SAFETY DATA SHEET

Date of issue 30 October 2024

Version 2

Section 1. Product and company identification

| Product name |
|-------------------------------|
| Product code |
| Other means of identification |
| Product type |

- : SIGMAZINC 109HS BASE REDGREY 5010COU1640
- : 00218767CO
- : Not available.
 - : Liquid.

Relevant identified uses of the substance or mixture and uses advised against

Identified uses

Coating. Paints. Painting-related materials.

| Uses advised against | Reason |
|----------------------|--------|
| Not applicable. | |

| Supplier's details: | |
|----------------------------|---|
| Supplier | : PPG Industries Colombia Ltda Calle 51 # 40-13 Municipio de Itagüí Antioquia, Colombia (57) (4) 3787400 (Porteria) |
| Email address: | : HazComLatam@ppg.com |
| Emergency telephone number | : Colombia: 01 8000 916012 (CISPROQUIM) + 571 288 6012 (CISPROQUIM) Ecuador: 1800-59-3005 (CISPROQUIM) Peru: 080-050-847 (CISPROQUIM) |

Section 2. Hazards identification

| Classification of the substance or mixture | AMMABLE LIQUIDS - Category 3 ACUTE TOXICITY (dermal) - Category 5 SKIN IRRITATION - Category 2 EYE IRRITATION - Category 2A SKIN SENSITIZATION - Category 1 CARCINOGENICITY - Category 1A |
|--|---|
| | CARCINOGENICITY - Category 1A |
| | AQUATIC HAZARD (ACUTE) - Category 1 AQUATIC HAZARD (LONG-TERM) - Category 1 |
| | |

| Code | 00218767 | O Date of issue | 30 October 2024 | Version | 2 |
|-------------|----------|--|-----------------|---------|---|
| Product nam | ne | SIGMAZINC 109HS BASE REDGREY 5010COU1640 | | | |

| Section 2. Hazards | s identification |
|---|--|
| Target organs | : Contains material which causes damage to the following organs: brain, central nervous system (CNS). Contains material which may cause damage to the following organs: blood, kidneys, lungs, the nervous system, liver, heart, gastrointestinal tract, cardiovascular system, upper respiratory tract, skin, eye, lens or cornea. |
| | Percentage of the mixture consisting of ingredient(s) of unknown acute dermal toxicity: 73.5% |
| | Percentage of the mixture consisting of ingredient(s) of unknown hazards to the aquatic environment: 18.1% |
| GHS label elements | |
| Hazard pictograms | |
| Signal word | : 🗖anger |
| Hazard statements | Fammable liquid and vapor. May be harmful in contact with skin. Causes skin irritation. May cause an allergic skin reaction. Causes serious eye irritation. May cause cancer. Very toxic to aquatic life with long lasting effects. |
| Precautionary statements | |
| Prevention | : Obtain special instructions before use. Wear protective gloves, protective clothing and eye or face protection. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Use explosion-proof electrical, ventilating or lighting equipment. Use non-sparking tools. Take action to prevent static discharges. Avoid release to the environment. Avoid breathing vapor. Wash thoroughly after handling. |
| Response | : Collect spillage. IF exposed or concerned: Get medical advice or attention. IF ON SKIN: Call a POISON CENTER or doctor if you feel unwell. Wash with plenty of water. If skin irritation or rash occurs: Get medical advice or attention. Take off contaminated clothing and wash it before reuse. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice or attention. |
| Storage | : Store in a well-ventilated place. Keep cool. |
| Disposal | : Dispose of contents and container in accordance with all local, regional, national and international regulations. |
| Other hazards which do not result in classification | : Prolonged or repeated contact may dry skin and cause irritation. |

2

Section 3. Composition/information on ingredients

Substance/mixture Other means of identification

: Mixture

: Not available.

