# SAFETY DATA SHEET

Date of issue 9/21/2022 (month/day/year)

Version 20

## Section 1. Chemical product and company identification

| Α. | Product name | 1 | SIGMADUR ONE RED 6188 |
|----|--------------|---|-----------------------|
|    | Product code | 1 | 00322222              |

#### B. Relevant identified uses of the substance or mixture and uses advised against

| Product use                             | : Professional applications, Used by spraying.   |
|---|--|
| Use of the substance/<br>mixture        | : Coating.   |
| Uses advised against                    | : Product is not intended, labelled or packaged for consumer use.  |
| C. Supplier's or Importer's information | : PPG SSC<br>(680-090)<br>19, Yeocheon-ro 217beon-gil, Nam-gu,<br>Ulsan, Korea<br>Tel: +82-52-210-8222<br>Korea.MSDS@PPG.COM |
| Emergency telephone number:             | : +82-52-210-8222  |

# Section 2. Hazards identification

| A. Hazard classification | <ul> <li>AMMABLE LIQUIDS - Category 3<br/>EYE IRRITATION - Category 2A<br/>CARCINOGENICITY - Category 1B<br/>SPECIFIC TARGET ORGAN TOXICITY (SINGLE EXPOSURE) (Respiratory tract<br/>irritation) - Category 3</li> </ul> |
|--------------------------|--|
|                          | SPECIFIC TARGET ORGAN TOXICITY (REPEATED EXPOSURE) - Category 2<br>AQUATIC HAZARD (LONG-TERM) - Category 3   |

This product is classified in accordance with the Industrial Safety and Health Act and the Chemical Control Act.

#### B. GHS label elements, including precautionary statements

Symbol

Signal word

: Danger

Date of issue 9/21/2022 (month/day/year)

Product name SIGMADUR ONE RED 6188

### Section 2. Hazards identification

| Hazard statements                    | <ul> <li>F226 - Flammable liquid and vapor.<br/>H319 - Causes serious eye irritation.<br/>H335 - May cause respiratory irritation.<br/>H350 - May cause cancer.<br/>H373 - May cause damage to organs through prolonged or repeated exposure.<br/>(central nervous system (CNS))<br/>H412 - Harmful to aquatic life with long lasting effects.</li> </ul>   |
|--------------------------------------|---|
| Precautionary statements             |   |
| Prevention                           | <ul> <li>P202 - Do not handle until all safety precautions have been read and understood.<br/>P280 - Wear protective gloves, protective clothing and eye or face protection.<br/>P210 - Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.<br/>P241 - Use explosion-proof electrical, ventilating or lighting equipment.<br/>P242 - Use non-sparking tools.<br/>P243 - Take action to prevent static discharges.<br/>P273 - Avoid release to the environment.<br/>P260 - Do not breathe vapor.</li> </ul> |
| Response                             | <ul> <li>F308 + P313 - IF exposed or concerned: Get medical advice or attention.</li> <li>P304 + P312 - IF INHALED: Call a POISON CENTER or doctor if you feel unwell.</li> <li>P305 + P351 + P338 - IF IN EYES: Rinse cautiously with water for several minutes.</li> <li>Remove contact lenses, if present and easy to do. Continue rinsing.</li> <li>P337 + P313 - If eye irritation persists: Get medical advice or attention.</li> </ul>   |
| Storage                              | : P403 + P233 - Store in a well-ventilated place. Keep container tightly closed.<br>P403 + P235 - Keep cool.  |
| Disposal                             | : P501 - Dispose of contents and container in accordance with all local, regional, national and international regulations.  |
| Other hazards which do not result in | : Prolonged or repeated contact may dry skin and cause irritation.  |

classification

# Section 3. Composition/information on ingredients

#### **CAS number/other identifiers**

CAS number

: Not applicable.

