skin reaction.<br>Harmful if inhaled.<br>Toxic to aquatic life with long lasting effects. |                    |
| Hazard statements                              | : Highly flammable liquid and vapour.   |                    |
| Signal word                                    | : Danger  |                    |
| <u>GHS label elements</u><br>Hazard pictograms |   |                    |
|  | Percentage of the mixture consisting of ingredient(s) of unknow aquatic environment: 58.5%  | n hazards to the   |
|  | Percentage of the mixture consisting of ingredient(s) of unknow toxicity: 58%   | n acute inhalation |
|  | Percentage of the mixture consisting of ingredient(s) of unknow toxicity: 60.7%   | n acute dermal     |
|  | SHORT-TERM (ACUTE) AQUATIC HAZARD - Category 2<br>LONG-TERM (CHRONIC) AQUATIC HAZARD - Category 2   |                    |
|  | SKIN SENSITISATION - Category 1   |                    |
|  | SERIOUS EYE DAMAGE/EYE IRRITATION - Category 1  |                    |
|  | ACUTE TOXICITY (inhalation) - Category 4<br>SKIN CORROSION/IRRITATION - Category 1B   |                    |
| substance or mixture                           | ACUTE TOXICITY (dermal) - Category 5  |                    |
| Classification of the                          | : FLAMMABLE LIQUIDS - Category 2  |                    |

## Section 2. Hazards identification

#### Precautionary statements Prevention : Wea

| <u>ments</u> |   |
|--------------|---|
|              | : Wear protective gloves, protective clothing and eye or face protection. Keep away |
|              | from heat, hot surfaces, sparks, open flames and other ignition sources. No         |
|              | smoking. Use only outdoors or in a well-ventilated area. Avoid release to the       |
|              | environment. Avoid breathing vapour. Wash thoroughly after handling.                |
|              | Contaminated work clothing should not be allowed out of the workplace.              |

Response: Collect spillage. IF INHALED: Remove person to fresh air and keep comfortable for<br/>breathing. Immediately call a POISON CENTER or doctor. IF SWALLOWED:<br/>Immediately call a POISON CENTER or doctor. Rinse mouth. Do NOT induce<br/>vomiting. IF ON SKIN (or hair): Take off immediately all contaminated clothing.<br/>Rinse skin with water. Immediately call a POISON CENTER or doctor. Wash<br/>contaminated clothing before reuse. IF ON SKIN: Call a POISON CENTER or<br/>doctor if you feel unwell. Wash with plenty of water. If skin irritation or rash occurs:<br/>Get medical advice or attention. IF IN EYES: Rinse cautiously with water for several<br/>minutes. Remove contact lenses, if present and easy to do. Continue rinsing.<br/>Immediately call a POISON CENTER or doctor.Storage: Store locked up.Disposal: Dispose of contents and container in accordance with all local, regional, national

| and international regulations. |  |                                  |  |
|--------------------------------|--|----------------------------------|--|
| Other hazards which do not     |  | Causes digestive tract burns. Pr | Prolonged or repeated contact may dry skin and |

#### CAS number/other identifiers

**CAS number** : Not applicable. Ingredient name % **CAS number x**ylene 5 - <10 1330-20-7 trimethoxy(methyl)silane 5 - <10 1185-55-3 [3-(2,3-epoxypropoxy)propyl]trimethoxysilane 3 - <5 2530-83-8 ethylbenzene 3 - <5 100-41-4 3-aminopropyltriethoxysilane 3 - <5 919-30-2 trimethoxyvinylsilane 1 - < 32768-02-7 Poly(oxy-1,2-ethanediyl),  $\alpha$ -(nonylphenyl)- $\omega$ -hydroxy-, branched, 1 - <3 68412-53-3 phosphates triethoxyoctylsilane 1 - <32943-75-1 2-ethylaminoethanol 1 - <3 110-73-6 α-[3-[3-(2H-benzotriazol-2-yl) derivatives 1 - <3 104810-48-2 bis(1,2,2,6,6-pentamethyl-4-piperidyl) sebacate 1 - <3 41556-26-7 ω-[3-[3-(2H-benzotriazol-2-yl) derivatives 1 - <3 104810-47-1 methyl 1,2,2,6,6-pentamethyl-4-piperidyl sebacate 0.3 - <1 82919-37-7 dibutylbis(pentane-2,4-dionato-O,O')tin 0.1 - < 0.3 22673-19-4 0.1 - < 0.3 7779-90-0 trizinc bis(orthophosphate) dibutyltin dilaurate 0.1 - < 0.3 77-58-7

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

SUB codes represent substances without registered CAS Numbers.