CAS number/other identifiers

| CAS number | |
|------------|--|
|------------|--|

: Not applicable.

| Ingredient name | % | CAS number |
|---|------------|------------|
| Zinc powder - zinc dust (stabilized) | 30 - <60 | 7440-66-6 |
| Talc , not containing asbestiform fibres | 10 - <12.5 | 14807-96-6 |
| Epoxy Resin (700 <mw<=1100)< td=""><td>5 - <7</td><td>25036-25-3</td></mw<=1100)<> | 5 - <7 | 25036-25-3 |
| bis-[4-(2,3-epoxipropoxi)phenyl]propane | 5 - <7 | 1675-54-3 |
| 1-methoxy-2-propanol | 2 - <3 | 107-98-2 |
| zinc oxide | 2 - <3 | 1314-13-2 |
| diiron trioxide | 1 - <2 | 1309-37-1 |
| xylene | 1 - <2 | 1330-20-7 |
| Solvent naphtha (petroleum), light aromatic | 1 - <2 | 64742-95-6 |
| m-xylene | 1 - <2 | 108-38-3 |
| ethylbenzene | 0.2 - <0.5 | 100-41-4 |
| crystalline silica, respirable powder (<10 microns) | 0.1 - <0.2 | 14808-60-7 |
| lead powder | 0 - <0.1 | 7439-92-1 |

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

SUB codes represent substances without registered CAS Numbers.

Section 4. First aid measures

| Description of necessary fire | st aid measures |
|---|---|
| Eye contact | Remove contact lenses, irrigate copiously with clean, fresh water, holding the eyelids apart for at least 10 minutes and seek immediate medical advice. |
| Inhalation | : Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. |
| Skin contact | : Remove contaminated clothing and shoes. Wash skin thoroughly with soap and water or use recognized skin cleanser. Do NOT use solvents or thinners. |
| Ingestion | : If swallowed, seek medical advice immediately and show this container or label. Keep person warm and at rest. Do NOT induce vomiting. |
| Indication of immediate med | ical attention and special treatment needed, if necessary |
| Notes to physician Specific treatments | Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled. No specific treatment. |
| Protection of first-aiders | : No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. |
| Potential acute health effect | |

Potential acute health effects

| English (US) | Colombia |
|--------------|----------|
|--------------|----------|

| Code | 00218767CO | Date of issue | 30 October 2024 | Version | 2 |
|-----------------------------|------------------|------------------------------|-----------------|---------|---|
| Product na | ame SIGMAZINC 10 | 9HS BASE REDGREY 5010COU1640 | | | |
| Section 4. First aid measur | | measures | | | |
| | - 4 4 | | | | |

| Eye contact | : Causes serious eye irritation. |
|--------------|--|
| Inhalation | : No known significant effects or critical hazards. |
| Skin contact | May be harmful in contact with skin. Causes skin irritation. Defatting to the skin. May cause an allergic skin reaction. |
| Ingestion | : No known significant effects or critical hazards. |

See toxicological information (Section 11)

Section 5. Fire-fighting measures

| Extinguishing media | |
|--|--|
| Suitable extinguishing media | : Use dry chemical, CO ₂ , water spray (fog) or foam. |
| Unsuitable extinguishing media | : Do not use water jet. |
| Specific hazards arising from the chemical | : Flammable liquid and vapor. Runoff to sewer may create fire or explosion hazard. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion. This material is very toxic to aquatic life with long lasting effects. Fire water contaminated with this material must be contained and prevented from being discharged to any waterway, sewer or drain. |
| Hazardous thermal decomposition products | Decomposition products may include the following materials: carbon oxides metal oxide/oxides oxides of lead |
| Special protective actions for fire-fighters | Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool. |
| Special protective equipment for fire-fighters | Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. |

Section 6. Accidental release measures

| Personal precautions, protective equipment and emergency procedures | | | | | | |
|---|---|--|--|--|--|--|
| For non-emergency personnel | : No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Shut off all ignition source No flares, smoking or flames in hazard area. Avoid breathing vapor or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment. | | | | | |
| For emergency responders | : If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel". | | | | | |
| Environmental precautions : | Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). Water polluting material. May be harmful to the environment if released in large quantities. Collect spillage. | | | | | |

Methods and materials for containment and cleaning up

| English (| US) | Colombia |
|-----------|-----|----------|
| | , | |

| Code (Product name | 00218767CO SIGMAZIN | Date of issue C 109HS BASE REDGREY 5010COU1640 | 30 October 2024 | Version | 2 |
|------------------------|------------------------|---|--|--|---|
| Section | n 6. Accide | ntal release measures | | | |
| Small spill | | : Stop leak if without risk. Move conta and explosion-proof equipment. Dilu Alternatively, or if water-insoluble, ab appropriate waste disposal container contractor. | ite with water and mop sorb with an inert dry m | up if water-solu naterial and pla | ıble. ce in an |
| Large spill | | : Stop leak if without risk. Move conta and explosion-proof equipment. Was s follows. Contain and sand, earth, vermiculite ccording to local regulat osal contractor. Contar | vind. Prevent e h spillages into collect spillage e or diatomace tions (see Sect ninated absorb | entry into an with non- ous earth ion 13). ent |

emergency contact information and Section 13 for waste disposal.

