# SAFETY DATA SHEET

The information in this Safety Data Sheet is required pursuant to GHS UN rev. 7

Date of issue/Date of revision 29 May 2024

Version 1

| Section 1. Identification                                    |  |  |
|--|--|--|
| Product code   | : 000001189747   |  |
| Product name   | : SIGMASHIELD 880 BASE (TINTED)  |  |
| Product type   | : Liquid.  |  |
| <b>Other means of identifica</b><br>00446817; 00446822; 0047 |  |  |
| Relevant identified uses                                     | of the substance or mixture and uses advised against   |  |
| Product use  | <ul> <li>Coating.<br/>Professional applications, Used by spraying.</li> </ul>  |  |
| Uses advised against   | : Product is not intended, labelled or packaged for consumer use.  |  |
| Company/undertaking<br>identification                        | : PPG Industries Sales, Inc. and PPG Coatings (Philippines), Inc.<br>3rd Floor First Life Center<br>174 Salcedo St., Legaspi Village<br>Makati City 1229, Philippines<br>Tel # 00632- 752-6773/ Fax # 00632-752-6771 |  |
| Emergency telephone<br>number                                | : CHEMTREC +(63) 2-395-3308 (CCN 17704)  |  |

### Section 2. Hazards identification

| Classification of the | : FLAMMABLE LIQUIDS - Category 3  |
|-----------------------|---|
| substance or mixture  | SKIN CORROSION/IRRITATION - Category 2  |
|                       | SERIOUS EYE DAMAGE/ EYE IRRITATION - Category 2A  |
|                       | SKIN SENSITIZATION - Category 1   |
|                       | SPECIFIC TARGET ORGAN TOXICITY (SINGLE EXPOSURE) (Respiratory tract<br>irritation) - Category 3 |
|                       | AQUATIC HAZARD (ACUTE) - Category 3   |
|                       | AQUATIC HAZARD (LONG-TERM) - Category 3   |
|                       | Percentage of the mixture consisting of ingredient(s) of unknown hazards to the                 |
|                       | aquatic environment: 39.8%  |
| GHS label elements    |   |
| Hazard pictograms     |   |
|                       |   |
|                       |   |
|                       | $\mathbf{x}_{\mathbf{z}}$   |
|                       | $\mathbf{v}$ $\mathbf{v}$   |

Signal word

: Warning

### Section 2. Hazards identification

| Hazard statements          | : | Flammable liquid and vapor.<br>Causes skin irritation.<br>May cause an allergic skin reaction.<br>Causes serious eye irritation.<br>May cause respiratory irritation.<br>Harmful to aquatic life with long lasting effects.   |
|----------------------------|---|---|
| Precautionary statements   |   |   |
| Prevention                 | : | Wear protective gloves, protective clothing and eye or face protection. Keep away<br>from heat, hot surfaces, sparks, open flames and other ignition sources. No<br>smoking. Use only outdoors or in a well-ventilated area. Avoid release to the<br>environment. Avoid breathing vapor. Wash thoroughly after handling.<br>Contaminated work clothing should not be allowed out of the workplace.  |
| Response                   | : | IF INHALED: Remove person to fresh air and keep comfortable for breathing. Call<br>a POISON CENTER or doctor if you feel unwell. IF ON SKIN (or hair): Take off<br>immediately all contaminated clothing. Rinse skin with water. IF ON SKIN: Wash<br>with plenty of water. If skin irritation or rash occurs: Get medical advice or attention.<br>IF IN EYES: Rinse cautiously with water for several minutes. Remove contact<br>lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get<br>medical advice or attention. |
| Storage                    | : | Store locked up. Store in a well-ventilated place. Keep container tightly closed.   |
| Disposal                   | : | Dispose of contents and container in accordance with all local, regional, national and international regulations.   |
| Other hazards which do not | : | Prolonged or repeated contact may dry skin and cause irritation.  |

