: 3.02

use.

Europe

## SECTION 1: Identification of the substance/mixture and of the company/ undertaking

**1.1 Product identifier** 

Product name	: PITT-CHAR XP HARDENER BLACK PF
Product code	: 000001104813

Other means of identification

00352602; 00354399

1.2 Relevant identified use	s of the substance or mixture and uses advised against
Product use	: Professional applications, Used by spraying.
Use of the substance/ mixture	: Hardener.; Coating.
Uses advised against	: Product is not intended, labelled or packaged for consumer

#### 1.3 Details of the supplier of the safety data sheet

PPG Coatings Belgium BV/SRL Tweemontstraat 104 B-2100 Deurne Belgium Telephone +32-33606311 Fax +32-33606435

e-mail address of person responsible for this SDS

: Product.Stewardship.EMEA@ppg.com

#### 1.4 Emergency telephone number

#### **Supplier**

+31 20 4075210

## **SECTION 2: Hazards identification**

2.1 Classification of the substance or mixture Product definition : Mixture Classification according to Regulation (EC) No. 1272/2008 [CLP/GHS] Skin Corr. 1C, H314 Eye Dam. 1, H318 Skin Sens. 1, H317 Carc. 2, H351 Repr. 2, H361f STOT RE 2, H373 Aquatic Chronic 2, H411 The product is classified as hazardous according to Regulation (EC) 1272/2008 as amended. See Section 16 for the full text of the H statements declared above.

See Section 11 for more detailed information on health effects and symptoms.

English (GB)

PITT-CHAR XP HARDENER BLACK PE		

## **SECTION 2: Hazards identification**

2.2 Label elements	
Hazard pictograms	
Signal word	: Danger
Hazard statements	<ul> <li>Causes severe skin burns and eye damage. May cause an allergic skin reaction. Suspected of causing cancer. Suspected of damaging fertility. May cause damage to organs through prolonged or repeated exposure. Toxic to aquatic life with long lasting effects.</li> </ul>
Precautionary statements	
Prevention	: Wear protective gloves, protective clothing and eye or face protection. Avoid release to the environment. Do not breathe vapour.
Response	: Collect spillage. IF INHALED: Immediately call a POISON CENTER or doctor.
Storage	: Not applicable.
Disposal	<ul> <li>Dispose of contents and container in accordance with all local, regional, national and international regulations.</li> <li>P280, P273, P260, P391, P304 + P310, P501</li> </ul>
Supplemental label elements	: Not applicable.
Annex XVII - Restrictions on the manufacture, placing on the market and use of certain dangerous substances, mixtures and articles	: Not applicable.
Special packaging requiren	nents
Containers to be fitted with child-resistant fastenings	: Not applicable.
Tactile warning of danger	: Not applicable.
2.3 Other hazards	
Product meets the criteria for PBT or vPvB	: This mixture does not contain any substances that are assessed to be a PBT or a vPvB.
Other hazards which do not result in classification	: Causes digestive tract burns.

Code : 000001104813 PITT-CHAR XP HARDENER BLACK PF Date of issue/Date of revision

## **SECTION 4: First aid measures**

#### 4.1 Description of first aid measures

Eye contact	: Check for and remove any contact lenses. Immediately flush eyes with running water for at least 15 minutes, keeping eyelids open. Seek immediate medical attention.
Inhalation	<ul> <li>Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel.</li> </ul>
Skin contact	<ul> <li>Remove contaminated clothing and shoes. Wash skin thoroughly with soap and water or use recognised skin cleanser. Do NOT use solvents or thinners.</li> </ul>
Ingestion	: If swallowed, seek medical advice immediately and show the container or label. Keep person warm and at rest. Do NOT induce vomiting.
Protection of first-aiders	: No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves.