| Chemical name                           | Common name                   | Identifiers     | %          |
|---|-------------------------------|-----------------|------------|
| Maphtha (petroleum), hydrotreated heavy | NAPHTHA (PETROLEUM);          | CAS: 64742-48-9 | 20 -       |
|   | HYDROTREATED HEAVY            |                 | <30        |
| titanium dioxide                        | TITANIUM DIOXIDE              | CAS: 13463-67-7 | 10 -<20    |
| Solvent naphtha (petroleum), medium     | SOLVENT NAPHTHA (PETROLEUM),  | CAS: 64742-88-7 | 5 - <10    |
| aliph.                                  | MEDIUM ALIPHATIC              |                 |            |
| Kaolin                                  | ALUMINUM SILICATE             | CAS: 1332-58-7  | 1 - <5     |
| 2-ethylhexanoic acid                    | 2-ETHYLHEXANOIC ACID          | CAS: 149-57-5   | 1 - <5     |
| 1-methoxy-2-propanol                    | PROPYLENE GLYCOL MONOMETHYL   | CAS: 107-98-2   | 1 - <5     |
|   | ETHER                         |                 |            |
| Solvent naphtha (petroleum), heavy      | SOLVENT NAPHTHA (PETROLEUM),  | CAS: 64742-94-5 | 1 - <5     |

| Section 3. Composition/information on ingredients                  |   |  |                                  |  |  |
| 2-butanone oxime<br>2-ethylhexanoic acid cobalt(2+) salt<br>nonane | METHYL ETHYL KETOXIME<br>COBALT OCTOATE<br>NONANE | CAS: 96-29-7<br>CAS: 136-52-7<br>CAS: 111-84-2 | 0.1 - <1<br>0.1 - <1<br>0.1 - <1 |  |  |

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

### Section 4. First aid measures

| Α. | Eye contact                | : | Remove contact lenses, irrigate copiously with clean, fresh water, holding the eyelids apart for at least 10 minutes and seek immediate medical advice.   |
|----|----------------------------|---|---|
| В. | Skin contact               | : | Remove contaminated clothing and shoes. Wash skin thoroughly with soap and water or use recognized skin cleanser. Do NOT use solvents or thinners.  |
| C. | Inhalation                 | : | Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel.  |
| D. | Ingestion                  | : | If swallowed, seek medical advice immediately and show this container or label.<br>Keep person warm and at rest. Do NOT induce vomiting.  |
| Е. | Notes to physician         | : | Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.   |
|    | Specific treatments        | : | No specific treatment.  |
|    | Protection of first-aiders | : | No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. |

See toxicological information (Section 11)

## Section 5. Fire-fighting measures

| Α. | Extinguishing media                        |   |   |
|----|--|---|---|
|    | Suitable extinguishing media               | 1 | Use dry chemical, CO <sub>2</sub> , water spray (fog) or foam.  |
|    | Unsuitable<br>extinguishing media          | - | Do not use water jet.   |
| В. | Specific hazards arising from the chemical | : | Flammable liquid and vapor. Runoff to sewer may create fire or explosion hazard.<br>In a fire or if heated, a pressure increase will occur and the container may burst, with<br>the risk of a subsequent explosion. This material is harmful to aquatic life with long<br>lasting effects. Fire water contaminated with this material must be contained and<br>prevented from being discharged to any waterway, sewer or drain. |
|    | Hazardous thermal decomposition products   | : | Decomposition products may include the following materials:<br>carbon oxides<br>metal oxide/oxides  |
|    |  |   | Kanar (0110)  |

Korea (GHS) Page: 3/15

## Section 5. Fire-fighting measures

| C. | Special equipment for<br>fire-fighting | : | Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.  |
|----|--|---|--|
|    | Fire-fighting procedures               | : | Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool. |