Date of issue 19 September 2022

## Section 4. First aid measures

| Description of necess                        | sary first aid measures  |
|--|--|
| Eye contact                                  | <ul> <li>Check for and remove any contact lenses. Immediately flush eyes with running<br/>water for at least 15 minutes, keeping eyelids open. Seek immediate medical<br/>attention.</li> </ul>                            |
| Inhalation                                   | <ul> <li>Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is<br/>irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by<br/>trained personnel.</li> </ul> |
| Skin contact                                 | : Remove contaminated clothing and shoes. Wash skin thoroughly with soap and water or use recognised skin cleanser. Do NOT use solvents or thinners.   |
| Ingestion                                    | : If swallowed, seek medical advice immediately and show the container or label.<br>Keep person warm and at rest. Do NOT induce vomiting.  |
| Most important symp<br>Potential acute healt | toms/effects, acute and delayed<br>th effects  |

| Eye contact                   | : Causes serious eye damage.  |
|-------------------------------|---|
| Inhalation                    | : Harmful if inhaled.   |
| Skin contact                  | : Causes severe burns. May be harmful in contact with skin. Defatting to the skin. May cause an allergic skin reaction.       |
| Ingestion                     | : Corrosive to the digestive tract. Causes burns.   |
| <u>Over-exposure signs/sy</u> | r <u>mptoms</u>   |
| Eye contact                   | : Adverse symptoms may include the following:<br>pain<br>watering<br>redness  |
| Inhalation                    | : No specific data.   |
| Skin contact                  | : Adverse symptoms may include the following:<br>pain or irritation<br>redness<br>dryness<br>cracking<br>blistering may occur |
| Ingestion                     | : Adverse symptoms may include the following: stomach pains   |
| Indication of immediate I     | nedical attention and special treatment needed, if necessary  |
| Notes to physician            | : In case of inhalation of decomposition products in a fire, symptoms may be delayed.   |

| Specific treatments        | The exposed person may need to be kept under medical surveillance for 48 hours.<br>No specific treatment.   |
|----------------------------|---|
| Protection of first-aiders | : No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. |

See toxicological information (Section 11)

## Section 5. Firefighting measures

| Extinguishing media                            |   |
|--|---|
| Suitable extinguishing media                   | : Use dry chemical, CO <sub>2</sub> , water spray (fog) or foam.  |
| Unsuitable extinguishing media                 | : Do not use water jet.   |
| Specific hazards arising from the chemical     | : Highly flammable liquid and vapour. Runoff to sewer may create fire or explosion hazard. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion. This material is toxic to aquatic life with long lasting effects. Fire water contaminated with this material must be contained and prevented from being discharged to any waterway, sewer or drain. |
| Hazardous thermal decomposition products       | : Decomposition products may include the following materials:<br>carbon oxides<br>nitrogen oxides<br>halogenated compounds<br>metal oxide/oxides<br>Formaldehyde.   |
| Special protective actions for fire-fighters   | : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.  |
| Special protective equipment for fire-fighters | <ul> <li>Fire-fighters should wear appropriate protective equipment and self-contained<br/>breathing apparatus (SCBA) with a full face-piece operated in positive pressure<br/>mode.</li> </ul>   |

## Section 6. Accidental release measures

#### Personal precautions, protective equipment and emergency procedures

contractor.

| For non-emergency<br>personnel | : No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilt material. Shut off all ignition sources.<br>No flares, smoking or flames in hazard area. Do not breathe vapour or mist.<br>Provide adequate ventilation. Wear appropriate respirator when ventilation is<br>inadequate. Put on appropriate personal protective equipment. |
|--------------------------------|---|
| For emergency responders       | If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".   |
| Environmental precautions      | : Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains<br>and sewers. Inform the relevant authorities if the product has caused environmental<br>pollution (sewers, waterways, soil or air). Water polluting material. May be harmful<br>to the environment if released in large quantities. Collect spillage.   |
| Methods and material for con   | tainment and cleaning up  |
| Small spill                    | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal  |

