| Technical Phone Number              | : 888-977-4762   |  |

# Section 2. Hazards identification

| OSHA/HCS status                            | : This material is considered hazardous by the OSHA Hazard Communication Standard  |
|--|--|
|  | (29 CFR 1910.1200).  |
| Classification of the substance or mixture | : SKIN IRRITATION - Category 2<br>EYE IRRITATION - Category 2A<br>SKIN SENSITIZATION - Category 1<br>CARCINOGENICITY - Category 1A   |
|  | Percentage of the mixture consisting of ingredient(s) of unknown acute toxicity: 13.8% (oral), 19.6% (dermal), 65.2% (inhalation)  |
|  | This product contains TiO2 which has been classified as a GHS Carcinogen Category 2 based on its IARC 2B classification. For many products, TiO2 is utilized as a raw material in a liquid coating formulation. In this case, the TiO2 particles are bound in a matrix with no meaningful potential for human exposure to unbound particles of TiO2 when the product is applied with a brush or roller. Sanding the coating surface or mist from spray applications may be harmful depending on the duration and level of exposure and require the use of appropriate personal protective equipment and/or engineering controls (see Section 8). |
| GHS label elements                         |  |

**United States**

Product name SIGMAGUARD CSF 650 BASE OFFWHITE

# Section 2. Hazards identification

| Hazard pictograms                   |   |
|-------------------------------------|---|
| Signal word                         | : Danger  |
| Hazard statements                   | : Causes skin irritation.<br>May cause an allergic skin reaction.<br>Causes serious eye irritation.<br>May cause cancer.  |
| Precautionary statements            |   |
| Prevention                          | : Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Wear protective gloves, protective clothing and eye or face protection. Avoid breathing vapor. Wash thoroughly after handling. Contaminated work clothing must not be allowed out of the workplace.   |
| Response                            | : F exposed or concerned: Get medical advice or attention. IF ON SKIN: Wash with plenty of water. If skin irritation or rash occurs: Get medical advice or attention. Take off contaminated clothing and wash it before reuse. Wash contaminated clothing before reuse. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice or attention.   |
| Storage                             | : Store locked up.  |
| Disposal                            | : Dispose of contents and container in accordance with all local, regional, national and international regulations.   |
| Supplemental label<br>elements      | : Sanding and grinding dusts may be harmful if inhaled. This product contains crystalline silica which can cause lung cancer or silicosis. The risk of cancer depends on the duration and level of exposure to dust from sanding surfaces or mist from spray applications. Repeated exposure to high vapor concentrations may cause irritation of the respiratory system and permanent brain and nervous system damage. Inhalation of vapor/aerosol concentrations above the recommended exposure limits causes headaches, drowsiness and nausea and may lead to unconsciousness or death. Emits toxic fumes when heated. |
| Hazards not otherwise<br>classified | : None known.   |

# Section 3. Composition/information on ingredients

| Substance/mixture                | 4 | Mixture                          |
|----------------------------------|---|----------------------------------|
| Product name                     | 1 | SIGMAGUARD CSF 650 BASE OFFWHITE |
| Other means of<br>identification | 1 | 00136130; 00140725               |

### Section 3. Composition/information on ingredients

| Ingredient name                                     | %           | CAS number |
|---|-------------|------------|
| bis-[4-(2,3-epoxipropoxi)phenyl]propane             | ≥20 - ≤50   | 1675-54-3  |
| 1,6-bis(2,3-epoxypropoxy)hexane                     | ≥5.0 - ≤10  | 16096-31-4 |
| benzyl alcohol                                      | ≥5.0 - ≤10  | 100-51-6   |
| Talc , not containing asbestiform fibres            | ≥1.0 - ≤5.0 | 14807-96-6 |
| titanium dioxide                                    | ≥1.0 - ≤5.0 | 13463-67-7 |
| crystalline silica, respirable powder (>10 microns) | ≤1.0        | 14808-60-7 |

SUB codes represent substances without registered CAS Numbers.

