| Product code   | : 00359043  |
| Product name   | : SIGMADUR GLOSS/520/550 HARDENER   |
| Product name   | : SIGMADUR GLOSS/520/550 HARDENER   |
| Product type   | : Liquid.   |
| Relevant identified uses of                                | the substance or mixture and uses advised against   |
| Product use  | : Professional applications, Used by spraying.  |
| Use of the substance/<br>mixture                           | : Coating.  |
| Uses advised against                                       | : Not applicable.   |
| Supplier's details   | : PPG Coatings (Kunshan) Co., Ltd<br>53 Jinyang Road, Lujia Town,<br>215331 Kunshan City, Jiangsu Province, P.R. China<br>Tel: 86 512 57678859 Fax: 86 512 57678857 |
| Emergency telephone<br>number (with hours of<br>operation) | : 00 86 532 83889090  |

## Section 2. Hazards identification

Classification of the substance or mixture according to GB 13690-2009 and GB 30000-2013

#### **Emergency overview** Liquid. Colorless. Aromatic. Flammable liquid and vapor. May be harmful if swallowed or in contact with skin. Causes skin irritation. May cause an allergic skin reaction. Causes serious eye irritation. Harmful if inhaled. May cause respiratory irritation. Suspected of causing cancer. Harmful to aquatic life. Harmful to aquatic life with long lasting effects. Prolonged or repeated contact may dry skin and cause irritation.

IF exposed or concerned: Get medical advice or attention. IF INHALED: Call a POISON CENTER or doctor if you feel unwell. IF SWALLOWED: Call a POISON CENTER or doctor if you feel unwell. IF ON SKIN: Call a POISON CENTER or doctor if you feel unwell. If skin irritation or rash occurs: Get medical advice or attention. If eye irritation persists: Get medical advice or attention.

#### See Section 12 for environmental precautions.

Product name SIGMADUR GLOSS/520/550 HARDENER

Version 4.02

## Section 2. Hazards identification

| Classification of the<br>substance or mixture | <ul> <li>FLAMMABLE LIQUIDS - Category 3<br/>ACUTE TOXICITY (oral) - Category 5<br/>ACUTE TOXICITY (dermal) - Category 5<br/>ACUTE TOXICITY (inhalation) - Category 4<br/>SKIN CORROSION/IRRITATION - Category 2<br/>SERIOUS EYE DAMAGE/ EYE IRRITATION - Category 2A<br/>SKIN SENSITIZATION - Category 1<br/>CARCINOGENICITY - Category 2<br/>SPECIFIC TARGET ORGAN TOXICITY (SINGLE EXPOSURE) (Respiratory tract<br/>irritation) - Category 3<br/>AQUATIC HAZARD (ACUTE) - Category 3<br/>AQUATIC HAZARD (LONG-TERM) - Category 3<br/>Percentage of the mixture consisting of ingredient(s) of unknown acute dermal<br/>toxicity: 1.3%<br/>Percentage of the mixture consisting of ingredient(s) of unknown acute inhalation<br/>toxicity: 2.2%</li> </ul> |
|---|---|
| GHS label elements                            |   |
| Hazard pictograms                             |   |
| Signal word                                   | : Warning   |
| Hazard statements                             | <ul> <li>Flammable liquid and vapor.<br/>May be harmful if swallowed or in contact with skin.<br/>Causes skin irritation.<br/>May cause an allergic skin reaction.<br/>Causes serious eye irritation.<br/>Harmful if inhaled.<br/>May cause respiratory irritation.<br/>Suspected of causing cancer.<br/>Harmful to aquatic life.<br/>Harmful to aquatic life with long lasting effects.</li> </ul>   |
| Precautionary statements                      |   |
| Prevention                                    | : Obtain special instructions before use. Do not handle until all safety precautions<br>have been read and understood. Wear protective gloves, protective clothing and<br>eye or face protection. Keep away from heat, hot surfaces, sparks, open flames<br>and other ignition sources. No smoking. Use explosion-proof electrical, ventilating<br>or lighting equipment. Use non-sparking tools. Take action to prevent static<br>discharges. Use only outdoors or in a well-ventilated area. Avoid release to the<br>environment. Avoid breathing vapor. Wash thoroughly after handling.<br>Contaminated work clothing should not be allowed out of the workplace.  |
| Response                                      | : IF exposed or concerned: Get medical advice or attention. IF INHALED: Remove<br>person to fresh air and keep comfortable for breathing. Call a POISON CENTER or<br>doctor if you feel unwell. IF SWALLOWED: Call a POISON CENTER or doctor if<br>you feel unwell. IF ON SKIN (or hair): Take off immediately all contaminated<br>clothing. Rinse skin with water. IF ON SKIN: Call a POISON CENTER or doctor if<br>you feel unwell. Wash with plenty of water. If skin irritation or rash occurs: Get<br>medical advice or attention. IF IN EYES: Rinse cautiously with water for several<br>minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye<br>irritation persists: Get medical advice or attention.                 |

