Rinse skin with water.</li> <li>P302 + P312 - IF ON SKIN: Call a POISON CENTER or doctor if you feel unwell.</li> <li>P332 + P313 - If skin irritation occurs: Get medical advice or attention.</li> <li>P305 + P351 + P338 - IF IN EYES: Rinse cautiously with water for several minutes.<br/>Remove contact lenses, if present and easy to do. Continue rinsing.</li> <li>P337 + P313 - If eye irritation persists: Get medical advice or attention.</li> </ul> |
| Storage                       | <ul> <li>P405 - Store locked up.</li> <li>P403 + P233 - Store in a well-ventilated place. Keep container tightly closed.</li> </ul>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| Disposal                      | : P501 - Dispose of contents and container in accordance with all local, regional, national and international regulations.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| result in classification      | : Sanding and grinding dusts may be harmful if inhaled. Prolonged or repeated contact may dry skin and cause irritation. Repeated exposure to high vapor concentrations may cause irritation of the respiratory system and permanent brain and nervous system damage. Inhalation of vapor/aerosol concentrations above the recommended exposure limits causes headaches, drowsiness and nausea and may lead to unconsciousness or death. This product contains crystalline silica which can cause lung cancer or silicosis. The risk of cancer depends on the duration and level of exposure to dust from sanding surfaces or mist from spray applications. Emits toxic fumes when heated.                                                                                                                      |
| See toxicological information | n (Section 11)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

| n-butyl acetate                                     | ≥5.0 - ≤10  | 123-86-4   |
| ethylbenzene                                        | ≥1.0 - ≤5.0 | 100-41-4   |
| Talc , not containing asbestiform fibres            | ≥1.0 - ≤5.0 | 14807-96-6 |
| bis(1,2,2,6,6-pentamethyl-4-piperidyl) sebacate     | <1.0        | 41556-26-7 |
| crystalline silica, respirable powder (<10 microns) | <1.0        | 14808-60-7 |
| toluene                                             | <1.0        | 108-88-3   |

Any concentration shown as a range is to protect confidentiality or is due to batch variation.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

### SECTION 4: First aid measures

#### **Description of necessary first aid measures**

| Eye contact<br>Inhalation | <ul> <li>Remove contact lenses, irrigate copiously with clean, fresh water, holding the eyelids apart for at least 10 minutes and seek immediate medical advice.</li> <li>Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel.</li> </ul> |
|---------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Skin contact<br>Ingestion | <ul> <li>Remove contaminated clothing and shoes. Wash skin thoroughly with soap and water or use recognized skin cleanser. Do NOT use solvents or thinners.</li> <li>If swallowed, seek medical advice immediately and show this container or label. Keep person warm and at rest. Do NOT induce vomiting.</li> </ul>                                                               |

| Most important symptoms/effects, acute and del | ayed |
|------------------------------------------------|------|
|                                                |      |

| Potential acute health effects |                                                                                       |  |
|--------------------------------|---------------------------------------------------------------------------------------|--|
| Eye contact                    | : Causes serious eye irritation.                                                      |  |
| Inhalation                     | : Harmful if inhaled. May cause respiratory irritation.                               |  |
| Skin contact                   | : May be harmful in contact with skin. Causes skin irritation. Defatting to the skin. |  |
| Ingestion                      | : No known significant effects or critical hazards.                                   |  |

**Over-exposure signs/symptoms** 

See toxicological information (Section 11)

| Indication of immediate medical attention and special treatment needed, if necessary |                                                                                            |  |
|--------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------|--|
| Notes to physician                                                                   | : Treat symptomatically. Contact poison treatment specialist immediately if large          |  |
| Specific treatments                                                                  | <ul><li>quantities have been ingested or inhaled.</li><li>No specific treatment.</li></ul> |  |

### Product name SIGMADUR 550 BASE BLUE 1188

### **SECTION 4: First aid measures**

| is suspected that fumes are still present, the rescuer should wear an appropriate<br>mask or self-contained breathing apparatus. It may be dangerous to the person<br>providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing<br>thoroughly with water before removing it, or wear gloves. |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

