# **SAFETY DATA SHEET**

Date of issue/Date of revision : 4 July 2024 Version : 19.01 SECTION 1: Identification of the substance/mixture and of the company/ : PPG VIKOTE 56 YELLOW 3138

**Product code** 

**1.1 Product identifier Product name** 

: 00171398

Other means of identification

Not available.

undertaking

| 1.2 Relevant identified use      | s of the substance or mixture and uses advised against            |
|----------------------------------|---|
| Product use                      | : Professional applications, Used by spraying.                    |
| Use of the substance/<br>mixture | : Coating.  |
| Uses advised against             | : Product is not intended, labelled or packaged for consumer use. |

## 1.3 Details of the supplier of the safety data sheet

PPG Coatings Belgium BV/SRL Tweemontstraat 104 B-2100 Deurne Belgium Telephone +32-33606311 Fax +32-33606435

e-mail address of person responsible for this SDS

: Product.Stewardship.EMEA@ppg.com

## 1.4 Emergency telephone number

## National advisory body/Poison Centre

**Telephone number** 

: Poison Information Centre; emergency telephone, public + 45 82 12 12 12 (health sector +45 35 31 55 55)

## **SECTION 2: Hazards identification**

| 2.1 Classification of the s | ubstance or mixture    |                               |      |
|-----------------------------|------------------------|-------------------------------|------|
| Product definition          | : Mixture              |                               |      |
| Classification according    | to Regulation (EC) No. | <u>o. 1272/2008 [CLP/GHS]</u> |      |
| Flam. Liq. 3, H226          |                        |                               |      |
| Skin Irrit. 2, H315         |                        |                               |      |
| Eye Irrit. 2, H319          |                        |                               |      |
| Carc. 1B, H350              |                        |                               |      |
| Lact., H362                 |                        |                               |      |
| STOT SE 3, H335             |                        |                               |      |
| STOT SE 3, H336             |                        |                               |      |
| Aquatic Acute 1, H400       |                        |                               |      |
| [                           |                        |                               |      |

## **SECTION 2: Hazards identification**

Aquatic Chronic 1, H410

The product is classified as hazardous according to Regulation (EC) 1272/2008 as amended.

See Section 16 for the full text of the H statements declared above.

See Section 11 for more detailed information on health effects and symptoms.

## 2.2 Label elements

Signal word

Hazard pictograms

**Hazard statements** 

|              | : |  |
|--------------|---|--|
|              | : | Danger   |
|              | : | Flammable liquid and vapour.<br>Causes skin irritation.<br>Causes serious eye irritation.<br>May cause respiratory irritation.<br>May cause drowsiness or dizziness.<br>May cause cancer.<br>May cause harm to breast-fed children.<br>Very toxic to aquatic life with long lasting effects. |
| <u>nents</u> |   |  |

| Precautionary statements  |                    |  |
|---|--------------------|--|
| Prevention  | heat, hot          | otective gloves, protective clothing and eye or face protection. Keep away from surfaces, sparks, open flames and other ignition sources. No smoking. Avoid o the environment. |
| Response  | Collect s          | pillage.   |
| Storage   | Store in a         | a well-ventilated place. Keep container tightly closed.  |
| Disposal  | •                  | of contents and container in accordance with all local, regional, national and onal regulations.   |

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment, are PBTs, vPvBs or Substances of equivalent concern, or have been assigned a workplace exposure limit and hence require reporting in this section.

Xylene: Several REACH registrations cover the REACH registered substance with xylene isomers, ethylbenzene (and toluene). The other REACH Registrations include: 01-2119555267-33 reaction mass of ethylbenzene and m-xylene and p-xylene, 01-2119486136-34 Aromatic hydrocarbons, C8, 01-2119539452-40 reaction mass of ethylbenzene and xylene. <u>Type</u>

PPG VIKOTE 56 YELLOW 3138

## • 4 July

## **SECTION 3: Composition/information on ingredients**

[1] Substance classified with a health or environmental hazard

[2] Substance with a workplace exposure limit

[3] Substance meets the criteria for PBT according to Regulation (EC) No. 1907/2006, Annex XIII

[4] Substance meets the criteria for vPvB according to Regulation (EC) No. 1907/2006, Annex XIII

Occupational exposure limits, if available, are listed in Section 8.

