# SAFETY DATA SHEET

Date of issue/Date of revision

: 1 August 2024

Version : 1.03

# SECTION 1: Identification of the substance/mixture and of the company/ undertaking

| 1.1 Product identifier           |   |
|----------------------------------|---|
| Product name                     | : SIGMADUR 550 BAS WHITE  |
| Product code                     | : 40550-C7000   |
| Product type                     | : Liquid.   |
| Other means of identification    | : Not available.  |
| 1.2 Relevant identified use      | s of the substance or mixture and uses advised against            |
| Product use                      | : Industrial applications, Used by spraying.                      |
| Use of the substance/<br>mixture | : Coating.  |
| Uses advised against             | : Product is not intended, labelled or packaged for consumer use. |

## 1.3 Details of the supplier of the safety data sheet

PPG France Business Support SAS, 3, ZAE "Les Dix Muids", B.P. 89, 59583 Marly Cedex, France, 33 (0)3 27 19 35 00 - Technical contact : Product Compliance EMEA

- Tel : +33 (0)3 27 19 35 00
- e-mail address of person : Product.Stewardship.EMEA@ppg.com
- responsible for this SDS

PPG Architectural Coatings UK Ltd, Huddersfield Road, Birstall, West Yorkshire WF17 9XA, Tel: +44 (0) 1924 354000

# 1.4 Emergency telephone number

## **Supplier**

+33 (0)3 27 19 35 00 (0800-1700)

# **SECTION 2: Hazards identification**

## 2.1 Classification of the substance or mixture

Skin Sens. 1, H317 Carc. 1B, H350 STOT SE 3, H335 STOT SE 3, H336 Aquatic Chronic 3, H412

The product is classified as hazardous according to UK CLP Regulation SI 2019/720 as amended.

See Section 16 for the full text of the H statements declared above.

See Section 11 for more detailed information on health effects and symptoms.

2.2 Label elements Hazard pictograms

Signal word

| <mark>Code</mark><br>SIGMADI | : 40550-C7000<br>UR 550 BAS WHITE | Date of issue/Date of revision | : 1 August 2024 |

| SECTI                        | ON 2: Hazards identification      |                                |                 |

| Hazard statements   |     | Fammable liquid and vapour.  |
|---|-----|--|
| nazaru statements   | 1   | May cause an allergic skin reaction.   |
|   |     | May cause respiratory irritation.  |
|   |     | May cause drowsiness or dizziness.   |
|   |     | May cause cancer.  |
|   |     | Harmful to aquatic life with long lasting effects.   |
| Precautionary statements  |     |  |
| Prevention  | :   | To not handle until all safety precautions have been read and understood. Wear protective gloves, protective clothing and eye or face protection. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Avoid release to the environment. |
| Response  | :   | 📕 exposed or concerned: Get medical advice or attention.   |
| Storage   |     | Not applicable.  |
| Disposal  | :   | Dispose of contents and container in accordance with all local, regional, national and international regulations.  |
|   |     | ₱202, P280, P210, P273, P308 + P313, P501  |
| Supplemental label<br>elements  | ;   | Not applicable.  |
| Annex XVII - Restrictions<br>on the manufacture,<br>placing on the market and<br>use of certain dangerous<br>substances, mixtures and<br>articles | :   | Restricted to professional users.  |
| Special packaging requirem  | nen | i <u>ts</u>  |
| Containers to be fitted<br>with child-resistant<br>fastenings   | :   | Not applicable.  |
| Tactile warning of danger   | :   | Not applicable.  |
| .3 Other hazards  |     |  |
| Product meets the criteria<br>for PBT or vPvB according<br>to Regulation (EC) No.<br>1907/2006, Annex XIII  | :   | This mixture does not contain any substances that are assessed to be a PBT or a vPvB.  |
| Other hazards which do not result in classification   | :   | Prolonged or repeated contact may dry skin and cause irritation.   |

 the full text of the H

 the full text of the H

 statements declared

 above.

 There are no additional ingredients present which, within the current knowledge of the supplier and in the

 concentrations applicable, are classified as hazardous to health or the environment, are PBTs, vPvBs or Substances of

 equivalent concern, or have been assigned a workplace exposure limit and hence require reporting in this section.