#### Section 6. Accidental release measures

Large spill: Stop leak if without risk. Move containers from spill area. Use spark-proof tools and<br/>explosion-proof equipment. Approach the release from upwind. Prevent entry into<br/>sewers, water courses, basements or confined areas. Wash spillages into an<br/>effluent treatment plant or proceed as follows. Contain and collect spillage with non-<br/>combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth<br/>and place in container for disposal according to local regulations (see Section 13).<br/>Dispose of via a licensed waste disposal contractor. Contaminated absorbent<br/>material may pose the same hazard as the spilt product. Note: see Section 1 for<br/>emergency contact information and Section 13 for waste disposal.

## Section 7. Handling and storage

| Precautions for safe handling                                |  |
|--|--|
| Protective measures :  | Put on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Do not get in eyes or on skin or clothing. Do not breathe vapour or mist. Do not ingest. Avoid release to the environment. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Take precautionary measures against electrostatic discharges. Empty containers retain product residue and can be hazardous. Do not reuse container. |
| Advice on general soccupational hygiene                      | Eating, drinking and smoking should be prohibited in areas where this material is<br>handled, stored and processed. Workers should wash hands and face before<br>eating, drinking and smoking. Remove contaminated clothing and protective<br>equipment before entering eating areas. See also Section 8 for additional<br>information on hygiene measures.  |
| Conditions for safe storage, including any incompatibilities | Do not store above the following temperature: 50°C (122°F). Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Eliminate all ignition sources. Separate from oxidising materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.   |

## Section 8. Exposure controls/personal protection

#### **Control parameters**

| ~           |          |          |        |
|-------------|----------|----------|--------|
| <u>Occu</u> | oational | exposure | limits |

| Ingredient name                         | Exposure limits                         |  |  |  |  |
|---|---|--|--|--|--|
| xylene                                  | ACGIH TLV (United States, 1/2021).      |  |  |  |  |
|   | [Xylene]                                |  |  |  |  |

|   | India GHS Page: 5/13                    |  |  |  |  |

## Section 8. Exposure controls/personal protection

| dibutyltin dilaurate              | through skin.<br>STEL: 0.2 mg/m <sup>3</sup><br>ACGIH TLV (United States, 1/2021). [Tin,<br>organic compounds] Absorbed through<br>skin.<br>TWA: 0.1 mg/m <sup>3</sup> , (as Sn) 8 hours.<br>STEL: 0.2 mg/m <sup>3</sup> , (as Sn) 15 minutes.<br>ACGIH TLV (United States, 1/2021). [Tin,<br>organic compounds] Absorbed through<br>skin.<br>STEL: 0.2 mg/m <sup>3</sup> , (as Sn) 15 minutes.<br>TWA: 0.1 mg/m <sup>3</sup> , (as Sn) 8 hours.  |
|-----------------------------------|---|
| Recommended monitoring procedures | : If this product contains ingredients with exposure limits, personal, workplace<br>atmosphere or biological monitoring may be required to determine the effectiveness<br>of the ventilation or other control measures and/or the necessity to use respiratory<br>protective equipment. Reference should be made to appropriate monitoring<br>standards. Reference to national guidance documents for methods for the<br>determination of hazardous substances will also be required.   |
| Appropriate engineering controls  | : Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapour or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.  |
| Environmental exposure controls   | : Emissions from ventilation or work process equipment should be checked to ensure<br>they comply with the requirements of environmental protection legislation. In some<br>cases, fume scrubbers, filters or engineering modifications to the process<br>equipment will be necessary to reduce emissions to acceptable levels.   |
| Individual protection measure     | <u>es</u>   |
| Hygiene measures                  | : Wash hands, forearms and face thoroughly after handling chemical products, before<br>eating, smoking and using the lavatory and at the end of the working period.<br>Appropriate techniques should be used to remove potentially contaminated clothing.<br>Contaminated work clothing should not be allowed out of the workplace. Wash<br>contaminated clothing before reusing. Ensure that eyewash stations and safety<br>showers are close to the workstation location.   |
| Eye/face protection               | : Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles and/or face shield. If inhalation hazards exist, a full-face respirator may be required instead.  |
| Skin protection                   |   |
| Hand protection                   | : Chemical-resistant, impervious gloves complying with an approved standard should<br>be worn at all times when handling chemical products if a risk assessment indicates<br>this is necessary. Considering the parameters specified by the glove manufacturer,<br>check during use that the gloves are still retaining their protective properties. It<br>should be noted that the time to breakthrough for any glove material may be<br>different for different glove manufacturers. In the case of mixtures, consisting of<br>several substances, the protection time of the gloves cannot be accurately<br>estimated. |
| Gloves                            | : nitrile neoprene  |

