## **SAFETY DATA SHEET**

Date of issue/Date of revision

: 13 December 2024 Version

: 2

Europe

#### SECTION 1: Identification of the substance/mixture and of the company/ undertaking

1.1 Product identifier

| Product name | : | CENTRIFUGON EAP EVO BASE L |
|--------------|---|----------------------------|
| Product code | : | 00446641                   |

Other means of identification

Not available.

| 1.2 Relevant identified uses of the substance or mixture and uses advised against |   |  |  |
|---|---|--|--|
| Product use   | : Professional applications, Used by spraying.                    |  |  |
| Use of the substance/<br>mixture  | : Coating.  |  |  |
| Uses advised against  | : Product is not intended, labelled or packaged for consumer use. |  |  |

#### 1.3 Details of the supplier of the safety data sheet

PPG AC - France Freitag Immeuble Union Square 1, Rue de l'Union CS10055 92565 RUEIL MALMAISON CEDEX France Tel : +33(0)1.57.61.03.20 Fax : +33(0)1.57.61.01.70

e-mail address of person : Product.Stewardship.EMEA@ppg.com responsible for this SDS

#### 1.4 Emergency telephone number

**Supplier** 

+31 (0)20 4075210

#### **SECTION 2: Hazards identification**

# 2.1 Classification of the substance or mixture Product definition : Mixture Classification according to Regulation (EC) No. 1272/2008 [CLP/GHS] Fam. Liq. 3, H226 Skin Irrit. 2, H315 Eye Irrit. 2, H319 STOT SE 3, H335 Aquatic Chronic 3, H412 The product is classified as hazardous according to Regulation (EC) 1272/2008 as amended. See Section 16 for the full text of the H statements declared above. See Section 11 for more detailed information on health effects and symptoms.

#### **SECTION 3: Composition/information on ingredients**

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment, are PBTs, vPvBs or Substances of equivalent concern, or have been assigned a workplace exposure limit and hence require reporting in this section.

<u>Type</u>

**M** Substance classified with a health or environmental hazard

[2] Substance with a workplace exposure limit

[3] Substance with endocrine disrupting properties

Occupational exposure limits, if available, are listed in Section 8.

#### SUB codes represent substances without registered CAS Numbers.

#### SECTION 4: First aid measures

#### 4.1 Description of first aid measures

| Eye contact                | <ul> <li>Remove contact lenses, irrigate copiously with clean, fresh water, holding the eyelids<br/>apart for at least 10 minutes and seek immediate medical advice.</li> </ul>  |
|----------------------------|--|
| Inhalation                 | : Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is<br>irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained<br>personnel.   |
| Skin contact               | <ul> <li>Remove contaminated clothing and shoes. Wash skin thoroughly with soap and water<br/>or use recognised skin cleanser. Do NOT use solvents or thinners.</li> </ul>   |
| Ingestion                  | <ul> <li>If swallowed, seek medical advice immediately and show the container or label. Keep person warm and at rest. Do NOT induce vomiting.</li> </ul>   |
| Protection of first-aiders | : No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. |

#### **4.2 Most important symptoms and effects, both acute and delayed**

| Potential acute health effect |  |  |
|-------------------------------|--|--|
| Eye contact                   | Causes serious eye irritation.   |  |
| Inhalation                    | May cause respiratory irritation.  |  |
| Skin contact                  | Causes skin irritation. Defatting to the skin.   |  |
| Ingestion                     | No known significant effects or critical hazards.  |  |
| Over-exposure signs/sympto    | <u>s</u>   |  |
| Eye contact                   | Adverse symptoms may include the following:<br>pain or irritation<br>watering<br>redness |  |
| Inhalation                    | Adverse symptoms may include the following:<br>respiratory tract irritation<br>coughing  |  |

| Code : 00446641<br>CENTRIFUGON EAP EVO BA                  | Date of issue/Date of revision         : 13 December 2024           ASE L   |
|--|---|
| SECTION 4: First aid                                       | measures  |
| Skin contact   | : Adverse symptoms may include the following:<br>irritation<br>redness<br>dryness<br>cracking   |
| Ingestion  | : No specific data.   |
| 4.3 Indication of any immedia                              | ate medical attention and special treatment needed  |
| Notes to physician   | <ul> <li>Treat symptomatically. Contact poison treatment specialist immediately if large<br/>quantities have been ingested or inhaled.</li> </ul>   |
| Specific treatments  | : No specific treatment.  |
| SECTION 5: Firefight                                       | ting measures   |
| 5.1 Extinguishing media<br>Suitable extinguishing<br>media | : Use dry chemical, CO <sub>2</sub> , water spray (fog) or foam.  |
| Unsuitable extinguishing media                             | : Do not use water jet.   |
| 5.2 Special hazards arising fi                             | rom the substance or mixture  |
| Hazards from the substance or mixture                      | : Fammable liquid and vapour. Runoff to sewer may create fire or explosion hazard. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion. This material is harmful to aquatic life with long lasting effects. Fire water contaminated with this material must be contained and prevented from being discharged to any waterway, sewer or drain. |
| Hazardous combustion products                              | : Decomposition products may include the following materials:<br>carbon oxides<br>metal oxide/oxides  |
| 5.3 Advice for firefighters                                |   |
| Special precautions for<br>fire-fighters                   | : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.  |
| Special protective equipment for fire-fighters             | : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. Clothing for fire-fighters (including helmets, protective boots and gloves) conforming to European standard EN 469 will provide a basic level of protection for chemical incidents.   |