 Xylene: Several REACH registrations cover the REACH registered substance with xylene isomers, ethylbenzene (and

toluene). The other REACH Registrations include: 01-2119555267-33 reaction mass of ethylbenzene and m-xylene and pxylene, 01-2119486136-34 Aromatic hydrocarbons, C8, 01-2119539452-40 reaction mass of ethylbenzene and xylene. <u>Type</u>

[1] Substance classified with a health or environmental hazard

[2] Substance with a workplace exposure limit

This mixture contains  $\geq$  1% of titanium dioxide. The Annex VI classification of titanium dioxide does not apply to this mixture according to Note 10.

Occupational exposure limits, if available, are listed in Section 8.

# SUB codes represent substances without registered CAS Numbers.

# **SECTION 4: First aid measures**

| 4.1 Description of firs | aid measures   |
|-------------------------|--|
| Eye contact             | : Remove contact lenses, irrigate copiously with clean, fresh water, holding the eyelids apart for at least 10 minutes and seek immediate medical advice.  |
| Inhalation              | <ul> <li>Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is<br/>irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained<br/>personnel.</li> </ul> |

| Code : 40550-C7000     | Date of issue/Date of revision | : 1 August 2024 |
|------------------------|--------------------------------|-----------------|
| SIGMADUR 550 BAS WHITE |                                |                 |
|                        |                                |                 |

# SECTION 4: First aid measures Skin contact : Remove contaminated clothing and shoes. Wash skin thoroughly with soap and water or use recognised skin cleanser. Do NOT use solvents or thinners. Ingestion : If swallowed, seek medical advice immediately and show the container or label. Keep person warm and at rest. Do NOT induce vomiting. Protection of first-aiders : No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves.

| Potential acute health eff | ects  |
|----------------------------|---|
| Eye contact                | : No known significant effects or critical hazards.   |
| Inhalation                 | <ul> <li>Can cause central nervous system (CNS) depression. May cause drowsiness or<br/>dizziness. May cause respiratory irritation.</li> </ul>   |
| Skin contact               | : Defatting to the skin. May cause skin dryness and irritation. May cause an allergic skir reaction.  |
| Ingestion                  | : 🖉an cause central nervous system (CNS) depression.  |
| Over-exposure signs/sy     | <u>mptoms</u>   |
| Eye contact                | : 📈 specific data.  |
| Inhalation                 | : Adverse symptoms may include the following:<br>respiratory tract irritation<br>coughing<br>nausea or vomiting<br>headache<br>drowsiness/fatigue<br>dizziness/vertigo<br>unconsciousness |
| Skin contact               | : Adverse symptoms may include the following:<br>irritation<br>redness<br>dryness<br>cracking   |
| Ingestion                  | : No specific data.   |
| 4.3 Indication of any imm  | ediate medical attention and special treatment needed   |
| Notes to physician         | : Treat symptomatically. Contact poison treatment specialist immediately if large<br>quantities have been ingested or inhaled.  |
| Specific treatments        | : No specific treatment.  |

# **SECTION 5: Firefighting measures**

| 5.1 Extinguishing media<br>Suitable extinguishing<br>media | : Use dry chemical, CO <sub>2</sub> , water spray (fog) or foam. |
|--|--|
| Unsuitable extinguishing media                             | : Do not use water jet.  |

## 5.2 Special hazards arising from the substance or mixture

Hazards from the substance or mixture
 Flammable liquid and vapour. Runoff to sewer may create fire or explosion hazard. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion. This material is harmful to aquatic life with long lasting effects. Fire water contaminated with this material must be contained and prevented from being discharged to any waterway, sewer or drain.

| Code | : 40550-C7000   | Date of issue/Date of revision | : 1 August 2024 |  |

# **SECTION 5: Firefighting measures**

| Hazardous combustion products | : Decomposition products may include the following materials:<br>carbon oxides<br>sulfur oxides<br>metal oxide/oxides |
|-------------------------------|---|
| 5.3 Advice for firefighters   |   |
| Special protective actions    | : Promptly isolate the scene by removing all persons from the vicinity of the incident if                             |

| for fire-fighters  |   | suitable training. Move containers from fire area if this can be done without risk.<br>Use water spray to keep fire-exposed containers cool.                  |
|--------------------|---|---|
| Special protective | : | Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure |

# SECTION 6: Accidental release measures

# 6.1 Personal precautions, protective equipment and emergency procedures

mode.

| For non-emergency<br>personnel  | :   | No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilt material. Shut off all ignition sources.<br>No flares, smoking or flames in hazard area. Avoid breathing vapour or mist.<br>Provide adequate ventilation. Wear appropriate respirator when ventilation is<br>inadequate. Put on appropriate personal protective equipment. |  |
|---------------------------------|---|--|--|
| For emergency responders        | :   | If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".  |  |
| 6.2 Environmental precautions   | :   | Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains<br>and sewers. Inform the relevant authorities if the product has caused environmental<br>pollution (sewers, waterways, soil or air). Water polluting material. May be harmful<br>to the environment if released in large quantities.  |  |
| 6.3 Methods and material for    | со  | ntainment and cleaning up  |  |
| Small spill                     | :   | Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.   |  |
| Large spill                     | : Stop leak if without risk. Move containers from spill area. Use spark-proof tool explosion-proof equipment. Approach the release from upwind. Prevent entry sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous e and place in container for disposal according to local regulations (see Section 1 Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilt product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal. |  |  |
| 6.4 Reference to other sections | :   | See Section 1 for emergency contact information.<br>See Section 8 for information on appropriate personal protective equipment.<br>See Section 13 for additional waste treatment information.  |  |

Code<th::</th>::1 August 2024SIGMADUR 550 BAS WHITEDate of issue/Date of revision:1 August 2024

# **SECTION 7: Handling and storage**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### 7.1 Precautions for safe handling

| Protective measures                    | : Fut on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Avoid exposure - obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Do not get in eyes or on skin or clothing. Do not ingest. Avoid breathing vapour or mist. Avoid release to the environment. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Take precautionary measures against electrostatic discharges. Empty containers retain product residue and can be hazardous. Do not reuse container. |
|--|--|
| Advice on general occupational hygiene | : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.  |

#### 7.2 Conditions for safe storage, including any incompatibilities

Store between the following temperatures: 0 to 35°C (32 to 95°F). Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Eliminate all ignition sources. Separate from oxidising materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.

## 7.3 Specific end use(s)

See Section 1.2 for Identified uses.

# **SECTION 8: Exposure controls/personal protection**

#### 8.1 Control parameters

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### **Occupational exposure limits**

| Product/ingredient name | Exposure limit values   |

|--|--|--|
| Other skin protection                  | : Appropriate footwear and any additional skin protection measures should be selected<br>based on the task being performed and the risks involved and should be approved by<br>specialist before handling this product.  |  |
| Body protection                        | : Personal protective equipment for the body should be selected based on the task be performed and the risks involved and should be approved by a specialist before handling this product. When there is a risk of ignition from static electricity, wear a static protective clothing. For the greatest protection from static discharges, clothir should include anti-static overalls, boots and gloves.   |  |
| Hand protection                        | : Chemical-resistant, impervious gloves complying with an approved standard should be<br>worn at all times when handling chemical products if a risk assessment indicates this<br>necessary. Considering the parameters specified by the glove manufacturer, check<br>during use that the gloves are still retaining their protective properties. It should be<br>noted that the time to breakthrough for any glove material may be different for different<br>glove manufacturers. In the case of mixtures, consisting of several substances, the<br>protection time of the gloves cannot be accurately estimated. When prolonged or<br>frequently repeated contact may occur, a glove with a protection class of 6<br>(breakthrough time greater than 480 minutes according to EN 374) is recommended.<br>When only brief contact is expected, a glove with a protection class of 2 or higher<br>(breakthrough time greater than 30 minutes according to EN 374) is recommended.<br>The user must check that the final choice of type of glove selected for handling this<br>product is the most appropriate and takes into account the particular conditions of use<br>as included in the user's risk assessment.<br><b>b</b> utyl rubber |  |
| Eye/face protection<br>Skin protection | : Chemical splash goggles.   |  |
| Hygiene measures                       | : Wash hands, forearms and face thoroughly after handling chemical products, before<br>eating, smoking and using the lavatory and at the end of the working period.<br>Appropriate techniques should be used to remove potentially contaminated clothing.<br>Contaminated work clothing should not be allowed out of the workplace. Wash<br>contaminated clothing before reusing. Ensure that eyewash stations and safety<br>showers are close to the workstation location.  |  |
| ndividual protection meas              | <u>ures</u>  |  |
| Appropriate engineering<br>controls    | : Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep ga vapour or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.   |  |