### Section 8. Exposure controls/personal protection

| •                      | • •   |
|------------------------|---|
| Body protection        | : Personal protective equipment for the body should be selected based on the task<br>being performed and the risks involved and should be approved by a specialist<br>before handling this product. When there is a risk of ignition from static electricity,<br>wear anti-static protective clothing. For the greatest protection from static<br>discharges, clothing should include anti-static overalls, boots and gloves. |
| Other skin protection  | <ul> <li>Appropriate footwear and any additional skin protection measures should be<br/>selected based on the task being performed and the risks involved and should be<br/>approved by a specialist before handling this product.</li> </ul>   |
| Respiratory protection | : Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use.  |

## Section 9. Physical and chemical properties

The conditions of measurement of all properties are at standard temperature and pressure unless otherwise indicated.

| Appearance  |   |                          |           |           |             |          |            |              |
|---|---|--------------------------|-----------|-----------|-------------|----------|------------|--------------|

## Section 10. Stability and reactivity

| Reactivity                         | : No specific test data related to reactivity available for this product or its ingredients.  |
|------------------------------------|---|
| Chemical stability                 | : The product is stable.  |
| Possibility of hazardous reactions | : Under normal conditions of storage and use, hazardous reactions will not occur.   |
| Conditions to avoid                | : When exposed to high temperatures may produce hazardous decomposition products.   |
| Incompatible materials             | : Keep away from the following materials to prevent strong exothermic reactions: oxidising agents, strong alkalis, strong acids.  |
| Hazardous decomposition products   | : Depending on conditions, decomposition products may include the following materials: carbon oxides nitrogen oxides halogenated compounds Formaldehyde. metal oxide/oxides |
| Hazardous polymerisation           | : Under normal conditions of storage and use, hazardous polymerisation will not occur.  |

## Section 11. Toxicological information

#### Information on toxicological effects

#### Acute toxicity

## Section 11. Toxicological information

#### Numerical measures of toxicity

#### Acute toxicity estimates

| Route                        | ATE value     |
|------------------------------|---------------|
| Øral                         | 6764.93 mg/kg |
| Dermal                       | 3104.8 mg/kg  |
| Inhalation (vapours)         | 29.3 mg/l     |
| Inhalation (dusts and mists) | 4.03 mg/l     |

#### Other information

Causes digestive tract burns. Prolonged or repeated contact may dry skin and cause irritation. Sanding and grinding dusts may be harmful if inhaled. Repeated exposure to high vapor concentrations may cause irritation of the respiratory system and permanent brain and nervous system damage. Inhalation of vapour/aerosol concentrations above the recommended exposure limits causes headaches, drowsiness and nausea and may lead to unconsciousness or death. Trimethoxysilanes are capable of forming methanol if hydrolyzed or ingested. If swallowed, methanol may be harmful or fatal or cause blindness. Contains a substance that may emit formaldehyde if stored beyond its shelf life and/or during cure at curing temperatures greater than 60C/140F. Avoid contact with skin and clothing.

## Section 12. Ecological information

#### **Toxicity**

| Product/ingredient name      | Result                          | Species                      | Exposure |
|------------------------------|---------------------------------|------------------------------|----------|
| mmethoxy(methyl)silane       | Acute LC50 >110 mg/l            | Fish                         | 96 hours |
| [3-(2,3-epoxypropoxy)propyl] | Acute LC50 324 mg/l             | Daphnia                      | 48 hours |

Version 1.02

Product name PSX ONE YELLOW TINT

## Section 12. Ecological information

Other adverse effects

: No known significant effects or critical hazards.

## Section 13. Disposal considerations

**Disposal methods** The generation of waste should be avoided or minimised wherever possible. з. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapour from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.

## Section 14. Transport information

|                                | UN   | IMDG  | ΙΑΤΑ   |
