# SECTION 1: Identification of the substance/mixture and of the company/ undertaking

: 7 June 2024

Version

: 18.02

| 1.1 Product identifier                            |   |
|---|---|
| Product name                                      | : SIGMATHERM 350 ALUMINIUM  |
| Product code                                      | : 00168790  |
| Other means of identificat                        | ion   |
| Not available.                                    |   |
| 1.2 Relevant identified uses                      | s of the substance or mixture and uses advised against            |
| Product use                                       | : Professional applications, Used by spraying.                    |
| Use of the substance/<br>mixture                  | : Coating.  |
| Uses advised against                              | : Product is not intended, labelled or packaged for consumer use. |
| 1.3 Details of the supplier of                    | of the safety data sheet  |
| Pittsburgh Paints Nigeria Lir                     |   |
| Nigeria   | stop, Badagry Expressway, Orile Iganmu, Lagos                     |
| Tel: 00 234 (0) 8138672483                        |   |
| e-mail address of person responsible for this SDS | : PS.ACEMEA@ppg.com   |
| 1.4 Emergency telephone number                    | : 00234 127 173 85  |

# **SECTION 2: Hazards identification**

2.1 Classification of the substance or mixture Product definition : Mixture Classification according to Regulation (EC) No. 1272/2008 [CLP/GHS] Flam. Liq. 3, H226 Skin Irrit. 2, H315 Eye Irrit. 2, H319 Carc. 1B, H350 STOT SE 3, H335 STOT SE 3, H336 STOT RE 2, H373 Aquatic Chronic 2, H411 The product is classified as hazardous according to Regulation (EC) 1272/2008 as amended.

See Section 16 for the full text of the H statements declared above.

See Section 11 for more detailed information on health effects and symptoms.

#### 2.2 Label elements

| Code : 00168790   | Date of issue/Date of revision : 7 June 2024   |
|---|--|
| GMATHERM 350 ALUMINIU   | JM   |
| SECTION 2: Hazards  | dentification  |
| Hazard pictograms   |  |
| Signal word   | : Danger   |
| Hazard statements   | <ul> <li>Flammable liquid and vapour.<br/>Causes skin irritation.<br/>Causes serious eye irritation.<br/>May cause respiratory irritation.<br/>May cause drowsiness or dizziness.<br/>May cause cancer.<br/>May cause damage to organs through prolonged or repeated exposure.<br/>Toxic to aquatic life with long lasting effects.</li> </ul> |
| Precautionary statements  |  |
| Prevention  | : Wear protective gloves, protective clothing and eye or face protection. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Avoir release to the environment.   |
| Response  | : Collect spillage.  |
| Storage   | : Store in a well-ventilated place. Keep container tightly closed.   |
| Disposal  | <ul> <li>Dispose of contents and container in accordance with all local, regional, national and<br/>international regulations.</li> <li>P280, P210, P273, P391, P403 + P233, P501</li> </ul>   |
| Hazardous ingredients   | <ul> <li>         Fydrocarbons, C9, aromatics &gt; 0.1% cumene<br/>xylene<br/>ethylbenzene<br/>Solvent naphtha (petroleum), heavy arom. Nota(s) P         </li> </ul>  |
| Supplemental label elements   | : Not applicable.  |
| Annex XVII - Restrictions<br>on the manufacture,<br>placing on the market and<br>use of certain dangerous<br>substances, mixtures and<br>articles | : Restricted to professional users.  |
| Special packaging requiren  | <u>nents</u>   |
| Containers to be fitted<br>with child-resistant<br>fastenings   | : Not applicable.  |
| Tactile warning of danger   | : Not applicable.  |
| 2.3 Other hazards   |  |
| Product meets the criteria<br>for PBT or vPvB   | : This mixture does not contain any substances that are assessed to be a PBT or a vPv  |
| Other hazards which do not result in classification   | : Prolonged or repeated contact may dry skin and cause irritation.   |

Code : 00168790

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment, are PBTs, vPvBs or Substances of equivalent concern, or have been assigned a workplace exposure limit and hence require reporting in this section.

Xylene: Several REACH registrations cover the REACH registered substance with xylene isomers, ethylbenzene (and toluene). The other REACH Registrations include: 01-2119555267-33 reaction mass of ethylbenzene and m-xylene and p-xylene, 01-2119486136-34 Aromatic hydrocarbons, C8, 01-2119539452-40 reaction mass of ethylbenzene and xylene. <u>Type</u>

[1] Substance classified with a health or environmental hazard

[2] Substance with a workplace exposure limit

Occupational exposure limits, if available, are listed in Section 8.

