# **SAFETY DATA SHEET**

Date of issue/Date of revision12 November 2024Version 1.04

| Section 1. Identification   |  |  |  |
|---|--|--|--|
| Product code  | : 000001020162   |  |  |
| Product name  | : SIGMAZINC 102 HS /109 HS HARDENER  |  |  |
| Other means of identification   | on de la constante de la const |  |  |
| 00218768; 00438803; 004806  | 339  |  |  |
| Product type  | : Liquid.  |  |  |
| Relevant identified uses of the substance or mixture and uses advised against |  |  |  |
| Product use   | <ul> <li>Hardener.</li> <li>Professional applications, Used by spraying.</li> </ul>                            |  |  |
| Supplier's details  | : PPG Industries (Singapore) Pte. Ltd., No. 1 Tuas Basin Close, Singapore 638803.<br>Tel +65 68653737          |  |  |
| Emergency telephone<br>number (with hours of<br>operation)                    | : CHEMTREC +(65)-31581349 (CCN 17704)  |  |  |

# Section 2. Hazards identification

| Classification of the substance or mixture | : FLAMMABLE LIQUIDS - Category 3<br>ACUTE TOXICITY (inhalation) - Category 4<br>SKIN CORROSION/IRRITATION - Category 1C<br>SERIOUS EYE DAMAGE/ EYE IRRITATION - Category 1<br>SKIN SENSITIZATION - Category 1<br>SPECIFIC TARGET ORGAN TOXICITY (SINGLE EXPOSURE) (Respiratory tract<br>irritation) - Category 3<br>AQUATIC HAZARD (LONG-TERM) - Category 2 |
|--|---|
|  |   |

**GHS** label elements, including precautionary statements

# Section 2. Hazards identification

| Hazard statements                                   | : | Flammable liquid and vapor.<br>Causes severe skin burns and eye damage.<br>May cause an allergic skin reaction.<br>Harmful if inhaled.<br>May cause respiratory irritation.<br>Toxic to aquatic life with long lasting effects.  |
|---|---|--|
| Precautionary statements                            |   |  |
| Prevention  | - | Wear protective gloves, protective clothing and eye or face protection. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Avoid release to the environment. Avoid breathing vapor.  |
| Response  | : | Collect spillage. IF INHALED: Immediately call a POISON CENTER or doctor. IF<br>SWALLOWED: Immediately call a POISON CENTER or doctor. Rinse mouth. Do<br>NOT induce vomiting. IF ON SKIN (or hair): Take off immediately all contaminated<br>clothing. Rinse skin with water. Immediately call a POISON CENTER or doctor. If<br>skin irritation or rash occurs: Get medical advice or attention. Wash contaminated<br>clothing before reuse. IF IN EYES: Rinse cautiously with water for several minutes.<br>Remove contact lenses, if present and easy to do. Continue rinsing. Immediately<br>call a POISON CENTER or doctor. |
| Storage   | : | Store in a well-ventilated place. Keep container tightly closed.   |
| Disposal  | : | Not applicable.  |
| Other hazards which do not result in classification | : | Causes digestive tract burns. Prolonged or repeated contact may dry skin and cause irritation.   |

# Section 3. Composition/information on ingredients

| Substance/mixture : |
|---------------------|
|---------------------|

#### CAS number/other identifiers

| CAS number | : Not applicable. |
|------------|-------------------|
| EC number  | : Mixture.        |

| Ingredient name   | %        | CAS number |
|---|----------|------------|
| Fatty acids, C18-unsatd., dimers, oligomeric reaction products with tall-oil fatty acids and triethylenetetramine                             | 25 - <50 | 68082-29-1 |
| Amides, from C18-unsatd. fatty acid dimers, tall-oil fatty acids and triethylenetetramine, reaction products with bisphenol A-epichlorohydrin | 20 - <25 | 68953-09-3 |
| polymer   |          | /          |
| xylene  | 10 - <20 | 1330-20-7  |
| 2-methylpropan-1-ol   | 10 - <20 | 78-83-1    |
| benzyl alcohol  | 10 - <20 | 100-51-6   |
| 2,4,6-tris(dimethylaminomethyl)phenol   | 5 - <10  | 90-72-2    |
| ethylbenzene  | 1 - <3   | 100-41-4   |
| 3,6-diazaoctanethylenediamin  | 1 - <3   | 112-24-3   |

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

|----------------------------------|-----------|--------------|------------|
|----------------------------------|-----------|--------------|------------|

### Section 3. Composition/information on ingredients

SUB codes represent substances without registered CAS Numbers.

