# **SAFETY DATA SHEET**

Safety Data Sheet according to GB/T 16483-2008 and GB/T 17519-2013

Date of issue/Date of revision 11 June 2024 Version 1.07

| Section 1. Chem  | ical product and company identification   |
|--|---|
| Product code   | : 000001011146  |
| Product name   | : SIGMAZINC 19  |
| Product name   | : SIGMAZINC 19  |
| Other means of identification                              | : 00136782; 00136783; 00156721  |
| Product type   | : Liquid.   |
| Relevant identified uses o                                 | f the substance or mixture and uses advised against   |
| Product use  | : Professional applications, Used by spraying.  |
| Use of the substance/<br>mixture                           | : Coating.  |
| Uses advised against                                       | : Not applicable.   |
| Supplier's details   | : PPG Coatings (Kunshan) Co., Ltd<br>53 Jinyang Road, Lujia Town,<br>215331 Kunshan City, Jiangsu Province, P.R. China<br>Tel: 86 512 57678859 Fax: 86 512 57678857 |
| Emergency telephone<br>number (with hours of<br>operation) | : 00 86 532 83889090  |

# Section 2. Hazards identification

Classification of the substance or mixture according to GB 13690-2009 and GB 30000-2013

#### Emergency overview

Liquid. Gray. Characteristic. Flammable liquid and vapor. Causes mild skin irritation. Very toxic to aquatic life. Very toxic to aquatic life with long lasting effects. If skin irritation occurs: Get medical advice or attention. See Section 12 for environmental precautions.

| Classification of the substance or mixture | : FLAMMABLE LIQUIDS - Category 3<br>SKIN CORROSION/IRRITATION - Category 3<br>AQUATIC HAZARD (ACUTE) - Category 1<br>AQUATIC HAZARD (LONG-TERM) - Category 1 |
|--|--|
|  | AQUATIC HAZARD (LONG-TERM) - Category 1  |

#### GHS label elements

### Section 2. Hazards identification

| Hazard pictograms              |  |
|--------------------------------|--|
| Signal word                    | : Warning  |
| Hazard statements              | : Flammable liquid and vapor.<br>Causes mild skin irritation.<br>Very toxic to aquatic life.<br>Very toxic to aquatic life with long lasting effects.  |
| Precautionary statements       |  |
| Prevention                     | : Wear protective gloves, protective clothing and eye or face protection. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Use explosion-proof electrical, ventilating or lighting equipment. Use non-sparking tools. Take action to prevent static discharges. Keep container tightly closed. Avoid release to the environment. |
| Response                       | <ul> <li>Collect spillage. IF ON SKIN (or hair): Take off immediately all contaminated<br/>clothing. Rinse skin with water. If skin irritation occurs: Get medical advice or<br/>attention.</li> </ul>   |
| Suitable extinguishing media   | : Use dry chemical, CO <sub>2</sub> , water spray (fog) or foam.   |
| Storage                        | : Store in a well-ventilated place. Keep cool.   |
| Disposal                       | : Dispose of contents and container in accordance with all local, regional, national and international regulations.  |
| Physical and chemical hazards  | : Flammable liquid and vapor.  |
| Health hazards                 | : Causes mild skin irritation.   |
| Symptoms related to the phy    | vsical, chemical and toxicological characteristics   |
| Eye contact                    | : Adverse symptoms may include the following:<br>pain or irritation<br>watering<br>redness   |
| Inhalation                     | : No specific data.  |
| Skin contact                   | : Adverse symptoms may include the following:<br>irritation<br>redness   |
| Ingestion                      | : No specific data.  |
| Delayed and immediate effect   | cts and also chronic effects from short and long term exposure   |
| Short term exposure            |  |
| Potential immediate<br>effects | : Not available.   |
| Potential delayed effects      | : Not available.   |
| Long term exposure             |  |
| Potential immediate<br>effects | : Not available.   |

### Section 2. Hazards identification

Potential delayed effects : Not available.

