# **SAFETY DATA SHEET**

#### Date of issue 26 February 2024

Version 1.01

### Section 1. Product and company identification

| Product name                  | 1 |
|-------------------------------|---|
| Product code                  | : |
| Other means of identification | : |
| Product type                  | : |

- SIGMASHIELD 880 BASE BLACK 8000CO2150
- : 00318045CO
- : Not available.
  - Liquid.

#### Relevant identified uses of the substance or mixture and uses advised against

#### **Identified uses**

Coating. Paints. Painting-related materials.

| Uses advised against | Reason |
|----------------------|--------|
| Not applicable.      |        |

| Supplier's details:        |  |
|----------------------------|--|
| Supplier                   | <ul> <li>PPG Industrial do Brasil – Tintas e Vernizes Ltda</li> <li>Via Anhanguera KM 106, Bairro Sao Judas Tadeu</li> <li>Sumare / SP, Brasil</li> <li>55 19 2103-6000 (Recepção e Portaria)</li> </ul> |
| Email address:             | : HazComLatam@ppg.com  |
| Emergency telephone number | :<br>0800 707 1767 / 0800 707 7022 – Empresa Suatrans Cotec<br>0800 14 8110 – CEATOX - Centro de Assistência Toxicológica  |

# Section 2. Hazards identification

| Classification of the<br>substance or mixture | <ul> <li>FLAMMABLE LIQUIDS - Category 3<br/>ACUTE TOXICITY (dermal) - Category 5<br/>SKIN IRRITATION - Category 2<br/>SERIOUS EYE DAMAGE - Category 1<br/>SKIN SENSITIZATION - Category 1<br/>GERM CELL MUTAGENICITY - Category 2<br/>CARCINOGENICITY - Category 1A<br/>SPECIFIC TARGET ORGAN TOXICITY (SINGLE EXPOSURE) (Respiratory tract<br/>irritation) - Category 3<br/>SPECIFIC TARGET ORGAN TOXICITY (REPEATED EXPOSURE) - Category 1<br/>AQUATIC HAZARD (ACUTE) - Category 3</li> </ul> |
|---|---|
|   | AQUATIC HAZARD (ACUTE) - Category 3<br>AQUATIC HAZARD (LONG-TERM) - Category 3  |

| Section 2. Hazards                                  | Section 2. Hazards identification  |     |  |
|---|--|-----|--|
| Target organs                                       | <ul> <li>Contains material which causes damage to the following organs: liver, spleen, brai bone marrow.</li> <li>Contains material which may cause damage to the following organs: blood, kidney lungs, the nervous system, gastrointestinal tract, cardiovascular system, upper respiratory tract, immune system, skin, central nervous system (CNS), eye, lens o cornea.</li> <li>Percentage of the mixture consisting of ingredient(s) of unknown acute dermal taxisity 54.8%</li> </ul>                                   | ′S, |  |
|   | toxicity: 51.8%<br>Percentage of the mixture consisting of ingredient(s) of unknown hazards to the aquatic environment: 54.4%  |     |  |
| GHS label elements                                  |  |     |  |
| Hazard pictograms                                   |  |     |  |
| Signal word   | : Danger   |     |  |
| Hazard statements                                   | <ul> <li>Flammable liquid and vapor.<br/>May be harmful in contact with skin.<br/>Causes skin irritation.<br/>May cause an allergic skin reaction.<br/>Causes serious eye damage.<br/>May cause respiratory irritation.<br/>Suspected of causing genetic defects.<br/>May cause cancer.<br/>Causes damage to organs through prolonged or repeated exposure.<br/>Harmful to aquatic life with long lasting effects.</li> </ul>  |     |  |
| Precautionary statements                            |  |     |  |
| Prevention  | : Obtain special instructions before use. Wear protective gloves, protective clothing<br>and eye or face protection. Keep away from heat, hot surfaces, sparks, open<br>flames and other ignition sources. No smoking. Use explosion-proof electrical,<br>ventilating or lighting equipment. Use non-sparking tools. Take action to prevent<br>static discharges. Avoid release to the environment. Do not breathe vapor. Do not<br>eat, drink or smoke when using this product. Wash thoroughly after handling.               |     |  |
| Response  | : IF exposed or concerned: Get medical advice or attention. IF INHALED: Call a POISON CENTER or doctor if you feel unwell. Take off contaminated clothing and wash it before reuse. IF ON SKIN: Call a POISON CENTER or doctor if you feel unwell. Wash with plenty of water. If skin irritation or rash occurs: Get medical advice or attention. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a POISON CENTER or doctor. | t   |  |
| Storage   | : Store in a well-ventilated place. Keep container tightly closed. Keep cool.  |     |  |
| Disposal  | : Dispose of contents and container in accordance with all local, regional, national and international regulations.  |     |  |
| Other hazards which do not result in classification | : Prolonged or repeated contact may dry skin and cause irritation.   |     |  |

# Section 3. Composition/information on ingredients

#### Substance/mixture Other means of identification

: Mixture

: Not available.

