# SAFETY DATA SHEET

SIGMASHIELD 880 BASE BASE Z

Date of issue 26 September

2024

Version 8.01

number

#### 1. Product and company identification : SIGMASHIELD 880 BASE BASE Z **Product name Product code** : 00319092 **Product type** : Liquid. Relevant identified uses of the substance or mixture and uses advised against : Professional applications, Used by spraying. **Product use** Use of the substance/ : Coating. mixture **Uses advised against** : Not applicable. : PPG PMC Japan Co., Ltd., 8F, Shintetsu Bldg., 1-1, Daikaidori 1-chome, Kobe **Supplier's details** 652-0803 Japan; Tel: +81-78-574-2777 : 078 574 2777 **Emergency telephone**

## 2. Hazards identification

| Hazard statements                              | <ul> <li>Flammable liquid and vapor.<br/>Causes skin irritation.<br/>May cause an allergic skin reaction.<br/>Causes serious eye damage.<br/>Suspected of causing genetic defects.<br/>Suspected of causing cancer.<br/>May damage fertility or the unborn child.</li> </ul>   |
|--|--|
| Signal word                                    | : Danger   |
| <u>GHS label elements</u><br>Hazard pictograms |  |
|  | <ul> <li>FLAMMABLE LIQUIDS - Category 3<br/>SKIN IRRITATION - Category 2<br/>SERIOUS EYE DAMAGE - Category 1<br/>SKIN SENSITIZATION - Category 1<br/>GERM CELL MUTAGENICITY - Category 2<br/>CARCINOGENICITY - Category 2<br/>TOXIC TO REPRODUCTION - Category 1B<br/>SPECIFIC TARGET ORGAN TOXICITY (SINGLE EXPOSURE) - Category 1<br/>SPECIFIC TARGET ORGAN TOXICITY (REPEATED EXPOSURE) - Category 1<br/>HAZARDOUS TO THE AQUATIC ENVIRONMENT - ACUTE HAZARD - Category 7<br/>HAZARDOUS TO THE AQUATIC ENVIRONMENT - CHRONIC HAZARD -<br/>Category 1</li> </ul> |

| Product code 00319092                               | Date of issue 26 September Version 8.01<br>2024   |  |  |
|---|---|--|--|
| Product name SIGMASHIELD 880 BASE BASE Z            |   |  |  |
| 2. Hazards identifi                                 | cation  |  |  |
|   | Causes damage to organs. (central nervous system (CNS), kidneys, liver,<br>respiratory organs)<br>Causes damage to organs through prolonged or repeated exposure. (hearing<br>organs, nervous system, respiratory organs)<br>Very toxic to aquatic life with long lasting effects.  |  |  |
| Precautionary statements                            |   |  |  |
| Prevention  | : Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Wear protective gloves, protective clothing and eye or face protection. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Avoid release to the environment. Do not breathe vapor. Do not eat, drink or smoke when using this product. Wash thoroughly after handling. Contaminated work clothing should not be allowed out of the workplace. |  |  |
| Response  | : Collect spillage. IF exposed or concerned: Call a POISON CENTER or doctor. IF<br>ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with<br>water. IF ON SKIN: Wash with plenty of water. If skin irritation or rash occurs: Get<br>medical advice or attention. IF IN EYES: Rinse cautiously with water for several<br>minutes. Remove contact lenses, if present and easy to do. Continue rinsing.<br>Immediately call a POISON CENTER or doctor.                              |  |  |
| Storage   | : Store locked up.  |  |  |
| Disposal  | : Dispose of contents and container in accordance with all local, regional, national and international regulations.   |  |  |
| Other hazards which do not result in classification | : Prolonged or repeated contact may dry skin and cause irritation.  |  |  |