#### **4.2 Most important symptoms and effects, both acute and delayed**

	tonis and enects, both acute and delayed
Potential acute health e	ffects
Eye contact	: Causes serious eye damage.
Inhalation	: No known significant effects or critical hazards.
Skin contact	: Causes severe burns. May cause an allergic skin reaction.
Ingestion	: Corrosive to the digestive tract. Causes burns.
Over-exposure signs/sy	<u>mptoms</u>
Eye contact	: Adverse symptoms may include the following: pain watering redness
Inhalation	: Adverse symptoms may include the following: reduced foetal weight increase in foetal deaths skeletal malformations
Skin contact	: Adverse symptoms may include the following: pain or irritation redness blistering may occur reduced foetal weight increase in foetal deaths skeletal malformations
Ingestion	: Adverse symptoms may include the following: stomach pains reduced foetal weight increase in foetal deaths skeletal malformations
4.3 Indication of any imm	ediate medical attention and special treatment needed
Notes to physician	: In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours.
Specific treatments	No specific treatment

**Specific treatments** : No specific treatment.

<b>SECTION 5: Firefigh</b>	ting measu	res	
5.1 Extinguishing media Suitable extinguishing media	: Use an extin	nguishing agent suitable for the surrounding	fire.
Unsuitable extinguishing media	: None known	۱.	
5.2 Special hazards arising f	rom the substar	nce or mixture	
Hazards from the substance or mixture	material is to	<sup>i</sup> heated, a pressure increase will occur and oxic to aquatic life with long lasting effects. I must be contained and prevented from bei ain.	Fire water contaminated with
Hazardous combustion products	: Decompositi carbon oxide nitrogen oxid		erials:
5.3 Advice for firefighters			
Special precautions for fire-fighters		plate the scene by removing all persons fron e. No action shall be taken involving any pe	
Special protective equipment for fire-fighters	•	s should wear appropriate protective equipm SCBA) with a full face-piece operated in pos	•

## **SECTION 6: Accidental release measures**

6.1 Personal precautions, pro	tective equipment and emergency procedures
For non-emergency personnel	: No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilt material. Do not breathe vapour or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment.
For emergency responders	: If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".
6.2 Environmental precautions	: Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). Water polluting material. May be harmful to the environment if released in large quantities. Collect spillage.
6.3 Methods and material for	containment and cleaning up
Small spill	: Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste

disposal contractor.

for fire-fighters (including helmets, protective boots and gloves) conforming to European

standard EN 469 will provide a basic level of protection for chemical incidents.

Code : 000001104 PITT-CHAR XP HARDENE		Date of issue/Date of revision	: 14 November 2024
SECTION 6: Accide	ental release me	asures	
Large spill	upwind. Prevent spillages into an spillage with non diatomaceous ea Dispose of via a	but risk. Move containers from spill are t entry into sewers, water courses, base effluent treatment plant or proceed as the combustible, absorbent material e.g. s arth and place in container for disposal licensed waste disposal contractor. Co me hazard as the spilt product.	ements or confined areas. Wash follows. Contain and collect sand, earth, vermiculite or according to local regulations.
6.4 Reference to other sections		r emergency contact information. r information on appropriate personal p	protective equipment.

See Section 13 for additional waste treatment information.

## **SECTION 7: Handling and storage**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### 7.1 Precautions for safe handling

Protective measures	: Put on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Avoid exposure - obtain special instructions before use. Avoid exposure during pregnancy. Do not handle until all safety precautions have been read and understood. Do not get in eyes or on skin or clothing. Do not breathe vapour or mist. Do not ingest. Avoid release to the environment. If during normal use the material presents a respiratory hazard, use only with adequate ventilation or wear appropriate respirator. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container.
Advice on general occupational hygiene	: Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.
7.2 Conditions for safe storage, including any incompatibilities	: Store between the following temperatures: 0 to 35°C (32 to 95°F). Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.

#### 7.3 Specific end use(s)

See Section 1.2 for Identified uses.