Any concentration shown as a range is to protect confidentiality or is due to batch variation.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

# Section 4. First aid measures

If ingestion, irritation, any type of overexposure or symptoms of overexposure occur during or persists after use of this product, contact a POISON CONTROL CENTER, EMERGENCY ROOM OR PHYSICIAN immediately; have Safety Data Sheet information available. Never give anything by mouth to an unconscious or convulsing person. Description of necessary first aid measures

# Eye contact : Remove contact lenses, irrigate copiously with clean, fresh water, holding the eyelids apart for at least 10 minutes and seek immediate medical advice.

| Innalation   | irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel.  |
|--------------|--|
| Skin contact | <ul> <li>Remove contaminated clothing and shoes. Wash skin thoroughly with soap and water<br/>or use recognized skin cleanser. Do NOT use solvents or thinners.</li> </ul> |
| Ingestion    | : If swallowed, seek medical advice immediately and show this container or label. Keep person warm and at rest. Do NOT induce vomiting.                                    |

#### Most important symptoms/effects, acute and delayed

| Potential acute health effects | <u>2</u>   |
|--------------------------------|--|
| Eye contact                    | : Causes serious eye irritation.   |
| Inhalation                     | : No known significant effects or critical hazards.  |
| Skin contact                   | : Causes skin irritation. May cause an allergic skin reaction.                             |
| Ingestion                      | : No known significant effects or critical hazards.  |
| Over-exposure signs/sympto     | o <u>ms</u>  |
| Eye contact                    | : Adverse symptoms may include the following:<br>pain or irritation<br>watering<br>redness |
| Inhalation                     | : No specific data.  |
| Skin contact                   | : Adverse symptoms may include the following:<br>irritation<br>redness                     |
| Ingestion                      | : No specific data.  |

Product name SIGMAGUARD CSF 650 BASE OFFWHITE

### Section 4. First aid measures

| Indication of immediate med | lical attention and special treatment needed, if necessary  |
|-----------------------------|---|
| Notes to physician          | <ul> <li>Treat symptomatically. Contact poison treatment specialist immediately if large<br/>quantities have been ingested or inhaled.</li> </ul>   |
| Specific treatments         | : No specific treatment.  |
| Protection of first-aiders  | : No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. |

See toxicological information (Section 11)

### Section 5. Fire-fighting measures

| Extinguishing media                            |   |
|--|---|
| Suitable extinguishing media                   | : Use an extinguishing agent suitable for the surrounding fire.   |
| Unsuitable extinguishing media                 | : None known.   |
| Specific hazards arising from the chemical     | : In a fire or if heated, a pressure increase will occur and the container may burst. Vapors may accumulate in low or confined areas or travel a considerable distance to a source of ignition and flash back.          |
| Hazardous thermal decomposition products       | : Decomposition products may include the following materials:<br>carbon oxides<br>metal oxide/oxides  |
| Special protective actions for fire-fighters   | <ul> <li>Promptly isolate the scene by removing all persons from the vicinity of the incident if<br/>there is a fire. No action shall be taken involving any personal risk or without suitable<br/>training.</li> </ul> |
| Special protective equipment for fire-fighters | : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.   |

# Section 6. Accidental release measures

### Personal precautions, protective equipment and emergency procedures

| : No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilled material. Avoid breathing vapor or mist.<br>Provide adequate ventilation. Wear appropriate respirator when ventilation is<br>inadequate. Put on appropriate personal protective equipment. |
|--|
| <ul> <li>If specialized clothing is required to deal with the spillage, take note of any information in<br/>Section 8 on suitable and unsuitable materials. See also the information in "For non-<br/>emergency personnel".</li> </ul>   |
| : Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).  |
|  |

#### Methods and materials for containment and cleaning up

### Product name SIGMAGUARD CSF 650 BASE OFFWHITE

# Section 6. Accidental release measures

| Small spill | : Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.   |
|-------------|---|
| Large spill | : Stop leak if without risk. Move containers from spill area. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal. |

# Section 7. Handling and storage

### Precautions for safe handling

| Protective measures  | : Put on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Avoid exposure - obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Do not get in eyes or on skin or clothing. Do not ingest. Avoid breathing vapor or mist. If during normal use the material presents a respiratory hazard, use only with adequate ventilation or wear appropriate respirator. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container. |
|--|--|
| Special precautions  | : Vapors may accumulate in low or confined areas or travel a considerable distance to a source of ignition and flash back. Vapors are heavier than air and may spread along floors. If this material is part of a multiple component system, read the Safety Data Sheet(s) for the other component or components before blending as the resulting mixture may have the hazards of all of its parts.  |
| Advice on general<br>occupational hygiene                          | : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.  |
| Conditions for safe storage,<br>including any<br>incompatibilities | : Store between the following temperatures: 0 to 35°C (32 to 95°F). Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.  |