# **SECTION 5: Firefighting measures**

| Extinguishing media                            |                                                                                                                                                                                                                                                                                                                      |
|------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Suitable extinguishing media                   | : Use dry chemical, CO <sub>2</sub> , water spray (fog) or foam.                                                                                                                                                                                                                                                     |
| Unsuitable extinguishing media                 | : Do not use water jet.                                                                                                                                                                                                                                                                                              |
| Specific hazards arising from the chemical     | : Flammable liquid and vapor. Runoff to sewer may create fire or explosion hazard.<br>In a fire or if heated, a pressure increase will occur and the container may burst, with<br>the risk of a subsequent explosion.                                                                                                |
| Hazardous thermal decomposition products       | : Decomposition products may include the following materials:<br>carbon oxides<br>sulfur oxides<br>metal oxide/oxides                                                                                                                                                                                                |
| Special protective actions for fire-fighters   | : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool. |
| Special protective equipment for fire-fighters | <ul> <li>Fire-fighters should wear appropriate protective equipment and self-contained<br/>breathing apparatus (SCBA) with a full face-piece operated in positive pressure<br/>mode.</li> </ul>                                                                                                                      |

# **SECTION 6: Accidental release measures**

| Personal precautions, protection | ve equipment and emergency procedures                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
|----------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| For non-emergency<br>personnel   | : No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilled material. Shut off all ignition sources.<br>No flares, smoking or flames in hazard area. Avoid breathing vapor or mist.<br>Provide adequate ventilation. Wear appropriate respirator when ventilation is<br>inadequate. Put on appropriate personal protective equipment. |
| For emergency responders         | : If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".                                                                                                                                                                                                                                                                                     |
| Environmental precautions        | : Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).                                                                                                                                                                                                                                                                       |
| Methods and materials for cor    | tainment and cleaning up                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| Small spill                      | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.                                                                                                                                            |

Product name SIGMADUR 550 BASE BLUE 1188

### **SECTION 6: Accidental release measures**

| Large spill | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and |
|-------------|-----------------------------------------------------------------------------------------|
|             | explosion-proof equipment. Approach release from upwind. Prevent entry into             |
|             | sewers, water courses, basements or confined areas. Wash spillages into an              |
|             | effluent treatment plant or proceed as follows. Contain and collect spillage with non-  |
|             | combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth     |
|             | and place in container for disposal according to local regulations (see Section 13).    |
|             | Dispose of via a licensed waste disposal contractor. Contaminated absorbent             |
|             | material may pose the same hazard as the spilled product. Note: see Section 1 for       |
|             | emergency contact information and Section 13 for waste disposal.                        |

# **SECTION 7: Handling and storage**

### Precautions for safe handling

| Protective measures                                                | : | Put on appropriate personal protective equipment (see Section 8). Avoid exposure -<br>obtain special instructions before use. Avoid exposure during pregnancy. Do not<br>handle until all safety precautions have been read and understood. Do not get in<br>eyes or on skin or clothing. Do not breathe vapor or mist. Do not ingest. Use only<br>with adequate ventilation. Wear appropriate respirator when ventilation is<br>inadequate. Do not enter storage areas and confined spaces unless adequately<br>ventilated. Keep in the original container or an approved alternative made from a<br>compatible material, kept tightly closed when not in use. Store and use away from<br>heat, sparks, open flame or any other ignition source. Use explosion-proof electrical<br>(ventilating, lighting and material handling) equipment. Use only non-sparking tools.<br>Take precautionary measures against electrostatic discharges. Empty containers<br>retain product residue and can be hazardous. Do not reuse container. |
|--------------------------------------------------------------------|---|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Special precautions                                                | : | Vapors may accumulate in low or confined areas or travel a considerable distance to<br>a source of ignition and flash back. Vapors are heavier than air and may spread<br>along floors. If this material is part of a multiple component system, read the Safety<br>Data Sheet(s) for the other component or components before blending as the<br>resulting mixture may have the hazards of all of its parts.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| Advice on general<br>occupational hygiene                          | : | Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| Conditions for safe storage,<br>including any<br>incompatibilities | : | Store between the following temperatures: 0 to 35°C (32 to 95°F). Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Eliminate all ignition sources. Separate from oxidizing materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.                                                                                                                                                                                                                                                                                                                                         |