## SUB codes represent substances without registered CAS Numbers.

## SECTION 4: First aid measures

| 4.1 Description of first aid n | neasures  |
|--------------------------------|---|
| Eye contact                    | <ul> <li>Remove contact lenses, irrigate copiously with clean, fresh water, holding the eyelids<br/>apart for at least 10 minutes and seek immediate medical advice.</li> </ul>   |
| Inhalation                     | : Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel.  |
| Skin contact                   | : Remove contaminated clothing and shoes. Wash skin thoroughly with soap and water<br>or use recognised skin cleanser. Do NOT use solvents or thinners.   |
| Ingestion                      | <ul> <li>If swallowed, seek medical advice immediately and show the container or label. Keep person warm and at rest. Do NOT induce vomiting.</li> </ul>  |
| Protection of first-aiders     | : No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. |

## 4.2 Most important symptoms and effects, both acute and delayed

## Potential acute health effects

| Eye contact               | Causes serious eye irritation.  |
|---------------------------|---|
| Inhalation                | Can cause central nervous system (CNS) depression. May cause drowsiness or dizziness. May cause respiratory irritation.   |
| Skin contact              | Causes skin irritation. Defatting to the skin.  |
| Ingestion                 | Can cause central nervous system (CNS) depression.  |
| Over-exposure signs/sympt | <u>15</u>   |
| Eye contact               | Adverse symptoms may include the following:<br>pain or irritation<br>watering<br>redness  |
| Inhalation                | Adverse symptoms may include the following:<br>respiratory tract irritation<br>coughing<br>nausea or vomiting<br>headache<br>drowsiness/fatigue<br>dizziness/vertigo<br>unconsciousness<br>reduced foetal weight<br>increase in foetal deaths<br>skeletal malformations |

| Code : 00171398<br>PPG VIKOTE 56 YELLOW 313       | Date of issue/Date of revision : 4 July 2024  |
|---|---|
| SECTION 4: First aid                              | measures  |
| Skin contact                                      | : Adverse symptoms may include the following:<br>irritation<br>redness<br>dryness<br>cracking<br>reduced foetal weight<br>increase in foetal deaths<br>skeletal malformations   |
| Ingestion   | : Adverse symptoms may include the following:<br>reduced foetal weight<br>increase in foetal deaths<br>skeletal malformations   |
| 4.3 Indication of any immediat                    | e medical attention and special treatment needed  |
| Notes to physician                                | : In case of inhalation of decomposition products in a fire, symptoms may be delayed.<br>The exposed person may need to be kept under medical surveillance for 48 hours.  |
| Specific treatments                               | : No specific treatment.  |
| SECTION 5: Firefighti                             | ng measures   |
| 5.1 Extinguishing media                           |   |
| Suitable extinguishing media                      | : Use dry chemical, CO <sub>2</sub> , water spray (fog) or foam.  |
| Unsuitable extinguishing media                    | : Do not use water jet.   |
| 5.2 Special hazards arising fro                   | om the substance or mixture   |
| Hazards from the substance or mixture             | : Flammable liquid and vapour. Runoff to sewer may create fire or explosion hazard. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion. This material is very toxic to aquatic life with long lasting effects. Fire water contaminated with this material must be contained and prevented from being discharged to any waterway, sewer or drain. |
| Hazardous combustion<br>products                  | : Decomposition products may include the following materials:<br>carbon oxides<br>nitrogen oxides<br>halogenated compounds<br>metal oxide/oxides  |
| 5.3 Advice for firefighters                       |   |
| Special precautions for fire-fighters             | : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.  |
| Special protective<br>equipment for fire-fighters | : Fire-fighters should wear appropriate protective equipment and self-contained breathin apparatus (SCBA) with a full face-piece operated in positive pressure mode. Clothing for fire-fighters (including helmets, protective boots and gloves) conforming to Europea standard EN 469 will provide a basic level of protection for chemical incidents.   |

| Code       | : 00171398     | Date of issue/Date of revision | : 4 July 2024 |
|------------|----------------|--------------------------------|---------------|
| PPG VIKOTE | 56 YELLOW 3138 |                                |               |