### Section 8. Exposure controls/personal protection

### **Control parameters**

#### **Occupational exposure limits**

| Ingredient name  | Exposure limits  |
|--|--|
| pis-[4-(2,3-epoxipropoxi)phenyl]propane  | None.  |
| 1,6-bis(2,3-epoxypropoxy)hexane  | None.  |
| benzyl alcohol   | IPEL (-)   |
|  | TWA: 5 ppm.  |
|  | STEL: 10 ppm.  |
| Talc , not containing asbestiform fibres   | ACGIH TLV (United States, 7/2023)  |
|  | TWA 8 hours: 2 mg/m <sup>3</sup> . Form: Respirable  |
|  | fraction.  |
|  | OSHA PEL Z3 (United States)  |
|  | TWA: 2 mg/m <sup>3</sup> .   |
| titanium dioxide   | ACGIH TLV (United States, 7/2023)  |
|  | TWA 8 hours: 2.5 mg/m <sup>3</sup> . Form: respirable  |
|  | fraction, finescale particles.   |
|  | OSHA PEL (United States, 5/2018)   |
|  | TWA 8 hours: 15 mg/m <sup>3</sup> . Form: Total dust.  |
| crystalline silica, respirable powder (>10 microns)  | ACGIH TLV (United States, 7/2023) [Silica,   |
|  | crystalline]   |
|  | TWA 8 hours: 0.025 mg/m <sup>3</sup> . Form:   |
|  | Respirable fraction.   |
|  | OSHA PEL (United States, 5/2018) [Silica,  |
|  | crystalline]   |
|  | TWA 8 hours: 50 µg/m³. Form: Respirable  |
|  | dust.  |

- Appropriate engineering controls
- : If user operations generate dust, fumes, gas, vapor or mist, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits.

| United States | Page: 6/15 |
|---------------|------------|
|               |            |

Product name SIGMAGUARD CSF 650 BASE OFFWHITE

# Section 8. Exposure controls/personal protection

| Environmental exposure controls | : Emissions from ventilation or work process equipment should be checked to ensure<br>they comply with the requirements of environmental protection legislation. In some<br>cases, fume scrubbers, filters or engineering modifications to the process equipment<br>will be necessary to reduce emissions to acceptable levels.  |
|---------------------------------|--|
| Individual protection meas      | <u>ures</u>  |
| Hygiene measures                | : Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Contaminated work clothing should not be allowed out of the workplace. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.   |
| Eye/face protection             | : Chemical splash goggles.   |
| Skin protection                 |  |
| Hand protection                 | : Chemical-resistant, impervious gloves complying with an approved standard should be<br>worn at all times when handling chemical products if a risk assessment indicates this is<br>necessary. Considering the parameters specified by the glove manufacturer, check<br>during use that the gloves are still retaining their protective properties. It should be<br>noted that the time to breakthrough for any glove material may be different for different<br>glove manufacturers. In the case of mixtures, consisting of several substances, the<br>protection time of the gloves cannot be accurately estimated. |
| Gloves                          | : butyl rubber   |
| Body protection                 | : Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.  |
| Other skin protection           | : Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.  |
| Respiratory protection          | : Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator. If workers are exposed to concentrations above the exposure limit, they must use appropriate, certified respirators. Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. The respiratory protection shall be in accordance to 29 CFR 1910.134.   |

# Section 9. Physical and chemical properties

| <u>Appearance</u>         |                             |
|---------------------------|-----------------------------|
| Physical state            | : Liquid.                   |
| Color                     | : Off-white.                |
| Odor                      | : Aromatic. [Slight]        |
| Odor threshold            | : Not available.            |
| рН                        | : Not applicable.           |
| Melting point             | : Not available.            |
| Boiling point             | : >37.78°C (>100°F)         |
| Flash point               | : Closed cup: 100°C (212°F) |
| Auto-ignition temperature | : 426°C (798.8°F)           |
| Decomposition temperature | : Not available.            |

