# Section 2. Hazards identification

| substance or mixture       ACUTE TOXICITY (oral) - Category 5         ACUTE TOXICITY (dermal) - Category 5         ACUTE TOXICITY (inhalation) - Category 4         SKIN IRRITATION - Category 2         SERIOUS EYE DAMAGE - Category 1         SKIN SENSITIZATION - Category 2         SPECIFIC TARGET ORGAN TOXICITY (SINGLE EXPOSURE) (Respiratory tract         irritation) - Category 3 | Classification of the<br>substance or mixture | ACUTE TOXICITY (dermal) - Category 5<br>ACUTE TOXICITY (inhalation) - Category 4<br>SKIN IRRITATION - Category 2<br>SERIOUS EYE DAMAGE - Category 1<br>SKIN SENSITIZATION - Category 1<br>CARCINOGENICITY - Category 2<br>SPECIFIC TARGET ORGAN TOXICITY (SINGLE EXPOSURE) (Respiratory tract<br>irritation) - Category 3<br>SPECIFIC TARGET ORGAN TOXICITY (SINGLE EXPOSURE) (Narcotic effects) -<br>Category 3<br>AQUATIC HAZARD (ACUTE) - Category 2 |
|---|---|---|
|---|---|---|

| Section 2. Hazard        | s identification   |
|--------------------------|--|
| Target organs            | : Contains material which causes damage to the following organs: brain.<br>Contains material which may cause damage to the following organs: blood, kidneys,<br>lungs, the nervous system, liver, upper respiratory tract, skin, central nervous<br>system (CNS), ears, eye, lens or cornea.   |
|                          | Percentage of the mixture consisting of ingredient(s) of unknown acute oral toxicity: 43.5%  |
|                          | Percentage of the mixture consisting of ingredient(s) of unknown acute dermal toxicity: 43.5%  |
|                          | Percentage of the mixture consisting of ingredient(s) of unknown acute inhalation toxicity: 47%  |
|                          | Percentage of the mixture consisting of ingredient(s) of unknown hazards to the aquatic environment: 21.8%   |
| GHS label elements       |  |
| Hazard pictograms        |  |
| Signal word              | : Danger   |
| Hazard statements        | <ul> <li>Flammable liquid and vapor.<br/>May be harmful if swallowed or in contact with skin.<br/>Causes skin irritation.<br/>May cause an allergic skin reaction.<br/>Causes serious eye damage.<br/>Harmful if inhaled.<br/>May cause respiratory irritation.<br/>May cause drowsiness or dizziness.<br/>Suspected of causing cancer.<br/>Toxic to aquatic life.<br/>Harmful to aquatic life with long lasting effects.</li> </ul>   |
| Precautionary statements |  |
| Prevention               | : Obtain special instructions before use. Wear protective gloves, protective clothing<br>and eye or face protection. Keep away from heat, hot surfaces, sparks, open<br>flames and other ignition sources. No smoking. Use explosion-proof electrical,<br>ventilating or lighting equipment. Use non-sparking tools. Take action to prevent<br>static discharges. Avoid release to the environment. Avoid breathing vapor. Wash<br>thoroughly after handling.  |
| Response                 | : IF exposed or concerned: Get medical advice or attention. IF INHALED: Call a POISON CENTER or doctor if you feel unwell. Take off contaminated clothing and wash it before reuse. IF ON SKIN: Call a POISON CENTER or doctor if you feel unwell. Wash with plenty of water. If skin irritation or rash occurs: Get medical advice or attention. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a POISON CENTER or doctor. |
| Storage                  | : Store in a well-ventilated place. Keep container tightly closed. Keep cool.  |
| Disposal                 | : Dispose of contents and container in accordance with all local, regional, national and international regulations.  |

Date of issue

### Section 2. Hazards identification

Other hazards which do not: Causes digestive tract burns. Prolonged or repeated contact may dry skin and<br/>cause irritation.

# Section 3. Composition/information on ingredients

| Substance/mixture                | 1 | Mixture                                |
|----------------------------------|---|--|
| Other means of<br>identification | : | 00202389; 00254137; 00326824; 00467284 |

#### CAS number/other identifiers

| %        | CAS number   |

|          | 20 - <30<br>20 - <30<br>20 - <30<br>3 - <5<br>2 - <3 |

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

SUB codes represent substances without registered CAS Numbers.