**Environmental hazards** : Very toxic to aquatic life. Very toxic to aquatic life with long lasting effects.

Other hazards which do not : None known.

result in classification

### Section 3. Composition/information on ingredients

| Substance/mixture                | 1 | Mixture                      |
|----------------------------------|---|------------------------------|
| Other means of<br>identification | 1 | 00136782; 00136783; 00156721 |

#### **CAS number/other identifiers**

| CAS number : Not applicable.    |          |            |  |
|---------------------------------|----------|------------|--|
| Ingredient name                 | %        | CAS number |  |
| zinc dust                       | 40 - <70 | 7440-66-6  |  |
| 2-methoxy-1-methylethyl acetate | 10 - <25 | 108-65-6   |  |
| xylene isomers mixture          | 1 - <10  | 1330-20-7  |  |
| ethylbenzene                    | 0.1 - <1 | 100-41-4   |  |
| zinc oxide                      | 0.1 - <1 | 1314-13-2  |  |
|                                 |          |            |  |

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

SUB codes represent substances without registered CAS Numbers.

### Section 4. First aid measures

| Description of necessary | <u>r first aid measures</u>  |
|--------------------------|--|
| Eye contact              | <ul> <li>Remove contact lenses, irrigate copiously with clean, fresh water, holding the<br/>eyelids apart for at least 10 minutes and seek immediate medical advice.</li> </ul>  |
| Inhalation               | <ul> <li>Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is<br/>irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by<br/>trained personnel.</li> </ul> |
| Skin contact             | <ul> <li>Remove contaminated clothing and shoes. Wash skin thoroughly with soap and<br/>water or use recognized skin cleanser. Do NOT use solvents or thinners.</li> </ul>   |
| Ingestion                | : If swallowed, seek medical advice immediately and show this container or label.<br>Keep person warm and at rest. Do NOT induce vomiting.   |

#### Most important symptoms/effects, acute and delayed

| Potential acute health effects |   |  |
|--------------------------------|---|--|
| Eye contact                    | : No known significant effects or critical hazards. |  |
| Inhalation                     | : No known significant effects or critical hazards. |  |
| Skin contact                   | : Causes mild skin irritation.                      |  |
| Ingestion                      | : No known significant effects or critical hazards. |  |
| Over-exposure signs/symptoms   |   |  |

### Section 4. First aid measures

| Eye contact                | verse symptoms may include the followi<br>n or irritation<br>tering<br>ness        | ng:  |
|----------------------------|--|--|
| Inhalation                 | specific data.   |  |
| Skin contact               | /erse symptoms may include the followiı<br>ation<br>ness                           | ng:  |
| Ingestion                  | specific data.   |  |
| Indication of immediate me | ention and special treatment needed,   | <u>if necessary</u>  |
| Notes to physician         | at symptomatically. Contact poison trea<br>antities have been ingested or inhaled. | atment specialist immediately if large   |
| Specific treatments        | specific treatment.  |  |
| Protection of first-aiders | action shall be taken involving any pers<br>y be dangerous to the person providing | onal risk or without suitable training. It aid to give mouth-to-mouth resuscitation. |

See toxicological information (Section 11)

| Section 5. File-lig                               |  |
|---|--|
| Extinguishing media                               |  |
| Suitable extinguishing media                      | : Use dry chemical, CO <sub>2</sub> , water spray (fog) or foam.   |
| Unsuitable extinguishing media                    | : Do not use water jet.  |
| Specific hazards arising from the chemical        | : Flammable liquid and vapor. Runoff to sewer may create fire or explosion hazard.<br>In a fire or if heated, a pressure increase will occur and the container may burst, with<br>the risk of a subsequent explosion. This material is very toxic to aquatic life with<br>long lasting effects. Fire water contaminated with this material must be contained<br>and prevented from being discharged to any waterway, sewer or drain. |
| Hazardous thermal decomposition products          | : Decomposition products may include the following materials:<br>carbon oxides<br>metal oxide/oxides   |
| Special protective actions for fire-fighters      | : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.   |
| Special protective<br>equipment for fire-fighters | <ul> <li>Fire-fighters should wear appropriate protective equipment and self-contained<br/>breathing apparatus (SCBA) with a full face-piece operated in positive pressure<br/>mode.</li> </ul>  |