|-----------------------------------------------------|--------------------------------------------------------|
| xylene                                              | NOM-010-STPS-2014 (Mexico, 4/2016)<br>[Xileno, mezcla] |
|                                                     | STEL 15 minutes: 150 ppm.                              |
|                                                     | TWA 8 hours: 100 ppm.                                  |
| titanium dioxide                                    | NOM-010-STPS-2014 (Mexico, 4/2016)                     |
|                                                     | TWA 8 hours: 10 mg/m <sup>3</sup> .                    |
| barium sulfate                                      | NOM-010-STPS-2014 (Mexico, 4/2016)                     |
|                                                     | TWA 8 hours: 10 mg/m <sup>3</sup> .                    |
| n-butyl acetate                                     | NOM-010-STPS-2014 (Mexico, 4/2016)                     |
|                                                     | TWA 8 hours: 150 ppm.                                  |
|                                                     | STEL 15 minutes: 200 ppm.                              |
| ethylbenzene                                        | NOM-010-STPS-2014 (Mexico, 4/2016)                     |
|                                                     | TWA 8 hours: 20 ppm.                                   |
| Talc , not containing asbestiform fibres            | ACGIH TLV (United States, 7/2023)                      |
|                                                     | TWA 8 hours: 2 mg/m <sup>3</sup> . Form: Respirable    |
|                                                     | fraction.                                              |
| bis(1,2,2,6,6-pentamethyl-4-piperidyl) sebacate     | None.                                                  |
| crystalline silica, respirable powder (<10 microns) | NOM-010-STPS-2014 (Mexico, 4/2016)                     |
|                                                     | TWA 8 hours: 0.025 mg/m <sup>3</sup> . Form:           |
|                                                     | Respirable fraction.                                   |
| toluene                                             | NOM-010-STPS-2014 (Mexico, 4/2016)                     |
|                                                     | TWA 8 hours: 20 ppm.                                   |

Key to abbreviations

С = Ceiling Limit IPEL = Internal Permissible Exposure Limit STEL = Short term exposure limit TLV

= Threshold Limit Value TWA = Time Weighted Average

#### Consult local authorities for acceptable exposure limits.

| Recommended monitoring procedures      | eference should be made to appropriate monitoring standards. Referen<br>ational guidance documents for methods for the determination of hazard<br>ubstances will also be required.                                                                                                                                                                              |                     |
|----------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------|
| Appropriate engineering<br>controls    | lse only with adequate ventilation. Use process enclosures, local exhaus<br>entilation or other engineering controls to keep worker exposure to airbo<br>ontaminants below any recommended or statutory limits. The engineerin<br>lso need to keep gas, vapor or dust concentrations below any lower expl<br>mits. Use explosion-proof ventilation equipment.   | rne<br>ng controls  |
| Environmental exposure controls        | missions from ventilation or work process equipment should be checked<br>ney comply with the requirements of environmental protection legislation<br>ases, fume scrubbers, filters or engineering modifications to the process<br>quipment will be necessary to reduce emissions to acceptable levels.                                                          | . In some           |
| Individual protection measure          |                                                                                                                                                                                                                                                                                                                                                                 |                     |
| Hygiene measures                       | Vash hands, forearms and face thoroughly after handling chemical produ<br>ating, smoking and using the lavatory and at the end of the working perio<br>ppropriate techniques should be used to remove potentially contaminate<br>Vash contaminated clothing before reusing. Ensure that eyewash station<br>afety showers are close to the workstation location. | od.<br>ed clothing. |
| Eye/face protection<br>Skin protection | hemical splash goggles.                                                                                                                                                                                                                                                                                                                                         |                     |

Product name SIGMADUR 550 BASE BLUE 1188

# **SECTION 8: Exposure controls/personal protection**

| Hand protection        | : Chemical-resistant, impervious gloves complying with an approved standard should<br>be worn at all times when handling chemical products if a risk assessment indicates<br>this is necessary. Considering the parameters specified by the glove manufacturer,<br>check during use that the gloves are still retaining their protective properties. It<br>should be noted that the time to breakthrough for any glove material may be<br>different for different glove manufacturers. In the case of mixtures, consisting of<br>several substances, the protection time of the gloves cannot be accurately<br>estimated. |
|------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Body protection        | : Personal protective equipment for the body should be selected based on the task<br>being performed and the risks involved and should be approved by a specialist<br>before handling this product. When there is a risk of ignition from static electricity,<br>wear anti-static protective clothing. For the greatest protection from static<br>discharges, clothing should include anti-static overalls, boots and gloves.                                                                                                                                                                                             |
| Other skin protection  | <ul> <li>Appropriate footwear and any additional skin protection measures should be<br/>selected based on the task being performed and the risks involved and should be<br/>approved by a specialist before handling this product.</li> </ul>                                                                                                                                                                                                                                                                                                                                                                             |
| Respiratory protection | : Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator. If workers are exposed to concentrations above the exposure limit, they must use appropriate, certified respirators. Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary.                                                                                                                                                                                    |

| Solubility in water                          | : | Not available.          |             |
| Partition coefficient: n-<br>octanol/water   | : | Not applicable.         |             |