| Code : 40550-C7000     | Date of issue/Date of revision | : 1 August 2024 |
|------------------------|--------------------------------|-----------------|

# **SECTION 8: Exposure controls/personal protection**

| Respiratory protection          | : Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator. If workers are exposed to concentrations above the exposure limit, they must use appropriate, certified respirators. Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Wear a respirator conforming to EN140. Filter type: organic vapour (Type A) and particulate filter P3 |
|---------------------------------|--|
| Environmental exposure controls | : Emissions from ventilation or work process equipment should be checked to ensure<br>they comply with the requirements of environmental protection legislation. In some<br>cases, fume scrubbers, filters or engineering modifications to the process equipment<br>will be necessary to reduce emissions to acceptable levels.  |

# **SECTION 9: Physical and chemical properties**

The conditions of measurement of all properties are at standard temperature and pressure unless otherwise indicated.

#### 9.1 Information on basic physical and chemical properties **Appearance Physical state** : Liquid. Colour White. Odour : Not available. : Not available. **Odour threshold** Melting point/freezing point : May start to solidify at the following temperature: -43.77°C (-46.8°F) This is based on data for the following ingredient: 1,2,4-trimethylbenzene. Weighted average: -78.67°C (-109.6°F) : >37.78°C (>100°F) Initial boiling point and boiling range Flammability (solid, gas) : liquid Upper/lower flammability or Createst known range: Lower: 1.4% Upper: 7.6% (Solvent naphtha (petroleum), 2 light aromatic) explosive limits **Flash point** Closed cup: 25°C (77°F) 5 Auto-ignition temperature ŝ **Ingredient name** °C °F Method p-butyl acetate 415 779 EU A.15 pН : Not applicable. # **SECTION 9: Physical and chemical properties**

|                          | I he product itself is not explosive, but the formation of an explosible mixture of vapour or dust with air is possible. |
|--------------------------|--|
| Oxidising properties     | : Product does not present an oxidizing hazard.  |
| Particle characteristics |  |
| Median particle size     | : Not applicable.  |

#### **SECTION 10: Stability and reactivity** : No specific test data related to reactivity available for this product or its ingredients. **10.1 Reactivity**

| io. i iteactivity                          |   |
|--|---|
| 10.2 Chemical stability                    | : The product is stable.  |
| 10.3 Possibility of<br>hazardous reactions | : Under normal conditions of storage and use, hazardous reactions will not occur.   |
| 10.4 Conditions to avoid                   | : When exposed to high temperatures may produce hazardous decomposition products.<br>Refer to protective measures listed in sections 7 and 8. |
| 10.5 Incompatible materials                | : Keep away from the following materials to prevent strong exothermic reactions: oxidising agents, strong alkalis, strong acids.              |
| 10.6 Hazardous<br>decomposition products   | : Depending on conditions, decomposition products may include the following materials: carbon oxides sulfur oxides metal oxide/oxides         |

#### 12.3 Bioaccumulative potential

| Code     | : 40550-C7000 | Date of issue/Date of revision | : 1 August 2024 |
|----------|---------------|--------------------------------|-----------------|
| SIGMADUR | 550 BAS WHITE |                                |                 |

# **SECTION 12: Ecological information**

| Product/ingredient name | LogPow | BCF         | Potential |
|-------------------------|--------|-------------|-----------|
| kylene                  | 3.12   | 7.4 to 18.5 | Low       |
| n-butyl acetate         | 2.3    | -           | Low       |
| ethylbenzene            | 3.6    | 79.43       | Low       |
| propylidynetrimethanol  | -0.47  | -           | Low       |

| 12.4 Mobility in soil                                  |                  |
|--|------------------|
| Soil/water partition<br>coefficient (K <sub>oc</sub> ) | : Not available. |
| Mobility   | : Not available. |

## 12.5 Results of PBT and vPvB assessment

This mixture does not contain any substances that are assessed to be a PBT or a vPvB.

