# **SAFETY DATA SHEET**

Date of issue/Date of revision

: 9 October 2024

Version : 3

pPg

Denmark

## SECTION 1: Identification of the substance/mixture and of the company/ undertaking

**1.1 Product identifier** 

Product name

: SIGMAPRIME 700 HARDENER

: 000001074765

**Product code** 

Other means of identification

00317124; 00471886

| 1.2 Relevant identified use      | es of the substance or mixture and uses advised against           |
|----------------------------------|---|
| Product use                      | : Professional applications, Used by spraying.                    |
| Use of the substance/<br>mixture | <b>:</b> ⊮ardener.; Coating.                                      |
| Uses advised against             | : Product is not intended, labelled or packaged for consumer use. |

#### 1.3 Details of the supplier of the safety data sheet

PPG Coatings Belgium BV/SRL Tweemontstraat 104 B-2100 Deurne Belgium Telephone +32-33606311 Fax +32-33606435

e-mail address of person responsible for this SDS : Product.Stewardship.EMEA@ppg.com

1.4 Emergency telephone number

#### National advisory body/Poison Centre

- **Telephone number**
- : Poison Information Centre; emergency telephone, public + 45 82 12 12 12 (health sector +45 35 31 55 55)

## **SECTION 2: Hazards identification**

#### **2.1 Classification of the substance or mixture**

Product definition : Mixture Classification according to Regulation (EC) No. 1272/2008 [CLP/GHS] Flam. Liq. 3, H226 Skin Corr. 1C, H314 Eye Dam. 1, H318 Skin Sens. 1, H317 STOT SE 3, H335 Aquatic Chronic 2, H411 The product is classified as hazardous according to Regulation (EC) 1272/2008 as amended. See Section 16 for the full text of the H statements declared above.

See Section 11 for more detailed information on health effects and symptoms.

| English (GB) |

|                         | SIGMAPRIME 700 HARDENER |                                |                  |

# **SECTION 2: Hazards identification**

| 2.2 Label elements<br>Hazard pictograms   | :   |   |
|---|-----|---|
| Signal word   | :   | Danger  |
| Hazard statements   | :   | Flammable liquid and vapour.<br>Causes severe skin burns and eye damage.<br>May cause an allergic skin reaction.<br>May cause respiratory irritation.<br>Toxic to aquatic life with long lasting effects. |
| Precautionary statements  |     |   |
| Prevention  | :   | Wear protective gloves, protective clothing and eye or face protection. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Avoid release to the environment.  |
| Response  | :   | Collect spillage.   |
| Storage   | :   | Store in a well-ventilated place. Keep container tightly closed.  |
| Disposal  | :   | Dispose of contents and container in accordance with all local, regional, national and international regulations.<br>P280, P210, P273, P391, P403 + P233, P501  |
| Supplemental label elements   | :   | Not applicable.   |
| Annex XVII - Restrictions<br>on the manufacture,<br>placing on the market and<br>use of certain dangerous<br>substances, mixtures and<br>articles | :   | Not applicable.   |
| Special packaging requiren  | nen | its   |
| Containers to be fitted<br>with child-resistant<br>fastenings   |     | Not applicable.   |
| Tactile warning of danger   | :   | Not applicable.   |
| 2.3 Other hazards   |     |   |
| Product meets the criteria for PBT or vPvB  | :   | This mixture contains substances that are assessed to be a PBT or a vPvB, refer to Section 3.2.   |
|   |     |   |

**Other hazards which do not result in classification** : Causes digestive tract burns. Prolonged or repeated contact may dry skin and cause irritation. Code : 000001074765 SIGMAPRIME 700 HARDENER Date of issue/Date of revision

: 9 October 2024

# **SECTION 3: Composition/information on ingredients**

## **SECTION 3: Composition/information on ingredients**

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment, are PBTs, vPvBs or Substances of equivalent concern, or have been assigned a workplace exposure limit and hence require reporting in this section.