| 6.1 Personal precautions, protective equipment and emergency procedures |   |  |  |  |
|---|---|--|--|--|
| For non-emergency<br>personnel  | : | No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilt material. Shut off all ignition sources. No<br>flares, smoking or flames in hazard area. Avoid breathing vapour or mist. Provide<br>adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put<br>on appropriate personal protective equipment. |  |  |
| For emergency responders  | : | If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".  |  |  |

| English (GB) | Europe | 5/19 |
|--------------|--------|------|
|--------------|--------|------|

| Code : 00446641<br>CENTRIFUGON EAP EVO | Date of issue/Date of revision         : 13 December 2024           BASE L   |
|--|--|
| SECTION 6: Accide                      | ental release measures   |
| 6.2 Environmental precautions          | : Kvoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). Water polluting material. May be harmful to the environment if released in large quantities.   |
| 6.3 Methods and material               | for containment and cleaning up  |
| Small spill                            | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.  |
| Large spill                            | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach the release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations. Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilt product. |
| 6.4 Reference to other sections        | <ul> <li>See Section 1 for emergency contact information.</li> <li>See Section 8 for information on appropriate personal protective equipment.</li> <li>See Section 13 for additional waste treatment information.</li> </ul>  |

#### SECTION 7: Handling and storage

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### 7.1 Precautions for safe handling

| Protective measures  | : Fut on appropriate personal protective equipment (see Section 8). Do not ingest. Avoid contact with eyes, skin and clothing. Avoid breathing vapour or mist. Avoid release to the environment. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Take precautionary measures against electrostatic discharges. Empty containers retain product residue and can be hazardous. Do not reuse container. |
|--|---|
| Advice on general<br>occupational hygiene                              | : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.   |
| 7.2 Conditions for safe<br>storage, including any<br>incompatibilities | : Store between the following temperatures: 0 to 35°C (32 to 95°F). Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Eliminate all ignition sources. Separate from oxidising materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.  |

|                             | -    |                        | 320 mg/l        | Assessment Factors       |
|                             | -    | Fresh water sediment   | 1.2 mg/kg dwt   | Assessment Factors       |
|                             | -    | Marine water sediment  | 0.24 mg/kg dwt  | Assessment Factors       |
|                             | -    | Soil                   | 3.7 mg/kg dwt   | Assessment Factors       |

#### 8.2 Exposure controls

| Appropriate engineering controls       | : Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapour or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.          |
|--|---|
| Individual protection meas             | <u>sures</u>  |
| Hygiene measures                       | : Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location. |
| Eye/face protection<br>Skin protection | : Chemical splash goggles. Use eye protection according to EN 166.  |

Hand protection

:

| Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II, as amended by Commission Regulation (EU) 2020/878 |                                   |                                |                    |
|--|-----------------------------------|--------------------------------|--------------------|
| <mark>Code</mark><br>CENTRIF   | : 00446641<br>UGON EAP EVO BASE L | Date of issue/Date of revision | : 13 December 2024 |
| SECTION 8: Exposure controls/personal protection   |                                   |                                |                    |

| SECTION 8: Exposure             | controls/personal protection   |                |
|---------------------------------|--|----------------|
|                                 | Chemical-resistant, impervious gloves complying with an approved standard should worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated. When prolonged or frequently repeated contact may occur, a glove with a protection class of 6 (breakthrough time greater than 480 minutes according to EN 374) is recommended. When only brief contact is expected, a glove with a protection class of 2 or higher (breakthrough time greater than 30 minutes according to EN 374) is recommended. The user must check that the final choice of type of glove selected for handling this product is the most appropriate and takes into account the particular conditions of us as included in the user's risk assessment. | s<br>ck<br>ent |
| Gloves                          | For prolonged or repeated handling, use the following type of gloves:  |                |
|                                 | Recommended: polyvinyl alcohol (PVA), neoprene, nitrile rubber, butyl rubber   |                |
| Body protection                 | Personal protective equipment for the body should be selected based on the task<br>being performed and the risks involved and should be approved by a specialist befor<br>handling this product. When there is a risk of ignition from static electricity, wear ant<br>static protective clothing. For the greatest protection from static discharges, clothing<br>should include anti-static overalls, boots and gloves. Refer to European Standard EI<br>1149 for further information on material and design requirements and test methods.  | i-             |
| Other skin protection           | Appropriate footwear and any additional skin protection measures should be selected<br>based on the task being performed and the risks involved and should be approved b<br>a specialist before handling this product.   |                |
| Respiratory protection          | Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator. If workers are exposed to concentrations above the exposure limit, they must use appropriate, certified respirators. Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Wear a respirator conforming to EN140. Filter type: organic vapour (Type A) and particulate filter P3   |                |
| Environmental exposure controls | Emissions from ventilation or work process equipment should be checked to ensure<br>they comply with the requirements of environmental protection legislation. In some<br>cases, fume scrubbers, filters or engineering modifications to the process equipment<br>will be necessary to reduce emissions to acceptable levels.  | t              |
|                                 |  |                |

#### **SECTION 9: Physical and chemical properties**

The conditions of measurement of all properties are at standard temperature and pressure unless otherwise indicated.