## Section 2. Hazards identification

| Suitable extinguishing media                        | : Use dry chemical, CO <sub>2</sub> , water spray (fog) or foam.   |
|---|--|
| Storage   | : Store locked up. Store in a well-ventilated place. Keep container tightly closed. Keep cool.   |
| Disposal  | : Dispose of contents and container in accordance with all local, regional, national and international regulations.  |
| Physical and chemical<br>hazards                    | : Flammable liquid and vapor.  |
| Health hazards                                      | : May be harmful if swallowed or in contact with skin. Causes skin irritation. May cause an allergic skin reaction. Causes serious eye irritation. Harmful if inhaled. May cause respiratory irritation. Suspected of causing cancer. Prolonged or repeated contact may dry skin and cause irritation. |
| Symptoms related to the phy                         | sical, chemical and toxicological characteristics  |
| Eye contact   | : Adverse symptoms may include the following:<br>pain or irritation<br>watering<br>redness   |
| Inhalation  | : Adverse symptoms may include the following:<br>respiratory tract irritation<br>coughing  |
| Skin contact  | : Adverse symptoms may include the following:<br>irritation<br>redness<br>dryness<br>cracking  |
| Ingestion   | : No specific data.  |
| Delayed and immediate effect                        | ts and also chronic effects from short and long term exposure  |
| Short term exposure                                 |  |
| Potential immediate effects                         | : Not available.   |
| Potential delayed effects                           | : Not available.   |
| Long term exposure                                  |  |
| Potential immediate<br>effects                      | : Not available.   |
| Potential delayed effects                           | : Not available.   |
| Environmental hazards                               | : Harmful to aquatic life. Harmful to aquatic life with long lasting effects.  |
| Other hazards which do not result in classification | : Prolonged or repeated contact may dry skin and cause irritation.   |

Date of issue 13 May 2024

## Section 3. Composition/information on ingredients

Substance/mixture

: Mixture

#### **CAS number/other identifiers**

**CAS number** : Not applicable.

| Ingredient name   | %        | CAS number |
|---|----------|------------|
| Hexamethylene diisocyanate, oligomers (isocyanurate type) | 70 - 100 | 28182-81-2 |
| xylene isomers mixture                                    | 10 - <25 | 1330-20-7  |
| n-butyl acetate   | 1 - <10  | 123-86-4   |
| ethylbenzene  | 1 - <10  | 100-41-4   |
| Solvent naphtha (petroleum), light aromatic               | 1 - <10  | 64742-95-6 |
| 1,2,4-trimethylbenzene                                    | 1 - <10  | 95-63-6    |

Date of issue 13 May 2024

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8. SUB codes represent substances without registered CAS Numbers.

## Section 4. First aid measures

#### Description of necessary first aid measures

| Eye contact  | : Remove contact lenses, irrigate copiously with clean, fresh water, holding the eyelids apart for at least 10 minutes and seek immediate medical advice.  |
|--------------|--|
| Inhalation   | <ul> <li>Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is<br/>irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by<br/>trained personnel.</li> </ul> |
| Skin contact | : Remove contaminated clothing and shoes. Wash skin thoroughly with soap and water or use recognized skin cleanser. Do NOT use solvents or thinners.   |
| Ingestion    | <ul> <li>If swallowed, seek medical advice immediately and show this container or label.</li> <li>Keep person warm and at rest. Do NOT induce vomiting.</li> </ul>   |

#### Most important symptoms/effects, acute and delayed

| Potential acute health e      | ffects   |
|-------------------------------|--|
| Eye contact                   | : Causes serious eye irritation.   |
| Inhalation                    | : Harmful if inhaled. May cause respiratory irritation.  |
| Skin contact                  | : May be harmful in contact with skin. Causes skin irritation. Defatting to the skin. May cause an allergic skin reaction. |
| Ingestion                     | : May be harmful if swallowed.   |
| <u>Over-exposure signs/sy</u> | <u>/mptoms</u>   |
| Eye contact                   | : Adverse symptoms may include the following:<br>pain or irritation<br>watering<br>redness                                 |
| Inhalation                    | : Adverse symptoms may include the following:<br>respiratory tract irritation<br>coughing                                  |