SUB codes represent substances without registered CAS Numbers.

| Code      | : 00168790      | Date of issue/Date of revision | : 7 June 2024 |
|-----------|-----------------|--------------------------------|---------------|
| SIGMATHER | M 350 ALUMINIUM |                                |               |

# **SECTION 4: First aid measures**

| 4.1 Description of first aid m | easures   |
|--------------------------------|---|
| Eye contact                    | <ul> <li>Remove contact lenses, irrigate copiously with clean, fresh water, holding the eyelids<br/>apart for at least 10 minutes and seek immediate medical advice.</li> </ul>   |
| Inhalation                     | : Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is<br>irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained<br>personnel.  |
| Skin contact                   | : Remove contaminated clothing and shoes. Wash skin thoroughly with soap and water<br>or use recognised skin cleanser. Do NOT use solvents or thinners.   |
| Ingestion                      | : If swallowed, seek medical advice immediately and show the container or label. Keep person warm and at rest. Do NOT induce vomiting.  |
| Protection of first-aiders     | : No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. |

#### 4.2 Most important symptoms and effects, both acute and delayed

| Potential acute health       | effects   |
|------------------------------|---|
| Eye contact                  | : Causes serious eye irritation.  |
| Inhalation                   | <ul> <li>Can cause central nervous system (CNS) depression. May cause drowsiness or<br/>dizziness. May cause respiratory irritation.</li> </ul>   |
| Skin contact                 | : Causes skin irritation. Defatting to the skin.  |
| Ingestion                    | : Can cause central nervous system (CNS) depression.  |
| <u>Over-exposure signs/s</u> | <u>ymptoms</u>  |
| Eye contact                  | : Adverse symptoms may include the following:<br>pain or irritation<br>watering<br>redness  |
| Inhalation                   | : Adverse symptoms may include the following:<br>respiratory tract irritation<br>coughing<br>nausea or vomiting<br>headache<br>drowsiness/fatigue<br>dizziness/vertigo<br>unconsciousness |
| Skin contact                 | : Adverse symptoms may include the following:<br>irritation<br>redness<br>dryness<br>cracking   |
| Ingestion                    | : No specific data.   |
| 4.3 Indication of any imr    | nediate medical attention and special treatment needed  |
| Notes to physician           | <ul> <li>Treat symptomatically. Contact poison treatment specialist immediately if large<br/>quantities have been ingested or inhaled.</li> </ul>   |
| Specific treatments          | : No specific treatment.  |
|                              |   |

| Code      | : 00168790      | Date of issue/Date of revision | : 7 June 2024 |
|-----------|-----------------|--------------------------------|---------------|
| SIGMATHER | M 350 ALUMINIUM |                                |               |

# SECTION 5: Firefighting measures

| -  | -  |
|--|--|
| 5.1 Extinguishing media                        |  |
| Suitable extinguishing media                   | : Use dry chemical, CO <sub>2</sub> , water spray (fog) or foam.   |
| Unsuitable extinguishing media                 | : Do not use water jet.  |
| 5.2 Special hazards arising f                  | rom the substance or mixture   |
| Hazards from the substance or mixture          | : Flammable liquid and vapour. Runoff to sewer may create fire or explosion hazard. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion. This material is toxic to aquatic life with long lasting effects. Fire water contaminated with this material must be contained and prevented from being discharged to any waterway, sewer or drain. |
| Hazardous combustion products                  | : Decomposition products may include the following materials:<br>carbon oxides<br>metal oxide/oxides   |
| 5.3 Advice for firefighters                    |  |
| Special precautions for<br>fire-fighters       | : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.   |
| Special protective equipment for fire-fighters | : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. Clothing for fire-fighters (including helmets, protective boots and gloves) conforming to European standard EN 469 will provide a basic level of protection for chemical incidents.  |

### **SECTION 6: Accidental release measures**

#### 6.1 Personal precautions, protective equipment and emergency procedures

|                                | ······································   |
|--------------------------------|--|
| For non-emergency<br>personnel | : No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilt material. Shut off all ignition sources. No<br>flares, smoking or flames in hazard area. Avoid breathing vapour or mist. Provide<br>adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put<br>on appropriate personal protective equipment. |
| For emergency responders       | : If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".  |
| 6.2 Environmental precautions  | : Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). Water polluting material. May be harmful to the environment if released in large quantities. Collect spillage.   |
| 6.3 Methods and material for   | containment and cleaning up  |
| Small spill                    | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.   |

| Code | : 00168790 | Date of issue/Date of revision | : 7 June 2024 |
|------|------------|--------------------------------|---------------|
|      |            |                                |               |