Section 7. Handling and storage

| Precautions for safe : handling | Put on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Avoid exposure - obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Do not get in eyes or on skin or clothing. Do not ingest. Avoid breathing vapor or mist. Avoid release to the environment. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Take precautionary measures against electrostatic discharges. Empty containers retain product residue and can be hazardous. Do not reuse container. |
|--|---|
| Conditions for safe storage, : including any incompatibilities | Do not store above the following temperature: 50°C (122°F). Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Eliminate all ignition sources. Separate from oxidizing materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use. |

Section 8. Exposure controls/personal protection

<u>Control parameters</u> <u>Occupational exposure limits</u>

Section 8. Exposure controls/personal protection

| Ingredient name | | Exposure limits |

| | | |
| Recommended monitoring | | appropriate monitoring standards. Reference to |
| procedures | | or methods for the determination of hazardous |
| | substances will also be require | d. |
| Appropriate engineering | : Use only with adequate ventila | tion. Use process enclosures, local exhaust |
| controls | | controls to keep worker exposure to airborne |
| | | mended or statutory limits. The engineering control |
| | | r dust concentrations below any lower explosive |
| | limits. Use explosion-proof ver | |
| Environmental exposure | | vork process equipment should be checked to ensur |
| controls | | ents of environmental protection legislation. In some |
| | cases, fume scrubbers, filters of | or engineering modifications to the process |
| | equipment will be necessary to | reduce emissions to acceptable levels. |
| idividual protection measu | <u>ires</u> | |
| Hygiene measures | : Wash hands, forearms and fac | e thoroughly after handling chemical products, |
| | | ing the lavatory and at the end of the working period. |
| | | be used to remove potentially contaminated clothing |
| | | ould not be allowed out of the workplace. Wash |
| | | eusing. Ensure that eyewash stations and safety |
| | showers are close to the works | |
| Eye protection | : Chemical splash goggles. | |
| Skin protection | | |
| - — | | |
| | | |

Section 8. Exposure controls/personal protection

| | • • |
|---------------------------------------|---|
| Hand protection | : Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated. |
| Gloves | : butyl rubber |
| Body protection Other skin protection | Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. When there is a risk of ignition from static electricity, wear anti-static protective clothing. For the greatest protection from static discharges, clothing should include anti-static overalls, boots and gloves. Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be |
| | approved by a specialist before handling this product. |
| Respiratory protection | : Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator. If workers are exposed to concentrations above the exposure limit, they must use appropriate, certified respirators. Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. |

Section 9. Physical and chemical properties

Appearance Physical state : Liquid. Color : Not available. Odor : Not available. pН : Not applicable. **Melting point** : Not available. : >37.78°C (>100°F) **Boiling point Flash point** : Closed cup: 31.8°C (89.2°F) **Evaporation rate** : Not available. : Not available. Section 11. Toxicological information

Carcinogen Classification code:

IARC: 1, 2A, 2B, 3, 4 NTP: Known to be a human carcinogen; Reasonably anticipated to be a human carcinogen OSHA: + Not listed/not regulated: -

Reproductive toxicity

Not available.

Conclusion/Summary : There are no data available on the mixture itself.

Teratogenicity

Not available.

Conclusion/Summary : There are no data available on the mixture itself.

Specific target organ toxicity (single exposure)

| Name | Category | Route of exposure | Target organs |
|---|------------|-------------------|---------------------------------|
| Talc , not containing asbestiform fibres | Category 3 | - | Respiratory tract irritation |
| 1-methoxy-2-propanol | Category 3 | - | Narcotic effects |
| xylene | Category 3 | - | Respiratory tract irritation |
| Solvent naphtha (petroleum), light aromatic | Category 3 | - | Narcotic effects |
| m-xylene | Category 3 | - | Respiratory tract irritation |

Specific target organ toxicity (repeated exposure)

| Name | Category | Route of exposure | Target organs |
|------|------------|-------------------|----------------|
| | Category 2 | - | hearing organs |
| | Category 1 | inhalation | - |

Target organs

: Contains material which causes damage to the following organs: brain, central nervous system (CNS).