### Section 5. Fire-fighting measures

### Section 6. Accidental release measures

| Personal precautions, protec                          | tiv | e equipment and emergency procedures  |
|---|-----|---|
| For non-emergency<br>personnel                        | :   | No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilled material. Shut off all ignition sources.<br>No flares, smoking or flames in hazard area. Avoid breathing vapor or mist.<br>Provide adequate ventilation. Wear appropriate respirator when ventilation is<br>inadequate. Put on appropriate personal protective equipment. |
| For emergency responders                              | :   | If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".   |
| Environmental precautions                             | :   | Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). Water polluting material. May be harmful to the environment if released in large quantities. Collect spillage.  |
| Methods and materials for containment and cleaning up |     |   |

| Small spill | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.   |
|-------------|--|
| Large spill | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal. |

### Section 7. Handling and storage

Precautions for safe handling
 Put on appropriate personal protective equipment (see Section 8). Do not ingest. Avoid contact with eyes, skin and clothing. Avoid breathing vapor or mist. Avoid release to the environment. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Take precautionary measures against electrostatic discharges. Empty containers retain product residue and can be hazardous. Do not reuse container.

### Section 7. Handling and storage

| 2 to 0.5°E) Store in   |
|--|
| 2 to 95°F). Store in<br>d and approved area. Store<br>lry, cool and well-ventilated<br>d) and food and drink.<br>materials. Keep container<br>s that have been opened<br>eakage. Do not store in |
| avoid environmental<br>als before handling or use.   |
|  |

# Section 8. Exposure controls/personal protection

#### **Control parameters**

#### **Occupational exposure limits**

| Ingredient name                   |  | Exposure limits   |  |
|-----------------------------------|--|---|--|
| vylene isomers mixture            |  | GBZ 2.1 (China, 11/2022). [Xylene]<br>PC-STEL: 100 mg/m <sup>3</sup> 15 minutes.<br>PC-TWA: 50 mg/m <sup>3</sup> 8 hours. |  |
| ethylbenzene                      |  | <b>GBZ 2.1 (China, 11/2022).</b><br>PC-STEL: 150 mg/m <sup>3</sup> 15 minutes.<br>PC-TWA: 100 mg/m <sup>3</sup> 8 hours.  |  |
| zinc oxide                        |  | <b>GBZ 2.1 (China, 11/2022).</b><br>PC-STEL: 5 mg/m <sup>3</sup> 15 minutes.<br>PC-TWA: 3 mg/m <sup>3</sup> 8 hours.      |  |
| Recommended monitoring procedures | <ul> <li>Reference should be made to appropriate monitoring standards. Reference in<br/>national guidance documents for methods for the determination of hazardous<br/>substances will also be required.</li> </ul>  |   |  |
| Appropriate engineering controls  | Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering control also need to keep gas, vapor or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.                       |   |  |
| Environmental exposure controls   | Emissions from ventilation or work process equipment should be checked to ensure<br>they comply with the requirements of environmental protection legislation. In some<br>cases, fume scrubbers, filters or engineering modifications to the process<br>equipment will be necessary to reduce emissions to acceptable levels.  |   |  |
| ndividual protection measur       | <u>es</u>  |   |  |
| Hygiene measures                  | Wash hands, forearms and face thoroughly after handling chemical products, before<br>eating, smoking and using the lavatory and at the end of the working period.<br>Appropriate techniques should be used to remove potentially contaminated clothing<br>Wash contaminated clothing before reusing. Ensure that eyewash stations and<br>safety showers are close to the workstation location. |   |  |
| Eye protection<br>Skin protection | : Safety glasses with side shi   | elds.   |  |

### Section 8. Exposure controls/personal protection

| Hand protection        | : Chemical-resistant, impervious gloves complying with an approved standard should<br>be worn at all times when handling chemical products if a risk assessment indicates<br>this is necessary. Considering the parameters specified by the glove manufacturer,<br>check during use that the gloves are still retaining their protective properties. It<br>should be noted that the time to breakthrough for any glove material may be<br>different for different glove manufacturers. In the case of mixtures, consisting of<br>several substances, the protection time of the gloves cannot be accurately<br>estimated. |
|------------------------|---|
| Gloves                 | : For prolonged or repeated handling, use the following type of gloves:<br>Recommended: butyl rubber, polyvinyl alcohol (PVA), Viton®<br>May be used: Chloroprene, nitrile rubber   |
| Body protection        | : Personal protective equipment for the body should be selected based on the task<br>being performed and the risks involved and should be approved by a specialist<br>before handling this product. When there is a risk of ignition from static electricity,<br>wear anti-static protective clothing. For the greatest protection from static<br>discharges, clothing should include anti-static overalls, boots and gloves.   |
| Other skin protection  | <ul> <li>Appropriate footwear and any additional skin protection measures should be<br/>selected based on the task being performed and the risks involved and should be<br/>approved by a specialist before handling this product.</li> </ul>   |
| Respiratory protection | : Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator. If workers are exposed to concentrations above the exposure limit, they must use appropriate, certified respirators. Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary.  |
|                        |   |