#### **CAS number/other identifiers**

CAS number

: Not applicable.

| Ingredient name   | %          | CAS number  |
|---|------------|-------------|
| bis-[4-(2,3-epoxipropoxi)phenyl]propane   | 20 - <30   | 1675-54-3   |
| Talc , not containing asbestiform fibres  | 15 - <20   | 14807-96-6  |
| crystalline silica, respirable powder (<10 microns)                                   | 10 - <12.5 | 14808-60-7  |
| crystalline silica, respirable powder (>10 microns)                                   | 10 - <12.5 | 14808-60-7  |
| Epoxy Resin (700 <mw<=1100)< td=""><td>3 - &lt;5</td><td>25036-25-3</td></mw<=1100)<> | 3 - <5     | 25036-25-3  |
| Phenol, methylstyrenated  | 3 - <5     | 68512-30-1  |
| m-xylene  | 3 - <5     | 108-38-3    |
| 2-methylpropan-1-ol   | 3 - <5     | 78-83-1     |
| 2,3-epoxypropyl neodecanoate  | 2 - <3     | 26761-45-5  |
| 12-hydroxyoctadecanoic acid, reaction products with                                   | 1 - <2     | 220926-97-6 |
| 1,3-benzenedimethanamine and hexamethylenediamine                                     |            |             |
| o-xylene  | 1 - <2     | 95-47-6     |
| xylene  | 1 - <2     | 1330-20-7   |
| p-xylene  | 1 - <2     | 106-42-3    |
| ethylbenzene  | 0.5 - <1   | 100-41-4    |
| proprietary microcrystalline silica   | 0.1 - <0.2 | SUB126659   |

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

SUB codes represent substances without registered CAS Numbers.

### Section 4. First aid measures

#### Description of necessary first aid measures

| Eye contact                               | <ul> <li>Check for and remove any contact lenses. Immediately flush eyes with running<br/>water for at least 15 minutes, keeping eyelids open. Seek immediate medical<br/>attention.</li> </ul>                             |
|---|---|
| Inhalation                                | <ul> <li>Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is<br/>irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by<br/>trained personnel.</li> </ul>  |
| Skin contact                              | <ul> <li>Remove contaminated clothing and shoes. Wash skin thoroughly with soap and<br/>water or use recognized skin cleanser. Do NOT use solvents or thinners.</li> </ul>  |
| Ingestion                                 | : If swallowed, seek medical advice immediately and show this container or label.<br>Keep person warm and at rest. Do NOT induce vomiting.  |
| Indication of immediate                   | medical attention and special treatment needed, if necessary  |
| Notes to physician<br>Specific treatments | <ul> <li>In case of inhalation of decomposition products in a fire, symptoms may be delayed.</li> <li>The exposed person may need to be kept under medical surveillance for 48 hours.<br/>No specific treatment.</li> </ul> |

| Code 00318045CO<br>Product name STGMASH | Date of issue<br>IELD 880 BASE BLACK 8000CO2150  | 26 February 2024  | Version                         | 1.01               |
|---|--|---|---------------------------------|--------------------|
| Section 4. First ai                     | id measures  |   |                                 |                    |
| Protection of first-aiders              | : No action shall be taken involvin<br>is suspected that fumes are still<br>mask or self-contained breathing<br>providing aid to give mouth-to-m<br>thoroughly with water before rem | present, the rescuer should<br>g apparatus. It may be dar<br>outh resuscitation. Wash | d wear an app<br>igerous to the | ropriate<br>person |
| Potential acute health effect           | <u>ts</u>  |   |                                 |                    |
| Eye contact                             | : Causes serious eye damage.   |   |                                 |                    |
| Inhalation                              | : May cause respiratory irritation.  |   |                                 |                    |
| Skin contact                            | : May be harmful in contact with s<br>May cause an allergic skin react   |   | Defatting to t                  | he skin.           |
| Ingestion                               | : No known significant effects or c  | ritical hazards.  |                                 |                    |

See toxicological information (Section 11)