Version 4.02

Date of issue 13 May 2024

## Section 4. First aid measures

| Skin contact               | : Adverse symptoms may include the following:<br>irritation<br>redness<br>dryness<br>cracking   |
|----------------------------|---|
| Ingestion                  | : No specific data.   |
| Indication of immediate me | dical attention and special treatment needed, if necessary  |
| Notes to physician         | : In case of inhalation of decomposition products in a fire, symptoms may be delayed.<br>The exposed person may need to be kept under medical surveillance for 48 hours.  |
| Specific treatments        | : No specific treatment.  |
| Protection of first-aiders | : No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. |

See toxicological information (Section 11)

## Section 5. Fire-fighting measures

| Extinguishing media                            |   |
|--|---|
| Suitable extinguishing media                   | : Use dry chemical, CO <sub>2</sub> , water spray (fog) or foam.  |
| Unsuitable extinguishing media                 | : Do not use water jet.   |
| Specific hazards arising from the chemical     | : Flammable liquid and vapor. Runoff to sewer may create fire or explosion hazard.<br>In a fire or if heated, a pressure increase will occur and the container may burst, with<br>the risk of a subsequent explosion. This material is harmful to aquatic life with long<br>lasting effects. Fire water contaminated with this material must be contained and<br>prevented from being discharged to any waterway, sewer or drain. |
| Hazardous thermal decomposition products       | : Decomposition products may include the following materials:<br>carbon oxides<br>nitrogen oxides<br>Cyanate and isocyanate.<br>hydrogen cyanide  |
| Special protective actions for fire-fighters   | : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.  |
| Special protective equipment for fire-fighters | : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.   |

## Section 6. Accidental release measures

| Personal precautions, protective equipment and emergency procedures |   |   |  |
|---|---|---|--|
| For non-emergency<br>personnel                                      | : | No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilled material. Shut off all ignition sources.<br>No flares, smoking or flames in hazard area. Avoid breathing vapor or mist.<br>Provide adequate ventilation. Wear appropriate respirator when ventilation is<br>inadequate. Put on appropriate personal protective equipment. |  |
| For emergency responders  | : | If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".   |  |
| Environmental precautions   | : | Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). Water polluting material. May be harmful to the environment if released in large quantities.  |  |

#### Methods and materials for containment and cleaning up

| Small spill        | Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.  |
|--------------------|---|
| Large spill        | Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.  |
| Special provisions | Contain and collect spillage with non-combustible, absorbent material e.g. sand,<br>earth, vermiculite or diatomaceous earth and place in container for disposal<br>according to local regulations (see Section 13). Place in a suitable container. The<br>contaminated area should be cleaned immediately with a suitable decontaminant.<br>One possible (flammable) decontaminant comprises (by volume): water (45 parts),<br>ethanol or isopropyl alcohol (50 parts) and concentrated (d: 0,880) ammonia<br>solution (5 parts). A non-flammable alternative is sodium carbonate (5 parts) and<br>water (95 parts). Add the same decontaminant to the remnants and let stand for<br>several days until no further reaction in an unsealed container. Once this stage is<br>reached, close container and dispose of according to local regulations (see section<br>13). Do not allow to enter drains or watercourses. If the product contaminates lakes,<br>rivers, or sewers, inform the appropriate authorities in accordance with local<br>regulations. |

Product name SIGMADUR GLOSS/520/550 HARDENER

## Section 7. Handling and storage

| Precautions for safe<br>handling                                   | Put on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Avoid exposure - obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Do not get in eyes or on skin or clothing. Do not ingest. Avoid breathing vapor or mist. Avoid release to the environment. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Take precautionary measures against electrostatic discharges. Empty containers retain product residue and can be hazardous. Do not reuse container. |
|--|---|
| Conditions for safe storage,<br>including any<br>incompatibilities | Store between the following temperatures: 0 to $35^{\circ}$ C ( $32$ to $95^{\circ}$ F). Store in<br>accordance with local regulations. Store in a segregated and approved area. Store<br>in original container protected from direct sunlight in a dry, cool and well-ventilated<br>area, away from incompatible materials (see Section 10) and food and drink. Store<br>locked up. Eliminate all ignition sources. Separate from oxidizing materials. Keep<br>container tightly closed and sealed until ready for use. Containers that have been<br>opened must be carefully resealed and kept upright to prevent leakage. Do not<br>store in unlabeled containers. Use appropriate containment to avoid environmental<br>contamination. See Section 10 for incompatible materials before handling or use.<br>Precautions should be taken to minimize exposure to atmospheric humidity or water.<br>$CO_2$ will be formed, which, in closed containers, could result in pressurization.   |