### Section 4. First aid measures

| Description of necessary first aid measures |  |  |
|---|--|--|
| Eye contact                                 | <ul> <li>Check for and remove any contact lenses. Immediately flush eyes with running<br/>water for at least 15 minutes, keeping eyelids open. Seek immediate medical<br/>attention.</li> </ul>                            |  |
| Inhalation                                  | <ul> <li>Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is<br/>irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by<br/>trained personnel.</li> </ul> |  |
| Skin contact                                | : Remove contaminated clothing and shoes. Wash skin thoroughly with soap and water or use recognized skin cleanser. Do NOT use solvents or thinners.   |  |
| Ingestion                                   | : If swallowed, seek medical advice immediately and show this container or label.<br>Keep person warm and at rest. Do NOT induce vomiting.   |  |

#### Most important symptoms/effects, acute and delayed

| uses serious eye   | damage.  |
|--|--|
| rmful if inhaled. N  | lay cause respiratory irritation.  |
| uses severe burn   | s. Defatting to the skin. May cause an allergic skin reaction.   |
| rrosive to the dige  | stive tract. Causes burns.   |
|  |  |
| in<br>tering   | nay include the following:   |
| piratory tract irrita  | nay include the following:<br>tion   |
| in or irritation<br>Iness<br>mess<br>acking  | nay include the following:   |
|  | nay include the following:   |
| ention and spec  | al treatment needed, if necessary  |
|  | of decomposition products in a fire, symptoms may be delayed.<br>may need to be kept under medical surveillance for 48 hours.  |
| specific treatmen  | t.   |

### Section 4. First aid measures

| mask or self-contained breathing apparatus. It may be dangerous to the person<br>providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing<br>thoroughly with water before removing it, or wear gloves. | Protection of first-aiders | providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing |
|--|----------------------------|--|
|--|----------------------------|--|

See toxicological information (Section 11)

### Section 5. Fire-fighting measures

| Extinguishing media                            |   |
|--|---|
| Suitable extinguishing media                   | : Use dry chemical, CO <sub>2</sub> , water spray (fog) or foam.  |
| Unsuitable extinguishing media                 | : Do not use water jet.   |
| Specific hazards arising from the chemical     | : Flammable liquid and vapor. Runoff to sewer may create fire or explosion hazard.<br>In a fire or if heated, a pressure increase will occur and the container may burst, with<br>the risk of a subsequent explosion. This material is toxic to aquatic life with long<br>lasting effects. Fire water contaminated with this material must be contained and<br>prevented from being discharged to any waterway, sewer or drain. |
| Hazardous thermal decomposition products       | : Decomposition products may include the following materials:<br>carbon oxides<br>nitrogen oxides<br>halogenated compounds  |
| Special protective actions for fire-fighters   | : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.  |
| Special protective equipment for fire-fighters | <ul> <li>Fire-fighters should wear appropriate protective equipment and self-contained<br/>breathing apparatus (SCBA) with a full face-piece operated in positive pressure<br/>mode.</li> </ul>   |

# Section 6. Accidental release measures

#### Personal precautions, protective equipment and emergency procedures

| For non-emergency<br>personnel | : | No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilled material. Shut off all ignition sources.<br>No flares, smoking or flames in hazard area. Do not breathe vapor or mist. Provide<br>adequate ventilation. Wear appropriate respirator when ventilation is inadequate.<br>Put on appropriate personal protective equipment. |
|--------------------------------|---|--|
| For emergency responders       | : | If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".  |