<u>Type</u>

[1] Substance classified with a health or environmental hazard

[2] Substance with a workplace exposure limit

[3] Substance meets the criteria for vPvB according to Regulation (EC) No. 1907/2006, Annex XIII

Occupational exposure limits, if available, are listed in Section 8.

#### SUB codes represent substances without registered CAS Numbers.

## SECTION 4: First aid measures

#### 4.1 Description of first aid measures

| Eye contact                | : Check for and remove any contact lenses. Immediately flush eyes with running water for at least 15 minutes, keeping eyelids open. Seek immediate medical attention.   |
|----------------------------|---|
| Inhalation                 | <ul> <li>Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is<br/>irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained<br/>personnel.</li> </ul>  |
| Skin contact               | <ul> <li>Remove contaminated clothing and shoes. Wash skin thoroughly with soap and water<br/>or use recognised skin cleanser. Do NOT use solvents or thinners.</li> </ul>  |
| Ingestion                  | : If swallowed, seek medical advice immediately and show the container or label. Keep person warm and at rest. Do NOT induce vomiting.  |
| Protection of first-aiders | : No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. |

#### 4.2 Most important symptoms and effects, both acute and delayed

| Potential acute heal | th effects  |
|----------------------|---|
| Eye contact          | : Causes serious eye damage.  |
| Inhalation           | : May cause respiratory irritation.   |
| Skin contact         | : Causes severe burns. Defatting to the skin. May cause an allergic skin reaction.        |
| Ingestion            | : Corrosive to the digestive tract. Causes burns.   |
| Over-exposure sign   | s/symptoms  |
| Eye contact          | : Adverse symptoms may include the following:<br>pain<br>watering<br>redness              |
| Inhalation           | : Adverse symptoms may include the following:<br>respiratory tract irritation<br>coughing |

| Code : 00000107476<br>SIGMAPRIME 700 HARDENE |  |
|--|--|
| SECTION 4: First aid                         | d measures   |
| Skin contact                                 | : Adverse symptoms may include the following:<br>pain or irritation<br>redness<br>dryness<br>cracking<br>blistering may occur  |
| Ingestion                                    | : Adverse symptoms may include the following:<br>stomach pains   |
| 4.3 Indication of any immed                  | iate medical attention and special treatment needed  |
| Notes to physician                           | : In case of inhalation of decomposition products in a fire, symptoms may be delayed.<br>The exposed person may need to be kept under medical surveillance for 48 hours.   |
| Specific treatments                          | : No specific treatment.   |
| <b>SECTION 5: Firefigh</b>                   | ting measures  |
| 5.1 Extinguishing media                      |  |
| Suitable extinguishing media                 | : Use dry chemical, CO <sub>2</sub> , water spray (fog) or foam.   |
| Unsuitable extinguishing media               | : Do not use water jet.  |
| 5.2 Special hazards arising                  | from the substance or mixture  |
| Hazards from the substance or mixture        | : Flammable liquid and vapour. Runoff to sewer may create fire or explosion hazard. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion. This material is toxic to aquatic life with long lasting effects. Fire water contaminated with this material must be contained and prevented from being discharged to any waterway, sewer or drain. |
| Hazardous combustion products                | : Decomposition products may include the following materials:<br>carbon oxides<br>nitrogen oxides  |
| 5.3 Advice for firefighters                  |  |
| On a sint way a sufficient form              |  |

| Special precautions for | : Promptly isolate the scene by removing all persons from the vicinity of the incident if |
|-------------------------|---|
| fire-fighters           | there is a fire. No action shall be taken involving any personal risk or without suitable |
| -                       | training. Move containers from fire area if this can be done without risk. Use water      |
|                         | spray to keep fire-exposed containers cool.   |
|                         |   |

#### **Special protective equipment for fire-fighters :** Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. Clothing for fire-fighters (including helmets, protective boots and gloves) conforming to European standard EN 469 will provide a basic level of protection for chemical incidents.