### **SECTION 8: Exposure controls/personal protection**

8.2 Exposure controls			
Appropriate engineering controls	:	If user operations generate dust, fumes, gas, vapour or mist, use process encl local exhaust ventilation or other engineering controls to keep worker exposure airborne contaminants below any recommended or statutory limits.	
Individual protection measu	<u>ires</u>	È de la constante de	
Hygiene measures	:	Wash hands, forearms and face thoroughly after handling chemical products, I eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clo Contaminated work clothing should not be allowed out of the workplace. Wash contaminated clothing before reusing. Ensure that eyewash stations and safet showers are close to the workstation location.	othing. h
Eye/face protection	:	Chemical splash goggles and face shield. Use eye protection according to EN	166.
Skin protection			
Hand protection	:	Chemical-resistant, impervious gloves complying with an approved standard sl worn at all times when handling chemical products if a risk assessment indicat is necessary. Considering the parameters specified by the glove manufactured during use that the gloves are still retaining their protective properties. It shoul noted that the time to breakthrough for any glove material may be different for glove manufacturers. In the case of mixtures, consisting of several substances protection time of the gloves cannot be accurately estimated. When prolonged frequently repeated contact may occur, a glove with a protection class of 6 (breakthrough time greater than 480 minutes according to EN 374) is recommend When only brief contact is expected, a glove with a protection class of 2 or high (breakthrough time greater than 30 minutes according to EN 374) is recommend The user must check that the final choice of type of glove selected for handling product is the most appropriate and takes into account the particular conditions as included in the user's risk assessment.	tes this r, check different s, the d or ended. her nded. g this
Gloves	:	nitrile neoprene	
Body protection	-	Personal protective equipment for the body should be selected based on the tabeing performed and the risks involved and should be approved by a specialist handling this product.	
Other skin protection		Appropriate footwear and any additional skin protection measures should be see based on the task being performed and the risks involved and should be appro- a specialist before handling this product.	
Respiratory protection	:	Respirator selection must be based on known or anticipated exposure levels, thazards of the product and the safe working limits of the selected respirator. If workers are exposed to concentrations above the exposure limit, they must us appropriate, certified respirators. Use a properly fitted, air-purifying or air-fed recomplying with an approved standard if a risk assessment indicates this is nece Wear a respirator conforming to EN140. Filter type: organic vapour (Type A) a particulate filter P3	f e espirator essary.

### PITT-CHAR XP HARDENER BLACK PF

## **SECTION 8: Exposure controls/personal protection**

**Environmental exposure controls** : Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

## **SECTION 9: Physical and chemical properties**

The conditions of measurement of all properties are at standard temperature and pressure unless otherwise indicated.

#### 9.1 Information on basic physical and chemical properties

Appearance

Code : 0000011048 <sup>4</sup> PITT-CHAR XP HARDENER	
SECTION 9: Physica	al and chemical properties
	The product itself is not explosive, but the formation of an explosible mixture of vapour or dust with air is possible.
Oxidising properties No additional information.	: Product does not present an oxidizing hazard.
SECTION 10: Stabil	ity and reactivity
10.1 Reactivity	: No specific test data related to reactivity available for this product or its ingredients.
10.2 Chemical stability	: The product is stable.
10.3 Possibility of hazardous reactions	: Under normal conditions of storage and use, hazardous reactions will not occur.
10.4 Conditions to avoid	: When exposed to high temperatures may produce hazardous decomposition products Refer to protective measures listed in sections 7 and 8.
10.5 Incompatible materials	<ul> <li>Keep away from the following materials to prevent strong exothermic reactions: oxidising agents, strong alkalis, strong acids.</li> </ul>
10.6 Hazardous decomposition products	: Depending on conditions, decomposition products may include the following materials carbon oxides nitrogen oxides

# **SECTION 11: Toxicological information**

#### 11.1 Information on hazard classes as defined in Regulation (EC) No 1272/2008

The mixture has been assessed following the conventional method of the CLP Regulation (EC) No 1272/2008 and is classified for toxicological properties accordingly.

May cause an allergic skin reaction.

Suspected of damaging fertility. Suspected of damaging the unborn child.

Suspected of causing cancer.

May cause damage to organs through prolonged or repeated exposure.