## **SECTION 6: Accidental release measures**

#### 6.1 Personal precautions, protective equipment and emergency procedures

| For non-emergency<br>personnel  | :  | No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilt material. Shut off all ignition sources. No<br>flares, smoking or flames in hazard area. Avoid breathing vapour or mist. Provide<br>adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put<br>on appropriate personal protective equipment.   |
|---------------------------------|----|--|
| For emergency responders        | :  | If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".  |
| 6.2 Environmental precautions   | :  | Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). Water polluting material. May be harmful to the environment if released in large quantities. Collect spillage.   |
| 6.3 Methods and material for    | со | ntainment and cleaning up  |
| Small spill                     | :  | Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.   |
| Large spill                     | :  | Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach the release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations. Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spill product. |
| 6.4 Reference to other sections | :  | See Section 1 for emergency contact information.<br>See Section 8 for information on appropriate personal protective equipment.  |

See Section 13 for additional waste treatment information.

## **SECTION 7: Handling and storage**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

## 7.1 Precautions for safe handling

Protective measures
 Put on appropriate personal protective equipment (see Section 8). Avoid exposure - obtain special instructions before use. Avoid contact during pregnancy or while nursing. Do not handle until all safety precautions have been read and understood. Do not get in eyes or on skin or clothing. Do not ingest. Avoid breathing vapour or mist. Avoid release to the environment. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Take precautionary measures against electrostatic discharges. Empty containers retain product residue and can be hazardous. Do not reuse container.

| Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II, as amended by Commission Regu | lation (EU) |
|--|-------------|
| 2020/878   |             |

| 2020/878   | C) No. 1907/2006 (REACH), Annex II, as amended by Commission Regulation (EO)   |

| Code : 00171398<br>PPG VIKOTE 56 YELLOW                                | Date of issue/Date of revision       : 4 July 2024         3138  |
| SECTION 7: Handli  | ing and storage  |
| Advice on general<br>occupational hygiene                              | : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.  |
| 7.2 Conditions for safe<br>storage, including any<br>incompatibilities | : Store between the following temperatures: 0 to 35°C (32 to 95°F). Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Eliminate all ignition sources. Separate from oxidising materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled |

Section 10 for incompatible materials before handling or use.

containers. Use appropriate containment to avoid environmental contamination. See

## 7.3 Specific end use(s)

See Section 1.2 for Identified uses.

## **SECTION 8: Exposure controls/personal protection**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### 8.1 Control parameters

## **Occupational exposure limits**

| Product/ingredient name | Exposure limit values   |  |  |  |
|-------------------------|---|--|--|--|
| xylene                  | Working Environment Authority (Denmark, 2/2023). [xylen, alle<br>isomere] Absorbed through skin.<br>TWA: 109 mg/m <sup>3</sup> 8 hours.<br>TWA: 25 ppm 8 hours.<br>STEL: 442 mg/m <sup>3</sup> 15 minutes.<br>STEL: 100 ppm 15 minutes. |  |  |  |