## **SECTION 6: Accidental release measures**

# 6.1 Personal precautions, protective equipment and emergency procedures For non-emergency personnel No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilt material. Shut off all ignition sources. No flares, smoking or flames in hazard area. Do not breathe vapour or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment.

| 2020/878   |    |  |  |
|--|----|--|--|
| Code : 000001074765<br>SIGMAPRIME 700 HARDENE            |    | Date of issue/Date of revision : 9 October 2024  |  |
| <b>SECTION 6: Acciden</b>                                | ta | l release measures   |  |
| For emergency responders                                 | :  | If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".  |  |
| 6.2 Environmental precautions                            | :  | Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). Water polluting material. May be harmful to the environment if released in large quantities. Collect spillage.   |  |
| 6.3 Methods and material for containment and cleaning up |    |  |  |
| Small spill  | :  | Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.   |  |
| Large spill  | :  | Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach the release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations. Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spill product. |  |
| 6.4 Reference to other sections                          | :  | See Section 1 for emergency contact information.<br>See Section 8 for information on appropriate personal protective equipment.<br>See Section 13 for additional waste treatment information.  |  |

## **SECTION 7: Handling and storage**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### 7.1 Precautions for safe handling

| Protective measures                    | : Put on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Do not get in eyes or on skin or clothing. Do not breathe vapour or mist. Do not ingest. Avoid release to the environment. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Take precautionary measures against electrostatic discharges. Empty containers retain product residue and can be hazardous. Do not reuse container. |
|--|--|
| Advice on general occupational hygiene | : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.  |

| Code : 0000010747<br>SIGMAPRIME 700 HARDE                              |   |
|--|---|
| SECTION 7: Handli  | ng and storage  |
| 7.2 Conditions for safe<br>storage, including any<br>incompatibilities | : Store between the following temperatures: 0 to 35°C (32 to 95°F). Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away |

from incompatible materials (see Section 10) and food and drink. Store locked up. Eliminate all ignition sources. Separate from oxidising materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.

#### 7.3 Specific end use(s)

See Section 1.2 for Identified uses.

#### SECTION 8: Exposure controls/personal protection

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### 8.1 Control parameters

#### **Occupational exposure limits**

#### 8.2 Exposure controls

| Appropriate engineering<br>controls | :         | Use only with adequate ventilation. Use process enclosures, local exhaust ventilation<br>or other engineering controls to keep worker exposure to airborne contaminants below<br>any recommended or statutory limits. The engineering controls also need to keep gas,<br>vapour or dust concentrations below any lower explosive limits. Use explosion-proof<br>ventilation equipment.  |

|--|---|
| <b>SECTION 8: Exposure</b>                     | e controls/personal protection  |
| Eye/face protection<br>Skin protection         | : Chemical splash goggles and face shield. Use eye protection according to EN 166.  |
| Hand protection                                | : Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated. When prolonged or frequently repeated contact may occur, a glove with a protection class of 6 (breakthrough time greater than 480 minutes according to EN 374) is recommended. When only brief contact is expected, a glove with a protection class of 2 or higher (breakthrough time greater than 30 minutes according to EN 374) is recommended. The user must check that the final choice of type of glove selected for handling this product is the most appropriate and takes into account the particular conditions of use, as included in the user's risk assessment. |
| Gloves   | : nitrile neoprene  |
| Body protection                                | : Personal protective equipment for the body should be selected based on the task<br>being performed and the risks involved and should be approved by a specialist before<br>handling this product. When there is a risk of ignition from static electricity, wear anti-<br>static protective clothing. For the greatest protection from static discharges, clothing<br>should include anti-static overalls, boots and gloves. Refer to European Standard EN<br>1149 for further information on material and design requirements and test methods.  |
| Other skin protection                          | Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.   |
| Respiratory protection                         | : Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator. If workers are exposed to concentrations above the exposure limit, they must use appropriate, certified respirators. Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Wear a respirator conforming to EN140. Filter type: organic vapour (Type A) and particulate filter P3  |
| Environmental exposure controls                | : Emissions from ventilation or work process equipment should be checked to ensure<br>they comply with the requirements of environmental protection legislation. In some<br>cases, fume scrubbers, filters or engineering modifications to the process equipment<br>will be necessary to reduce emissions to acceptable levels.   |

# **SECTION 9: Physical and chemical properties**

The conditions of measurement of all properties are at standard temperature and pressure unless otherwise indicated.