# Section 6. Accidental release measures

| A. Personal precautions,<br>protective equipment and<br>emergency procedures | : | No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilled material. Shut off all ignition sources.<br>No flares, smoking or flames in hazard area. Avoid breathing vapor or mist.<br>Provide adequate ventilation. Wear appropriate respirator when ventilation is<br>inadequate. Put on appropriate personal protective equipment. |
|--|---|---|
| B. Environmental precautions   | : | Avoid dispersal of spilled material and runoff and contact with soil, waterways,<br>drains and sewers. Inform the relevant authorities if the product has caused<br>environmental pollution (sewers, waterways, soil or air). Water polluting material.<br>May be harmful to the environment if released in large quantities.   |

#### C. Methods and materials for containment and cleaning up

| Small spill | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.  |
|-------------|---|
| Large spill | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools<br>and explosion-proof equipment. Approach release from upwind. Prevent entry into<br>sewers, water courses, basements or confined areas. Wash spillages into an<br>effluent treatment plant or proceed as follows. Contain and collect spillage with non-<br>combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth<br>and place in container for disposal according to local regulations (see Section 13).<br>Dispose of via a licensed waste disposal contractor. Contaminated absorbent<br>material may pose the same hazard as the spilled product. Note: see Section 1 for<br>emergency contact information and Section 13 for waste disposal. |

# Section 7. Handling and storage

| A. Precau<br>handlin |  | Fut on appropriate personal protective equipment (see Section 8). Avoid exposure -<br>obtain special instructions before use. Do not handle until all safety precautions<br>have been read and understood. Do not get in eyes or on skin or clothing. Do not<br>breathe vapor or mist. Do not ingest. Avoid release to the environment. Use only<br>with adequate ventilation. Wear appropriate respirator when ventilation is<br>inadequate. Do not enter storage areas and confined spaces unless adequately<br>ventilated. Keep in the original container or an approved alternative made from a<br>compatible material, kept tightly closed when not in use. Store and use away from<br>heat, sparks, open flame or any other ignition source. Use explosion-proof electrical<br>(ventilating, lighting and material handling) equipment. Use only non-sparking tools.<br>Take precautionary measures against electrostatic discharges. Empty containers<br>retain product residue and can be hazardous. Do not reuse container. |
|----------------------|--|--|
|----------------------|--|--|

Korea (GHS) Page: 4/15

### Section 7. Handling and storage

Materials such as cleaning rags, paper wipes and protective clothing, which are contaminated with the product may spontaneously self-ignite some hours later. To avoid the risks of fires, all contaminated materials should be stored in purpose-built containers or in metal containers with tight-fitting, self-closing lids. Contaminated materials should be removed from the workplace at the end of each working day and be stored outside.

B. Conditions for safe storage, including any incompatibilities
 Store between the following temperatures: 0 to 35°C (32 to 95°F). Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Eliminate all ignition sources. Separate from oxidizing materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.