# Section 5. Fire-fighting measures

| Extinguishing media                               |   |
|---|---|
| Suitable extinguishing media                      | : Use dry chemical, CO <sub>2</sub> , water spray (fog) or foam.  |
| Unsuitable extinguishing media                    | : Do not use water jet.   |
| Specific hazards arising from the chemical        | : Flammable liquid and vapor. Runoff to sewer may create fire or explosion hazard.<br>In a fire or if heated, a pressure increase will occur and the container may burst,<br>with the risk of a subsequent explosion. This material is harmful to aquatic life with<br>long lasting effects. Fire water contaminated with this material must be contained<br>and prevented from being discharged to any waterway, sewer or drain. |
| Hazardous thermal decomposition products          | : Decomposition products may include the following materials:<br>carbon oxides<br>nitrogen oxides<br>metal oxide/oxides   |
| Special protective actions for fire-fighters      | Promptly isolate the scene by removing all persons from the vicinity of the incident if<br>there is a fire. No action shall be taken involving any personal risk or without<br>suitable training. Move containers from fire area if this can be done without risk.<br>Use water spray to keep fire-exposed containers cool.   |
| Special protective<br>equipment for fire-fighters | <ul> <li>Fire-fighters should wear appropriate protective equipment and self-contained<br/>breathing apparatus (SCBA) with a full face-piece operated in positive pressure<br/>mode.</li> </ul>   |

# Section 6. Accidental release measures

| Personal precautions, protect  | tive equipment and emergency procedures   |
|--------------------------------|---|
| For non-emergency<br>personnel | : No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilled material. Shut off all ignition sources.<br>No flares, smoking or flames in hazard area. Do not breathe vapor or mist. Provide<br>adequate ventilation. Wear appropriate respirator when ventilation is inadequate. |
| For emergency responders       | <ul> <li>Put on appropriate personal protective equipment.</li> <li>If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".</li> </ul>  |

| Code        | 00318045CO    | Date of issue            | 26 February 2024 | Version | 1.01 |
|-------------|---------------|--------------------------|------------------|---------|------|
| Product nam | SIGMASHIELD 8 | 80 BASE BLACK 8000CO2150 |                  |         |      |

### Section 6. Accidental release measures

| Environmental precautions | 1 | Avoid dispersal of spilled material and runoff and contact with soil, waterways,    |
|---------------------------|---|---|
|                           |   | drains and sewers. Inform the relevant authorities if the product has caused        |
|                           |   | environmental pollution (sewers, waterways, soil or air). Water polluting material. |
|                           |   | May be harmful to the environment if released in large quantities.                  |

#### Methods and materials for containment and cleaning up

| Small spill | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools<br>and explosion-proof equipment. Dilute with water and mop up if water-soluble.<br>Alternatively, or if water-insoluble, absorb with an inert dry material and place in an<br>appropriate waste disposal container. Dispose of via a licensed waste disposal<br>contractor.  |
|-------------|---|
| Large spill | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools<br>and explosion-proof equipment. Approach release from upwind. Prevent entry into<br>sewers, water courses, basements or confined areas. Wash spillages into an<br>effluent treatment plant or proceed as follows. Contain and collect spillage with non-<br>combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth<br>and place in container for disposal according to local regulations (see Section 13).<br>Dispose of via a licensed waste disposal contractor. Contaminated absorbent<br>material may pose the same hazard as the spilled product. Note: see Section 1 for<br>emergency contact information and Section 13 for waste disposal. |

### Section 7. Handling and storage

| Precautions for safe<br>handling | : Put on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Avoid exposure - obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Do not get in eyes or on skin or clothing. Do not breathe vapor or mist. Do not ingest. Avoid release to the environment. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Take precautionary measures against electrostatic discharges. Empty containers retain product residue and can be hazardous. Do not reuse container. |
|----------------------------------|--|
| Conditions for safe storage      | • Do not store above the following temperature: 50°C (122°F) Store in accordance   |

**Conditions for safe storage, including any incompatibilities incompatible incompatible** 

# Section 8. Exposure controls/personal protection

#### **Control parameters**

#### **Occupational exposure limits**

| Ingredient name   | Exposure limits   |
|---|---|
| Talc , not containing asbestiform fibres  | ACGIH TLV (United States, 1/2023).  |

### procedures

Reference should be made to appropriate monitoring standards. Reference to national guidance documents for methods for the determination of hazardous substances will also be required.