## **SECTION 8: Exposure controls/personal protection**

| Product/ingredient name                   | Туре | Exposure              | Value                  | Population         | Effects  |
|---|------|-----------------------|------------------------|--------------------|----------|
| Hydrocarbons, C9, aromatics > 0.1% cumene | DNEL | Long term Inhalation  | 150 mg/m³              | Workers            | Systemic |
|   | DNEL | Long term Dermal      | 25 mg/kg bw/day        | Workers            | Systemic |
|   | DNEL | Long term Inhalation  | 32 mg/m <sup>3</sup>   | General population | Systemic |
|   | DNEL | Long term Dermal      | 11 mg/kg bw/day        | General population | Systemic |
|   | DNEL | Long term Oral        | 11 mg/kg bw/day        | General population | Systemic |
| xylene                                    | DNEL | Long term Oral        | 5 mg/kg bw/day         | General population | Systemic |
|   | DNEL | Long term Inhalation  | 65.3 mg/m <sup>3</sup> | General population | Local    |
|   | DNEL | Long term Inhalation  | 65.3 mg/m <sup>3</sup> | General population | Systemic |
|   | DNEL | Long term Dermal      | 125 mg/kg bw/day       | General population | Systemic |
|   | DNEL | Long term Dermal      | 212 mg/kg bw/day       | Workers            | Systemic |
|   | DNEL | Long term Inhalation  | 221 mg/m <sup>3</sup>  | Workers            | Local    |
|   | DNEL | Long term Inhalation  | 221 mg/m <sup>3</sup>  | Workers            | Systemic |
|   | DNEL | Short term Inhalation | 260 mg/m <sup>3</sup>  | General population | Local    |
|   | DNEL | Short term Inhalation | 260 mg/m <sup>3</sup>  | General population | Systemic |
|   | DNEL | Short term Inhalation | 442 mg/m <sup>3</sup>  | Workers            | Local    |
|   | DNEL | Short term Inhalation | 442 mg/m <sup>3</sup>  | Workers            | Systemic |
| alkanes, C14-17, chloro                   | DNEL | Long term Oral        | 0.58 mg/kg bw/day      | General population | Systemic |
|   | DNEL | Long term Inhalation  | 2 mg/m <sup>3</sup>    | General population | Systemic |
|   | DNEL | Long term Inhalation  | 6.7 mg/m³              | Workers            | Systemic |
|   | DNEL | Long term Dermal      | 28.75 mg/kg bw/day     | General population | Systemic |
|   | DNEL | Long term Dermal      | 47.9 mg/kg bw/day      | Workers            | Systemic |
| ethylbenzene                              | DMEL | Long term Inhalation  | 442 mg/m <sup>3</sup>  | Workers            | Local    |
|   | DMEL | Short term Inhalation | 884 mg/m³              | Workers            | Systemic |
|   | DNEL | Long term Oral        | 1.6 mg/kg bw/day       | General population | Systemic |
|   | DNEL | Long term Inhalation  | 15 mg/m³               | General population | Systemic |
|   | DNEL | Long term Inhalation  | 77 mg/m³               | Workers            | Systemic |
|   | DNEL | Long term Dermal      | 180 mg/kg bw/day       | Workers            | Systemic |
|   | DNEL | Short term Inhalation | 293 mg/m³              | Workers            | Local    |

## **PNECs**

| Product/ingredient name | Туре | Compartment Detail     | Value           | Method Detail            |
|-------------------------|------|------------------------|-----------------|--------------------------|
| xylene                  | -    | Fresh water            | 0.327 mg/l      | -                        |
|                         | -    | Marine water           | 0.327 mg/l      | -                        |
|                         | -    | Sewage Treatment Plant | 6.58 mg/l       | -                        |
|                         | -    | Fresh water sediment   | 12.46 mg/kg dwt | -                        |
|                         | -    | Marine water sediment  | 12.46 mg/kg dwt | -                        |
|                         | -    | Soil                   | 2.31 mg/kg      | -                        |
| ethylbenzene            | -    | Fresh water            | 0.1 mg/l        | Assessment Factors       |
| -                       | -    | Marine water           | 0.01 mg/l       | Assessment Factors       |
|                         | -    | Sewage Treatment Plant | 9.6 mg/l        | Assessment Factors       |
|                         | -    | Fresh water sediment   | 13.7 mg/kg dwt  | Equilibrium Partitioning |
|                         | -    | Marine water sediment  | 1.37 mg/kg dwt  | Equilibrium Partitioning |
|                         | -    | Soil                   | 2.68 mg/kg dwt  | Equilibrium Partitioning |
|                         | -    | Secondary Poisoning    | 20 mg/kg        | -                        |

#### 8.2 Exposure controls

Appropriate engineering controls

: Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapour or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.