Product name SIGMAZINC 102 HS /109 HS HARDENER

### Section 6. Accidental release measures

| Environmental precautions | 1 | Avoid dispersal of spilled material and runoff and contact with soil, waterways,     |
|---------------------------|---|--|
|                           |   | drains and sewers. Inform the relevant authorities if the product has caused         |
|                           |   | environmental pollution (sewers, waterways, soil or air). Water polluting material.  |
|                           |   | May be harmful to the environment if released in large quantities. Collect spillage. |

| Methods and materials f | for containment and cleaning up  |
|-------------------------|--|
| Small spill             | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.   |
| Large spill             | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal. |

# Section 7. Handling and storage

#### Precautions for safe handling

| Protective measures                    | : Put on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Do not get in eyes or on skin or clothing. Do not breathe vapor or mist. Do not ingest. Avoid release to the environment. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Take precautionary measures against electrostatic discharges. Empty containers retain product residue and can be hazardous. Do not reuse container. |
|--|---|
|  | Materials such as cleaning rags, paper wipes and protective clothing, which are<br>contaminated with the product may spontaneously self-ignite some hours later. To<br>avoid the risks of fires, all contaminated materials should be stored in purpose-built<br>containers or in metal containers with tight-fitting, self-closing lids. Contaminated<br>materials should be removed from the workplace at the end of each working day<br>and be stored outside.   |
| Advice on general occupational hygiene | : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.   |

# Section 7. Handling and storage

| Conditions for safe storage, | : Store between the following temperatures: 0 to 35°C (32 to 95°F). Store in            |
|------------------------------|---|
| including any                | accordance with local regulations. Store in a segregated and approved area. Store       |
| incompatibilities            | in original container protected from direct sunlight in a dry, cool and well-ventilated |
|                              | area, away from incompatible materials (see Section 10) and food and drink. Store       |
|                              | locked up. Eliminate all ignition sources. Separate from oxidizing materials. Keep      |
|                              | container tightly closed and sealed until ready for use. Containers that have been      |
|                              | opened must be carefully resealed and kept upright to prevent leakage. Do not           |
|                              | store in unlabeled containers. Use appropriate containment to avoid environmental       |
|                              | contamination. See Section 10 for incompatible materials before handling or use.        |

### Section 8. Exposure controls/personal protection

#### **Control parameters**

#### **Occupational exposure limits**

| Ingredient name                               |                                      | Exposure limits  |
|---|--------------------------------------|--|
| xylene<br>2-methylpropan-1-ol<br>ethylbenzene |                                      | Workplace Safety and Health Act<br>(Singapore, 2/2006) [Xylene]<br>PEL (long term) 8 hours: 100 ppm.<br>PEL (long term) 8 hours: 434 mg/m <sup>3</sup> .<br>PEL (short term) 15 minutes: 651 mg/m <sup>3</sup> .<br>PEL (short term) 15 minutes: 150 ppm.<br>Workplace Safety and Health Act<br>(Singapore, 2/2006)<br>PEL (long term) 8 hours: 50 ppm.<br>PEL (long term) 8 hours: 152 mg/m <sup>3</sup> .<br>Workplace Safety and Health Act |
|   |                                      | (Singapore, 2/2006)<br>PEL (long term) 8 hours: 100 ppm.<br>PEL (long term) 8 hours: 434 mg/m <sup>3</sup> .<br>PEL (short term) 15 minutes: 543 mg/m <sup>3</sup> .<br>PEL (short term) 15 minutes: 125 ppm.  |
| Recommended monitoring procedures             |                                      | priate monitoring standards. Reference to tho the third the the termination of hazardous   |
| Appropriate engineering<br>controls           | contaminants below any recommend     | ols to keep worker exposure to airborne<br>led or statutory limits. The engineering controls<br>concentrations below any lower explosive   |
| invironmental exposure<br>controls            | they comply with the requirements of | rocess equipment should be checked to ensure<br>f environmental protection legislation. In some<br>ineering modifications to the process<br>ce emissions to acceptable levels.   |