# Section 9. Physical and chemical properties

| <u>Appearance</u>                            |   |                 |   |  |  |
|--|---|-----------------|---|--|--|
| Physical state                               | : | Liquid.         |   |  |  |
| Color  | : | Gray.           |   |  |  |
| Odor   | : | Characteristic. |   |  |  |
| Boiling point                                | : | >37.78°C (>100  | >37.78°C (>100°F)                       |  |  |
| Flash point                                  | : | Closed cup: 35° | Closed cup: 35°C (95°F)                 |  |  |
| Lower and upper explosive (flammable) limits | : | Greatest known  | range: Lower: 0.8% Upper: 6.7% (xylene) |  |  |
| Relative density                             | : | 2.37            |   |  |  |
| Solubility(ies)                              |   | Media           | Result                                  |  |  |
| Solubility(les)                              | • | cold water      | Not soluble                             |  |  |
| Viscosity                                    | : | Kinematic (40°C | c): >21 mm²/s                           |  |  |

### Section 10. Stability and reactivity

| Reactivity                         | : No specific test data related to reactivity available for this product or its ingredients.  |
|------------------------------------|---|
| Chemical stability                 | : The product is stable.  |
| Possibility of hazardous reactions | : Under normal conditions of storage and use, hazardous reactions will not occur.   |
| Conditions to avoid                | : When exposed to high temperatures may produce hazardous decomposition products.   |
| Incompatible materials             | : Keep away from the following materials to prevent strong exothermic reactions: oxidizing agents, strong alkalis, strong acids.                                |
| Hazardous decomposition products   | : Evolves hydrogen on contact with water. Depending on conditions, decomposition products may include the following materials: carbon oxides metal oxide/oxides |

# Section 11. Toxicological information

#### Information on toxicological effects

#### Acute toxicity

| Product/ingredient name         | Result                          | Species | Dose                    | Exposure |
|---------------------------------|---------------------------------|---------|-------------------------|----------|
| zinc dust                       | LC50 Inhalation Dusts and mists | Rat     | >5.4 mg/l               | 4 hours  |
|                                 | LD50 Oral                       | Rat     | >2000 mg/kg             | -        |

#### **Teratogenicity**

Not available.

#### Specific target organ toxicity (single exposure)

| Name                            |            | Route of exposure | Target organs    |
|---------------------------------|------------|-------------------|------------------|
| 2-methoxy-1-methylethyl acetate | Category 3 | -                 | Narcotic effects |

#### Specific target organ toxicity (repeated exposure)

| Name         | •••        | Route of<br>exposure | Target organs |
|--------------|------------|----------------------|---------------|
| ethylbenzene | Category 2 | -                    | -             |

#### **Aspiration hazard**

| Name         | Result                         |
|--------------|--------------------------------|
| ethylbenzene | ASPIRATION HAZARD - Category 1 |

| Information on the likely routes of exposure | : | Not available.                                    |
|--|---|---|
| Potential acute health effects               |   |   |
| Eye contact                                  | : | No known significant effects or critical hazards. |
| Inhalation                                   | : | No known significant effects or critical hazards. |
| Skin contact                                 | : | Causes mild skin irritation.                      |
| Ingestion                                    | ; | No known significant effects or critical hazards. |
|  |   |   |

#### Symptoms related to the physical, chemical and toxicological characteristics

| Eye contact  | : Adverse symptoms may include the following:<br>pain or irritation<br>watering<br>redness |
|--------------|--|
| Inhalation   | : No specific data.  |
| Skin contact | : Adverse symptoms may include the following:<br>irritation<br>redness                     |
| Ingestion    | : No specific data.  |