#### **Individual protection measures**

| English (GB) | Denmark | 8/20 |
|--------------|---------|------|
|              |         |      |

| Code    : 00171398<br>PPG VIKOTE 56 YELLOW 313 | Date of issue/Date of revision         : 4 July 2024           8  |
|--|---|
| SECTION 8: Exposur                             | e controls/personal protection  |
| Hygiene measures                               | : Wash hands, forearms and face thoroughly after handling chemical products, before   |
| nygiene measures                               | <ul> <li>Wash hands, forearms and face thoroughly after handling chemical products, before<br/>eating, smoking and using the lavatory and at the end of the working period.</li> <li>Appropriate techniques should be used to remove potentially contaminated clothing.</li> <li>Wash contaminated clothing before reusing. Ensure that eyewash stations and safety<br/>showers are close to the workstation location.</li> </ul>   |
| Eye/face protection                            | : Chemical splash goggles. Use eye protection according to EN 166.  |
| Skin protection                                |   |
| Hand protection                                | : Chemical-resistant, impervious gloves complying with an approved standard should be<br>worn at all times when handling chemical products if a risk assessment indicates this<br>is necessary. Considering the parameters specified by the glove manufacturer, check<br>during use that the gloves are still retaining their protective properties. It should be<br>noted that the time to breakthrough for any glove material may be different for different<br>glove manufacturers. In the case of mixtures, consisting of several substances, the<br>protection time of the gloves cannot be accurately estimated. When prolonged or<br>frequently repeated contact may occur, a glove with a protection class of 6<br>(breakthrough time greater than 480 minutes according to EN 374) is recommended.<br>When only brief contact is expected, a glove with a protection class of 2 or higher<br>(breakthrough time greater than 30 minutes according to EN 374) is recommended.<br>The user must check that the final choice of type of glove selected for handling this<br>product is the most appropriate and takes into account the particular conditions of use<br>as included in the user's risk assessment. |
| Gloves   | : For prolonged or repeated handling, use the following type of gloves:   |
|  | May be used: nitrile rubber<br>Recommended: polyvinyl alcohol (PVA), Viton®   |
| Body protection                                | : Personal protective equipment for the body should be selected based on the task<br>being performed and the risks involved and should be approved by a specialist before<br>handling this product. When there is a risk of ignition from static electricity, wear anti-<br>static protective clothing. For the greatest protection from static discharges, clothing<br>should include anti-static overalls, boots and gloves. Refer to European Standard EN<br>1149 for further information on material and design requirements and test methods.  |
| Other skin protection                          | Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.   |
| Respiratory protection                         | : Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator. If workers are exposed to concentrations above the exposure limit, they must use appropriate, certified respirators. Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Wear a respirator conforming to EN140. Filter type: organic vapour (Type A) and particulate filter P3  |
| Environmental exposure controls                | : Emissions from ventilation or work process equipment should be checked to ensure<br>they comply with the requirements of environmental protection legislation. In some<br>cases, fume scrubbers, filters or engineering modifications to the process equipment<br>will be necessary to reduce emissions to acceptable levels.   |

## **SECTION 9: Physical and chemical properties**

No additional information.

## **SECTION 10: Stability and reactivity**

| 10.1 Reactivity                          | : No specific test data related to reactivity available for this product or its ingredients.  |
|--|---|
| 10.2 Chemical stability                  | : The product is stable.  |
| 10.3 Possibility of hazardous reactions  | : Under normal conditions of storage and use, hazardous reactions will not occur.   |
| 10.4 Conditions to avoid                 | : When exposed to high temperatures may produce hazardous decomposition products.<br>Refer to protective measures listed in sections 7 and 8.                 |
| 10.5 Incompatible materials              | : Keep away from the following materials to prevent strong exothermic reactions: oxidising agents, strong alkalis, strong acids.                              |
| 10.6 Hazardous<br>decomposition products | : Depending on conditions, decomposition products may include the following materials: carbon oxides nitrogen oxides halogenated compounds metal oxide/oxides |