1.01

| •                                | ure controls/personal protection  |
|----------------------------------|---|
| Appropriate engineering controls | : Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering control also need to keep gas, vapor or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.  |
| Environmental exposure controls  | : Emissions from ventilation or work process equipment should be checked to ensur<br>they comply with the requirements of environmental protection legislation. In some<br>cases, fume scrubbers, filters or engineering modifications to the process<br>equipment will be necessary to reduce emissions to acceptable levels.  |
| Individual protection measu      | <u>ires</u>   |
| Hygiene measures                 | : Wash hands, forearms and face thoroughly after handling chemical products,<br>before eating, smoking and using the lavatory and at the end of the working period<br>Appropriate techniques should be used to remove potentially contaminated clothing<br>Contaminated work clothing should not be allowed out of the workplace. Wash<br>contaminated clothing before reusing. Ensure that eyewash stations and safety<br>showers are close to the workstation location.   |
| Eye protection                   | : Chemical splash goggles and face shield.  |
| Skin protection                  |   |
| Hand protection                  | : Chemical-resistant, impervious gloves complying with an approved standard should<br>be worn at all times when handling chemical products if a risk assessment indicate<br>this is necessary. Considering the parameters specified by the glove manufactured<br>check during use that the gloves are still retaining their protective properties. It<br>should be noted that the time to breakthrough for any glove material may be<br>different for different glove manufacturers. In the case of mixtures, consisting of<br>several substances, the protection time of the gloves cannot be accurately<br>estimated. |
| Gloves                           | : butyl rubber  |
| Body protection                  | : Personal protective equipment for the body should be selected based on the task<br>being performed and the risks involved and should be approved by a specialist<br>before handling this product. When there is a risk of ignition from static electricity,<br>wear anti-static protective clothing. For the greatest protection from static<br>discharges, clothing should include anti-static overalls, boots and gloves.   |
| Other skin protection            | : Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.   |
| Respiratory protection           | : Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator. If workers are exposed to concentrations above the exposure limit, they must use appropriate, certified respirators. Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this necessary.   |

# Section 9. Physical and chemical properties

| Appearance     |                     |                               |       |

# Section 10. Stability and reactivity

| Hazardous decomposition products   | : Depending on conditions, decomposition products may include the following materia carbon oxides nitrogen oxides metal oxide/oxides |
|------------------------------------|--|
|                                    | oxidizing agents, strong alkalis, strong acids.  |
| Incompatible materials             | : Keep away from the following materials to prevent strong exothermic reactions:   |
| Conditions to avoid                | : When exposed to high temperatures may produce hazardous decomposition products.  |
| Possibility of hazardous reactions | : Under normal conditions of storage and use, hazardous reactions will not occur.  |
| Chemical stability                 | : The product is stable.   |
| Reactivity                         | : No specific test data related to reactivity available for this product or its ingredients.   |

Carcinogen Classification code:

IARC: 1, 2A, 2B, 3, 4 NTP: Known to be a human carcinogen; Reasonably anticipated to be a human carcinogen OSHA: + Not listed/not regulated: -

#### **Reproductive toxicity**

Not available.

**Conclusion/Summary** : There are no data available on the mixture itself.

#### **Teratogenicity**

Not available.

**Conclusion/Summary** : There are no data available on the mixture itself.

Specific target organ toxicity (single exposure)

Version

# Section 11. Toxicological information

| Name                                     | Category   | Route of exposure | Target organs                |
|--|------------|-------------------|------------------------------|
| Talc , not containing asbestiform fibres | Category 3 | -                 | Respiratory tract irritation |
| m-xylene                                 | Category 3 | -                 | Respiratory tract irritation |
| 2-methylpropan-1-ol                      | Category 3 | -                 | Respiratory tract irritation |
|  | Category 3 |                   | Narcotic effects             |
| o-xylene                                 | Category 3 | -                 | Respiratory tract irritation |
| xylene                                   | Category 3 | -                 | Respiratory tract irritation |
| p-xylene                                 | Category 3 | -                 | Respiratory tract irritation |

Date of issue

#### Specific target organ toxicity (repeated exposure)

| Name  | Category                 | Route of exposure        | Target organs           |
|---|--------------------------|--------------------------|-------------------------|
| crystalline silica, respirable powder (<10 microns)<br>12-hydroxyoctadecanoic acid, reaction products with<br>1,3-benzenedimethanamine and hexamethylenediamine | Category 1<br>Category 2 | inhalation<br>inhalation | -<br>lungs              |
| ethylbenzene<br>proprietary microcrystalline silica   | Category 2<br>Category 1 | -<br>inhalation          | hearing organs<br>lungs |

#### Target organs

: Contains material which causes damage to the following organs: liver, spleen, brain, bone marrow.