### Section 4. First aid measures

| Description of necessary fir              | <u>st aid measures</u>  |
|---|---|
| Eye contact                               | <ul> <li>Check for and remove any contact lenses. Immediately flush eyes with running<br/>water for at least 15 minutes, keeping eyelids open. Seek immediate medical<br/>attention.</li> </ul>   |
| Inhalation                                | <ul> <li>Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is<br/>irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by<br/>trained personnel.</li> </ul>  |
| Skin contact                              | : Remove contaminated clothing and shoes. Wash skin thoroughly with soap and water or use recognized skin cleanser. Do NOT use solvents or thinners.  |
| Ingestion                                 | : If swallowed, seek medical advice immediately and show this container or label.<br>Keep person warm and at rest. Do NOT induce vomiting.  |
| Indication of immediate med               | lical attention and special treatment needed, if necessary  |
| Notes to physician<br>Specific treatments | <ul> <li>In case of inhalation of decomposition products in a fire, symptoms may be delayed.</li> <li>The exposed person may need to be kept under medical surveillance for 48 hours.<br/>No specific treatment.</li> </ul>   |
| Protection of first-aiders                | : No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. |
| Potential acute health effect             | S   |

# Section 4. First aid measures

| Eye contact  | : Causes serious eye damage.  |
|--------------|---|
| Inhalation   | <ul> <li>Harmful if inhaled. Can cause central nervous system (CNS) depression. May<br/>cause drowsiness or dizziness. May cause respiratory irritation.</li> </ul> |
| Skin contact | : May be harmful in contact with skin. Causes skin irritation. Defatting to the skin. May cause an allergic skin reaction.  |
| Ingestion    | : May be harmful if swallowed. Corrosive to the digestive tract. Causes burns. Can cause central nervous system (CNS) depression.                                   |

See toxicological information (Section 11)

# Section 5. Fire-fighting measures

| Extinguishing media                            |  |
|--|--|
| Suitable extinguishing media                   | : Use dry chemical, CO <sub>2</sub> , water spray (fog) or foam.   |
| Unsuitable extinguishing media                 | : Do not use water jet.  |
| Specific hazards arising from the chemical     | : Flammable liquid and vapor. Runoff to sewer may create fire or explosion hazard.<br>In a fire or if heated, a pressure increase will occur and the container may burst,<br>with the risk of a subsequent explosion. This material is toxic to aquatic life. This<br>material is harmful to aquatic life with long lasting effects. Fire water contaminated<br>with this material must be contained and prevented from being discharged to any<br>waterway, sewer or drain. |
| Hazardous thermal decomposition products       | : Decomposition products may include the following materials:<br>carbon oxides<br>nitrogen oxides  |
| Special protective actions for fire-fighters   | : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.   |
| Special protective equipment for fire-fighters | <ul> <li>Fire-fighters should wear appropriate protective equipment and self-contained<br/>breathing apparatus (SCBA) with a full face-piece operated in positive pressure<br/>mode.</li> </ul>  |

# Section 6. Accidental release measures

#### Personal precautions, protective equipment and emergency procedures

| For non-emergency<br>personnel |   | No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilled material. Shut off all ignition source<br>No flares, smoking or flames in hazard area. Do not breathe vapor or mist. Provi<br>adequate ventilation. Wear appropriate respirator when ventilation is inadequate.<br>Put on appropriate personal protective equipment. | es.<br>ide |
|--------------------------------|---|--|------------|
| For emergency responders       | : | If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".  |            |
| Environmental precautions      | : | Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). Water polluting material. May be harmful to the environment if released in large quantities.   |            |
|                                |   | English (US) Uruguay   | 4/1        |

2.07

# Section 6. Accidental release measures

#### Methods and materials for containment and cleaning up

| Small spill | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools<br>and explosion-proof equipment. Dilute with water and mop up if water-soluble.<br>Alternatively, or if water-insoluble, absorb with an inert dry material and place in an<br>appropriate waste disposal container. Dispose of via a licensed waste disposal<br>contractor.  |
|-------------|---|
| Large spill | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools<br>and explosion-proof equipment. Approach release from upwind. Prevent entry into<br>sewers, water courses, basements or confined areas. Wash spillages into an<br>effluent treatment plant or proceed as follows. Contain and collect spillage with non-<br>combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth<br>and place in container for disposal according to local regulations (see Section 13).<br>Dispose of via a licensed waste disposal contractor. Contaminated absorbent<br>material may pose the same hazard as the spilled product. Note: see Section 1 for<br>emergency contact information and Section 13 for waste disposal. |

