# SAFETY DATA SHEET

Date of issue/Date of revision

: 16 May 2024

Version

: 5

### SECTION 1: Identification of the substance/mixture and of the company/ undertaking **1.1 Product identifier Product name** : SIGMACOVER 555 BASE BLACK **Product code** : 00275859 Other means of identification Not available. 1.2 Relevant identified uses of the substance or mixture and uses advised against **Product use** : Professional applications, Used by spraying. Use of the substance/ : Coating. mixture : Product is not intended, labelled or packaged for consumer use. **Uses advised against** 1.3 Details of the supplier of the safety data sheet Sigma Paint Saudi Arabia Ltd. PO Box 7509 Dammam 31472 Saudi Arabia Tel: 00966 138 47 3100 Fax: 00966 138471734 e-mail address of person : ndpic@sfda.gov.sa responsible for this SDS **1.4 Emergency telephone** : 00966 138473100 extn 1001

#### number

## SECTION 2: Hazards identification

2.1 Classification of the substance or mixture **Product definition** : Mixture Classification according to Regulation (EC) No. 1272/2008 [CLP/GHS] Fam. Liq. 3, H226 Skin Irrit. 2, H315 Eye Irrit. 2, H319 Skin Sens. 1, H317 Carc. 2, H351 Aquatic Chronic 3, H412 The product is classified as hazardous according to Regulation (EC) 1272/2008 as amended. See Section 16 for the full text of the H statements declared above.

See Section 11 for more detailed information on health effects and symptoms.

## 2.2 Label elements

| Code : 00275859   | Date of issue/Date of revision : 16 May 2024   |
|---|--|
| SIGMACOVER 555 BASE BLA   | ACK  |
| SECTION 2: Hazards  | identification   |
| Hazard pictograms   |  |
| Signal word   | : Warning  |
| Hazard statements   | <ul> <li>Fammable liquid and vapour.<br/>Causes skin irritation.<br/>May cause an allergic skin reaction.<br/>Causes serious eye irritation.<br/>Suspected of causing cancer.<br/>Harmful to aquatic life with long lasting effects.</li> </ul>                                    |
| Precautionary statements  |  |
| Prevention  | : Do not handle until all safety precautions have been read and understood. Wear protective gloves, protective clothing and eye or face protection. Keep away from hea hot surfaces, sparks, open flames and other ignition sources. No smoking. Avoid release to the environment. |
| Response  | : IF exposed or concerned: Get medical advice or attention.  |
| Storage   | : Not applicable.  |
| Disposal  | <ul> <li>Dispose of contents and container in accordance with all local, regional, national and<br/>international regulations.</li> <li>P202, P280, P210, P273, P308 + P313, P501</li> </ul>   |
| Hazardous ingredients   | : 4-methylpentan-2-one<br>bis-[4-(2,3-epoxipropoxi)phenyl]propane<br>Epoxy Resin (700 <mw<=1100)< td=""></mw<=1100)<>  |
| Supplemental label elements   | : Contains epoxy constituents. May produce an allergic reaction.   |
| Annex XVII - Restrictions<br>on the manufacture,<br>placing on the market and<br>use of certain dangerous<br>substances, mixtures and<br>articles | : Not applicable.  |
| Special packaging requirem  | nents  |
| Containers to be fitted<br>with child-resistant<br>fastenings   | : Not applicable.  |
| Tactile warning of danger   | : Not applicable.  |
| 2.3 Other hazards   |  |
| Product meets the criteria<br>for PBT or vPvB   | : This mixture does not contain any substances that are assessed to be a PBT or a vPv  |
| Other hazards which do not result in classification   | : Prolonged or repeated contact may dry skin and cause irritation.   |

|   |  |             | statements declared above.   |   |         |

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment, are PBTs, vPvBs or Substances of equivalent concern, or have been assigned a workplace exposure limit and hence require reporting in this section.

Xylene: Several REACH registrations cover the REACH registered substance with xylene isomers, ethylbenzene (and toluene). The other REACH Registrations include: 01-2119555267-33 reaction mass of ethylbenzene and m-xylene and p-xylene, 01-2119486136-34 Aromatic hydrocarbons, C8, 01-2119539452-40 reaction mass of ethylbenzene and xylene. <u>Type</u>

[1] Substance classified with a health or environmental hazard

[2] Substance with a workplace exposure limit

Occupational exposure limits, if available, are listed in Section 8.