result in classification

### Section 3. Composition/information on ingredients

Substance/mixture

: Mixture

#### **CAS number/other identifiers**

| <b>CAS number</b> : Not applicable.   |          |             |
|---|----------|-------------|
| Ingredient name   | %        | CAS number  |
| bis-[4-(2,3-epoxipropoxi)phenyl]propane   | 10 - <20 | 1675-54-3   |
| Talc , not containing asbestiform fibres  | 10 - <20 | 14807-96-6  |
| barium sulfate  | 5 - <10  | 7727-43-7   |
| xylene  | 5 - <10  | 1330-20-7   |
| Époxy Resin (700 <mw<=1100)< td=""><td>3 - &lt;5</td><td>25036-25-3</td></mw<=1100)<>                 | 3 - <5   | 25036-25-3  |
| Phenol, methylstyrenated  | 3 - <5   | 68512-30-1  |
| 2-methylpropan-1-ol   | 1 - <3   | 78-83-1     |
| 2-methoxy-1-methylethyl acetate   | 1 - <3   | 108-65-6    |
| oxirane, mono[(C12-14-alkyloxy)methyl] derivs.  | 1 - <3   | 68609-97-2  |
| 12-hydroxyoctadecanoic acid, reaction products with 1,3-benzenedimethanamine and hexamethylenediamine | 1 - <3   | 220926-97-6 |
| ethylbenzene  | 1 - <3   | 100-41-4    |

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

SUB codes represent substances without registered CAS Numbers.

### Section 4. First aid measures

| Description of necessary | first aid measures   |
|--------------------------|--|
| Eye contact              | <ul> <li>Remove contact lenses, irrigate copiously with clean, fresh water, holding the<br/>eyelids apart for at least 10 minutes and seek immediate medical advice.</li> </ul>                  |
| Inhalation               | : Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. |
| Skin contact             | : Remove contaminated clothing and shoes. Wash skin thoroughly with soap and water or use recognized skin cleanser. Do NOT use solvents or thinners.   |
| Ingestion                | <ul> <li>If swallowed, seek medical advice immediately and show this container or label.</li> <li>Keep person warm and at rest. Do NOT induce vomiting.</li> </ul>                               |

| Most important symptoms/   | effects, acute and delayed  |  |  |
|--|---|--|--|
| Potential acute health effe  | <u>cts</u>  |  |  |
| Eye contact  | : Causes serious eye irritation.  |  |  |
| Inhalation   | : May cause respiratory irritation.   |  |  |
| Skin contact   | : Causes skin irritation. Defatting to the skin. May cause an allergic skin reaction.   |  |  |
| Ingestion  | : No known significant effects or critical hazards.   |  |  |
| Over-exposure signs/sym  | <u>otoms</u>  |  |  |
| Eye contact  | : Adverse symptoms may include the following:<br>pain or irritation<br>watering<br>redness  |  |  |
| Inhalation   | : Adverse symptoms may include the following:<br>respiratory tract irritation<br>coughing   |  |  |
| Skin contact   | : Adverse symptoms may include the following:<br>irritation<br>redness<br>dryness<br>cracking   |  |  |
| Ingestion  | : No specific data.   |  |  |
| Indication of immediate medical attention and special treatment needed, if necessary |   |  |  |
| Notes to physician   | : In case of inhalation of decomposition products in a fire, symptoms may be delayed.<br>The exposed person may need to be kept under medical surveillance for 48 hours.  |  |  |
| Specific treatments  | : No specific treatment.  |  |  |
| Protection of first-aiders   | : No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. |  |  |

See toxicological information (Section 11)

### Section 5. Fire-fighting measures

| Extinguishing media            |  |
|--------------------------------|--|
| Suitable extinguishing media   | : Use dry chemical, CO <sub>2</sub> , water spray (fog) or foam. |
| Unsuitable extinguishing media | : Do not use water jet.  |

