|-----------------------------------------------------|---|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Precautionary statements                            |   |                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| Prevention                                          | : | Do not handle until all safety precautions have been read and understood. Wear protective gloves, protective clothing and eye or face protection. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Avoid release to the environment. Do not breathe vapour. Wash thoroughly after handling.                                                                                                 |
| Response                                            | : | IF exposed or concerned: Call a POISON CENTER or doctor. Take off<br>contaminated clothing and wash it before reuse. IF ON SKIN: Wash with plenty of<br>water. If skin irritation or rash occurs: Get medical advice or attention. IF IN EYES:<br>Rinse cautiously with water for several minutes. Remove contact lenses, if present<br>and easy to do. Continue rinsing. If eye irritation persists: Get medical advice or<br>attention. |
| Storage                                             | 1 | Not applicable.                                                                                                                                                                                                                                                                                                                                                                                                                           |
| Disposal                                            | : | Dispose of contents and container in accordance with all local, regional, national and international regulations.                                                                                                                                                                                                                                                                                                                         |
| Other hazards which do not result in classification | : | Prolonged or repeated contact may dry skin and cause irritation.                                                                                                                                                                                                                                                                                                                                                                          |
|                                                     |   |                                                                                                                                                                                                                                                                                                                                                                                                                                           |

This material is classified as hazardous according to criteria in the Hazardous Substances (Minimum Degrees of Hazard) Notice 2017 and has been classified according to the Hazardous Substances (Classifications) Notice 2017.

This material is classified as DANGEROUS GOODS according to criteria in New Zealand Land Transport Rule: Dangerous Goods 2005.

## Section 7. Handling and storage

| Precautions for safe : handling                                      | Put on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Avoid exposure - obtain special instructions before use. Avoid exposure during pregnancy. Do not handle until all safety precautions have been read and understood. Do not get in eyes or on skin or clothing. Do not breathe vapour or mist. Do not ingest. Avoid release to the environment. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Take precautionary measures against electrostatic discharges. Empty containers retain product residue and can be hazardous. Do not reuse container. |
|----------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Conditions for safe storage, :<br>including any<br>incompatibilities | Store between the following temperatures: 0 to 35°C (32 to 95°F). Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Eliminate all ignition sources. Separate from oxidising materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.                                                                                                                                                                                                                                                                                                                                                                                                   |

## Section 8. Exposure controls/personal protection

## Section 8. Exposure controls/personal protection

| Appropriate engineering controls | Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering also need to keep gas, vapour or dust concentrations below any lower exploimits. Use explosion-proof ventilation equipment.                                                                                                                                                                                                                                 | controls                     |
|----------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------|
| Environmental exposure controls  | Emissions from ventilation or work process equipment should be checked to<br>they comply with the requirements of environmental protection legislation. In<br>cases, fume scrubbers, filters or engineering modifications to the process<br>equipment will be necessary to reduce emissions to acceptable levels.                                                                                                                                                                                                                                                                           |                              |
| Individual protection measu      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                              |
| Hygiene measures                 | Wash hands, forearms and face thoroughly after handling chemical products<br>eating, smoking and using the lavatory and at the end of the working period.<br>Appropriate techniques should be used to remove potentially contaminated of<br>Contaminated work clothing should not be allowed out of the workplace. Wa<br>contaminated clothing before reusing. Ensure that eyewash stations and sa<br>showers are close to the workstation location.                                                                                                                                        | clothing.<br>ash             |
| Respiratory protection           | Respirator selection must be based on known or anticipated exposure levels<br>nazards of the product and the safe working limits of the selected respirator.<br>workers are exposed to concentrations above the exposure limit, they must<br>appropriate, certified respirators. Use a properly fitted, air-purifying or air-fec-<br>respirator complying with an approved standard if a risk assessment indicate<br>necessary.                                                                                                                                                             | lf<br>use<br>d               |
| Hand protection                  | Chemical-resistant, impervious gloves complying with an approved standard<br>be worn at all times when handling chemical products if a risk assessment in<br>this is necessary. Considering the parameters specified by the glove manuf-<br>check during use that the gloves are still retaining their protective properties<br>should be noted that the time to breakthrough for any glove material may be<br>different for different glove manufacturers. In the case of mixtures, consisting<br>several substances, the protection time of the gloves cannot be accurately<br>estimated. | ndicates<br>acturer,<br>. It |
| Gloves                           | putyl rubber                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                              |
| Eye protection                   | Chemical splash goggles.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                              |
| Skin protection                  | Appropriate footwear and any additional skin protection measures should be<br>selected based on the task being performed and the risks involved and shou<br>approved by a specialist before handling this product.                                                                                                                                                                                                                                                                                                                                                                          |                              |

| Solubility(ies)                              | - | cold water             | Not soluble              |
| Partition coefficient: n-<br>octanol/water   | : | Not applicable.        |                          |
| Auto-ignition temperature                    | : | Not available.         |                          |
| Decomposition temperature                    | : | Not available.         |                          |
| Viscosity                                    | : | Kinematic (40°C (104°F | r)): >21 mm²/s (>21 cSt) |

