## **SAFETY DATA SHEET**

Date of issue/Date of revision

: 11 June 2024

Version

: 2.05

## SECTION 1: Identification of the substance/mixture and of the company/ undertaking

| <b>1.1 Product identifie</b> | r |
|------------------------------|---|
|------------------------------|---|

| Product name | : SIG |
|--------------|-------|
| Product code | : 000 |

: SIGMACOVER 256 BASE (LEAD FREE) : 000001011155

#### Other means of identification

**1**49968; 00175856; 00175859; 00175860; 00182413; 00198666; 00220209; 00224208; 00226487; 00237341; 00249757; 00254143; 00270012; 00270013; 00270014

#### 1.2 Relevant identified uses of the substance or mixture and uses advised against

| Product use                      | : Professional applications, Used by spraying.                    |
|----------------------------------|---|
| Use of the substance/<br>mixture | : Coating.  |
| Uses advised against             | : Product is not intended, labelled or packaged for consumer use. |

#### 1.3 Details of the supplier of the safety data sheet

Sigma Paint Saudi Arabia Ltd. PO Box 7509, Dammam 31472 Saudi Arabia Tel: 00966 138 47 31 00 Fax: 00966 138 47 17 34 e-mail address of person : PS.ACEMEA@ppg.com responsible for this SDS 1.4 Emergency telephone : 00966 138473100 extn 1001 number

## **SECTION 2: Hazards identification**

#### 2.1 Classification of the substance or mixture Product definition : Mixture <u>Classification according to Regulation (EC) No. 1272/2008 [CLP/GHS]</u>

Flam. Liq. 3, H226 Skin Irrit. 2, H315 Eye Dam. 1, H318 Skin Sens. 1, H317 Aquatic Chronic 2, H411

The product is classified as hazardous according to Regulation (EC) 1272/2008 as amended.

See Section 16 for the full text of the H statements declared above.

See Section 11 for more detailed information on health effects and symptoms.

#### 2.2 Label elements

| Code : 000001011155   | Date of issue/Date of revision : 11 June 2  | 2024      |
|---|---|-----------|
| SIGMACOVER 256 BASE (LEA  |   |           |
| SECTION 2: Hazards  | dentification   |           |
| Hazard pictograms   |   |           |
| Signal word   | Danger  |           |

statements declared

above.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment, are PBTs, vPvBs or Substances of equivalent concern, or have been assigned a workplace exposure limit and hence require reporting in this section.

[1] Substance classified with a health or environmental hazard

[2] Substance with a workplace exposure limit

[3] Substance of equivalent concern

This mixture contains  $\geq$  1% of titanium dioxide. The Annex VI classification of titanium dioxide does not apply to this mixture according to Note 10.

Occupational exposure limits, if available, are listed in Section 8.

### **SECTION 4: First aid measures**

#### 4.1 Description of first aid measures

| Eye contact                | : Check for and remove any contact lenses. Immediately flush eyes with running water for at least 15 minutes, keeping eyelids open. Seek immediate medical attention.   |
|----------------------------|---|
| Inhalation                 | <ul> <li>Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is<br/>irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained<br/>personnel.</li> </ul>  |
| Skin contact               | <ul> <li>Remove contaminated clothing and shoes. Wash skin thoroughly with soap and water<br/>or use recognised skin cleanser. Do NOT use solvents or thinners.</li> </ul>  |
| Ingestion                  | <ul> <li>If swallowed, seek medical advice immediately and show the container or label. Keep<br/>person warm and at rest. Do NOT induce vomiting.</li> </ul>  |
| Protection of first-aiders | : No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. |

|                              | is and effects, both acute and delayed  |
|------------------------------|---|
| Potential acute health effec | ts  |
| Eye contact                  | : Causes serious eye damage.  |
| Inhalation                   | : No known significant effects or critical hazards.                                   |
| Skin contact                 | : Causes skin irritation. Defatting to the skin. May cause an allergic skin reaction. |
| Ingestion                    | : Corrosive to the digestive tract. Causes burns.                                     |
| Over-exposure signs/symp     | <u>toms</u>   |
| Eye contact                  | : Adverse symptoms may include the following:<br>pain<br>watering<br>redness          |
| Inhalation                   | : No specific data.   |

| Code : 000001011155                               |  | Date of issue/Date of revision  | : 11 June 2024   |