### Section 5. Fire-fighting measures

| Specific hazards arising from the chemical        | : Flammable liquid and vapor. Runoff to sewer may create fire or explosion hazard.<br>In a fire or if heated, a pressure increase will occur and the container may burst, with<br>the risk of a subsequent explosion. This material is harmful to aquatic life with long<br>lasting effects. Fire water contaminated with this material must be contained and<br>prevented from being discharged to any waterway, sewer or drain. |
|---|---|
| Hazardous thermal decomposition products          | : Decomposition products may include the following materials:<br>carbon oxides<br>nitrogen oxides<br>sulfur oxides<br>halogenated compounds<br>metal oxide/oxides   |
| Special protective actions for fire-fighters      | : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.  |
| Special protective<br>equipment for fire-fighters | : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.   |

### Section 6. Accidental release measures

| Personal precautions, protective equipment and emergency procedures |  |  |
|---|--|--|
| For non-emergency<br>personnel                                      | : No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilled material. Shut off all ignition sources.<br>No flares, smoking or flames in hazard area. Avoid breathing vapor or mist.<br>Provide adequate ventilation. Wear appropriate respirator when ventilation is<br>inadequate. Put on appropriate personal protective equipment.  |  |
| For emergency responders  | : If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".  |  |
| Environmental precautions   | : Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). Water polluting material. May be harmful to the environment if released in large quantities.   |  |
| Methods and materials for con                                       | ntainment and cleaning up  |  |
| Small spill   | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.   |  |
| Large spill   | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal. |  |

Product code 000001189747 Product name SIGMASHIELD 880 BASE (TINTED)

### Section 7. Handling and storage

| <ul> <li>Protective measures</li> <li>Put on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Do not get in eyes or on skin or clothing. Do not ingest. Avoid breathing vapor or mist. Avoid release to the environment. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Kee in the original container or an approved alternative made from a compatible materia kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Take</li> </ul> | Precautions for safe handling |   |                                   |
|---|-------------------------------|---|-----------------------------------|
| precautionary measures against electrostatic discharges. Empty containers retain product residue and can be hazardous. Do not reuse container.  | Protective measures           | y of skin sensitization problems should not be employed in any process in<br>this product is used. Do not get in eyes or on skin or clothing. Do not inge<br>breathing vapor or mist. Avoid release to the environment. Use only with<br>late ventilation. Wear appropriate respirator when ventilation is inadequate<br>t enter storage areas and confined spaces unless adequately ventilated. Ho<br>original container or an approved alternative made from a compatible mate<br>ghtly closed when not in use. Store and use away from heat, sparks, oper<br>or any other ignition source. Use explosion-proof electrical (ventilating,<br>g and material handling) equipment. Use only non-sparking tools. Take<br>utionary measures against electrostatic discharges. Empty containers retar | est.<br>e.<br>Keep<br>erial,<br>1 |
| Advice on general<br>occupational hygiene<br>: Eating, drinking and smoking should be prohibited in areas where this material is<br>handled, stored and processed. Workers should wash hands and face before<br>eating, drinking and smoking. Remove contaminated clothing and protective<br>equipment before entering eating areas. See also Section 8 for additional<br>information on hygiene measures.  |                               | ed, stored and processed. Workers should wash hands and face before<br>, drinking and smoking. Remove contaminated clothing and protective<br>ment before entering eating areas. See also Section 8 for additional  | i                                 |
| Conditions for safe storage,<br>including any<br>incompatibilities Store between the following temperatures: 0 to 35°C (32 to 95°F). Store in<br>accordance with local regulations. Store in a segregated and approved area. Store<br>in original container protected from direct sunlight in a dry, cool and well-ventilated<br>area, away from incompatible materials (see Section 10) and food and drink. Store<br>locked up. Eliminate all ignition sources. Separate from oxidizing materials. Keep<br>container tightly closed and sealed until ready for use. Containers that have been<br>opened must be carefully resealed and kept upright to prevent leakage. Do not<br>store in unlabeled containers. Use appropriate containment to avoid environmental<br>contamination. See Section 10 for incompatible materials before handling or use.                                    | including any                 | dance with local regulations. Store in a segregated and approved area. Si<br>inal container protected from direct sunlight in a dry, cool and well-ventilate<br>away from incompatible materials (see Section 10) and food and drink. St<br>d up. Eliminate all ignition sources. Separate from oxidizing materials. Ke<br>iner tightly closed and sealed until ready for use. Containers that have bee<br>ad must be carefully resealed and kept upright to prevent leakage. Do not<br>in unlabeled containers. Use appropriate containment to avoid environment   | ed<br>ore<br>ep<br>n<br>ntal      |