## 3. Composition/information on ingredients

Substance/mixture

: Mixture

### CAS number/other identifiers

| CAS number  | : Not applicable. |
|-------------|-------------------|
| CSCL number | : Not available.  |

| Ingredient name  | %          | CAS number  | CSCL           |
|--|------------|-------------|----------------|
| ✓olycondensate of 4,4'-isopropylidenediphenol<br>and 1-chloro-2,3-epoxypropane (liquid only)                 | 25 - <50   | 25068-38-6  | 7-1283         |
| Talc (containing no asbestos or quartz)  | 20 - <25   | 14807-96-6  | Not available. |
| crystalline silica, respirable powder (>10 microns)  | 20 - <25   | 14808-60-7  | 1-548          |
| Xylene   | 5 - <7     | 1330-20-7   | 3-3; 3-60      |
| Phenol, methylstyrenated   | 3 - <5     | 68512-30-1  | Not available. |
| Epoxy Resin (700 <mw<=1100)< td=""><td>3 - &lt;5</td><td>25036-25-3</td><td>Not available.</td></mw<=1100)<> | 3 - <5     | 25036-25-3  | Not available. |
| isobutyl alcohol   | 3 - <5     | 78-83-1     | 2-3049         |
| 2,3-epoxypropyl neodecanoate   | 2 - <3     | 26761-45-5  | 2-637          |
| Reaction products of 12-hydroxyoctadecanoic<br>acid and octadecanoic acid and<br>1,3-phenylenedimethanamine  | 1 - <2     | 911674-82-3 | Not available. |
| Ethyl Benzene  | 1 - <2     | 100-41-4    | 3-28; 3-60     |
| N,N'-ethane-1,2-diylbis(12-hydroxyoctadecan-<br>1-amide)   | 0.1 - <0.2 | 123-26-2    | 2-2720         |

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

## 3. Composition/information on ingredients

SUB codes represent substances without registered CAS Numbers.

### 4. First aid measures

### Description of necessary first aid measures

| Eye contact  | <ul> <li>Check for and remove any contact lenses. Immediately flush eyes with running<br/>water for at least 15 minutes, keeping eyelids open. Seek immediate medical<br/>attention.</li> </ul>                            |
|--------------|--|
| Inhalation   | <ul> <li>Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is<br/>irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by<br/>trained personnel.</li> </ul> |
| Skin contact | <ul> <li>Remove contaminated clothing and shoes. Wash skin thoroughly with soap and<br/>water or use recognized skin cleanser. Do NOT use solvents or thinners.</li> </ul>   |
| Ingestion    | <ul> <li>If swallowed, seek medical advice immediately and show this container or label.</li> <li>Keep person warm and at rest. Do NOT induce vomiting.</li> </ul>   |

### Most important symptoms/effects, acute and delayed

| Potential acute health effects         Eye contact       2       Causes serious eye damage.         Inhalation       2       No known significant effects or critical hazards.         Skin contact       2       Causes damage to organs following a single exposure in contact with skin. Causes skin irritation. Defatting to the skin. May cause an allergic skin reaction.         Ingestion       2       Causes damage to organs following a single exposure if swallowed.         Over-exposure signs/symptoms       2       Causes damage to organs following a single exposure if swallowed.         Over-exposure signs/symptoms       2       Adverse symptoms may include the following: pain watering reduces fetal weight increase in fetal deaths skeletal malformations         Skin contact       2       Adverse symptoms may include the following: reduces fetal weight increase in fetal deaths skeletal malformations         Skin contact       2       Adverse symptoms may include the following: reduced fetal weight increase in fetal deaths skeletal malformations         Ingestion       2       Adverse symptoms may include the following: skeletal malformations         Ingestion       2       Adverse symptoms may include the following: skeletal malformations         Ingestion       2       Adverse symptoms may include the following: skeletal malformations         Ingestion       3       Adverse symptoms may include the following: skeletal malformations  |                          |  |
|---|--------------------------|--|
| Inhalation       : No known significant effects or critical hazards.         Skin contact       : Causes damage to organs following a single exposure in contact with skin. Causes skin irritation. Defatting to the skin. May cause an allergic skin reaction.         Ingestion       : Causes damage to organs following a single exposure if swallowed.         Over-exposure signs/symptoms       : Adverse symptoms may include the following: pain watering redness         Inhalation       : Adverse symptoms may include the following: reduced fetal weight increase in fetal deaths skeletal malformations         Skin contact       : Adverse symptoms may include the following: reduced fetal weight increase in fetal deaths skeletal malformations         Skin contact       : Adverse symptoms may include the following: reduced fetal weight increase in fetal deaths skeletal malformations         Ingestion       : Adverse symptoms may include the following: stomach pains reduced fetal weight increase in fetal deaths skeletal malformations         Ingestion       : Adverse symptoms may include the following: stomach pains reduced fetal weight increase in fetal deaths skeletal malformations         Ingestion       : Adverse symptoms may include the following: stomach pains reduced fetal weight increase in fetal deaths skeletal malformations         Ingestion       : Adverse symptoms may include the following: stomach pains reduced fetal weight increase in fetal deaths skeletal malformations         Ingestion       : Adverse symptoms may include the following: stomach pains reduced fetal deaths skeletal malformation       | Potential acute health e | ifects   |
| Skin contact       : Causes damage to organs following a single exposure in contact with skin. Causes skin irritation. Defatting to the skin. May cause an allergic skin reaction.         Ingestion       : Causes damage to organs following a single exposure if swallowed.         Over-exposure signs/symptoms       : Causes damage to organs following a single exposure if swallowed.         Over-exposure signs/symptoms       : Adverse symptoms may include the following: pain watering reduced fetal weight increase in fetal deaths skeletal malformations         Skin contact       : Adverse symptoms may include the following: reduced fetal weight increase in fetal deaths skeletal malformations         Skin contact       : Adverse symptoms may include the following: pain or irritation reduced fetal weight increase in fetal deaths skeletal malformations         Ingestion       : Adverse symptoms may include the following: pain or irritation reduced fetal weight increase in fetal deaths skeletal malformations         Ingestion       : Adverse symptoms may include the following: stomach pains reduced fetal weight increase in fetal deaths skeletal malformations         Ingestion       : Adverse symptoms may include the following: stomach pains reduced fetal weight increase in fetal deaths skeletal malformations         Ingestion       : Adverse symptoms may include the following: stomach pains reduced fetal weight increase in fetal deaths skeletal malformations         Ingestion       : Adverse symptoms may include the following: stomach pains reduced fetal weight increases in fetal deaths skeletal malformations | Eye contact              | : Causes serious eye damage.   |
| skin irritation. Defatting to the skin. May cause an allergic skin reaction.         Ingestion       : Causes damage to organs following a single exposure if swallowed.         Over-exposure signs/symptoms         Eye contact       : Adverse symptoms may include the following:<br>pain<br>watering<br>redness         Inhalation       : Adverse symptoms may include the following:<br>redness         Inhalation       : Adverse symptoms may include the following:<br>redness         Skin contact       : Adverse symptoms may include the following:<br>redness         Skin contact       : Adverse symptoms may include the following:<br>pain or irritation<br>redness<br>dryness<br>cracking         Ingestion       : Adverse symptoms may include the following:<br>stomach pains<br>reduced fetal weight<br>increase in fetal deaths<br>skeletal malformations         Ingestion       : Adverse symptoms may include the following:<br>stomach pains<br>reduced fetal weight<br>increase in fetal deaths<br>skeletal malformations         Ingestion       : Adverse symptoms may include the following:<br>stomach pains<br>reduced fetal weight<br>increase in fetal deaths<br>skeletal malformations         Indication of immediate medical attention and special treatment needed. If necessary         Notes to physician       : Treat symptomatically. Contact poison treatment specialist immediately if large<br>quantities have been ingested or inhaled.   | Inhalation               | : No known significant effects or critical hazards.  |
| Over-exposure signs/symptoms         Eye contact       : Adverse symptoms may include the following:<br>pain<br>watering<br>reducess         Inhalation       : Adverse symptoms may include the following:<br>reduced fetal weight<br>increase in fetal deaths<br>skeletal malformations         Skin contact       : Adverse symptoms may include the following:<br>pain or irritation<br>redness<br>dryness<br>cracking<br>blistering may occur<br>reduced fetal weight<br>increase in fetal deaths<br>skeletal malformations         Ingestion       : Adverse symptoms may include the following:<br>stomach pains<br>reduced fetal weight<br>increase in fetal deaths<br>skeletal malformations         Ingestion       : Adverse symptoms may include the following:<br>stomach pains<br>reduced fetal weight<br>increase in fetal deaths<br>skeletal malformations         Indication of immediate medical attention and special treatment needed. If necessary         Notes to physician       : Treat symptomatically. Contact poison treatment specialist immediately if large<br>quantities have been ingested or inhaled.   | Skin contact             |  |
| Eye contact       : Adverse symptoms may include the following:<br>pain<br>watering<br>redness         Inhalation       : Adverse symptoms may include the following:<br>reduced fetal weight<br>increase in fetal deaths<br>skeletal malformations         Skin contact       : Adverse symptoms may include the following:<br>pain or irritation<br>redness<br>dryness<br>cracking<br>blistering may occur<br>reduced fetal weight<br>increase in fetal deaths<br>skeletal malformations         Ingestion       : Adverse symptoms may include the following:<br>stomach pains<br>reduced fetal weight<br>increase in fetal deaths<br>skeletal malformations         Ingestion       : Adverse symptoms may include the following:<br>stomach pains<br>reduced fetal weight<br>increase in fetal deaths<br>skeletal malformations         Indication of immediate medical attention and special treatment needed. If necessary         Notes to physician       : Treat symptomatically. Contact poison treatment specialist immediately if large<br>quantities have been ingested or inhaled.   | Ingestion                | : Causes damage to organs following a single exposure if swallowed.  |
| pain       watering         redness       inhalation         Inhalation       : Adverse symptoms may include the following:         reduced fetal weight       increase in fetal deaths         skeletal malformations       : Adverse symptoms may include the following:         Skin contact       : Adverse symptoms may include the following:         pain or irritation       reduced fetal weight         increase in fetal deaths       skeletal malformations         Skin contact       : Adverse symptoms may include the following:         pain or irritation       reduced fetal weight         increase in fetal deaths       skeletal malformations         Ingestion       : Adverse symptoms may include the following:         stomach pains       reduced fetal weight         increase in fetal deaths       skeletal malformations         Ingestion       : Adverse symptoms may include the following:         stomach pains       reduced fetal weight         increase in fetal deaths       skeletal malformations         reduced fetal weight       increase in fetal deaths         skeletal malformations       :         reduced fetal weight       increase in fetal deaths         skeletal malformations       :         reduced fetal weight       increase in fetal deaths  | Over-exposure signs/sy   | <u>mptoms</u>  |

### Product name SIGMASHIELD 880 BASE BASE Z

### 4. First aid measures

```
    Protection of first-aiders
    No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves.
```

See toxicological information (Section 11)

### 5. Fire-fighting measures

| Extinguishing media                            |  |
|--|--|
| Suitable extinguishing media                   | : Use dry chemical, $CO_2$ , water spray (fog) or foam.  |
| Unsuitable extinguishing media                 | : Do not use water jet.  |
| Specific hazards arising from the chemical     | : Flammable liquid and vapor. Runoff to sewer may create fire or explosion hazard. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion. This material is very toxic to aquatic life with long lasting effects. Fire water contaminated with this material must be contained and prevented from being discharged to any waterway, sewer or drain. |
| Hazardous thermal decomposition products       | : Decomposition products may include the following materials:<br>carbon oxides<br>halogenated compounds<br>metal oxide/oxides  |
| Special protective actions for fire-fighters   | : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.   |
| Special protective equipment for fire-fighters | : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.  |

### 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures

| For non-emergency<br>personnel | : No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilled material. Shut off all ignition sources.<br>No flares, smoking or flames in hazard area. Do not breathe vapor or mist. Provide<br>adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put<br>on appropriate personal protective equipment. |
|--------------------------------|--|
| For emergency responders       | : If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".  |
| Environmental precautions      | : Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains<br>and sewers. Inform the relevant authorities if the product has caused environmental<br>pollution (sewers, waterways, soil or air). Water polluting material. May be harmful to<br>the environment if released in large quantities. Collect spillage.  |

### Methods and materials for containment and cleaning up

### 6. Accidental release measures

| Small spill | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.   |
|-------------|--|
| Large spill | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal. |

## 7. Handling and storage

| Precautions for safe<br>handling | : Put on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Avoid exposure - obtain special instructions before use. Avoid exposure during pregnancy. Do not handle until all safety precautions have been read and understood. Do not get in eyes or on skin or clothing. Do not breathe vapor or mist. Do not ingest. Avoid release to the environment. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Take precautionary measures against electrostatic discharges. Empty containers retain product residue and can be hazardous. Do not reuse container. |
|----------------------------------|---|
| Conditions for safe storage      | : Store between the following temperatures: 0 to 35°C (32 to 95°F). Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Eliminate all ignition sources. Separate from oxidizing materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. See   |

### 8. Exposure controls/personal protection

### Control parameters

#### **Occupational exposure limits**

| Ingredient name                         | Exposure limits   |

| Recommended monitoring procedures                   |   | priate monitoring standards. Reference to those for the determination of hazardous   |
| Appropriate engineering controls                    | : Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapor or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.   |  |
| Environmental exposure controls                     | : Emissions from ventilation or work process equipment should be checked to ensure<br>they comply with the requirements of environmental protection legislation. In some<br>cases, fume scrubbers, filters or engineering modifications to the process equipment<br>will be necessary to reduce emissions to acceptable levels.   |  |
| Individual protection measu                         | ires  |  |
| Hygiene measures                                    | : Wash hands, forearms and face thoroughly after handling chemical products, before<br>eating, smoking and using the lavatory and at the end of the working period.<br>Appropriate techniques should be used to remove potentially contaminated clothing.<br>Contaminated work clothing should not be allowed out of the workplace. Wash<br>contaminated clothing before reusing. Ensure that eyewash stations and safety<br>showers are close to the workstation location. |  |
| Eye protection<br>Skin protection                   | : Chemical splash goggles and face s  | hield.   |

## 8. Exposure controls/personal protection

| Hand protection        | : Chemical-resistant, impervious gloves complying with an approved standard should<br>be worn at all times when handling chemical products if a risk assessment indicates<br>this is necessary. Considering the parameters specified by the glove manufacturer,<br>check during use that the gloves are still retaining their protective properties. It<br>should be noted that the time to breakthrough for any glove material may be<br>different for different glove manufacturers. In the case of mixtures, consisting of<br>several substances, the protection time of the gloves cannot be accurately<br>estimated. |
|------------------------|---|
| Gloves                 | : butyl rubber  |
| Body protection        | : Personal protective equipment for the body should be selected based on the task<br>being performed and the risks involved and should be approved by a specialist<br>before handling this product. When there is a risk of ignition from static electricity,<br>wear anti-static protective clothing. For the greatest protection from static<br>discharges, clothing should include anti-static overalls, boots and gloves.   |
| Other skin protection  | : Appropriate footwear and any additional skin protection measures should be<br>selected based on the task being performed and the risks involved and should be<br>approved by a specialist before handling this product.   |
| Respiratory protection | : Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator. If workers are exposed to concentrations above the exposure limit, they must use appropriate, certified respirators. Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary.  |

## 9. Physical and chemical properties

| Appearance       |                       |             |  |
|------------------|-----------------------|-------------|--|
| Physical state   | : Liquid.             |             |  |
| Color            | : Various             |             |  |
| Odor             | : Characteristic.     |             |  |
| Boiling point    | : >37.78°C (>100°F)   |             |  |
| Flash point      | : Closed cup: 26°C (7 | 3.8°F)      |  |
| Relative density | : 1.2                 |             |  |
| Solubility/ico)  | Media                 | Result      |  |
| Solubility(ies)  | cold water            | Not soluble |  |
|                  |                       |             |  |

| 10. Stability and                  | reactivity   |
|------------------------------------|--|
| Reactivity                         | : No specific test data related to reactivity available for this product or its ingredients.                                     |
| Chemical stability                 | : The product is stable.   |
| Possibility of hazardous reactions | : Under normal conditions of storage and use, hazardous reactions will not occur.  |
| Conditions to avoid                | : When exposed to high temperatures may produce hazardous decomposition products.  |
| Incompatible materials             | : Keep away from the following materials to prevent strong exothermic reactions: oxidizing agents, strong alkalis, strong acids. |
|                                    | Japan Page: 7/16   |

Product name SIGMASHIELD 880 BASE BASE Z

### 10. Stability and reactivity

Hazardous decomposition products

: Depending on conditions, decomposition products may include the following materials: carbon oxides halogenated compounds metal oxide/oxides

## 11. Toxicological information

| 0   |   |      |
|---|---|------|
| Skin contact  | Causes damage to organs following a single exposure in contact with skin. Caus skin irritation. Defatting to the skin. May cause an allergic skin reaction.   | es   |
| Ingestion   | Causes damage to organs following a single exposure if swallowed.   |      |
| Symptoms related to the ph                          | ical, chemical and toxicological characteristics  |      |
| Eye contact   | Adverse symptoms may include the following:<br>pain<br>watering<br>redness  |      |
| Inhalation  | Adverse symptoms may include the following:<br>reduced fetal weight<br>increase in fetal deaths<br>skeletal malformations   |      |
| Skin contact  | Adverse symptoms may include the following:<br>pain or irritation<br>redness<br>dryness<br>cracking<br>blistering may occur<br>reduced fetal weight<br>increase in fetal deaths<br>skeletal malformations   |      |
| Ingestion   | Adverse symptoms may include the following:<br>stomach pains<br>reduced fetal weight<br>increase in fetal deaths<br>skeletal malformations  |      |
| Delayed and immediate effect<br>Short term exposure | and also chronic effects from short and long term exposure  |      |
| Potential immediate<br>effects                      | Not available.  |      |
| Potential delayed effects                           | Not available.  |      |
| <u>Long term exposure</u>                           |   |      |
| Potential immediate effects                         | Not available.  |      |
| Potential delayed effects                           | Not available.  |      |
| Potential chronic health eff                        | <u>S</u>  |      |
| General   | Causes damage to organs through prolonged or repeated exposure. Prolonged or repeated contact can defat the skin and lead to irritation, cracking and/or dermatint Once sensitized, a severe allergic reaction may occur when subsequently expose to very low levels. | tis. |
| Carcinogenicity                                     | Suspected of causing cancer. Risk of cancer depends on duration and level of exposure.  |      |
| Mutagenicity  | Suspected of causing genetic defects.   |      |
| Reproductive toxicity                               | May damage fertility or the unborn child.   |      |

### Other information

Prolonged or repeated contact may dry skin and cause irritation. Sanding and grinding dusts may be harmful if inhaled. Repeated exposure to high vapor concentrations may cause irritation of the respiratory system and permanent brain and nervous system damage. Inhalation of vapor/aerosol concentrations above the recommended exposure limits causes headaches, drowsiness and nausea and may lead to unconsciousness or death. Avoid contact with skin and clothing.

### Mobility in soil

: Not available.

Soil/water partition coefficient (Koc) Mobility

: Not available.

Other adverse effects

: No known significant effects or critical hazards.

### Product name SIGMASHIELD 880 BASE BASE Z

### 13. Disposal considerations

**Disposal methods** 

The generation of waste should be avoided or minimized wherever possible. 2 Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapor from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

### 14. Transport information

|                               | UN   | IMDG   | ΙΑΤΑ   |
|-------------------------------|--|--|--|
| UN number                     | UN1263   | UN1263   | UN1263   |
| UN proper<br>shipping name    | PAINT  | PAINT  | PAINT  |
| Transport hazard<br>class(es) | 3  | 3  | 3  |
| Packing group                 | III  | III  | III  |
| Environmental<br>hazards      | Yes. The environmentally<br>hazardous substance mark is<br>not required. | Yes.   | Yes. The environmentally<br>hazardous substance mark is<br>not required. |
| Marine pollutant substances   | Not applicable.  | (reaction product: bisphenol-A-<br>(epichlorohydrin); epoxy resin) | Not applicable.  |

#### **Additional information**

| UN   | : None identified.   |
|------|--|
| IMDG | : The marine pollutant mark is not required when transported in sizes of $\leq$ 5 L or $\leq$ 5 kg.        |
| ΙΑΤΑ | : The environmentally hazardous substance mark may appear if required by other transportation regulations. |
|      |  |

Special precautions for user : Transport within user's premises: always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

Transport in bulk according : Not applicable. to IMO instruments

### 15. Regulatory information

### Fire Service Law

| Category    | Substance name/Type | Danger<br>category | Signal word                | Designated<br>quantity |
|-------------|---------------------|--------------------|----------------------------|------------------------|
| Category IV | Class II petroleums | III                | Flammable - Keep Fire Away | 1000 L                 |

### Pollutant Release and Transfer Registers (PRTR)

| Ingredient name | %   | Status  | Reference<br>number |
|-----------------|-----|---------|---------------------|
| Xylene          | 6.9 | Class 1 | 80                  |
| Ethylbenzene    | 1.2 | Class 1 | 53                  |

### **Industrial Safety and Health Act**

### Ordinance on the Prevention of the Hazard due to Specified Chemical Substances

| Ingredient name | %   |                          | Reference<br>number |