#### **SECTION 6: Accidental release measures**

| For emergency responders        | :  | If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".  |
|---------------------------------|----|--|
| 6.2 Environmental precautions   | :  | Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). Water polluting material. May be harmful to the environment if released in large quantities. Collect spillage.   |
| 6.3 Methods and material for    | со | ntainment and cleaning up  |
| Small spill                     | :  | Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.   |
| Large spill                     | :  | Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach the release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations. Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilt product. |
| 6.4 Reference to other sections | :  | See Section 1 for emergency contact information.<br>See Section 8 for information on appropriate personal protective equipment.<br>See Section 13 for additional waste treatment information.  |

## **SECTION 7: Handling and storage**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### 7.1 Precautions for safe handling

| Protective measures  | : | history of skin sensitization problems<br>this product is used. Do not get in e<br>mist. Do not ingest. Avoid release t<br>ventilation. Wear appropriate respire<br>storage areas and confined spaces<br>container or an approved alternative<br>closed when not in use. Store and u<br>ignition source. Use explosion-proor<br>handling) equipment. Use only non- | n appropriate personal protective equipment (see Section 8). Persons with a<br>y of skin sensitization problems should not be employed in any process in which<br>roduct is used. Do not get in eyes or on skin or clothing. Do not breathe vapour or<br>Do not ingest. Avoid release to the environment. Use only with adequate<br>ation. Wear appropriate respirator when ventilation is inadequate. Do not enter<br>ge areas and confined spaces unless adequately ventilated. Keep in the original<br>iner or an approved alternative made from a compatible material, kept tightly<br>d when not in use. Store and use away from heat, sparks, open flame or any other<br>on source. Use explosion-proof electrical (ventilating, lighting and material<br>ing) equipment. Use only non-sparking tools. Take precautionary measures<br>st electrostatic discharges. Empty containers retain product residue and can be<br>rdous. Do not reuse container. |  |  |
|--|---|--|---|--|--|
| Advice on general occupational hygiene                                 | : | Eating, drinking and smoking should<br>handled, stored and processed. Wo<br>drinking and smoking. Remove con<br>entering eating areas. See also Sec<br>measures.   | orkers should wash hands and face taminated clothing and protective e   | before eating,<br>quipment before  |  |
| 7.2 Conditions for safe<br>storage, including any<br>incompatibilities | : | Store between the following tempera<br>with local regulations. Store in a sec<br>container protected from direct sunli<br>from incompatible materials (see Se<br>Eliminate all ignition sources. Separ<br>closed and sealed until ready for use<br>carefully resealed and kept upright to  | gregated and approved area. Store<br>ght in a dry, cool and well-ventilated<br>ction 10) and food and drink. Store<br>rate from oxidising materials. Keep<br>e. Containers that have been open  | e in original<br>d area, away<br>e locked up.<br>o container tightly<br>ed must be |  |