Date of issue/Date of revision

: 16 May 2024

## **SECTION 3: Composition/information on ingredients**

SUB codes represent substances without registered CAS Numbers.

## **SECTION 4: First aid measures**

| 4.1 Description of first aid measures |   |  |  |
|---------------------------------------|---|--|--|
| Eye contact                           | : Remove contact lenses, irrigate copiously with clean, fresh water, holding the eyelids apart for at least 10 minutes and seek immediate medical advice.   |  |  |
| Inhalation                            | : Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel.  |  |  |
| Skin contact                          | : Remove contaminated clothing and shoes. Wash skin thoroughly with soap and water<br>or use recognised skin cleanser. Do NOT use solvents or thinners.   |  |  |
| Ingestion                             | : If swallowed, seek medical advice immediately and show the container or label. Keep person warm and at rest. Do NOT induce vomiting.  |  |  |
| Protection of first-aiders            | : No action shall be taken involving any personal risk or without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. |  |  |

### 4.2 Most important symptoms and effects, both acute and delayed

| 4.2 most important symp   | toms and encets, both dedic and dedayed   |
|---------------------------|---|
| Potential acute health e  | ffects  |
| Eye contact               | : Causes serious eye irritation.  |
| Inhalation                | : No known significant effects or critical hazards.   |
| Skin contact              | : Causes skin irritation. Defatting to the skin. May cause an allergic skin reaction.   |
| Ingestion                 | : No known significant effects or critical hazards.   |
| Over-exposure signs/sy    | <u>mptoms</u>   |
| Eye contact               | : Adverse symptoms may include the following:<br>pain or irritation<br>watering<br>redness  |
| Inhalation                | : No specific data.   |
| Skin contact              | : Adverse symptoms may include the following:<br>irritation<br>redness<br>dryness<br>cracking   |
| Ingestion                 | : No specific data.   |
| 4.3 Indication of any imm | ediate medical attention and special treatment needed   |
| Notes to physician        | <ul> <li>Treat symptomatically. Contact poison treatment specialist immediately if large<br/>quantities have been ingested or inhaled.</li> </ul> |
| Specific treatments       | : No specific treatment.  |

## **SECTION 5: Firefighting measures**

| 5.1 Extinguishing media        |  |
|--------------------------------|--|
| Suitable extinguishing media   | : Use dry chemical, CO <sub>2</sub> , water spray (fog) or foam. |
| Unsuitable extinguishing media | : Do not use water jet.  |

### 5.2 Special hazards arising from the substance or mixture

Code: 00275859Date of issue/Date of revision: 16 May 2024

SIGMACOVER 555 BASE BLACK

| Hazards from the substance or mixture | : Fammable liquid and vapour. Runoff to sewer may create fire or explosion hazard. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion. This material is harmful to aquatic life with long lasting effects. Fire water contaminated with this material must be contained and prevented from being discharged to any waterway, sewer or drain. |
|---------------------------------------|---|
| Hazardous combustion<br>products      | : Decomposition products may include the following materials:<br>carbon oxides<br>sulfur oxides<br>halogenated compounds<br>metal oxide/oxides  |

| 5.3 Advice for firefighters                       |   |
|---|---|
| Special precautions for<br>fire-fighters          | : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.                                      |
| Special protective<br>equipment for fire-fighters | : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. Clothing for fire-fighters (including helmets, protective boots and gloves) conforming to European standard EN 469 will provide a basic level of protection for chemical incidents. |

## **SECTION 6: Accidental release measures**

| 6.1 Personal precautions, pro  | ote | ctive equipment and emergency procedures   |
|--------------------------------|-----|--|
| For non-emergency<br>personnel | :   | No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilt material. Shut off all ignition sources. No<br>flares, smoking or flames in hazard area. Avoid breathing vapour or mist. Provide<br>adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put<br>on appropriate personal protective equipment. |
| For emergency responders       | :   | If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".  |
| 6.2 Environmental precautions  | :   | Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). Water polluting material. May be harmful to the environment if released in large quantities.   |

### 6.3 Methods and material for containment and cleaning up

| Small spill                     | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.   |
|---------------------------------|--|
| Large spill                     | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach the release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations. Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilt product. |
| 6.4 Reference to other sections | : See Section 1 for emergency contact information.<br>See Section 8 for information on appropriate personal protective equipment.<br>See Section 13 for additional waste treatment information.  |