Contains material which may cause damage to the following organs: blood, kidneys, lungs, the nervous system, liver, heart, gastrointestinal tract, cardiovascular system, upper respiratory tract, skin, eye, lens or cornea.

Aspiration hazard

| Name | Result |
|---|--------------------------------|
| xylene | ASPIRATION HAZARD - Category 1 |
| Solvent naphtha (petroleum), light aromatic | ASPIRATION HAZARD - Category 1 |
| m-xylene | ASPIRATION HAZARD - Category 1 |
| ethylbenzene | ASPIRATION HAZARD - Category 1 |

| Information on the likely routes of exposure | : | Not available. |
|--|---|--------------------------------|
| Potential acute health effects | | |
| Eye contact | ÷ | Causes serious eye irritation. |

| Code 00218767CO Product name SIGMAZIN | Date of issue 30 October 2024 Version 2 NC 109HS BASE REDGREY 5010COU1640 |
|--|---|
| Section 11. Toxic | ological information |
| Inhalation | : No known significant effects or critical hazards. |
| Skin contact | : May be harmful in contact with skin. Causes skin irritation. Defatting to the skin. May cause an allergic skin reaction. |
| Ingestion | : No known significant effects or critical hazards. |
| Symptoms related to the ph | vsical, chemical and toxicological characteristics |
| Eye contact | : Adverse symptoms may include the following: pain or irritation watering redness |
| Inhalation | : No specific data. |
| Skin contact | : Adverse symptoms may include the following: irritation redness dryness cracking |
| Ingestion | : No specific data. |
| | |
| Delayed and immediate effe | cts and also chronic effects from short and long term exposure |
| Conclusion/Summary | : There are no data available on the mixture itself. Contains lead. Exposure to lead dust and fumes adversely affects blood and blood forming tissues, kidneys, liver, th central/peripheral nervous systems and male/female reproductive organs. Lead exposure causes adverse developmental effects including brain damage in children and unborn fetuses. This product contains crystalline silica which can cause lung cancer or silicosis. The risk of cancer depends on the duration and level of exposure to dust from sanding surfaces or mist from spray applications. Exposure to component solvent vapor concentrations in excess of the stated occupational exposure limit may result in adverse health effects such as mucous membrane and respiratory system. Symptoms and signs include headache, dizziness, fatigue, muscular weakness, drowsiness and, in extreme cases, loss of consciousness. Solvents may cause some of the above effects by absorption through the skin. There is some evidence that repeated exposure to organic solvent vapors in combination with constant loud noise can cause greater hearing loss than expected from exposure to noise alone. If splashed in the eyes, the liquid may cause irritation and reversible damage. Ingestion may cause nausea, diarrhea and vomiting. This takes into account, where known, delayed and immediate effects and also chronic effects of components from short-term and long-term exposure by oral, inhalation and dermal routes of exposure and eye contact. |
| Potential immediate | : There are no data available on the mixture itself. |
| effects | |
| Potential delayed effects | : There are no data available on the mixture itself. |
| Long term exposure Potential immediate effects | : There are no data available on the mixture itself. |
| Potential delayed effects | : There are no data available on the mixture itself. |
| Potential chronic health eff | |
| Not available. | |

Section 11. Toxicological information

| General | Prolonged or repeated contact can defat the skin and lead to irritation, cracking and/ or dermatitis. Once sensitized, a severe allergic reaction may occur when subsequently exposed to very low levels. |
|-----------------------|---|
| Carcinogenicity | : \mathbf{M} ay cause cancer. Risk of cancer depends on duration and level of exposure. |
| Mutagenicity | : No known significant effects or critical hazards. |
| Reproductive toxicity | : No known significant effects or critical hazards. |

Mobility in soil

Soil/water partition coefficient (Koc)

: Not available.

Other adverse effects

: No known significant effects or critical hazards.

Section 13. Disposal considerations

Disposal methods

: The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and nonrecyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapor from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.