**12.6 Other adverse effects** : No known significant effects or critical hazards.

# **SECTION 13: Disposal considerations**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### **13.1 Waste treatment methods**

| Product             |  |
|---------------------|--|
| Methods of disposal | : The generation of waste should be avoided or minimised wherever possible.<br>Disposal of this product, solutions and any by-products should at all times comply<br>with the requirements of environmental protection and waste disposal legislation<br>and any regional local authority requirements. Dispose of surplus and non-<br>recyclable products via a licensed waste disposal contractor. Waste should not be<br>disposed of untreated to the sewer unless fully compliant with the requirements of<br>all authorities with jurisdiction. |
| Hazardous waste     | : Yes.   |

## Waste catalogue

| Waste code          | Waste designation   |
|---------------------|---|
| 08 01 11*           | waste paint and varnish containing organic solvents or other hazardous substances   |
| Packaging           |   |
| Methods of disposal | : The generation of waste should be avoided or minimised wherever possible. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible.  |
| Special precautions | : This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapour from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. |

# **SECTION 14: Transport information**

#### Additional information

| ADR/RID  | : None identified.  |
|--|---|
| Tunnel code  | : (D/E)   |
| ADN  | : The product is only regulated as an environmentally hazardous substance when transported in tank vessels. |
| IMDG   | : None identified.  |
| IATA   | : None identified.  |
| <ul> <li>14.6 Special precautions for user</li> <li><b>Transport within user's premises:</b> always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.</li> </ul> |   |

#### 14.7 Transport in bulk : Not available. according to IMO instruments

# **SECTION 15: Regulatory information**

15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture <u>UK (GB)/REACH</u>

Annex XIV - List of substances subject to authorisation

## Annex XIV

None of the components are listed.

Substances of very high concern

None of the components are listed.

# Ozone depleting substances

Not listed.

Annex XVII - Restrictions : Restricted to professional users. on the manufacture, placing on the market and use of certain dangerous substances, mixtures and articles

## Seveso Directive

This product is controlled under the Seveso Directive.

**Danger criteria** 

Code : 40550-C7000 **SIGMADUR 550 BAS WHITE**

## Procedure used to derive the classification

| Classification          | Justification         |
|-------------------------|-----------------------|
| Mam. Liq. 3, H226       | On basis of test data |
| Skin Sens. 1, H317      | Calculation method    |
| Carc. 1B, H350          | Calculation method    |
| STOT SE 3, H335         | Calculation method    |
| STOT SE 3, H336         | Calculation method    |
| Aquatic Chronic 3, H412 | Calculation method    |

#### Full text of abbreviated H statements

| H225   | Highly flammable liquid and vapour.                                      |
|--------|--|
| H226   | Flammable liquid and vapour.   |
| H304   | May be fatal if swallowed and enters airways.                            |
| H312   | Harmful in contact with skin.  |
| H315   | Causes skin irritation.  |
| H317   | May cause an allergic skin reaction.                                     |
| H319   | Causes serious eye irritation.   |
| H332   | Harmful if inhaled.  |
| H335   | May cause respiratory irritation.  |
| H336   | May cause drowsiness or dizziness.                                       |
| H350   | May cause cancer.  |
| H361f  | Suspected of damaging fertility.   |
| H361fd | Suspected of damaging fertility. Suspected of damaging the unborn child. |
| H373   | May cause damage to organs through prolonged or repeated exposure.       |
| H400   | Very toxic to aquatic life.  |
| H410   | Very toxic to aquatic life with long lasting effects.                    |
| H411   | Toxic to aquatic life with long lasting effects.                         |
| H412   | Harmful to aquatic life with long lasting effects.                       |
| H413   | May cause long lasting harmful effects to aquatic life.                  |
| EUH066 | Repeated exposure may cause skin dryness or cracking.                    |