## **SECTION 11: Toxicological information**

## 11.1 Information on hazard classes as defined in Regulation (EC) No 1272/2008

## **Acute toxicity**

| Potential chronic health effe  | ects  |
| Not available.                 |   |
| Conclusion/Summary             | : Not available.  |
| General                        | : Prolonged or repeated contact can defat the skin and lead to irritation, cracking and/or dermatitis.  |
| Carcinogenicity                | : May cause cancer. Risk of cancer depends on duration and level of exposure.   |
| Mutagenicity                   | : No known significant effects or critical hazards.   |
| Reproductive toxicity          | : May cause harm to breast-fed children.  |
| Other information              | : Not available.  |
| Prolonged or repeated contac   | t may dry skin and cause irritation. Repeated exposure to high vapor concentrations may   |

Prolonged or repeated contact may dry skin and cause irritation. Repeated exposure to high vapor concentrations may cause irritation of the respiratory system and permanent brain and nervous system damage. Inhalation of vapour/aerosol concentrations above the recommended exposure limits causes headaches, drowsiness and nausea and may lead to unconsciousness or death. Avoid contact with skin and clothing.

## 11.2 Information on other hazards

## 11.2.1 Endocrine disrupting properties

Not available.

## 11.2.2 Other information

Not available.

## **SECTION 12: Ecological information**

## **12.7 Other adverse effects**

No known significant effects or critical hazards.

## **SECTION 13: Disposal considerations**

: Yes.

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

## 13.1 Waste treatment methods

## **Product**

Methods of disposal: The generation of waste should be avoided or minimised wherever possible. Disposal<br/>of this product, solutions and any by-products should at all times comply with the<br/>requirements of environmental protection and waste disposal legislation and any<br/>regional local authority requirements. Dispose of surplus and non-recyclable products<br/>via a licensed waste disposal contractor. Waste should not be disposed of untreated to<br/>the sewer unless fully compliant with the requirements of all authorities with jurisdiction.

Hazardous waste

## European waste catalogue (EWC)

| Waste code          | Waste designation   |  |  |
|---------------------|---|--|--|
| 08 01 11*           | waste paint and varnish containing organic solvents or other hazardous substances   |  |  |
| Packaging           |   |  |  |
| Methods of disposal | <ul> <li>The generation of waste should be avoided or minimised wherever possible. Waste<br/>packaging should be recycled. Incineration or landfill should only be considered when<br/>recycling is not feasible.</li> </ul>  |  |  |
| Type of packaging   | European waste catalogue (EWC)  |  |  |
| Container           | 15 01 06 mixed packaging  |  |  |
| Special precautions | : This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapour from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. |  |  |

**MAL-code** 

: 4-3

#### Protection based on MAL

## : According to the regulations on work involving coded products, the following stipulations apply to the use of personal protective equipment:

**General:** Gloves must be worn for all work that may result in soiling. Apron/coveralls/ protective clothing must be worn when soiling is so great that regular work clothes do not adequately protect skin against contact with the product. A face shield must be worn in work involving spattering if a full mask is not required. In this case, other recommended use of eye protection is not required.

In all spraying operations in which there is return spray, the following must be worn: respiratory protection and arm protectors/apron/coveralls/protective clothing as appropriate or as instructed.

#### MAL-code: 4-3

**Application:** When spraying in new\* booths if the operator is outside the spray zone. When using scraper or knife, brush, roller, etc. for pre- and post-treatments outside a closed facility, spray booth or spray cabin.

- Air-supplied half mask and eye protection must be worn.

When using scraper or knife, brush, roller, etc, for pre- and post-treatments in cabins or booths of the existing\* facility type, if the operator is inside the spray zone.

- Air-supplied half mask, coveralls and eye protection must be worn.

During downtimes, cleaning and repair in closed facilities, spray booths or cabins, if there is a risk of contact with wet paint or organic solvents.

- Air-supplied full mask and coveralls must be worn.

When spraying in existing\* spray booths, if the operator is outside the spray zone.

- Air-supplied full mask, arm protectors and apron must be worn.