### Section 8. Exposure controls/personal protection

#### **Control parameters**

#### **Occupational exposure limits**

| Ingredient name                                     | Exposure limits                                    |
|---|--|
| Talc , not containing asbestiform fibres            | TLV (Philippines, 4/2016).                         |
|   | TLV: 20 mppf 8 hours. Form: Dust                   |
| barium sulfate                                      | ACGIH TLV (United States, 7/2023).                 |
|   | TWA: 5 mg/m <sup>3</sup> 8 hours. Form: Inhalable  |
|   | fraction   |
| xylene  | TLV (Philippines, 4/2016). [Xylene]                |
|   | TLV: 0.1 mg/m <sup>3</sup> 8 hours.                |
| 2-methylpropan-1-ol                                 | TLV (Philippines, 4/2016).                         |
|   | TLV: 300 mg/m <sup>3</sup> 8 hours.                |
|   | TLV: 100 ppm 8 hours.                              |
| 12-hydroxyoctadecanoic acid, reaction products with | ACGIH TLV (United States).                         |
| 1,3-benzenedimethanamine and hexamethylenediamine   |  |
| · ·   | TWA: 10 mg/m <sup>3</sup> Form: Inhalable particle |
|   | TWA: 3 mg/m <sup>3</sup> , (inhalable dust) Form:  |
|   | Respirable particle                                |
| ethylbenzene  | TLV (Philippines, 4/2016).                         |
|   | TLV-Ceiling: 435 mg/m <sup>3</sup> 8 hours.        |
|   | TLV-Ceiling: 100 ppm 8 hours.                      |

### Section 8. Exposure controls/personal protection

| Recommended monitoring procedures   | :         | Reference should be made to appropriate monitoring standards. Reference to national guidance documents for methods for the determination of hazardous substances will also be required.   |
|-------------------------------------|-----------|---|
| Appropriate engineering<br>controls | :         | Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapor or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.   |
| Environmental exposure controls     | :         | Emissions from ventilation or work process equipment should be checked to ensure<br>they comply with the requirements of environmental protection legislation. In some<br>cases, fume scrubbers, filters or engineering modifications to the process<br>equipment will be necessary to reduce emissions to acceptable levels.   |
| Individual protection measure       | <u>es</u> |   |
| Hygiene measures                    | :         | Wash hands, forearms and face thoroughly after handling chemical products, before<br>eating, smoking and using the lavatory and at the end of the working period.<br>Appropriate techniques should be used to remove potentially contaminated clothing.<br>Contaminated work clothing should not be allowed out of the workplace. Wash<br>contaminated clothing before reusing. Ensure that eyewash stations and safety<br>showers are close to the workstation location.   |
| Eye/face protection                 | :         | Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles.  |
| Skin protection                     |           |   |
| Hand protection                     | :         | Chemical-resistant, impervious gloves complying with an approved standard should<br>be worn at all times when handling chemical products if a risk assessment indicates<br>this is necessary. Considering the parameters specified by the glove manufacturer,<br>check during use that the gloves are still retaining their protective properties. It<br>should be noted that the time to breakthrough for any glove material may be<br>different for different glove manufacturers. In the case of mixtures, consisting of<br>several substances, the protection time of the gloves cannot be accurately<br>estimated. |
| Gloves                              | :         | butyl rubber  |
| Body protection                     | :         | Personal protective equipment for the body should be selected based on the task<br>being performed and the risks involved and should be approved by a specialist<br>before handling this product. When there is a risk of ignition from static electricity,<br>wear anti-static protective clothing. For the greatest protection from static<br>discharges, clothing should include anti-static overalls, boots and gloves.   |
| Other skin protection               | :         | Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.   |
| Respiratory protection              | :         | Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use.  |