Product name SIGMAGUARD CSF 650 BASE OFFWHITE

### Section 9. Physical and chemical properties

| Flammability                                 | : Not available.  |  |  |
|--|---|--|--|
| Lower and upper explosive (flammable) limits | : Not available.  |  |  |
| Evaporation rate                             | : Not available.  |  |  |
| Vapor pressure                               | : Not available.  |  |  |
| Vapor density                                | : Not available.  |  |  |
| Relative density                             | : 1.4   |  |  |
| Density(lbs / gal)                           | : 11.68   |  |  |
|  | Media   | Result                                     |  |
| Solubility(ies)                              | cold water  | Not soluble                                |  |
| Partition coefficient: n-<br>octanol/water   | : Not applicable.   | Not applicable.                            |  |
| Viscosity                                    | , i   | Øynamic (room temperature): Not available. |  |
|  | Kinematic (room temperature): Not available.<br>Kinematic (40°C (104°F)): >21 mm²/s (>21 cSt) |  |  |
| % Solid. (w/w)                               |   | 99.853                                     |  |

# Section 10. Stability and reactivity

| Reactivity                         | : No specific test data related to reactivity available for this product or its ingredients.  |
|------------------------------------|---|
| Chemical stability                 | : The product is stable.  |
| Possibility of hazardous reactions | : Under normal conditions of storage and use, hazardous reactions will not occur.   |
| Conditions to avoid                | : When exposed to high temperatures may produce hazardous decomposition products.<br>Refer to protective measures listed in sections 7 and 8. |
| Incompatible materials             | : Keep away from the following materials to prevent strong exothermic reactions: oxidizing agents, strong alkalis, strong acids.              |
| Hazardous decomposition products   | : Depending on conditions, decomposition products may include the following materials: carbon oxides metal oxide/oxides                       |

# Section 11. Toxicological information

Information on toxicological effects Acute toxicity

### Product name SIGMAGUARD CSF 650 BASE OFFWHITE

### Section 11. Toxicological information

| Product/ingredient name                | Result                          | Species | Dose        | Exposure |

### Product name SIGMAGUARD CSF 650 BASE OFFWHITE

# Section 11. Toxicological information

| Conclusion/Summary           | :   | There are no data available on the mixture itself. This product contains crystalline silica which can cause lung cancer or silicosis. The risk of cancer depends on the duration and level of exposure to dust from sanding surfaces or mist from spray applications. This product contains TiO2 which has been classified as a GHS Carcinogen Category 2 based on its IARC 2B classification. For many products, TiO2 is utilized as a raw material in a liquid coating formulation. In this case, the TiO2 particles are bound in a matrix with no meaningful potential for human exposure to unbound particles of TiO2 when the product is applied with a brush or roller. Sanding the coating surface or mist from spray applications may be harmful depending on the duration and level of exposure and require the use of appropriate personal protective equipment and/or engineering controls (see Section 8). Exposure to component solvent vapor concentrations in excess of the stated occupational exposure limit may result in adverse health effects such as mucous membrane and respiratory system irritation and adverse effects on the kidneys, liver and central nervous system. Symptoms and signs include headache, dizziness. Solvents may cause some of the above effects by absorption through the skin. There is some evidence that repeated exposure to organic solvent vapors in combination with constant loud noise can cause greater hearing loss than expected from exposure to noise alone. If splashed in the eyes, the liquid may cause irritation and reversible damage. Ingestion may cause nausea, diarrhea and vomiting. This takes into account, where known, delayed and immediate effects and also chronic effects of components from short-term and long-term exposure by oral, inhalation and dermal routes of exposure and eye contact. |
|------------------------------|-----|--|
| Short term exposure          |     |  |
| Potential immediate effects  | :   | There are no data available on the mixture itself.   |
| Potential delayed effects    | :   | There are no data available on the mixture itself.   |
| Long term exposure           |     |  |
| Potential immediate effects  | :   | There are no data available on the mixture itself.   |
| Potential delayed effects    | :   | There are no data available on the mixture itself.   |
| Potential chronic health eff | ect | <u>s</u>   |
| General                      | :   | Once sensitized, a severe allergic reaction may occur when subsequently exposed to very low levels.  |
| Carcinogenicity              | 1   | May cause cancer. Risk of cancer depends on duration and level of exposure.  |
| Mutagenicity                 | :   | No known significant effects or critical hazards.  |
| Reproductive toxicity        | :   | No known significant effects or critical hazards.  |
|                              |     |  |

# Section 13. Disposal considerations

**Disposal methods** 

: The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

Disposal should be in accordance with applicable regional, national and local laws and regulations.

Refer to Section 7: HANDLING AND STORAGE and Section 8: EXPOSURE CONTROLS/PERSONAL PROTECTION for additional handling information and protection of employees. Section 6. Accidental release measures