During non-atomising spraying in existing\* facilities of the combined-cabin, spray-cabin

|   | and spray-booth type where the operator is working inside the spray zone.   |
|   | - Air-supplied full mask must be worn.  |
|   | During all spraying where atomisation occurs in cabins or spray booths where the operator is inside the spray zone and during spraying outside a closed facility, cabin or booth.   |
|   | - Air-supplied full mask, coveralls and hood must be worn.  |
|   | <b>Drying:</b> Items for drying/drying ovens that are temporarily placed on such things as rack trolleys, etc, must be equipped with a mechanical exhaust system to prevent fumes from wet items from passing through workers' inhalation zone. |
|   | <b>Polishing:</b> When polishing treated surfaces, a mask with dust filter must be worn. When machine grinding, eye protection must be worn. Work gloves must always be worn.   |
|   | <b>Caution</b> The regulations contain other stipulations in addition to the above.   |
|   | *See Regulations.   |
| Restrictions on use                         | : Not to be used by professional users below 18 years of age. See the National Working<br>Environment Authorities Executive Order regarding Young People At Work.   |
| List of undesirable substances              | : Listed  |
| Carcinogenic waste                          | : Waste containers must be labeled: Contains a substance or substances regulated by<br>Danish working environment legislation on cancer risks.  |

#### **15.2 Chemical safety** assessment

: No Chemical Safety Assessment has been carried out.

## **SECTION 16: Other information**

Indicates information that has changed from previously issued version.

## Abbreviations and acronyms

ATE = Acute Toxicity Estimate CLP = Classification, Labelling and Packaging Regulation [Regulation (EC) No. 1272/2008] DNEL = Derived No Effect Level EUH statement = CLP-specific Hazard statement PNEC = Predicted No Effect Concentration RRN = REACH Registration Number PBT = Persistent, Bioaccumulative and Toxic vPvB = Very Persistent and Very Bioaccumulative

## English (GB)

Code: 00171398Date of issue/Date of revision: 4 July 2024

PPG VIKOTE 56 YELLOW 3138

## **SECTION 16: Other information**

ADR = The European Agreement concerning the International Carriage of Dangerous Goods by Road ADN = European Provisions concerning the International Carriage of Dangerous Goods by Inland Waterway IMDG = International Maritime Dangerous Goods

IATA = International Air Transport Association

## Procedure used to derive the classification according to Regulation (EC) No. 1272/2008 [CLP/GHS]

| Classification          | Justification         |
|-------------------------|-----------------------|
| Flam. Liq. 3, H226      | On basis of test data |
| Skin Irrit. 2, H315     | Calculation method    |
| Eye Irrit. 2, H319      | Calculation method    |
| Carc. 1B, H350          | Calculation method    |
| Lact., H362             | Calculation method    |
| STOT SE 3, H335         | Calculation method    |
| STOT SE 3, H336         | Calculation method    |
| Aquatic Acute 1, H400   | Calculation method    |
| Aquatic Chronic 1, H410 | Calculation method    |

## Full text of abbreviated H statements

| H225                                   | Highly flammable liquid and vapour.                      |
|--|--|
| H226                                   | Flammable liquid and vapour.                             |
|  |  |
| H304                                   | May be fatal if swallowed and enters airways.            |
| H312                                   | Harmful in contact with skin.                            |
| H315                                   | Causes skin irritation.                                  |
| H317                                   | May cause an allergic skin reaction.                     |
| H319                                   | Causes serious eye irritation.                           |
| H332                                   | Harmful if inhaled.                                      |
| H335                                   | May cause respiratory irritation.                        |
| H336                                   | May cause drowsiness or dizziness.                       |
| H350                                   | May cause cancer.  |
| H362                                   | May cause harm to breast-fed children.                   |
| H373                                   | May cause damage to organs through prolonged or repeated |
|  | exposure.  |
| H400                                   | Very toxic to aquatic life.                              |
| H410                                   | Very toxic to aquatic life with long lasting effects.    |
| H411                                   | Toxic to aquatic life with long lasting effects.         |
| H412                                   | Harmful to aquatic life with long lasting effects.       |
| H413                                   | May cause long lasting harmful effects to aquatic life.  |
| EUH066                                 | Repeated exposure may cause skin dryness or cracking.    |
|  | Repeated exposure may cause skill dryness of clacking.   |