# Section 10. Stability and reactivity

| Stability                          | : Stable under recommended storage and handling conditions (see Section 7).                                                                                               |
|------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Possibility of hazardous reactions | : Under normal conditions of storage and use, hazardous reactions will not occur.                                                                                         |
| Conditions to avoid                | : Avoid all possible sources of ignition (spark or flame). Do not pressurise, cut, weld, braze, solder, drill, grind or expose containers to heat or sources of ignition. |
| Incompatible materials             | : Reactive or incompatible with the following materials:<br>oxidising materials<br>strong acids<br>strong alkalis                                                         |
| Hazardous decomposition products   | <ul> <li>Depending on conditions, decomposition products may include the following<br/>materials: carbon oxides halogenated compounds metal oxide/oxides</li> </ul>       |
| Hazardous polymerisation           | <ul> <li>Under normal conditions of storage and use, hazardous polymerisation will not occur.</li> </ul>                                                                  |

# Section 11. Toxicological information

### Information on likely routes of exposure

| Inhalation            | : No known significant effects or critical hazards.                                                                                                                                           |
|-----------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Ingestion             | : May cause damage to organs following a single exposure if swallowed.                                                                                                                        |
| Skin contact          | <ul> <li>May cause damage to organs following a single exposure in contact with skin.</li> <li>Causes skin irritation. Defatting to the skin. May cause an allergic skin reaction.</li> </ul> |
| Eye contact           | : Causes serious eye irritation.                                                                                                                                                              |
| Symptoms related to t | he physical, chemical and toxicological characteristics                                                                                                                                       |
| Inhalation            | : Adverse symptoms may include the following:<br>reduced foetal weight<br>increase in foetal deaths<br>skeletal malformations                                                                 |

# Section 11. Toxicological information

| General                      | : May cause damage to organs through prolonged or repeated exposure. Prolonged or repeated contact can defat the skin and lead to irritation, cracking and/or dermatitis. Once sensitized, a severe allergic reaction may occur when subsequently exposed to very low levels. |
|------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Skin contact                 | : Once sensitized, a severe allergic reaction may occur when subsequently exposed to very low levels.                                                                                                                                                                         |
| Carcinogenicity              | : Suspected of causing cancer. Risk of cancer depends on duration and level of exposure.                                                                                                                                                                                      |
| Mutagenicity                 | : No known significant effects or critical hazards.                                                                                                                                                                                                                           |
| Teratogenicity               | : Suspected of damaging the unborn child.                                                                                                                                                                                                                                     |
| <b>Developmental effects</b> | : No known significant effects or critical hazards.                                                                                                                                                                                                                           |
| Fertility effects            | : Suspected of damaging fertility.                                                                                                                                                                                                                                            |
| Chronic toxicity             |                                                                                                                                                                                                                                                                               |
| Not available.               |                                                                                                                                                                                                                                                                               |

Other information

# Date of issue 26 September 2024

### Product name SIGMACOVER 456 BASE WHITE

# Section 11. Toxicological information

Prolonged or repeated contact may dry skin and cause irritation. Sanding and grinding dusts may be harmful if inhaled. Repeated exposure to high vapor concentrations may cause irritation of the respiratory system and permanent brain and nervous system damage. Inhalation of vapour/aerosol concentrations above the recommended exposure limits causes headaches, drowsiness and nausea and may lead to unconsciousness or death. Avoid contact with skin and clothing.

# Section 12. Ecological information

: This material is harmful to aquatic life with long lasting effects.

### Aquatic and terrestrial toxicity

**Ecotoxicity**

Soil/water partition

coefficient (Koc)

Other adverse effects

: No known significant effects or critical hazards.

Do not allow to enter drains or watercourses.

# Section 13. Disposal considerations

: Not available.

### **Disposal methods** : The generation of waste should be avoided or minimised wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or

## Section 13. Disposal considerations

liners may retain some product residues. Vapour from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.

### **Not suitable:** : Do not allow to enter drains or watercourses.

The classification of the product may meet the criteria for a hazardous waste. Disposal should be in accordance with applicable regional, national and local laws and regulations.

Refer to Section 7: HANDLING AND STORAGE and Section 8: EXPOSURE CONTROLS/PERSONAL PROTECTION for additional handling information and protection of employees. Section 6. Accidental release measures