#### 9.1 Information on basic physical and chemical properties

| <u>Appearance</u>  |  |

#### **SECTION 10: Stability and reactivity**

10.6 Hazardous decomposition products

: Depending on conditions, decomposition products may include the following materials: carbon oxides nitrogen oxides

## **SECTION 11: Toxicological information**

#### 11.1 Information on hazard classes as defined in Regulation (EC) No 1272/2008

The mixture has been assessed following the conventional method of the CLP Regulation (EC) No 1272/2008 and is classified for toxicological properties accordingly.

Zauses severe skin burns and eye damage.

May cause an allergic skin reaction.

May cause respiratory irritation.

#### Acute toxicity

| Product/ingredient name   | Result                 | Species | Dose        | Exposure |

| SECTION 11: Toxico                                   | ogical information  |
| Inhalation   | : Adverse symptoms may include the following:<br>respiratory tract irritation<br>coughing   |
| Ingestion  | : Adverse symptoms may include the following:<br>stomach pains  |
| Skin contact   | : Adverse symptoms may include the following:<br>pain or irritation<br>redness<br>dryness<br>cracking<br>blistering may occur   |
| Eye contact  | : Adverse symptoms may include the following:<br>pain<br>watering<br>redness  |
| Delayed and immediate effe                           | cts as well as chronic effects from short and long-term exposure  |
| <u>Short term exposure</u>                           |   |
| Potential immediate effects                          | : No known significant effects or critical hazards.   |
|  | : No known significant effects or critical hazards.   |
| Long term exposure<br>Potential immediate<br>effects | : No known significant effects or critical hazards.   |
| Potential delayed effects                            | : No known significant effects or critical hazards.   |
| Potential chronic health eff                         | <u>ects</u>   |
| General  | : Prolonged or repeated contact can defat the skin and lead to irritation, cracking and/or dermatitis. Once sensitized, a severe allergic reaction may occur when subsequently exposed to very low levels.  |
| Carcinogenicity                                      | : No known significant effects or critical hazards.   |
| Mutagenicity   | : No known significant effects or critical hazards.   |
| Reproductive toxicity                                | : No known significant effects or critical hazards.   |
| Other information                                    | : Causes digestive tract burns. Prolonged or repeated contact may dry skin and cause irritation. Repeated exposure to high vapor concentrations may cause irritation of the respiratory system and permanent brain and nervous system damage. Inhalation of vapour/aerosol concentrations above the recommended exposure limits causes headaches, drowsiness and nausea and may lead to unconsciousness or death. Avoid contact with skin and clothing. Exposure to amine vapor has been reported to cause transient corneal edema described as blue haze, halo effect, foggy or blurred vision for several hours. This condition is typically temporary and does not cause permanent visual effects. When the proper eye protection specified in Section 8 is worn, exposure is significantly reduced and the condition has not been observed. |

#### **11.2 Information on other hazards**

#### **11.2.1 Endocrine disrupting properties**

Based on available data, the classification criteria are not met.

#### **11.2.2 Other information**

Not available.

## **SECTION 12: Ecological information**

There are no data available on the mixture itself. Do not allow to enter drains or watercourses.

The mixture has been assessed following the summation method of the CLP Regulation (EC) No 1272/2008 and is classified for eco-toxicological properties accordingly. See Sections 2 and 3 for details.

#### **12.6 Endocrine disrupting properties**

Based on available data, the classification criteria are not met.

#### 12.7 Other adverse effects

No known significant effects or critical hazards.