#### 9.1 Information on basic physical and chemical properties

#### 11.2 Information on other hazards

11.2.1 Endocrine disrupting properties

Based on available data, the classification criteria are not met.

#### **11.2.2 Other information**

Not available.

#### **SECTION 12: Ecological information**

There are no data available on the mixture itself. Do not allow to enter drains or watercourses.

The mixture has been assessed following the summation method of the CLP Regulation (EC) No 1272/2008 and is classified for eco-toxicological properties accordingly. See Sections 2 and 3 for details.

#### 12.1 Toxicity

| Product/ingredient name     | Result                      | Species                  | Exposure |
|-----------------------------|-----------------------------|--------------------------|----------|
| eptan-2-one                 | Acute LC50 131 mg/l         | Fish                     | 96 hours |
| butan-1-ol                  | Acute LC50 1376 mg/l        | Fish                     | 96 hours |

#### **SECTION 12: Ecological information**

#### 12.2 Persistence and degradability

| Product/ingredient name   | Test                  | Result   |             | Dose   |     | Inoculum                |
|---|-----------------------|--|-------------|--------|-----|-------------------------|
| ø-xylene<br>heptan-2-one  | OECD 301F<br>OECD 310 | 94 % - Readily - 28 day<br>69 % - Readily - 28 day |             | -      |     | -                       |
| Product/ingredient name   |                       | Aquatic half-life                                  | Photo       | olysis | Bio | degradability           |
| <ul> <li>xylene</li> <li>heptan-2-one</li> <li>4,4'-isopropylidenediphenol</li> </ul> |                       | -<br>-<br>-  | -<br>-<br>- |        | Rea | adily<br>adily<br>adily |

#### **12.3 Bioaccumulative potential**

| Product/ingredient name     | LogPow | BCF   | Potential |
|-----------------------------|--------|-------|-----------|
| ø-xylene                    | 3.12   | 14.13 | Low       |
| heptan-2-one                | 2.26   | -     | Low       |
| 1-ethoxypropan-2-ol         | <1     | -     | Low       |
| butan-1-ol                  | 1      | -     | Low       |
| 1-methoxy-2-propanol        | <1     | -     | Low       |
| 2-methylpropan-1-ol         | 1      | -     | Low       |
| propylidynetrimethanol      | -0.47  | -     | Low       |
| 4,4'-isopropylidenediphenol | 3.4    | 43.65 | Low       |

| 12.4 Mobility in soil                     |                  |
|---|------------------|
| Soil/water partition<br>coefficient (Koc) | : Not available. |
| Mobility                                  | : Not available. |

#### 12.5 Results of PBT and vPvB assessment

This mixture does not contain any substances that are assessed to be a PBT or a vPvB.

#### **12.6 Endocrine disrupting properties**

Based on available data, the classification criteria are not met.

#### 12.7 Other adverse effects

No known significant effects or critical hazards.

#### **SECTION 13: Disposal considerations**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### 13.1 Waste treatment methods

| Product         Methods of disposal         : The generation of waste should be avoided or minimised wherever possible.<br>Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. |  |

#### **SECTION 13: Disposal considerations**

ŝ

#### Hazardous waste

#### European waste catalogue (EWC)

| Waste code | Waste designation   |
|------------|---|
| 08 01 11*  | waste paint and varnish containing organic solvents or other hazardous substances |

#### Packaging

Methods of disposal

: The generation of waste should be avoided or minimised wherever possible. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible.

| Type of packaging   | European waste catalogue (EWC)   |  |  |
|---------------------|--|--|--|
| Container           | 15 01 06 mixed packaging   |  |  |
| Special precautions | : This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapour from product residues may create a highly flammable or explosive atmosphere inside the container Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilt material and runoff and contact with soil, waterway drains and sewers. |  |  |

#### **SECTION 14: Transport information**

|                                    | ADR/RID         | ADN             | IMDG            | ΙΑΤΑ            |

#### **Additional information**

| ADR/RID     | : This class 3 viscous liquid is not subject to regulation in packagings up to 450 L according to 2.2.3.1.5.1.   |
|-------------|--|
| Tunnel code | : (D/E)  |
| ADN         | : The product is only regulated as an environmentally hazardous substance when transported in tank vessels. This class 3 viscous liquid is not subject to regulation in packagings up to 450 L according to 2.2.3.1.5.1. |
| IMDG        | : This class 3 viscous liquid is not subject to regulation in packagings up to 450 L according to 2.3.2.5.   |
| ΙΑΤΑ        | : None identified.   |

# **14.6 Special precautions for : Transport within user's premises:** always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.