#### Individual protection measures

| Singapore | English (US) | Page: 6/14 |
|-----------|--------------|------------|
|-----------|--------------|------------|

Product name SIGMAZINC 102 HS /109 HS HARDENER

# Section 8. Exposure controls/personal protection

| Hygiene measures       | : Wash hands, forearms and face thoroughly after handling chemical products, before<br>eating, smoking and using the lavatory and at the end of the working period.<br>Appropriate techniques should be used to remove potentially contaminated clothing.<br>Contaminated work clothing should not be allowed out of the workplace. Wash<br>contaminated clothing before reusing. Ensure that eyewash stations and safety<br>showers are close to the workstation location.   |
|------------------------|---|
| Eye/face protection    | : Chemical splash goggles and face shield.  |
| Skin protection        |   |
| Hand protection        | : Chemical-resistant, impervious gloves complying with an approved standard should<br>be worn at all times when handling chemical products if a risk assessment indicates<br>this is necessary. Considering the parameters specified by the glove manufacturer,<br>check during use that the gloves are still retaining their protective properties. It<br>should be noted that the time to breakthrough for any glove material may be<br>different for different glove manufacturers. In the case of mixtures, consisting of<br>several substances, the protection time of the gloves cannot be accurately<br>estimated. |
| Gloves                 | : nitrile neoprene  |
| Body protection        | : Personal protective equipment for the body should be selected based on the task<br>being performed and the risks involved and should be approved by a specialist<br>before handling this product. When there is a risk of ignition from static electricity,<br>wear anti-static protective clothing. For the greatest protection from static<br>discharges, clothing should include anti-static overalls, boots and gloves.   |
| Other skin protection  | <ul> <li>Appropriate footwear and any additional skin protection measures should be<br/>selected based on the task being performed and the risks involved and should be<br/>approved by a specialist before handling this product.</li> </ul>   |
| Respiratory protection | : Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator. If workers are exposed to concentrations above the exposure limit, they must use appropriate, certified respirators. Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary.  |

# **Section 9. Physical and chemical properties**

| <u>Appearance</u>         |                             |
|---------------------------|-----------------------------|
| Physical state            | : Liquid.                   |
| Color                     | : Colorless.                |
| Odor                      | : Amine-like.               |
| рН                        | insoluble in water.         |
| Boiling point             | : >37.78°C (>100°F)         |
| Flash point               | : Closed cup: 31°C (87.8°F) |
| Evaporation rate          | : Not available.            |
| Flammability (solid, gas) | : liquid                    |
| Vapor pressure            | : Not available.            |
| Vapor density             | :                           |
| Relative density          | : 0.95                      |

### Section 9. Physical and chemical properties

| Solubility(ies)           | Media           | Result   |  |
|---------------------------|-----------------|--|--|
|                           | . cold water    | Not soluble  |  |
| Auto-ignition temperature | : 335°C         |  |  |
| Viscosity                 | Kinematic (room | emperature): Not available.<br>temperature): Not available.<br>(104°F)): >21 mm²/s (>21 cSt) |  |

# Section 10. Stability and reactivity

| Reactivity                         | : No specific test data related to reactivity available for this product or its ingredient   | S. |
|------------------------------------|--|----|
| Chemical stability                 | : The product is stable.   |    |
| Possibility of hazardous reactions | : Under normal conditions of storage and use, hazardous reactions will not occur.  |    |
| Conditions to avoid                | : When exposed to high temperatures may produce hazardous decomposition products.  |    |
| Incompatible materials             | : Keep away from the following materials to prevent strong exothermic reactions: oxidizing agents, strong alkalis, strong acids.           |    |
| Hazardous decomposition products   | : Depending on conditions, decomposition products may include the following materials: carbon oxides nitrogen oxides halogenated compounds |    |

### Section 11. Toxicological information

| Ingestion                                    | : Adverse symptoms may include the following: stomach pains   |