### Section 9. Physical and chemical properties

The conditions of measurement of all properties are at standard temperature and pressure unless otherwise indicated.

| Appearance  |    |                         |   |        |                  |       |                       |           |            |        |
|---|----|-------------------------|---|--------|------------------|-------|-----------------------|-----------|------------|--------|
| Physical state  | ÷  | Liquid.                 |   |        |                  |       |                       |           |            |        |
| Color<br>Odor   | ÷  | Various                 |   |        |                  |       |                       |           |            |        |
|   | ÷  | Not available.          | romatic.  |        |                  |       |                       |           |            |        |
| Odor threshold  | ÷. |                         |   |        |                  |       |                       |           |            |        |
| Melting point/freezing point                            |    |                         | ot available.   |        |                  |       |                       |           |            |        |

## Section 10. Stability and reactivity

|                                    | Philippines   | Page: 7/14         |
|------------------------------------|---|--------------------|
| Conditions to avoid                | : When exposed to high temperatures may produce hazardous deco products.    | mposition          |
| Possibility of hazardous reactions | : Under normal conditions of storage and use, hazardous reactions w         | vill not occur.    |
| Chemical stability                 | : The product is stable.  |                    |
| Reactivity                         | : No specific test data related to reactivity available for this product of | r its ingredients. |

### Section 10. Stability and reactivity

| Incompatible materials           | : | Keep away from the following materials to prevent strong exothermic reactions: oxidizing agents, strong alkalis, strong acids.  |
|----------------------------------|---|---|
| Hazardous decomposition products | : | Depending on conditions, decomposition products may include the following materials: carbon oxides nitrogen oxides sulfur oxides halogenated compounds metal oxide/oxides |
| Hazardous polymerization         | 1 | Under normal conditions of storage and use, hazardous polymerization will not occur.  |

### Section 11. Toxicological information

#### Information on toxicological effects

Acute toxicity

| Product/ingredient name  | Result                          | Species | Dose        | Exposure |
|--|---------------------------------|---------|-------------|----------|
| bis-[4-(2,3-epoxipropoxi)  | LD50 Dermal                     | Rabbit  | 23000 mg/kg | -        |

### Section 11. Toxicological information

| General               | : Prolonged or repeated contact can defat the skin and lead to irritation, cracking and/<br>or dermatitis. Once sensitized, a severe allergic reaction may occur when<br>subsequently exposed to very low levels. |
|-----------------------|---|
| Carcinogenicity       | : No known significant effects or critical hazards.   |
| Mutagenicity          | : No known significant effects or critical hazards.   |
| Reproductive toxicity | : No known significant effects or critical hazards.   |

#### Numerical measures of toxicity

#### Acute toxicity estimates

| Route                        | ATE value      |
|------------------------------|----------------|
| Oral                         | 16604.32 mg/kg |
| Dermal                       | 8334.46 mg/kg  |
| Inhalation (vapors)          | 93.54 mg/l     |
| Inhalation (dusts and mists) | 11.26 mg/l     |

#### Other information

Prolonged or repeated contact may dry skin and cause irritation. Sanding and grinding dusts may be harmful if inhaled. Repeated exposure to high vapor concentrations may cause irritation of the respiratory system and permanent brain and nervous system damage. Inhalation of vapor/aerosol concentrations above the recommended exposure limits causes headaches, drowsiness and nausea and may lead to unconsciousness or death. Avoid contact with skin and clothing.

### Section 12. Ecological information

#### <u>Mobility in soil</u>

Soil/water partition: Not available.coefficient (Koc)

Other adverse effects

: No known significant effects or critical hazards.

### Section 13. Disposal considerations

Disposal methods : The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapor from product residues may create a Product code 000001189747 Product name SIGMASHIELD 880 BASE (TINTED)

### Section 13. Disposal considerations

highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

### Section 14. Transport information