### Section 8. Exposure controls/personal protection

| A. Occupational exposure limits            |  |  |  |  |  |
|--|--|--|--|--|--|
| Ingredient name                            | Exposure limits  |  |  |  |  |
| titanium dioxide                           | Ministry of Employment and Labor<br>(Republic of Korea, 1/2020).<br>TWA: 10 mg/m <sup>3</sup> 8 hours. Form: total dust  |  |  |  |  |
|  | with less than 1% of free SiO2   |  |  |  |  |
| Solvent naphtha (petroleum), medium aliph. | ACGIH TLV (United States).<br>TWA: 400 ppm   |  |  |  |  |
| Kaolin                                     | Ministry of Employment and Labor (Republic of Korea, 1/2020).  |  |  |  |  |
|  | TWA: 2 mg/m <sup>3</sup> 8 hours. Form: Respirable fraction  |  |  |  |  |
| 2-ethylhexanoic acid                       | <b>ACGIH TLV (United States, 1/2021).</b><br>TWA: 5 mg/m <sup>3</sup> 8 hours. Form: Inhalable<br>fraction and vapor   |  |  |  |  |
| 1-methoxy-2-propanol                       | Ministry of Employment and Labor<br>(Republic of Korea, 1/2020).<br>STEL: 150 ppm 15 minutes.  |  |  |  |  |
| 2-ethylhexanoic acid, zirconium salt       | TWA: 100 ppm 8 hours.<br><b>Ministry of Employment and Labor</b><br><b>(Republic of Korea, 1/2020). [Zirconium</b><br><b>and compounds]</b><br>STEL: 10 mg/m <sup>3</sup> , (as Zr) 15 minutes.<br>TWA: 5 mg/m <sup>3</sup> , (as Zr) 8 hours. |  |  |  |  |
|  |  |  |  |  |  |
| ethanol                                    | Ministry of Employment and Labor<br>(Republic of Korea, 1/2020).   |  |  |  |  |
|  | TWA: 1000 ppm 8 hours.   |  |  |  |  |
| 2-ethylhexanoic acid cobalt(2+) salt       | Ministry of Employment and Labor<br>(Republic of Korea, 1/2020). [Cobalt and   |  |  |  |  |
|  | inorganic compounds]<br>TWA: 0.02 mg/m <sup>3</sup> 8 hours.   |  |  |  |  |
| nonane                                     | Ministry of Employment and Labor<br>(Republic of Korea, 1/2020).<br>TWA: 200 ppm 8 hours.  |  |  |  |  |

Korea (GHS) Page: 5/15

# Section 8. Exposure controls/personal protection

|    | Recommended<br>monitoring procedures | : | If this product contains ingredients with exposure limits, personal, workplace<br>atmosphere or biological monitoring may be required to determine the effectiveness<br>of the ventilation or other control measures and/or the necessity to use respiratory<br>protective equipment. Reference should be made to appropriate monitoring<br>standards. Reference to national guidance documents for methods for the<br>determination of hazardous substances will also be required. |
|----|--------------------------------------|---|---|
| В. | Appropriate engineering controls     | : | Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapor or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.   |
|    | Environmental<br>exposure controls   | : | Emissions from ventilation or work process equipment should be checked to ensure<br>they comply with the requirements of environmental protection legislation. In some<br>cases, fume scrubbers, filters or engineering modifications to the process<br>equipment will be necessary to reduce emissions to acceptable levels.   |
| C  | Personal protective equip            | m |   |

| Respiratory protection | <ul> <li>Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator. If workers are exposed to concentrations above the exposure limit, they must use appropriate, certified respirators. Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary.</li> <li>Chemical splash goggles.</li> </ul>  |
|------------------------|---|
|                        |   |
| Hand protection        | : Chemical-resistant, impervious gloves complying with an approved standard should<br>be worn at all times when handling chemical products if a risk assessment indicates<br>this is necessary. Considering the parameters specified by the glove manufacturer,<br>check during use that the gloves are still retaining their protective properties. It<br>should be noted that the time to breakthrough for any glove material may be<br>different for different glove manufacturers. In the case of mixtures, consisting of<br>several substances, the protection time of the gloves cannot be accurately<br>estimated. |
| Gloves                 | : butyl rubber  |
| Body protection        | : Personal protective equipment for the body should be selected based on the task<br>being performed and the risks involved and should be approved by a specialist<br>before handling this product. When there is a risk of ignition from static electricity,<br>wear anti-static protective clothing. For the greatest protection from static<br>discharges, clothing should include anti-static overalls, boots and gloves.   |
| Hygiene measures       | : Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.   |

Product name SIGMADUR ONE RED 6188

### Section 9. Physical and chemical properties

The conditions of measurement of all properties are at standard temperature and pressure unless otherwise indicated.

| Α. | Appearance   |   |                      |                 |               |                          |
|----|--|---|----------------------|-----------------|---------------|--------------------------|
|    | Physical state                                     | : | Liquid.              |                 |               |                          |
|    | Color  | : | Red.                 |                 |               |                          |
| В. | Odor   | : | Characteristic.      |                 |               |                          |
| С. | Odor threshold                                     | : | Not available.       |                 |               |                          |
| D. | рН   | : | Not applicable.      |                 |               |                          |
| Ε. | Melting/freezing point                             | : | Not available.       |                 |               |                          |

