# SAFETY DATA SHEET

Date of issue/Date of revision

: 14 December 2024 Version

: 6

### SECTION 1: Identification of the substance/mixture and of the company/ undertaking

| 1.1 Product identifier   |      |   |
|--|------|---|
| Product name   | :    | PPG VIKOTE 56 (TINTED)  |
| Product code   | :    | 00425230  |
| Other means of identificatio   | n    |   |
| Not available.   |      |   |
| 1.2 Relevant identified uses of  | of t | he substance or mixture and uses advised against                |
| Product use  | :    | Professional applications, Used by spraying.                    |
| Use of the substance/<br>mixture   | :    | Coating.  |
| Uses advised against   | :    | Product is not intended, labelled or packaged for consumer use. |
| 1.3 Details of the supplier of t   | the  | safety data sheet   |
| Pittsburgh Paints Nigeria Limit<br>1, Coker Street, Coker Bus-sto<br>Nigeria<br>Tel: 00 234 (0) 8138672483 |      | Badagry Expressway, Orile Iganmu, Lagos                         |
| e-mail address of person responsible for this SDS  | :    | PS.ACEMEA@ppg.com   |
| 1.4 Emergency telephone  | :    | 00234 127 173 85  |

### **SECTION 2: Hazards identification**

#### 2.1 Classification of the substance or mixture **Product definition** : Mixture Classification according to Regulation (EC) No. 1272/2008 [CLP/GHS]

Flam. Liq. 3, H226 Skin Irrit. 2, H315 Eye Irrit. 2, H319 Carc. 1B, H350 Lact., H362 STOT SE 3, H335 STOT SE 3, H336 Aquatic Acute 1, H400 Aquatic Chronic 1, H410

number

The product is classified as hazardous according to Regulation (EC) 1272/2008 as amended.

See Section 16 for the full text of the H statements declared above.

See Section 11 for more detailed information on health effects and symptoms.

| Code : 00425230        | Date of issue/Date of revision | : 14 December 2024 |
|------------------------|--------------------------------|--------------------|
| PPG VIKOTE 56 (TINTED) |                                |                    |

## **SECTION 2: Hazards identification**

| Hazard statements   | <ul> <li>Flammable liquid and vapour.<br/>Causes skin irritation.<br/>Causes serious eye irritation.<br/>May cause respiratory irritation.<br/>May cause drowsiness or dizziness.<br/>May cause cancer.<br/>May cause harm to breast-fed children.<br/>Very toxic to aquatic life with long lasting effects.</li> </ul> |
|---|---|
| Precautionary statements  |   |
| Prevention  | : Wear protective gloves, protective clothing and eye or face protection. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Avoid release to the environment.  |
| Response  | : Collect spillage.   |
| Storage   | : Store in a well-ventilated place. Keep container tightly closed.  |
| Disposal  | <ul> <li>Dispose of contents and container in accordance with all local, regional, national and<br/>international regulations.</li> <li>P280, P210, P273, P391, P403 + P233, P501</li> </ul>  |
| Supplemental label elements   | : Contains n-butyl methacrylate. May produce an allergic reaction.  |
| Annex XVII - Restrictions<br>on the manufacture,<br>placing on the market and<br>use of certain dangerous<br>substances, mixtures and<br>articles | : Restricted to professional users.   |
| Special packaging requiren  | nents   |
| Containers to be fitted<br>with child-resistant<br>fastenings   | : Not applicable.   |
| Tactile warning of danger   | : Not applicable.   |
| 2.3 Other hazards   |   |
| Product meets the criteria for PBT or vPvB  | : This mixture contains substances that are assessed to be a PBT or a vPvB, refer to Section 3.2.   |
| Other hazards which do not result in classification   | : Prolonged or repeated contact may dry skin and cause irritation.  |

## **SECTION 3: Composition/information on ingredients**

| 3.2 Mixtures            | : Mixture   |     |                |   |      |
|-------------------------|-------------|-----|----------------|---|------|
| Product/ingredient name | Identifiers | %   | Classification | Specific Conc.<br>Limits, M-factors<br>and ATEs | Туре |
|                         |             |     |                |   |      |
|                         |             |     |                |   |      |

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment, are PBTs, vPvBs or Substances of equivalent concern, or have been assigned a workplace exposure limit and hence require reporting in this section.