Date of issue 13 December 2024 Version 12

### Product name SIGMADUR 550 BASE BLUE 1188

# **SECTION 9: Physical and chemical properties**

| SECTION 10: Stability and reactivity |                                                                                                                                                                                                                |  |  |  |  |  |
|--------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|--|--|--|--|
| % Solid. (w/w)                       | : 64.936                                                                                                                                                                                                       |  |  |  |  |  |
| Viscosity                            | <ul> <li>         Fynamic (room temperature): Not available.         Kinematic (room temperature): &gt;400 mm²/s (&gt;400 cSt)         Kinematic (40°C (104°F)): &gt;21 mm²/s (&gt;21 cSt)         </li> </ul> |  |  |  |  |  |

| Reactivity                         | : No specific test data related to reactivity available for this product or its ingredients.                                                               |
|------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Chemical stability                 | : The product is stable.                                                                                                                                   |
| Possibility of hazardous reactions | : Under normal conditions of storage and use, hazardous reactions will not occur.                                                                          |
| Conditions to avoid                | : When exposed to high temperatures may produce hazardous decomposition products.<br>Refer to protective measures listed in sections 7 and 8.              |
| Incompatible materials             | : Keep away from the following materials to prevent strong exothermic reactions: oxidizing agents, strong alkalis, strong acids.                           |
| Hazardous decomposition products   | <ul> <li>Depending on conditions, decomposition products may include the following materials<br/>carbon oxides sulfur oxides metal oxide/oxides</li> </ul> |

### **SECTION 11: Toxicological information**

### Information on toxicological effects

#### Acute toxicity

### Product name SIGMADUR 550 BASE BLUE 1188

### **SECTION 11: Toxicological information**

#### **Target organs**

: Contains material which causes damage to the following organs: brain. Contains material which may cause damage to the following organs: blood, kidneys,

lungs, the nervous system, liver, cardiovascular system, upper respiratory tract, skin, central nervous system (CNS), ears, eye, lens or cornea.

#### **Aspiration hazard**

| Conclusion/Summary       | : There are no data available on the mixture itself. This product contains crystalline silica which can cause lung cancer or silicosis. The risk of cancer depends on the duration and level of exposure to dust from sanding surfaces or mist from spray applications. For many products, TiO2 is utilized as a raw material in a liquid coating formulation. In this case, the TiO2 particles are bound in a matrix with no meaningful potential for human exposure to unbound particles of TiO2 when the product is applied with a brush or roller. Sanding the coating surface or mist from spray applications may be harmful depending on the duration and level of exposure and require the use of exposure approach participation of the duration and level of exposure and |

# **SECTION 11: Toxicological information**

|                               |      | the kidneys, liver and central nervous system. Symptoms and signs include<br>headache, dizziness, fatigue, muscular weakness, drowsiness and, in extreme<br>cases, loss of consciousness. Solvents may cause some of the above effects by<br>absorption through the skin. There is some evidence that repeated exposure to<br>organic solvent vapors in combination with constant loud noise can cause greater<br>hearing loss than expected from exposure to noise alone. If splashed in the eyes,<br>the liquid may cause irritation and reversible damage. Ingestion may cause nausea,<br>diarrhea and vomiting. This takes into account, where known, delayed and<br>immediate effects and also chronic effects of components from short-term and long-<br>term exposure by oral, inhalation and dermal routes of exposure and eye contact. |

### Mobility in soil

Soil/water partition coefficient (Koc)

: Not available.

Other adverse effects

: No known significant effects or critical hazards.

### **SECTION 13: Disposal considerations**

| Disposal methods           | : The generation of waste should be avoided or minimized wherever possible.<br>Disposal of this product, solutions and any by-products should at all times comply<br>with the requirements of environmental protection and waste disposal legislation<br>and any regional local authority requirements. Dispose of surplus and non-<br>recyclable products via a licensed waste disposal contractor. Waste should not be<br>disposed of untreated to the sewer unless fully compliant with the requirements of<br>all authorities with jurisdiction. Waste packaging should be recycled. Incineration or<br>landfill should only be considered when recycling is not feasible. This material and<br>its container must be disposed of in a safe way. Care should be taken when<br>handling emptied containers that have not been cleaned or rinsed out. Empty<br>containers or liners may retain some product residues. Vapor from product residues<br>may create a highly flammable or explosive atmosphere inside the container. Do<br>not cut, weld or grind used containers unless they have been cleaned thoroughly<br>internally. Avoid dispersal of spilled material and runoff and contact with soil,<br>waterways, drains and sewers. |
|----------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Disposal should be in acco | ordance with applicable regional national and local laws and regulations                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

Disposal should be in accordance with applicable regional, national and local laws and regulations. Refer to Section 7: HANDLING AND STORAGE and Section 8: EXPOSURE CONTROLS/PERSONAL PROTECTION for additional handling information and protection of employees. Section 6. Accidental release measures