### Acute toxicity

Product/ingredient name	Result	Species	Dose	Exposure
Fatty acids, C18-unsatd., dimers, oligomeric reaction products with tall-oil fatty acids and triethylenetetramine	LD50 Dermal	Rat	>2000 mg/kg	-
	LD50 Oral	Rat	>2000 mg/kg	-
1,3,5-triazine-2,4,6-triamine	LC50 Inhalation Dusts and mists	Rat	>5190 mg/m <sup>3</sup>	4 hours

## **SECTION 11: Toxicological information**

Route	ATE value
Øral	13432.34 mg/kg
Dermal	13077.11 mg/kg

Conclusion/Summary

: Based on available data, the classification criteria are not met.

#### Irritation/Corrosion

Product/ingredient name	Result	Species	Score	Exposure	Observation
Fatty acids, C18-unsatd., dimers, oligomeric reaction products with tall-oil fatty acids and triethylenetetramine	Eyes - Severe irritant	Rabbit	-	-	-
	Skin - Irritant	Human	-	-	-

#### **Conclusion/Summary**

- Skin : Zauses severe burns.
- Eyes

Respiratory

- : Zauses serious eye damage.
- **Based on available data, the classification criteria are not met.**

### Respiratory or skin sensitization

Product/ingredient name	Route of exposure	Species	Result
Fatty acids, C18-unsatd., dimers, oligomeric reaction products with tall-oil fatty acids and triethylenetetramine	skin	Mouse	Sensitising
		Guinea pig	Sensitising

#### **Conclusion/Summary**

Skin

: May cause an allergic skin reaction.

: Based on available data, the classification criteria are not met.

#### Respiratory Mutagenicity

Based on available data, the classification criteria are not met.

#### **Carcinogenicity**

Suspected of causing cancer.

#### **Reproductive toxicity**

Suspected of damaging fertility. Suspected of damaging the unborn child.

#### Specific target organ toxicity (single exposure)

Based on available data, the classification criteria are not met.

#### Specific target organ toxicity (repeated exposure)

Product/ingredient name	Category	Route of exposure	Target organs
1,3,5-triazine-2,4,6-triamine	Category 2	-	urinary system

#### Conclusion/Summary

 $\mathbf{M}$ ay cause damage to organs through prolonged or repeated exposure.

#### Aspiration hazard

Based on available data, the classification criteria are not met.

English (GB)	Europe	11/17
Ingestion	Corrosive to the digestive tract. Causes burns.	
Inhalation	No known significant effects or critical hazards.	
Potential acute health effects		
Information on likely routes of exposure	Not available.	

Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II, as amended by Commission	on Regulation (EU)
2020/878