Code : 00275859

SIGMACOVER 555 BASE BLACK

Date of issue/Date of revision

: 16 May 2024

**SECTION 7: Handling and storage** 

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

### 7.1 Precautions for safe handling

| Protective measures  | : Put on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Avoid exposure - obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Do not get in eyes or on skin or clothing. Do not ingest. Avoid breathing vapour or mist. Avoid release to the environment. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Take precautionary measures against electrostatic discharges. Empty containers retain product residue and can be hazardous. Do not reuse container. |
|--|--|
| Advice on general occupational hygiene                                 | : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.  |
| 7.2 Conditions for safe<br>storage, including any<br>incompatibilities | : Store between the following temperatures: 0 to 35°C (32 to 95°F). Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Eliminate all ignition sources. Separate from oxidising materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.   |

### 7.3 Specific end use(s)

See Section 1.2 for Identified uses.

## **SECTION 8: Exposure controls/personal protection**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

### 8.1 Control parameters

### **Occupational exposure limits**

| Product/ingredient name                  | Exposure limit values  |  |
|--|--|--|
| ralc , not containing asbestiform fibres | Resolution No. 4 of 2005, issued under decree-law no. 30 of 2002 (Annex 3-6) (Qatar, 8/2005).<br>Maximum permissible concentration: 2 mg/m <sup>3</sup> 8 hours. Form: inhalable dust or fine dust |  |

| Code : 00275859                               | Date of issue/Date of revision : 16 May 2024  |
|---|---|
| SIGMACOVER 555 BASE BLA                       | ACK   |
| Recommended monitoring procedures             | : Reference should be made to monitoring standards, such as the following: European Standard EN 689 (Workplace atmospheres - Guidance for the assessment of exposure by inhalation to chemical agents for comparison with limit values and measurement strategy) European Standard EN 14042 (Workplace atmospheres - Guide for the application and use of procedures for the assessment of exposure to chemical and biological agents) European Standard EN 482 (Workplace atmospheres - General requirements for the performance of procedures for the measurement of chemical agents) Reference to national guidance documents for methods for the determination of hazardous substances will also be required.   |
| 8.2 Exposure controls                         |   |
| Appropriate engineering controls              | : Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapour or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.  |
| Individual protection measu                   | <u>res</u>  |
| Hygiene measures                              | : Wash hands, forearms and face thoroughly after handling chemical products, before<br>eating, smoking and using the lavatory and at the end of the working period.<br>Appropriate techniques should be used to remove potentially contaminated clothing.<br>Contaminated work clothing should not be allowed out of the workplace. Wash<br>contaminated clothing before reusing. Ensure that eyewash stations and safety<br>showers are close to the workstation location.   |
| Eye/face protection<br><u>Skin protection</u> | : Chemical splash goggles.  |
| Hand protection                               | : Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated. When prolonged or frequently repeated contact may occur, a glove with a protection class of 6 (breakthrough time greater than 480 minutes according to EN 374) is recommended. When only brief contact is expected, a glove with a protection class of 2 or higher (breakthrough time greater than 30 minutes according to EN 374) is recommended. The user must check that the final choice of type of glove selected for handling this product is the most appropriate and takes into account the particular conditions of use, as included in the user's risk assessment. |
| Gloves  | : butyl rubber  |
| Body protection                               | : Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. When there is a risk of ignition from static electricity, wear antistatic protective clothing. For the greatest protection from static discharges, clothing should include anti-static overalls, boots and gloves. Refer to European Standard EN 1149 for further information on material and design requirements and test methods.   |
| Other skin protection                         | : Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.   |
| <b>Respiratory protection</b>                 | :   |
| Environmental exposure controls               | : Emissions from ventilation or work process equipment should be checked to ensure<br>they comply with the requirements of environmental protection legislation. In some<br>cases, fume scrubbers, filters or engineering modifications to the process equipment<br>will be necessary to reduce emissions to acceptable levels.   |

## **SECTION 10: Stability and reactivity**

| 10.1 Reactivity                            | : | No specific test data related to reactivity available for this product or its ingredients.  |
|--|---|---|
| 10.2 Chemical stability                    | : | The product is stable.  |
| 10.3 Possibility of<br>hazardous reactions | : | Under normal conditions of storage and use, hazardous reactions will not occur.   |
| 10.4 Conditions to avoid                   | : | When exposed to high temperatures may produce hazardous decomposition products.<br>Refer to protective measures listed in sections 7 and 8.               |
| 10.5 Incompatible materials                | : | Keep away from the following materials to prevent strong exothermic reactions: oxidising agents, strong alkalis, strong acids.                            |
| 10.6 Hazardous<br>decomposition products   | : | Depending on conditions, decomposition products may include the following materials: carbon oxides sulfur oxides halogenated compounds metal oxide/oxides |