|                                 |   | -   |
| Hygiene measures                | : | Wash hands, forearms and face thoroughly after handling chemical products, before<br>eating, smoking and using the lavatory and at the end of the working period.<br>Appropriate techniques should be used to remove potentially contaminated clothing.<br>Contaminated work clothing should not be allowed out of the workplace. Wash<br>contaminated clothing before reusing. Ensure that eyewash stations and safety<br>showers are close to the workstation location.   |
| Eye/face protection             | 1 | Chemical splash goggles and face shield.  |
| Skin protection                 |   |   |
| Hand protection                 | : | Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated. When prolonged or frequently repeated contact may occur, a glove with a protection class of 6 (breakthrough time greater than 480 minutes according to EN 374) is recommended. When only brief contact is expected, a glove with a protection class of 2 or higher (breakthrough time greater than 30 minutes according to EN 374) is recommended. The user must check that the final choice of type of glove selected for handling this product is the most appropriate and takes into account the particular conditions of use, as included in the user's risk assessment. |
| Gloves                          | : | butyl rubber  |
| Body protection                 | : | Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. When there is a risk of ignition from static electricity, wear anti-<br>static protective clothing. For the greatest protection from static discharges, clothing should include anti-static overalls, boots and gloves. Refer to European Standard EN 1149 for further information on material and design requirements and test methods.  |
| Other skin protection           |   | Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.   |
| <b>Respiratory protection</b>   | : |   |
| Environmental exposure controls | : | Emissions from ventilation or work process equipment should be checked to ensure<br>they comply with the requirements of environmental protection legislation. In some<br>cases, fume scrubbers, filters or engineering modifications to the process equipment<br>will be necessary to reduce emissions to acceptable levels.   |

### **SECTION 9: Physical and chemical properties**

The conditions of measurement of all properties are at standard temperature and pressure unless otherwise indicated.

## **SECTION 11: Toxicological information**

| <b>Conclusion/Summary</b> | : Not available.   |
|---------------------------|--|
| General                   | <ul> <li>Prolonged or repeated contact can defat the skin and lead to irritation, cracking and/or<br/>dermatitis. Once sensitized, a severe allergic reaction may occur when subsequently<br/>exposed to very low levels.</li> </ul> |
| Carcinogenicity           | : No known significant effects or critical hazards.  |
| Mutagenicity              | : No known significant effects or critical hazards.  |
| Reproductive toxicity     | : No known significant effects or critical hazards.  |
| Other information         | : Not available.   |

Causes digestive tract burns. Prolonged or repeated contact may dry skin and cause irritation. Sanding and grinding dusts may be harmful if inhaled. Repeated exposure to high vapor concentrations may cause irritation of the respiratory system and permanent brain and nervous system damage. Inhalation of vapour/aerosol concentrations above the recommended exposure limits causes headaches, drowsiness and nausea and may lead to unconsciousness or death. Avoid contact with skin and clothing.

#### 11.2 Information on other hazards

**11.2.1 Endocrine disrupting properties** 

Not available.

11.2.2 Other information

Not available.

## **SECTION 12: Ecological information**

#### 12.1 Toxicity

| Product/ingredient name    | Result                                 | Species                                  | Exposure |
|----------------------------|--|--|----------|
| rizinc bis(orthophosphate) | Acute LC50 0.112 mg/l                  | Fish                                     | 96 hours |

Mobility : Not available.

#### 12.5 Results of PBT and vPvB assessment

This mixture does not contain any substances that are assessed to be a PBT or a vPvB.

#### 12.6 Endocrine disrupting properties

May cause endocrine disruption.

#### 12.7 Other adverse effects

No known significant effects or critical hazards.

### **SECTION 13: Disposal considerations**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### **13.1 Waste treatment methods**

#### Product

Methods of disposal: The generation of waste should be avoided or minimised wherever possible. Disposal<br/>of this product, solutions and any by-products should at all times comply with the<br/>requirements of environmental protection and waste disposal legislation and any<br/>regional local authority requirements. Dispose of surplus and non-recyclable products<br/>via a licensed waste disposal contractor. Waste should not be disposed of untreated to<br/>the sewer unless fully compliant with the requirements of all authorities with jurisdiction.

Hazardous waste : The classification of the product may meet the criteria for a hazardous waste.

#### European waste catalogue (EWC)

| Waste code                       | Waste designation  |
|----------------------------------|--|
| 08 01 11*                        | waste paint and varnish containing organic solvents or other hazardous substances  |
| Packaging<br>Methods of disposal | : The generation of waste should be avoided or minimised wherever possible. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. |