Date of issue 9/21/2022 (month/day/year)

Version 20

Product name SIGMADUR ONE RED 6188

# Section 10. Stability and reactivity

| A. Chemical stability<br>Possibility of hazardous<br>reactions | <ul> <li>The product is stable.</li> <li>Under normal conditions of storage and use, hazardous reactions will not occur.</li> </ul> |
|--|---|
| B. Conditions to avoid   | : When exposed to high temperatures may produce hazardous decomposition products.   |
| C. Incompatible materials                                      | : Keep away from the following materials to prevent strong exothermic reactions: oxidizing agents, strong alkalis, strong acids.    |
| D. Hazardous<br>decomposition products                         | : Depending on conditions, decomposition products may include the following materials: carbon oxides metal oxide/oxides             |

# Section 11. Toxicological information

| A. Information on the routes of exposure | likely : Not available.   |  |  |  |  |  |
|--|---|--|--|--|--|--|
| Potential acute health effects           |   |  |  |  |  |  |
| Inhalation                               | : May cause respiratory irritation.   |  |  |  |  |  |
| Ingestion                                | : No known significant effects or critical hazards.   |  |  |  |  |  |
| Skin contact                             | : Defatting to the skin. May cause skin dryness and irritation.   |  |  |  |  |  |
| Eye contact                              | : Causes serious eye irritation.  |  |  |  |  |  |
| Over-exposure signs/                     | symptoms  |  |  |  |  |  |
| Inhalation                               | : Adverse symptoms may include the following:<br>respiratory tract irritation<br>coughing               |  |  |  |  |  |
| Ingestion                                | : No specific data.   |  |  |  |  |  |
| Skin contact                             | <ul> <li>Adverse symptoms may include the following:<br/>irritation<br/>dryness<br/>cracking</li> </ul> |  |  |  |  |  |
| Eye contact                              | : Adverse symptoms may include the following:<br>pain or irritation<br>watering<br>redness              |  |  |  |  |  |

#### B. Health hazards

#### Specific target organ toxicity (single exposure)

### Section 11. Toxicological information

| Name                                       | Classification | Route of exposure | Target organs                   |
|--|----------------|-------------------|---------------------------------|
| Naphtha (petroleum), hydrotreated heavy    | Category 3     | -                 | Respiratory tract<br>irritation |
| Solvent naphtha (petroleum), medium aliph. | Category 3     | -                 | Narcotic effects                |
| 1-methoxy-2-propanol                       | Category 3     | -                 | Narcotic effects                |
| Solvent naphtha (petroleum), heavy arom.   | Category 3     | -                 | Narcotic effects                |
| 2-butanone oxime                           | Category 1     | -                 | upper respiratory<br>tract      |
|  | Category 3     |                   | Narcotic effects                |
| nonane                                     | Category 3     | -                 | Narcotic effects                |

#### Specific target organ toxicity (repeated exposure)

| Name                                       | Classification | Route of exposure | Target organs                   |
|--|----------------|-------------------|---------------------------------|
| Solvent naphtha (petroleum), medium aliph. | Category 1     |                   | central nervous<br>system (CNS) |
| 2-butanone oxime                           | Category 2     |                   | blood system                    |

#### **Aspiration hazard**

| Name                                       | Result                         |
|--|--------------------------------|
| Naphtha (petroleum), hydrotreated heavy    | ASPIRATION HAZARD - Category 1 |
| Solvent naphtha (petroleum), medium aliph. | ASPIRATION HAZARD - Category 1 |
| Solvent naphtha (petroleum), heavy arom.   | ASPIRATION HAZARD - Category 1 |
| nonane                                     | ASPIRATION HAZARD - Category 1 |