#### Delayed and immediate effects and also chronic effects from short and long term exposure

| <u>Short term exposure</u>  |                  |  |
|-----------------------------|------------------|--|
| Potential immediate effects | : Not available. |  |
| Potential delayed effects   | : Not available. |  |
| <u>Long term exposure</u>   |                  |  |
| Potential immediate effects | : Not available. |  |

### Section 11. Toxicological information

| Potential delayed effects     | : Not available.                                    |
|-------------------------------|---|
| Potential chronic health effe | ects  |
| General                       | : No known significant effects or critical hazards. |
| Carcinogenicity               | : No known significant effects or critical hazards. |
| Mutagenicity                  | : No known significant effects or critical hazards. |
| Reproductive toxicity         | : No known significant effects or critical hazards. |

#### Numerical measures of toxicity

#### Acute toxicity estimates

#### Other information

Sanding and grinding dusts may be harmful if inhaled. Repeated exposure to high vapor concentrations may cause irritation of the respiratory system and permanent brain and nervous system damage. Inhalation of vapor/aerosol concentrations above the recommended exposure limits causes headaches, drowsiness and nausea and may lead to unconsciousness or death.

### Section 12. Ecological information

#### **Toxicity**

| Product/ingredient name         | Result                              | Species   | Exposure |
|---------------------------------|-------------------------------------|---|----------|
| Zinc dust                       | Acute EC50 0.106 mg/l Fresh water   | Algae - Pseudokirchneriella subcapitata   | 72 hours |
|                                 | Acute EC50 354 µg/l Fresh water     | Daphnia - <i>Daphnia magna</i>  | 48 hours |
|                                 | Chronic EC10 6.3 µg/l               | Daphnia - <i>Daphnia magna</i> -<br>Neonate   | 21 days  |
|                                 | Chronic LC10 185 µg/l Fresh water   | Fish - <i>Oncorhynchus mykiss</i> -<br>Juvenile (Fledgling, Hatchling,<br>Weanling) | 30 days  |
| 2-methoxy-1-methylethyl acetate | Acute LC50 134 mg/l Fresh water     | Fish - Oncorhynchus mykiss  | 96 hours |
| ethylbenzene                    | Acute EC50 1.8 mg/l Fresh water     | Daphnia   | 48 hours |

|----------------------|------------------|
| coefficient (Koc)    |                  |

Other adverse effects

: No known significant effects or critical hazards.

# Section 13. Disposal considerations

| Disposal methods | : The generation of waste should be avoided or minimized wherever possible.<br>Disposal of this product, solutions and any by-products should at all times comply<br>with the requirements of environmental protection and waste disposal legislation and<br>any regional local authority requirements. Dispose of surplus and non-recyclable<br>products via a licensed waste disposal contractor. Waste should not be disposed of<br>untreated to the sewer unless fully compliant with the requirements of all authorities<br>with jurisdiction. Waste packaging should be recycled. Incineration or landfill<br>should only be considered when recycling is not feasible. This material and its<br>container must be disposed of in a safe way. Care should be taken when handling<br>emptied containers that have not been cleaned or rinsed out. Empty containers or<br>liners may retain some product residues. Vapor from product residues may create a<br>highly flammable or explosive atmosphere inside the container. Do not cut, weld or<br>grind used containers unless they have been cleaned thoroughly internally. Avoid<br>dispersal of spilled material and runoff and contact with soil, waterways, drains and |
|------------------|--|
|                  | sewers.  |

# Section 14. Transport information

|                               | =   |   |   |   |
|-------------------------------|---|---|---|---|

The<br>environmentally<br>hazardous substance<br>mark is not required. | Yes.                                      | Yes. The<br>environmentally<br>hazardous substance<br>mark is not required. |
| Marine pollutant substances   | Not applicable.   | Not applicable.   | (Zinc powder - zinc<br>dust (stabilized)) | Not applicable.   |

| Additional ir | Iformation   |
|---------------|--|
| CN            | : None identified.   |
| UN            | : None identified.   |
| IMDG          | : The marine pollutant mark is not required when transported in sizes of $\leq 5$ L or $\leq 5$ kg.        |
| ΙΑΤΑ          | : The environmentally hazardous substance mark may appear if required by other transportation regulations. |

**Special precautions for user : Transport within user's premises:** always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

Transport in bulk according : Not applicable. to IMO instruments