# Section 11. Toxicological information

| Delayed and immediate effe     | ects and also chronic effects from short and long term exposure   |
|--------------------------------|---|
| Short term exposure            |   |
| Potential immediate effects    | : Not available.  |
| Potential delayed effects      | : Not available.  |
| Long term exposure             |   |
| Potential immediate<br>effects | : Not available.  |
| Potential delayed effects      | : Not available.  |
| Potential chronic health eff   | ects  |
| General                        | : Prolonged or repeated contact can defat the skin and lead to irritation, cracking and/<br>or dermatitis. Once sensitized, a severe allergic reaction may occur when<br>subsequently exposed to very low levels. |
| Carcinogenicity                | : No known significant effects or critical hazards.   |
| Mutagenicity                   | : No known significant effects or critical hazards.   |
| Reproductive toxicity          | : No known significant effects or critical hazards.   |
|                                |   |

#### Numerical measures of toxicity

#### Acute toxicity estimates

| Route                        | ATE value     |  |
|------------------------------|---------------|--|
| Oral                         | 4704.56 mg/kg |  |
| Dermal                       | 5672.1 mg/kg  |  |
| Inhalation (vapors)          | 30.7 mg/l     |  |
| Inhalation (dusts and mists) | 3.94 mg/l     |  |

#### Other information

Causes digestive tract burns. Prolonged or repeated contact may dry skin and cause irritation. Repeated exposure to high vapor concentrations may cause irritation of the respiratory system and permanent brain and nervous system damage. Inhalation of vapor/aerosol concentrations above the recommended exposure limits causes headaches, drowsiness and nausea and may lead to unconsciousness or death. Avoid contact with skin and clothing. Exposure to amine vapor has been reported to cause transient corneal edema described as blue haze, halo effect, foggy or blurred vision for several hours. This condition is typically temporary and does not cause permanent visual effects. When the proper eye protection specified in Section 8 is worn, exposure is significantly reduced and the condition has not been observed.

### Section 12. Ecological information

#### **Toxicity**

# Section 12. Ecological information

| Product/ingredient name   | Result   | Species  | Exposure      |
|---|--|--|---------------|
| Fatty acids, C18-unsatd.,<br>dimers, oligomeric reaction<br>products with tall-oil fatty<br>acids and<br>triethylenetetramine | EC10 1.78 mg/l   | Algae  | 72 hours      |
| 2-methylpropan-1-ol   | Acute EC50 1100 mg/l   | Daphnia  | 48 hours      |

| 3,6-diazaoctanethylenediamin | -1.66 to -1.4 | -           | Low       |

### Section 12. Ecological information

#### Mobility in soil

Soil/water partition coefficient (K<sub>oc</sub>)

: Not available.

#### **Other adverse effects** : No known significant effects or critical hazards.

# Section 13. Disposal considerations

| Disposal methods | : The generation of waste should be avoided or minimized wherever possible.<br>Disposal of this product, solutions and any by-products should at all times comply<br>with the requirements of environmental protection and waste disposal legislation and<br>any regional local authority requirements. Dispose of surplus and non-recyclable<br>products via a licensed waste disposal contractor. Waste should not be disposed of<br>untreated to the sewer unless fully compliant with the requirements of all authorities<br>with jurisdiction. Waste packaging should be recycled. Incineration or landfill<br>should only be considered when recycling is not feasible. This material and its<br>container must be disposed of in a safe way. Care should be taken when handling<br>emptied containers that have not been cleaned or rinsed out. Empty containers or<br>liners may retain some product residues. Vapor from product residues may create a<br>highly flammable or explosive atmosphere inside the container. Do not cut, weld or<br>grind used containers unless they have been cleaned thoroughly internally. Avoid<br>dispersal of spilled material and runoff and contact with soil, waterways, drains and<br>sewers. |
|------------------|---|
|                  |   |

# Section 14. Transport information

### Section 14. Transport information

Special precautions for user : Transport within user's premises: always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

Transport in bulk according : Not applicable. to IMO instruments

### Section 15. Regulatory information

Singapore - hazardous chemicals under government control

None.

International regulations

Montreal Protocol

Not listed.

#### Stockholm Convention on Persistent Organic Pollutants

Not listed.