## Section 8. Exposure controls/personal protection

#### Control parameters

#### **Occupational exposure limits**

| Ingredient name        | Exposure limits                            |
|------------------------|--|
| xylene isomers mixture | GBZ 2.1 (China, 11/2022). [Xylene]         |
|                        | PC-STEL: 100 mg/m <sup>3</sup> 15 minutes. |
|                        | PC-TWA: 50 mg/m <sup>3</sup> 8 hours.      |
| n-butyl acetate        | GBZ 2.1 (China, 11/2022).                  |
| -                      | PC-STEL: 300 mg/m <sup>3</sup> 15 minutes. |
|                        | PC-TWA: 200 mg/m <sup>3</sup> 8 hours.     |
| ethylbenzene           | GBZ 2.1 (China, 11/2022).                  |
| •                      | PC-STEL: 150 mg/m <sup>3</sup> 15 minutes. |
|                        | PC-TWA: 100 mg/m <sup>3</sup> 8 hours.     |
| 1,2,4-trimethylbenzene | ACGIH TLV (United States, 7/2023).         |
| •                      | TWA: 10 ppm 8 hours.                       |

procedures

Reference should be made to appropriate monitoring standards. Reference to national guidance documents for methods for the determination of hazardous substances will also be required.

## Section 8. Exposure controls/personal protection

| •                                |             | · · ·   |
|----------------------------------|-------------|---|
| Appropriate engineering controls | :           | Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapor or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.   |
| Environmental exposure controls  | :           | Emissions from ventilation or work process equipment should be checked to ensure<br>they comply with the requirements of environmental protection legislation. In some<br>cases, fume scrubbers, filters or engineering modifications to the process<br>equipment will be necessary to reduce emissions to acceptable levels.   |
| Individual protection measu      | <u>ires</u> |   |
| Hygiene measures                 | :           | Wash hands, forearms and face thoroughly after handling chemical products, before<br>eating, smoking and using the lavatory and at the end of the working period.<br>Appropriate techniques should be used to remove potentially contaminated clothing.<br>Contaminated work clothing should not be allowed out of the workplace. Wash<br>contaminated clothing before reusing. Ensure that eyewash stations and safety<br>showers are close to the workstation location.   |
| Eye protection                   | :           | Chemical splash goggles.  |
| Skin protection                  |             |   |
| Hand protection                  | :           | Chemical-resistant, impervious gloves complying with an approved standard should<br>be worn at all times when handling chemical products if a risk assessment indicates<br>this is necessary. Considering the parameters specified by the glove manufacturer,<br>check during use that the gloves are still retaining their protective properties. It<br>should be noted that the time to breakthrough for any glove material may be<br>different for different glove manufacturers. In the case of mixtures, consisting of<br>several substances, the protection time of the gloves cannot be accurately<br>estimated. |
| Gloves                           |             | butyl rubber  |
| Body protection                  | :           | Personal protective equipment for the body should be selected based on the task<br>being performed and the risks involved and should be approved by a specialist<br>before handling this product. When there is a risk of ignition from static electricity,<br>wear anti-static protective clothing. For the greatest protection from static<br>discharges, clothing should include anti-static overalls, boots and gloves.   |
| Other skin protection            | :           | Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.   |
| Respiratory protection           | :           | Use an air-fed respirator unless a site-specific assessment determines that an air-<br>fed respirator is not necessary, in which case the results of the risk assessment<br>should be utilized to determine whether respiratory protection is necessary and what<br>type of protection is appropriate. Respirator selection must be based on known or<br>anticipated exposure levels, the hazards of the product and the safe working limits<br>of the selected respirator.   |

## Section 9. Physical and chemical properties

| <u>Appearance</u> |                             |
|-------------------|-----------------------------|
| Physical state    | : Liquid.                   |
| Color             | : Colorless.                |
| Odor              | : Aromatic.                 |
| Boiling point     | : >37.78°C (>100°F)         |
| Flash point       | : Closed cup: 32°C (89.6°F) |
|                   |                             |