Contains material which may cause damage to the following organs: blood, kidneys, lungs, the nervous system, gastrointestinal tract, cardiovascular system, upper respiratory tract, immune system, skin, central nervous system (CNS), eye, lens or cornea.

#### **Aspiration hazard**

| Name                | Result                         |
|---------------------|--------------------------------|
| m-xylene            | ASPIRATION HAZARD - Category 1 |
| 2-methylpropan-1-ol | ASPIRATION HAZARD - Category 2 |
| o-xylene            | ASPIRATION HAZARD - Category 1 |
| xylene              | ASPIRATION HAZARD - Category 1 |
| p-xylene            | ASPIRATION HAZARD - Category 1 |
| ethylbenzene        | ASPIRATION HAZARD - Category 1 |

| Information on the likely routes of exposure | : | Not available.  |
|--|---|---|
| Potential acute health effects               |   |   |
| Eye contact                                  | : | Causes serious eye damage.  |
| Inhalation                                   | : | May cause respiratory irritation.   |
| Skin contact                                 | 1 | May be harmful in contact with skin. Causes skin irritation. Defatting to the skin.<br>May cause an allergic skin reaction. |

Version

# Section 11. Toxicological information

#### Symptoms related to the physical, chemical and toxicological characteristics

| Eye contact  | : Adverse symptoms may include the following:<br>pain<br>watering<br>redness  |
|--------------|---|
| Inhalation   | : Adverse symptoms may include the following: respiratory tract irritation coughing   |
| Skin contact | : Adverse symptoms may include the following:<br>pain or irritation<br>redness<br>dryness<br>cracking<br>blistering may occur |
| Ingestion    | : Adverse symptoms may include the following: stomach pains   |

#### Delayed and immediate effects and also chronic effects from short and long term exposure

| Conclusion/Summary          | : | There are no data available on the mixture itself. This product contains crystalline silica which can cause lung cancer or silicosis. The risk of cancer depends on the duration and level of exposure to dust from sanding surfaces or mist from spray applications. Carbon black is utilized as a raw material in many liquid coating formulations. In this case, the carbon black particles are bound in a matrix with no meaningful potential for human exposure to unbound particles of carbon black when the product is applied with a brush or roller. Sanding the coating surface or mist from spray applications may be harmful depending on the duration and level of exposure and require the use of appropriate personal protective equipment and/or engineering controls (see Section 8). Most carbon blacks contain trace quantities of polyaromatic hydrocarbons (PAH). PAHs are not expected to be released in biological fluids and are therefore not likely available for biological activity. Exposure to component solvent vapor concentrations in excess of the stated occupational exposure limit may result in adverse health effects such as mucous membrane and respiratory system irritation and adverse effects on the kidneys, liver and central nervous system. Symptoms and signs include headache, dizziness, fatigue, muscular weakness, drowsiness and, in extreme cases, loss of consciousness. Solvents may cause some of the above effects by absorption through the skin. There is some evidence that repeated exposure to organic solvent vapors in combination with constant loud noise can cause greater hearing loss than expected from exposure to noise alone. If splashed in the eyes, the liquid may cause irritation and reversible damage. Ingestion may cause nausea, diarrhea and vomiting. This takes into account, where known, delayed and immediate effects and also chronic effects of components from short-term and long-term exposure by oral, inhalation and dermal routes of exposure and eye contact. |
|-----------------------------|---|---|
| Short term exposure         |   |   |
| Potential immediate effects | : | There are no data available on the mixture itself.  |
| Potential delayed effects   | : | There are no data available on the mixture itself.  |
| Long term exposure          |   |   |
| Potential immediate effects | : | There are no data available on the mixture itself.  |

### Section 11. Toxicological information

**Potential delayed effects** : There are no data available on the mixture itself.

#### Potential chronic health effects

Not available.

| General               | : Causes damage to organs through prolonged or repeated exposure. Prolonged or repeated contact can defat the skin and lead to irritation, cracking and/or dermatitis. Once sensitized, a severe allergic reaction may occur when subsequently exposed to very low levels. |
|-----------------------|--|
| Carcinogenicity       | : May cause cancer. Risk of cancer depends on duration and level of exposure.  |
| Mutagenicity          | : Suspected of causing genetic defects.  |
| Reproductive toxicity | : No known significant effects or critical hazards.  |

#### Numerical measures of toxicity

### Section 12. Ecological information

#### Mobility in soil

Soil/water partition coefficient (Koc)

: Not available.

Other adverse effects : No known significant effects or critical hazards.

## Section 13. Disposal considerations

**Disposal methods** : The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and nonrecyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapor from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.