# Section 7. Handling and storage

| Precautions for safe<br>handling                                   | Put on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Avoid exposure - obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Do not get in eyes or on skin or clothing. Do not breathe vapor or mist. Do not ingest. Avoid release to the environment. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Take precautionary measures against electrostatic discharges. Empty containers retain product residue and can be hazardous. Do not reuse container. |
|--|--|
| Conditions for safe storage,<br>including any<br>incompatibilities | : Store between the following temperatures: 0 to 35°C (32 to 95°F). Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Eliminate all ignition sources. Separate from oxidizing materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.  |

# Section 10. Stability and reactivity

| Reactivity                         | : No specific test data related to reactivity available for this product or its ingredients. |
|------------------------------------|--|
| Chemical stability                 | : The product is stable.   |
| Possibility of hazardous reactions | : Under normal conditions of storage and use, hazardous reactions will not occur.            |

# Section 10. Stability and reactivity

| Conditions to avoid              | : | When exposed to high temperatures may produce hazardous decomposition products.  |
|----------------------------------|---|--|
| Incompatible materials           | : | Keep away from the following materials to prevent strong exothermic reactions: oxidizing agents, strong alkalis, strong acids. |
| Hazardous decomposition products | : | Depending on conditions, decomposition products may include the following materials carbon oxides nitrogen oxides              |
|                                  |   |  |

# Section 11. Toxicological information

| Information on the likely<br>routes of exposure | 1   | Not available.  |
|---|-----|---|
| Potential acute health effects                  | È   |   |
| Eye contact                                     | 1   | Causes serious eye damage.  |
| Inhalation                                      | 1   | Harmful if inhaled. Can cause central nervous system (CNS) depression. May cause drowsiness or dizziness. May cause respiratory irritation.                         |
| Skin contact                                    | :   | May be harmful in contact with skin. Causes skin irritation. Defatting to the skin.<br>May cause an allergic skin reaction.   |
| Ingestion                                       | :   | May be harmful if swallowed. Corrosive to the digestive tract. Causes burns. Can cause central nervous system (CNS) depression.                                     |
| Symptoms related to the phy                     | sic | cal, chemical and toxicological characteristics   |
| Eye contact                                     |     | Adverse symptoms may include the following:   |
|   |     | pain  |
|   |     | watering  |
|   |     | redness   |
| Inhalation                                      | ÷   | Adverse symptoms may include the following:   |
|   |     | respiratory tract irritation<br>coughing  |
|   |     | nausea or vomiting  |
|   |     | headache  |
|   |     | drowsiness/fatigue  |
|   |     | dizziness/vertigo<br>unconsciousness  |
| Skin contact                                    |     |   |
| Skin contact                                    | 1   | Adverse symptoms may include the following:<br>pain or irritation   |
|   |     | redness   |
|   |     | dryness   |
|   |     | cracking  |
|   |     | blistering may occur  |
| Ingestion                                       | ÷   | Adverse symptoms may include the following: stomach pains   |
|   |     | stomach pains   |
| Deleved and immediate offer                     | •   | and also obvenia officiate from object and long term evenesure  |
|   |     | and also chronic effects from short and long term exposure  |
| Conclusion/Summary                              | ÷   | There are no data available on the mixture itself. Exposure to component solvent  |
|   |     | vapor concentrations in excess of the stated occupational exposure limit may result<br>in adverse health effects such as mucous membrane and respiratory system     |
|   |     | irritation and adverse effects on the kidneys, liver and central nervous system.  |
|   |     | Symptoms and signs include headache, dizziness, fatigue, muscular weakness,   |
|   |     | drowsiness and, in extreme cases, loss of consciousness. Solvents may cause   |
|   |     | some of the above effects by absorption through the skin. There is some evidence  |
|   |     | that repeated exposure to organic solvent vapors in combination with constant loud noise can cause greater hearing loss than expected from exposure to noise alone. |
|   |     | If splashed in the eyes, the liquid may cause irritation and reversible damage.   |
|   |     | Ingestion may cause nausea, diarrhea and vomiting. This takes into account, where   |
|   |     | known, delayed and immediate effects and also chronic effects of components from  |
|   |     | short-term and long-term exposure by oral, inhalation and dermal routes of exposure and eye contact.  |
| Short form experience                           |     | exposure and eye contact.   |
| <u>Short term exposure</u>                      |     |   |

**Other adverse effects** 

: No known significant effects or critical hazards.

### Section 13. Disposal considerations

**Disposal methods** : The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and nonrecyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapor from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.