SIGMATHERM 350 ALUMINIUM

#### **SECTION 6: Accidental release measures**

| Large spill                     | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach the release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations. Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilt product. |
|---------------------------------|--|
| 6.4 Reference to other sections | <ul> <li>See Section 1 for emergency contact information.</li> <li>See Section 8 for information on appropriate personal protective equipment.</li> <li>See Section 13 for additional waste treatment information.</li> </ul>  |

### **SECTION 7: Handling and storage**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### 7.1 Precautions for safe handling

| Protective measures  | : Put on appropriate personal protective equipment (see Section 8). Avoid exposure -<br>obtain special instructions before use. Do not handle until all safety precautions have<br>been read and understood. Do not get in eyes or on skin or clothing. Do not breathe<br>vapour or mist. Do not ingest. Avoid release to the environment. Use only with<br>adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do<br>not enter storage areas and confined spaces unless adequately ventilated. Keep in the<br>original container or an approved alternative made from a compatible material, kept<br>tightly closed when not in use. Store and use away from heat, sparks, open flame or<br>any other ignition source. Use explosion-proof electrical (ventilating, lighting and<br>material handling) equipment. Use only non-sparking tools. Take precautionary<br>measures against electrostatic discharges. Empty containers retain product residue<br>and can be hazardous. Do not reuse container. |
|--|---|
| Advice on general occupational hygiene                                 | : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.   |
| 7.2 Conditions for safe<br>storage, including any<br>incompatibilities | : Store between the following temperatures: 0 to 35°C (32 to 95°F). Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Eliminate all ignition sources. Separate from oxidising materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.  |

#### 7.3 Specific end use(s)

See Section 1.2 for Identified uses.

| Code : 00168790          | Date of issue/Date of revision | : 7 June 2024 |
|--------------------------|--------------------------------|---------------|
| SIGMATHERM 350 ALUMINIUM |                                |               |

## **SECTION 8: Exposure controls/personal protection**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### 8.1 Control parameters

|--|--|
|  | as included in the user's risk assessment.   |
| Gloves                                     | : For prolonged or repeated handling, use the following type of gloves:  |
|  | Not recommended: nitrile rubber<br>Recommended: polyvinyl alcohol (PVA), Viton®  |
| Body protection                            | : Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. When there is a risk of ignition from static electricity, wear anti-static protective clothing. For the greatest protection from static discharges, clothing should include anti-static overalls, boots and gloves. Refer to European Standard EN 1149 for further information on material and design requirements and test methods. |
| Other skin protection                      | Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.  |
| <b>Respiratory protection</b>              | :  |
| Environmental exposure controls            | : Emissions from ventilation or work process equipment should be checked to ensure<br>they comply with the requirements of environmental protection legislation. In some<br>cases, fume scrubbers, filters or engineering modifications to the process equipment<br>will be necessary to reduce emissions to acceptable levels.  |

# **SECTION 9: Physical and chemical properties**

The conditions of measurement of all properties are at standard temperature and pressure unless otherwise indicated.

| Not available.                 |   |
| Conclusion/Summary             | : Not available.  |
| General                        | : May cause damage to organs through prolonged or repeated exposure. Prolonged or repeated contact can defat the skin and lead to irritation, cracking and/or dermatitis.                 |
| Carcinogenicity                | : May cause cancer. Risk of cancer depends on duration and level of exposure.   |
| Mutagenicity                   | : No known significant effects or critical hazards.   |
| Reproductive toxicity          | : No known significant effects or critical hazards.   |
| Other information              | : Not available.  |

Repeated exposure to high vapor concentrations may cause irritation of the respiratory system and permanent brain an nervous system damage. Inhalation of vapour/aerosol concentrations above the recommended exposure limits causes headaches, drowsiness and nausea and may lead to unconsciousness or death. Avoid contact with skin and clothing.

### 11.2 Information on other hazards

#### 11.2.1 Endocrine disrupting properties

### **SECTION 13: Disposal considerations**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### 13.1 Waste treatment methods

| Product                  |    |   |
|--------------------------|----|---|
| Methods of disposal      | :  | The generation of waste should be avoided or minimised wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. |
| Hazardous waste          | :  | Yes.  |
| European waste catalogue | (E | <u>WC)</u>  |

| Waste code | Waste designation   |  |
|------------|---|--|
| 08 01 11*  | waste paint and varnish containing organic solvents or other hazardous substances |  |

#### Packaging

Methods of disposal

: The generation of waste should be avoided or minimised wherever possible. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible.

| Type of packaging   | European waste catalogue (EWC)  |   |  |
|---------------------|---|---|--|
| Container           | 15 01 06  | mixed packaging   |  |