Product name SIGMADUR GLOSS/520/550 HARDENER

Date of issue 13 May 2024

Version 4.02

## Section 9. Physical and chemical properties

| Lower and upper explosive (flammable) limits | : | Greatest known range: Lower: 1.4% Upper: 7.6% (n-butyl acetate) |             |  |
|--|---|---|-------------|--|
| Relative density                             | : | 1.07  |             |  |
| Solubility(ies)                              |   | Media   | Result      |  |
|  | 1 | cold water  | Not soluble |  |
| Viscosity                                    | : | Kinematic (40°C):   | >21 mm²/s   |  |

## Section 10. Stability and reactivity

| Reactivity                         | : No specific test data related to reactivity available for this product or its ingredients.  |
|------------------------------------|---|
| Chemical stability                 | : The product is stable.  |
| Possibility of hazardous reactions | : Under normal conditions of storage and use, hazardous reactions will not occur.   |
| Conditions to avoid                | : In a fire, hazardous decomposition products may be produced.  |
| Incompatible materials             | : Keep away from: oxidizing agents, strong alkalis, strong acids, amines, alcohols, water. Uncontrolled exothermic reactions occur with amines and alcohols.  |
| Hazardous decomposition products   | : Depending on conditions, decomposition products may include the following materials: Cyanate and isocyanate. carbon oxides nitrogen oxides hydrogen cyanide |

## Section 11. Toxicological information

#### Information on toxicological effects

#### Acute toxicity

| Product/ingredient name                                   | Result                | Species         | Dose                    | Exposure |

|------|--|
|      | ASPIRATION HAZARD - Category 1<br>ASPIRATION HAZARD - Category 1 |

# Information on the likely routes of exposure

: Not available.

| Potential acute health effects |   |   |
|--------------------------------|---|---|
| Eye contact                    | : | Causes serious eye irritation.  |
| Inhalation                     | 1 | Harmful if inhaled. May cause respiratory irritation.   |
| Skin contact                   | : | May be harmful in contact with skin. Causes skin irritation. Defatting to the skin.<br>May cause an allergic skin reaction. |
| Ingestion                      | ÷ | May be harmful if swallowed.  |

#### Symptoms related to the physical, chemical and toxicological characteristics

## Section 11. Toxicological information

|              | -   |
|--------------|---|
| Eye contact  | : Adverse symptoms may include the following:<br>pain or irritation<br>watering<br>redness    |
| Inhalation   | : Adverse symptoms may include the following:<br>respiratory tract irritation<br>coughing     |
| Skin contact | : Adverse symptoms may include the following:<br>irritation<br>redness<br>dryness<br>cracking |
| Ingestion    | : No specific data.   |

| Delayed and immediate effect   | ts  | and also chronic effects from short and long term exposure  |
|--------------------------------|-----|---|
| Short term exposure            |     |   |
| Potential immediate<br>effects | :   | Not available.  |
| Potential delayed effects      | :   | Not available.  |
| Long term exposure             |     |   |
| Potential immediate<br>effects | :   | Not available.  |
| Potential delayed effects      | 1   | Not available.  |
| Potential chronic health effe  | ect | <u>s</u>  |
| General                        | :   | Prolonged or repeated contact can defat the skin and lead to irritation, cracking and/<br>or dermatitis. Once sensitized, a severe allergic reaction may occur when<br>subsequently exposed to very low levels. |
| Carcinogenicity                | :   | Suspected of causing cancer. Risk of cancer depends on duration and level of exposure.  |
| Mutagenicity                   | :   | No known significant effects or critical hazards.   |
| Reproductive toxicity          | :   | No known significant effects or critical hazards.   |

## Section 11. Toxicological information

Prolonged or repeated contact may dry skin and cause irritation. Repeated exposure to high vapor concentrations may cause irritation of the respiratory system and permanent brain and nervous system damage. Inhalation of vapor/aerosol concentrations above the recommended exposure limits causes headaches, drowsiness and nausea and may lead to unconsciousness or death. Based on the properties of the isocyanate components and considering toxicological data on similar mixtures, this mixture may cause acute irritation and/or sensitization of the respiratory system, leading to an asthmatic condition, wheezing and tightness of the chest. Sensitized persons may subsequently show asthmatic symptoms when exposed to atmospheric concentrations well below the OEL. Persons with a history of skin sensitization problems or asthma, allergies or chronic or recurrent respiratory disease should not be employed in any process in which this product is used. Repeated exposure may lead to permanent respiratory disability. Moisturesensitive material. Avoid contact with skin and clothing.

### Section 12. Ecological information

Other adverse effects : No known significant effects or critical hazards.

### Section 13. Disposal considerations

**Disposal methods** : The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapor from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers
