# SAFETY DATA SHEET

Date of issue/Date of revision

: 1 October 2024

Version : 2

Europe

## SECTION 1: Identification of the substance/mixture and of the company/ undertaking

**1.1 Product identifier** 

| Product name | ; | SIGMADUR 550 BASE CNC 2039 |
|--------------|---|----------------------------|
| Product code | ; | 00445273                   |

Other means of identification

Not available.

| 1.2 Relevant identified uses of the substance or mixture and uses advised against |   |  |  |  |
|---|---|--|--|--|
| Product use   | : Professional applications, Used by spraying.                    |  |  |  |
| Use of the substance/<br>mixture  | : Coating.  |  |  |  |
| Uses advised against  | : Product is not intended, labelled or packaged for consumer use. |  |  |  |

#### 1.3 Details of the supplier of the safety data sheet

PPG Coatings Belgium BV/SRL Tweemontstraat 104 B-2100 Deurne Belgium Telephone +32-33606311 Fax +32-33606435

e-mail address of person responsible for this SDS

: Product.Stewardship.EMEA@ppg.com

#### 1.4 Emergency telephone number

#### **Supplier**

+31 20 4075210

## **SECTION 2: Hazards identification**

2.1 Classification of the substance or mixture **Product definition** : Mixture

Classification according to Regulation (EC) No. 1272/2008 [CLP/GHS] Mam. Liq. 3, H226 Skin Sens. 1, H317 Carc. 1B, H350 STOT SE 3, H335 STOT SE 3, H336 Aquatic Chronic 3, H412

The product is classified as hazardous according to Regulation (EC) 1272/2008 as amended.

See Section 16 for the full text of the H statements declared above.

See Section 11 for more detailed information on health effects and symptoms.

| Code : 00445273            | Date of issue/Date of revision | : 1 October 2024 |
|----------------------------|--------------------------------|------------------|
| SIGMADUR 550 BASE CNC 2039 |                                |                  |

## **SECTION 2: Hazards identification**

| 2.2 Label elements<br>Hazard pictograms   |   |
|---|---|
| Signal word   | : Danger  |
| Hazard statements   | <ul> <li>Fammable liquid and vapour.</li> <li>May cause an allergic skin reaction.</li> <li>May cause respiratory irritation.</li> <li>May cause drowsiness or dizziness.</li> <li>May cause cancer.</li> <li>Harmful to aquatic life with long lasting effects.</li> </ul> |
| Precautionary statements  |   |
| Prevention  | : po not handle until all safety precautions have been read and understood. Wear protective gloves, protective clothing and eye or face protection. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.                          |
| Response  | : F exposed or concerned: Get medical advice or attention.  |
| Storage   | : Store in a well-ventilated place. Keep container tightly closed.  |
| Disposal  | <ul> <li>Dispose of contents and container in accordance with all local, regional, national and<br/>international regulations.</li> </ul>   |
|   | ₽202, P280, P210, P308 + P313, P403 + P233, P501  |
| Supplemental label<br>elements  | : Repeated exposure may cause skin dryness or cracking.   |
| Annex XVII - Restrictions<br>on the manufacture,<br>placing on the market and<br>use of certain dangerous<br>substances, mixtures and<br>articles | : <b>R</b> estricted to professional users.   |
| Special packaging requirem  | nents   |
| Containers to be fitted<br>with child-resistant<br>fastenings   | : Not applicable.   |
| Tactile warning of danger   | : Not applicable.   |
| 2.3 Other hazards   |   |
| Product meets the criteria for PBT or vPvB  | : This mixture does not contain any substances that are assessed to be a PBT or a vPvB.   |
| Other hazards which do not result in classification   | : Prolonged or repeated contact may dry skin and cause irritation.  |

Code : 00445273 SIGMADUR 550 BASE CNC 2039

3.2 Mixtures

Date of issue/Date of revision

: 1 October 2024

SECTION 3: Composition/information on ingredients

##

SIGMADUR 550 BASE CNC 2039

## **SECTION 3: Composition/information on ingredients**

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment, are PBTs, vPvBs or Substances of equivalent concern, or have been assigned a workplace exposure limit and hence require reporting in this section.

<u>Type</u>

[1] Substance classified with a health or environmental hazard

[2] Substance with a workplace exposure limit

Occupational exposure limits, if available, are listed in Section 8.

#### SUB codes represent substances without registered CAS Numbers.

### **SECTION 4: First aid measures**

#### 4.1 Description of first aid measures

| Eye contact                | : Remove contact lenses, irrigate copiously with clean, fresh water, holding the eyelids apart for at least 10 minutes and seek immediate medical advice.   |
|----------------------------|---|
| Inhalation                 | : Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is<br>irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained<br>personnel.  |
| Skin contact               | : Remove contaminated clothing and shoes. Wash skin thoroughly with soap and water<br>or use recognised skin cleanser. Do NOT use solvents or thinners.   |
| Ingestion                  | : If swallowed, seek medical advice immediately and show the container or label. Keep person warm and at rest. Do NOT induce vomiting.  |
| Protection of first-aiders | : No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. |

#### 4.2 Most important symptoms and effects, both acute and delayed

| Potential acute health | effects   |
|------------------------|---|
| Eye contact            | : No known significant effects or critical hazards.   |
| Inhalation             | : Can cause central nervous system (CNS) depression. May cause drowsiness or dizziness. May cause respiratory irritation.   |
| Skin contact           | : Defatting to the skin. May cause skin dryness and irritation. May cause an allergic skin reaction.  |
| Ingestion              | : 🗭an cause central nervous system (CNS) depression.  |
| Over-exposure signs/   | symptoms  |
| Eye contact            | : No specific data.   |
| Inhalation             | : Adverse symptoms may include the following:<br>respiratory tract irritation<br>coughing<br>nausea or vomiting<br>headache<br>drowsiness/fatigue<br>dizziness/vertigo<br>unconsciousness |

| 2020/878  | No. 1907/2006 (REACH), Annex II, as amended by Commission Regulation (EU)  |
|---|--|
| Code : 00445273<br>SIGMADUR 550 BASE CNC 2        | Date of issue/Date of revision         : 1 October 2024           2039         : 1 October 2024  |
| SECTION 4: First aid                              | measures   |
| Skin contact                                      | : Adverse symptoms may include the following:<br>irritation<br>redness<br>dryness<br>cracking  |
| Ingestion   | : No specific data.  |
| 4.3 Indication of any immedia                     | ate medical attention and special treatment needed   |
| Notes to physician                                | : Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.  |
| Specific treatments                               | : No specific treatment.   |
| SECTION 5: Firefight                              | ting measures  |
| 5.1 Extinguishing media                           |  |
| Suitable extinguishing media                      | : Use dry chemical, CO <sub>2</sub> , water spray (fog) or foam.   |
| Unsuitable extinguishing media                    | : Do not use water jet.  |
|   |  |
|   | rom the substance or mixture   |
| Hazards from the substance or mixture             | : Flammable liquid and vapour. Runoff to sewer may create fire or explosion hazard. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion. This material is harmful to aquatic life with long lasting effects. Fire water contaminated with this material must be contained and prevented from being discharged to any waterway, sewer or drain.   |
| Hazardous combustion products                     | : Decomposition products may include the following materials:<br>carbon oxides<br>sulfur oxides<br>metal oxide/oxides  |
| 5.3 Advice for firefighters                       |  |
| Special precautions for fire-fighters             | : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.   |
| Special protective<br>equipment for fire-fighters | : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. Clothing for fire-fighters (including helmets, protective boots and gloves) conforming to Europear standard EN 469 will provide a basic level of protection for chemical incidents.  |
| SECTION 6: Acciden                                | tal release measures   |
| 6.1 Personal precautions, pro                     | otective equipment and emergency procedures  |
| For non-emergency<br>personnel                    | : No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilt material. Shut off all ignition sources. No<br>flares, smoking or flames in hazard area. Avoid breathing vapour or mist. Provide<br>adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put<br>on appropriate personal protective equipment. |
| <b>F</b>  | If an acialized alathing is negatived to deal with the avillage, take note of any information is   |

**For emergency responders** : If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".

| English (GB) | Europe | 5/18 |

| SIGMADUR | 550 BASE CNC 2039 |                                |                  |

## **SECTION 6: Accidental release measures**

| 6.2 Environmental precautions   | :    | Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). Water polluting material. May be harmful to the environment if released in large quantities.   |
|---------------------------------|------|--|
| 6.3 Methods and material for    | r co | ntainment and cleaning up  |
| Small spill                     | -    | Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.   |
| Large spill                     | :    | Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach the release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations. Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilt product. |
| 6.4 Reference to other sections | :    | See Section 1 for emergency contact information.<br>See Section 8 for information on appropriate personal protective equipment.<br>See Section 13 for additional waste treatment information.  |

## **SECTION 7: Handling and storage**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### 7.1 Precautions for safe handling

| Protective measures  | : Fut on appropriate personal protective equipment (see Section 8). Personal history of skin sensitization problems should not be employed in any process this product is used. Avoid exposure - obtain special instructions before us handle until all safety precautions have been read and understood. Do not or on skin or clothing. Do not ingest. Avoid breathing vapour or mist. Avoid the environment. Use only with adequate ventilation. Wear appropriate resventilation is inadequate. Do not enter storage areas and confined spaces adequately ventilated. Keep in the original container or an approved alternative from heat, sparks, open flame or any other ignition source. Use explosion-electrical (ventilating, lighting and material handling) equipment. Use only it tools. Take precautionary measures against electrostatic discharges. Empretain product residue and can be hazardous. Do not reuse container. | ss in which<br>get in eyes<br>id release to<br>spirator when<br>unless<br>ative made<br>use away<br>proof<br>non-sparking |
|--|--|---|
| Advice on general occupational hygiene                                 | : Eating, drinking and smoking should be prohibited in areas where this mate handled, stored and processed. Workers should wash hands and face bef drinking and smoking. Remove contaminated clothing and protective equip entering eating areas. See also Section 8 for additional information on hyg measures.   | ore eating,<br>oment before   |
| 7.2 Conditions for safe<br>storage, including any<br>incompatibilities | : Store between the following temperatures: 0 to 35°C (32 to 95°F). Store in with local regulations. Store in a segregated and approved area. Store in a container protected from direct sunlight in a dry, cool and well-ventilated are from incompatible materials (see Section 10) and food and drink. Store loc Eliminate all ignition sources. Separate from oxidising materials. Keep conclosed and sealed until ready for use. Containers that have been opened r carefully resealed and kept upright to prevent leakage. Do not store in unla containers. Use appropriate containment to avoid environmental contamin  | original<br>ea, away<br>ked up.<br>ntainer tightly<br>nust be<br>abelled  |

Code : 00445273 Date of issue/Date of revision : 1 October 2024 SIGMADUR 550 BASE CNC 2039 SECTION 8: Exposure controls/personal protection 0.01 mg/l Marine water **Assessment Factors** Assessment Factors Sewage Treatment Plant 9.6 mg/l Fresh water sediment 13.7 mg/kg dwt Equilibrium Partitioning \_ Marine water sediment 1.37 mg/kg dwt Equilibrium Partitioning \_ Equilibrium Partitioning Soil 2.68 mg/kg dwt \_ Secondary Poisoning 20 mg/kg -8.2 Exposure controls Appropriate engineering : Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below controls any recommended or statutory limits. The engineering controls also need to keep gas, vapour or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment. Individual protection measures : Wash hands, forearms and face thoroughly after handling chemical products, before **Hygiene measures** eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Contaminated work clothing should not be allowed out of the workplace. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location. : Chemical splash goggles. Use eye protection according to EN 166. Eye/face protection Skin protection Hand protection Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated. When prolonged or frequently repeated contact may occur, a glove with a protection class of 6 (breakthrough time greater than 480 minutes according to EN 374) is recommended. When only brief contact is expected, a glove with a protection class of 2 or higher (breakthrough time greater than 30 minutes according to EN 374) is recommended. The user must check that the final choice of type of glove selected for handling this product is the most appropriate and takes into account the particular conditions of use, as included in the user's risk assessment. Gloves

butyl rubber 5

**Body protection** 2 Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. When there is a risk of ignition from static electricity, wear antistatic protective clothing. For the greatest protection from static discharges, clothing should include anti-static overalls, boots and gloves. Refer to European Standard EN 1149 for further information on material and design requirements and test methods.

Appropriate footwear and any additional skin protection measures should be selected Other skin protection based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

: Respirator selection must be based on known or anticipated exposure levels, the **Respiratory protection** hazards of the product and the safe working limits of the selected respirator. If workers are exposed to concentrations above the exposure limit, they must use appropriate, certified respirators. Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Wear a respirator conforming to EN140. Filter type: organic vapour (Type A) and particulate filter P3

## **SECTION 8: Exposure controls/personal protection**

**Environmental exposure** : Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some controls cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

### **SECTION 9: Physical and chemical properties**

The conditions of measurement of all properties are at standard temperature and pressure unless otherwise indicated.

**SECTION 9: Physical and chemical properties** 

No additional information.

## **SECTION 10: Stability and reactivity**

| 10.1 Reactivity                          | : No specific test data related to reactivity available for this product or its ingredients.  |
|--|---|
| 10.2 Chemical stability                  | : The product is stable.  |
| 10.3 Possibility of hazardous reactions  | : Under normal conditions of storage and use, hazardous reactions will not occur.   |
| 10.4 Conditions to avoid                 | : When exposed to high temperatures may produce hazardous decomposition products.<br>Refer to protective measures listed in sections 7 and 8. |
| 10.5 Incompatible materials              | : Keep away from the following materials to prevent strong exothermic reactions: oxidising agents, strong alkalis, strong acids.              |
| 10.6 Hazardous<br>decomposition products | : Depending on conditions, decomposition products may include the following materials: carbon oxides sulfur oxides metal oxide/oxides         |
|  |   |

## **SECTION 11: Toxicological information**

#### 11.1 Information on hazard classes as defined in Regulation (EC) No 1272/2008

The mixture has been assessed following the conventional method of the CLP Regulation (EC) No 1272/2008 and is classified for toxicological properties accordingly.

May cause an allergic skin reaction.

May cause cancer. May cause respiratory irritation.

May cause drowsiness or dizziness.

#### Acute toxicity

|                            | 41                             |                  |

## **SECTION 11: Toxicological information**

| Mutagenicity                | : No known significant effects or critical hazards.   |
|-----------------------------|---|
| Reproductive toxicity       | : No known significant effects or critical hazards.   |
| Other information           | : Prolonged or repeated contact may dry skin and cause irritation. Sanding and grinding dusts may be harmful if inhaled. Repeated exposure to high vapor concentrations may cause irritation of the respiratory system and permanent brain and nervous system damage. Inhalation of vapour/aerosol concentrations above the recommended exposure limits causes headaches, drowsiness and nausea and may lead to unconsciousness or death. Avoid contact with skin and clothing. |
| 11.2 Information on other h | nazards   |

#### 11.2.1 Endocrine disrupting properties

Based on available data, the classification criteria are not met.

#### **11.2.2 Other information**

Not available.

## **SECTION 12: Ecological information**

There are no data available on the mixture itself. Do not allow to enter drains or watercourses.

The mixture has been assessed following the summation method of the CLP Regulation (EC) No 1272/2008 and is classified for eco-toxicological properties accordingly. See Sections 2 and 3 for details.

#### 12.1 Toxicity

| Product/ingredient name   | Result                          | Species                         | Exposure |
|---|---------------------------------|---------------------------------|----------|
| √ydrocarbons, C9, aromatics > 0.1% cumene   | EC50 3.2 mg/l                   | Daphnia                         | 48 hours |

|----------------------|------------------|
| coefficient (Koc)    |                  |
| Mobility             | : Not available. |

#### 12.5 Results of PBT and vPvB assessment

This mixture does not contain any substances that are assessed to be a PBT or a vPvB.

#### **12.6 Endocrine disrupting properties**

Based on available data, the classification criteria are not met.

#### 12.7 Other adverse effects

No known significant effects or critical hazards.

### **SECTION 13: Disposal considerations**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### **13.1 Waste treatment methods**

**Product** 

Methods of disposal : The generation of waste should be avoided or minimised wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction.

Hazardous waste

#### European waste catalogue (EWC)

## SECTION 13: Disposal considerations

Special precautions
 This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapour from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.