## **SECTION 13: Disposal considerations**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### **13.1 Waste treatment methods**

| Product             |  |
|---------------------|--|
| Methods of disposal | : The generation of waste should be avoided or minimised wherever possible.<br>Disposal of this product, solutions and any by-products should at all times comply<br>with the requirements of environmental protection and waste disposal legislation<br>and any regional local authority requirements. Dispose of surplus and non-<br>recyclable products via a licensed waste disposal contractor. Waste should not be<br>disposed of untreated to the sewer unless fully compliant with the requirements of<br>all authorities with jurisdiction. |
| Hazardous waste     |  |

#### Abbreviations and acronyms

ATE = Acute Toxicity Estimate

CLP = Classification, Labelling and Packaging Regulation [Regulation (EC) No. 1272/2008]

DNEL = Derived No Effect Level

EUH statement = CLP-specific Hazard statement

PNEC = Predicted No Effect Concentration

RRN = REACH Registration Number

PBT = Persistent, Bioaccumulative and Toxic

vPvB = Very Persistent and Very Bioaccumulative

ADR = The European Agreement concerning the International Carriage of Dangerous Goods by Road

ADN = European Provisions concerning the International Carriage of Dangerous Goods by Inland Waterway

IMDG = International Maritime Dangerous Goods

IATA = International Air Transport Association

#### Procedure used to derive the classification according to Regulation (EC) No. 1272/2008 [CLP/GHS]

| Classification          | Justification         |
|-------------------------|-----------------------|
| Flam. Liq. 3, H226      | On basis of test data |
| Skin Corr. 1C, H314     | Calculation method    |
| Eye Dam. 1, H318        | Calculation method    |
| Skin Sens. 1, H317      | Calculation method    |
| STOT SE 3, H335         | Calculation method    |
| Aquatic Chronic 2, H411 | Calculation method    |

#### Full text of abbreviated H statements

| H225 | Highly flammable liquid and vapour.                      |
|------|--|
| H226 | Flammable liquid and vapour.                             |
| H302 | Harmful if swallowed.                                    |
| H304 | May be fatal if swallowed and enters airways.            |
| H312 | Harmful in contact with skin.                            |
| H314 | Causes severe skin burns and eye damage.                 |
| H315 | Causes skin irritation.                                  |
| H317 | May cause an allergic skin reaction.                     |
| H318 | Causes serious eye damage.                               |
| H319 | Causes serious eye irritation.                           |
| H332 | Harmful if inhaled.                                      |
| H335 | May cause respiratory irritation.                        |
| H336 | May cause drowsiness or dizziness.                       |
| H373 | May cause damage to organs through prolonged or repeated |
|      | exposure.  |
| H411 | Toxic to aquatic life with long lasting effects.         |
| H412 | Harmful to aquatic life with long lasting effects.       |

| English (GB) | Denmark | 20/21 |
|--------------|---------|-------|
| <b>J</b> ( ) |         |       |

| Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II, as amended by Commission Regulation ( | EU) |

#### Full text of classifications [CLP/GHS]

| ACUTE TOXICITY - Category 4                          |
|--|
| LONG-TERM (CHRONIC) AQUATIC HAZARD - Category 2      |
| LONG-TERM (CHRONIC) AQUATIC HAZARD - Category 3      |
| ASPIRATION HAZARD - Category 1                       |
| SERIOUS EYE DAMAGE/EYE IRRITATION - Category 1       |
| SERIOUS EYE DAMAGE/EYE IRRITATION - Category 2       |
| FLAMMABLE LIQUIDS - Category 2                       |
| FLAMMABLE LIQUIDS - Category 3                       |
| SKIN CORROSION/IRRITATION - Category 1B              |
| SKIN CORROSION/IRRITATION - Category 1C              |
| SKIN CORROSION/IRRITATION - Category 2               |
| SKIN SENSITISATION - Category 1                      |
| SKIN SENSITISATION - Category 1A                     |
| SPECIFIC TARGET ORGAN TOXICITY - REPEATED EXPOSURE - |
| Category 2   |
| SPECIFIC TARGET ORGAN TOXICITY - SINGLE EXPOSURE -   |
| Category 3   |
|  |