# **SECTION 11: Toxicological information**

<ul> <li>Causes serious eye damage.</li> <li>Sical, chemical and toxicological characteristics</li> <li>Adverse symptoms may include the following: reduced foetal weight increase in foetal deaths skeletal malformations</li> <li>Adverse symptoms may include the following: stomach pains reduced foetal weight increase in foetal deaths skeletal malformations</li> <li>Adverse symptoms may include the following: pain or irritation reduces symptoms may include the following: pain or irritation reduced foetal weight increase in foetal deaths skeletal malformations</li> <li>Adverse symptoms may include the following: pain or irritation reduced foetal weight increase in foetal deaths skeletal malformations</li> <li>Adverse symptoms may include the following: pain watering redness</li> <li>adverse symptoms may include the following: pain watering redness</li> <li>as well as chronic effects from short and long-term exposure</li> </ul>
<ul> <li>Adverse symptoms may include the following: reduced foetal weight increase in foetal deaths skeletal malformations</li> <li>Adverse symptoms may include the following: stomach pains reduced foetal weight increase in foetal deaths skeletal malformations</li> <li>Adverse symptoms may include the following: pain or irritation redness</li> <li>blistering may occur reduced foetal weight increase in foetal deaths skeletal malformations</li> <li>Adverse symptoms may include the following: pain or irritation redness</li> <li>blistering may occur reduced foetal weight increase in foetal deaths skeletal malformations</li> <li>Adverse symptoms may include the following: pain watering redness</li> </ul>
<ul> <li>reduced foetal weight increase in foetal deaths skeletal malformations</li> <li>Adverse symptoms may include the following: stomach pains reduced foetal weight increase in foetal deaths skeletal malformations</li> <li>Adverse symptoms may include the following: pain or irritation redness</li> <li>blistering may occur reduced foetal weight increase in foetal deaths skeletal malformations</li> <li>Adverse symptoms may include the following: pain</li> <li>adverse symptoms may include the following: pain</li> <li>blistering may occur</li> <li>reduced foetal weight increase in foetal deaths</li> <li>skeletal malformations</li> <li>Adverse symptoms may include the following: pain</li> <li>watering redness</li> </ul>
<ul> <li>stomach pains</li> <li>reduced foetal weight</li> <li>increase in foetal deaths</li> <li>skeletal malformations</li> <li>Adverse symptoms may include the following:</li> <li>pain or irritation</li> <li>redness</li> <li>blistering may occur</li> <li>reduced foetal weight</li> <li>increase in foetal deaths</li> <li>skeletal malformations</li> <li>Adverse symptoms may include the following:</li> <li>pain</li> <li>watering</li> <li>redness</li> </ul>
pain or irritation redness blistering may occur reduced foetal weight increase in foetal deaths skeletal malformations Adverse symptoms may include the following: pain watering redness
pain watering redness
s as well as chronic effects from short and long-term exposure
No known significant effects or critical hazards.
No known significant effects or critical hazards.
No known significant effects or critical hazards.
No known significant effects or critical hazards.
<u>ts</u>
May cause damage to organs through prolonged or repeated exposure. Once sensitized, a severe allergic reaction may occur when subsequently exposed to very low levels.
<ul> <li>Suspected of causing cancer. Risk of cancer depends on duration and level of exposure.</li> </ul>
No known significant effects or critical hazards.
Suspected of damaging fertility.
: Causes digestive tract burns. Sanding and grinding dusts may be harmful if inhaled. Repeated exposure to high vapor concentrations may cause irritation of the respiratory system and permanent brain and nervous system damage. Inhalation of vapour/aerosol concentrations above the recommended exposure limits causes headaches, drowsiness and nausea and may lead to unconsciousness or death. Exposure to amine vapor has been reported to cause transient corneal edema described as blue haze, halo effect, foggy or blurred vision for several hours. This condition is typically temporary and does not cause permanent visual effects. When the proper eye protection specified in Section 8 is worn, exposure is significantly reduced and the condition has not been observed.

11.2 Information on other hazards

11.2.1 Endocrine disrupting properties

English (GB)	Europe	12/17
--------------	--------	-------

Code	: 000001104813	Date of issue/Date of revision	: 14 November 2024
PITT-CHAP	R XP HARDENER BLACK PF		

## **SECTION 11: Toxicological information**

Based on available data, the classification criteria are not met.

11.2.2 Other information

Not available.

## **SECTION 12: Ecological information**

There are no data available on the mixture itself. Do not allow to enter drains or watercourses.

The mixture has been assessed following the summation method of the CLP Regulation (EC) No 1272/2008 and is classified for eco-toxicological properties accordingly. See Sections 2 and 3 for details.

#### 12.1 Toxicity

Product/ingredient name	Result	Species	Exposure
Fatty acids, C18-unsatd., dimers, oligomeric reaction products with tall-oil fatty acids and triethylenetetramine	EC10 1.78 mg/l	Algae	72 hours
1,3,5-triazine-2,4,6-triamine	Acute EC50 200 mg/l	Daphnia	48 hours
2,4,6-tris(dimethylaminomethyl)phenol	Acute LC50 >100 mg/l	Daphnia	48 hours
	Acute LC50 >100 mg/l	Fish	96 hours
N,N'-ethane-1,2-diylbis(12-hydroxyoctadecan-	Acute EC50 29 to 43 mg/l	Algae -	72 hours
1-amide)		Pseudokirchneriella	
		subcapitata	
	Acute EC50 94 mg/l	Daphnia - Daphnia	48 hours
		magna	