#### Potential chronic health effects

| General                         | : May cause damage to organs through prolonged or repeated exposure. Prolonged or repeated contact can defat the skin and lead to irritation, cracking and/or dermatitis. |
|---------------------------------|---|
| Carcinogenicity<br>Mutagenicity | <ul> <li>May cause cancer. Risk of cancer depends on duration and level of exposure.</li> <li>No known significant effects or critical hazards.</li> </ul>                |
| Reproductive toxicity           | : No known significant effects or critical hazards.   |

#### **Additional information**

Prolonged or repeated contact may dry skin and cause irritation. Sanding and grinding dusts may be harmful if inhaled. Repeated exposure to high vapor concentrations may cause irritation of the respiratory system and permanent brain and nervous system damage. Inhalation of vapor/aerosol concentrations above the recommended exposure limits causes headaches, drowsiness and nausea and may lead to unconsciousness or death. Avoid contact with skin and clothing.

# Section 12. Ecological information

#### A. Ecotoxicity

| Product/ingredient name                     | Result                            | Species                 | Exposure |
|---|-----------------------------------|-------------------------|----------|
| <b>ti</b> tanium dioxide                    | Acute LC50 >100 mg/l Fresh water  | Daphnia - Daphnia magna | 48 hours |
| 1-methoxy-2-propanol                        | Acute LC50 23300 mg/l             | Daphnia                 | 48 hours |
| 5 1 1                                       | Acute LC50 >4500 mg/l Fresh water | Fish                    | 96 hours |
| Solvent naphtha<br>(petroleum), heavy arom. | NOEL 0.48 mg/l Fresh water        | Daphnia                 | 21 days  |
| 2-ethylhexanoic acid,<br>zirconium salt     | Acute LC50 >100 mg/l              | Fish                    | 96 hours |
| ethanol                                     | Acute EC50 7640 mg/l Fresh water  | Daphnia - Daphnia magna | 48 hours |

#### B. Persistence and degradability

| Product/ingredient name | Aquatic half-life | Photolysis | Biodegradability |
|-------------------------|-------------------|------------|------------------|
| ethanol                 | -                 | -          | Readily          |

#### C. Bioaccumulative potential

| Product/ingredient name  | LogPow     | BCF  | Potential |  |
|--------------------------|------------|------|-----------|--|
| 2-ethylhexanoic acid     | 2.7        | -    | low       |  |
| 1-methoxy-2-propanol     | <1         | -    | low       |  |
| Solvent naphtha          | 2.8 to 6.5 | -    | high      |  |
| (petroleum), heavy arom. |            |      |           |  |
| ethanol                  | -0.35      | -    | low       |  |
| 2-butanone oxime         | 0.63       | 5.01 | low       |  |
| nonane                   | 5.65       | -    | high      |  |

#### D. Mobility in soil

Soil/water partition : Not available. coefficient (Koc)

E. <u>Other adverse effects</u> : No known significant effects or critical hazards.

### Section 13. Disposal considerations

 A. Disposal methods
 The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible.

### Section 13. Disposal considerations

- **B.** Disposal precautions
- : This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapor from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

## Section 14. Transport information

|                                      | UN              | IMDG            | ΙΑΤΑ            |

| Environmental<br>hazards             | No.             | No.             | No.             |
| E. Marine<br>pollutant<br>substances | Not applicable. | Not applicable. | Not applicable. |

#### **Additional information**

| UN   | : This class 3 viscous liquid is not subject to regulation in packagings up to 450 L according to 2.3.2.5.1. |
|------|--|
| IMDG | : This class 3 viscous liquid is not subject to regulation in packagings up to 450 L according to 2.3.2.5.   |
| ΙΑΤΑ | : None identified.   |

# F. Special precaution which a user to be aware of or needs to comply with in connection with transport or transportation

**Transport within user's premises:** always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

Transport in bulk according : Not applicable. to IMO instruments

# Section 15. Regulatory information

| Α. | Regulation according to ISHA   |   |                                    |