## **SECTION 11: Toxicological information**

### **11.1 Information on toxicological effects**

### Acute toxicity

| Product/ingredient name   | Result                 | Species | Dose        | Exposure |
|---|------------------------|---------|-------------|----------|
|   | LC50 Inhalation Vapour | Rat     | 11 mg/l     | 4 hours  |
|   | LD50 Dermal            | Rabbit  | >5000 mg/kg | -        |
|   | LD50 Oral              | Rat     | 2.08 g/kg   | -        |
| bis-[4-(2,3-epoxipropoxi)phenyl]propane   | LD50 Dermal            | Rabbit  | 23000 mg/kg | -        |

## **SECTION 11: Toxicological information**

| Delayed and immediate effe    | ct  | s as well as chronic effects from short and long-term exposure   |
|-------------------------------|-----|--|
| <u>Short term exposure</u>    |     |  |
| Potential immediate effects   | 1   | Not available.   |
| Potential delayed effects     | :   | Not available.   |
| Long term exposure            |     |  |
| Potential immediate effects   | 1   | Not available.   |
| Potential delayed effects     | :   | Not available.   |
| Potential chronic health effe | ect | <u>s</u>   |
| Not available.                |     |  |
| <b>Conclusion/Summary</b>     | :   | Not available.   |
| General                       | :   | Prolonged or repeated contact can defat the skin and lead to irritation, cracking and/or dermatitis. Once sensitized, a severe allergic reaction may occur when subsequently exposed to very low levels. |
| Carcinogenicity               | 1   | Suspected of causing cancer. Risk of cancer depends on duration and level of exposure.   |
| Mutagenicity                  | 1   | No known significant effects or critical hazards.  |
| Reproductive toxicity         | :   | No known significant effects or critical hazards.  |
| Other information             | :   | Not available.   |

Prolonged or repeated contact may dry skin and cause irritation. Sanding and grinding dusts may be harmful if inhaled. Repeated exposure to high vapor concentrations may cause irritation of the respiratory system and permanent brain and nervous system damage. Inhalation of vapour/aerosol concentrations above the recommended exposure limits causes headaches, drowsiness and nausea and may lead to unconsciousness or death. Avoid contact with skin and clothing.

### 11.2 Information on other hazards

### **11.2.1 Endocrine disrupting properties**

Not available.

### 11.2.2 Other information

Not available.

## **SECTION 12: Ecological information**

### 12.1 Toxicity

| Product/ingredient name                 | Result                               | Species                                  | Exposure |
|---|--------------------------------------|--|----------|
| 4-methylpentan-2-one                    | Acute LC50 >179 mg/l                 | Fish                                     | 96 hours |
| bis-[4-(2,3-epoxipropoxi)phenyl]propane | Acute LC50 1.8 mg/l Fresh water      | Daphnia - <i>daphnia</i><br><i>magna</i> | 48 hours |

| Soil/water partition<br>coefficient (Koc) | : Not available. |
| Mobility                                  | : Not available. |

#### 12.5 Results of PBT and vPvB assessment

This mixture does not contain any substances that are assessed to be a PBT or a vPvB.

#### 12.6 Endocrine disrupting properties

Not available.

#### 12.7 Other adverse effects

No known significant effects or critical hazards.

### **SECTION 13: Disposal considerations**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### 13.1 Waste treatment methods

ProductMethods of disposal: The generation of waste should be avoided or minimised wherever possible. Disposal<br/>of this product, solutions and any by-products should at all times comply with the<br/>requirements of environmental protection and waste disposal legislation and any<br/>regional local authority requirements. Dispose of surplus and non-recyclable products<br/>via a licensed waste disposal contractor. Waste should not be disposed of untreated to<br/>the sewer unless fully compliant with the requirements of all authorities with jurisdiction.

Hazardous waste : Yes.

#### European waste catalogue (EWC)

|   | Waste code | Waste designation   |
|---|------------|---|

SECTION 13: Disposal considerations

| Methods of disposal | : The generation of waste should be avoided or minimised wherever possible. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible.   |
|---------------------|--|
| Type of packaging   | European waste catalogue (EWC)   |
| Container           | 15 01 06 mixed packaging   |
| Special precautions | : This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapour from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilt material and runoff and contact with soil, waterways drains and sewers. |

## **SECTION 14: Transport information**