**Conclusion/Summary** : **T**oxic to aquatic life with long lasting effects.

#### 12.2 Persistence and degradability

Product/ingredient name	Test	Result	I	Dose	Inoculum
2,4,6-tris (dimethylaminomethyl)phenol	OECD 301D Ready Biodegradability - Closed Bottle Test	4 % - Not readily - 28 da	ays -		-
N,N'-ethane-1,2-diylbis (12-hydroxyoctadecan- 1-amide)	-	63 % - 28 days	-		-
Product/ingredient name		Aquatic half-life	Photoly	sis	Biodegradability
Fatty acids, C18-unsatd., dime reaction products with tall-oil fa triethylenetetramine	atty acids and	-	-		Not readily
2,4,6-tris(dimethylaminomethyl N,N'-ethane-1,2-diylbis(12-hyd 1-amide)	<i>,</i> ,	-	-		Not readily Readily

#### **12.3 Bioaccumulative potential**

Product/ingredient name	LogPow	BCF	Potential
1,3,5-triazine-2,4,6-triamine 2,4,6-tris(dimethylaminomethyl)phenol 3,6-diazaoctanethylenediamin N,N'-ethane-1,2-diylbis(12-hydroxyoctadecan- 1-amide)	-1.22 0.219 -1.66 to -1.4 >6	3.8 - - -	Low Low Low High

## **SECTION 12: Ecological information**

12.4 Mobility in soil	
Soil/water partition coefficient (Koc)	: Not available.
Mobility	: Not available.

#### 12.5 Results of PBT and vPvB assessment

This mixture does not contain any substances that are assessed to be a PBT or a vPvB.

#### 12.6 Endocrine disrupting properties

Based on available data, the classification criteria are not met.

#### 12.7 Other adverse effects

No known significant effects or critical hazards.

## SECTION 13: Disposal considerations

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### **13.1 Waste treatment methods**

Product	
Methods of disposal	: The generation of waste should be avoided or minimised wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non- recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction.
Hazardous waste	

#### Hazardous waste

#### European waste catalogue (EWC)

Waste code	Waste designation
<b>0</b> 8 01 11*	waste paint and varnish containing organic solvents or other hazardous substances

#### **Packaging**

Methods of disposal

: The generation of waste should be avoided or minimised wherever possible. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible.

Type of packaging	European waste catalogue (EWC)	
Container	15 01 06 mixed packaging	
Special precautions	<ul> <li>This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of sp material and runoff and contact with soil, waterways, drains and sewers.</li> </ul>

# **SECTION 14: Transport information**

	ADR/RID	ADN	IMDG	ΙΑΤΑ
14.1 UN number or ID number	UN3066	UN3066	UN3066	UN3066
14.2 UN proper shipping name	PAINT	PAINT	PAINT	PAINT
14.3 Transport hazard class(es)	8	8	8	8
14.4 Packing group	III	=	III	Ш
14.5 Environmental hazards	Yes.	Yes.	Yes.	Yes. The environmentally hazardous substance mark is not required.
Marine pollutant substances	Not applicable.	Not applicable.	(Polyamide)	Not applicable.

#### **Additional information**

ADR/RID	: The environmentally hazardous substance mark is not required when transported in sizes of ≤5 L or ≤5 kg.	
Tunnel code	: (E)	
ADN	: The environmentally hazardous substance mark is not required when transported in sizes of ≤5 L or ≤5 kg.	
IMDG	: The marine pollutant mark is not required when transported in sizes of $\leq$ 5 L or $\leq$ 5 kg.	
ΙΑΤΑ	: The environmentally hazardous substance mark may appear if required by other transportation regulations.	
14.6 Special pre- user	cautions for : Transport within user's premises: always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.	

**14.7 Maritime transport in** : Not applicable. bulk according to IMO instruments

## **SECTION 15: Regulatory information**

15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture <u>EU Regulation (EC) No. 1907/2006 (REACH)</u>

Annex XIV - List of substances subject to authorisation Annex XIV None of the components are listed. Substances of very high concern