Туре

[1] Substance classified with a health or environmental hazard

[2] Substance with a workplace exposure limit

[3] Substance meets the criteria for PBT according to Regulation (EC) No. 1907/2006, Annex XIII

[4] Substance meets the criteria for vPvB according to Regulation (EC) No. 1907/2006, Annex XIII

This mixture contains  $\geq$  1% of titanium dioxide. The Annex VI classification of titanium dioxide does not apply to this mixture according to Note 10.

Occupational exposure limits, if available, are listed in Section 8.

SUB codes represent substances without registered CAS Numbers.

| Code : 00425230        | Date of issue/Date of revision | : 14 December 2024 |
|------------------------|--------------------------------|--------------------|
| PPG VIKOTE 56 (TINTED) |                                |                    |

### **SECTION 4: First aid measures**

| 4.1 Description of first aid m | easures   |
|--------------------------------|---|
| Eye contact                    | <ul> <li>Remove contact lenses, irrigate copiously with clean, fresh water, holding the eyelids<br/>apart for at least 10 minutes and seek immediate medical advice.</li> </ul>   |
| Inhalation                     | <ul> <li>Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is<br/>irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained<br/>personnel.</li> </ul>  |
| Skin contact                   | : Remove contaminated clothing and shoes. Wash skin thoroughly with soap and water<br>or use recognised skin cleanser. Do NOT use solvents or thinners.   |
| Ingestion                      | <ul> <li>If swallowed, seek medical advice immediately and show the container or label. Keep<br/>person warm and at rest. Do NOT induce vomiting.</li> </ul>  |
| Protection of first-aiders     | : No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. |

#### 4.2 Most important symptoms and effects, both acute and delayed

| Potential acute health effect |   |
|-------------------------------|---|
| Eye contact                   | : Causes serious eye irritation.  |
| Inhalation                    | : Can cause central nervous system (CNS) depression. May cause drowsiness or dizziness. May cause respiratory irritation.   |
| Skin contact                  | : Causes skin irritation. Defatting to the skin.  |
| Ingestion                     | : Can cause central nervous system (CNS) depression.  |
| Over-exposure signs/symp      | <u>ms</u>   |
| Eye contact                   | : Adverse symptoms may include the following:<br>pain or irritation<br>watering<br>redness  |
| Inhalation                    | : Adverse symptoms may include the following:<br>respiratory tract irritation<br>coughing<br>nausea or vomiting<br>headache<br>drowsiness/fatigue<br>dizziness/vertigo<br>unconsciousness<br>reduced foetal weight<br>increase in foetal deaths<br>skeletal malformations |
| Skin contact                  | : Adverse symptoms may include the following:<br>irritation<br>redness<br>dryness<br>cracking<br>reduced foetal weight<br>increase in foetal deaths<br>skeletal malformations   |
| Ingestion                     | : Adverse symptoms may include the following:<br>reduced foetal weight<br>increase in foetal deaths<br>skeletal malformations   |

### 4.3 Indication of any immediate medical attention and special treatment needed

| English | (GB) |
|---------|------|
|---------|------|

| Conforms to Regulation (EC) 2020/878              | ) No. 1907/2006 (REACH), Annex II, as amended by Commission Regulation (EU)   |
|---|---|
| Code : 00425230                                   | Date of issue/Date of revision : 14 December 2024   |
| PPG VIKOTE 56 (TINTED)                            |   |
| SECTION 4: First aid                              | l measures  |
| Notes to physician                                | : Treat symptomatically. Contact poison treatment specialist immediately if large<br>quantities have been ingested or inhaled.  |
| Specific treatments                               | : No specific treatment.  |
| <b>SECTION 5: Firefigh</b>                        | ting measures   |
| 5.1 Extinguishing media                           |   |
| Suitable extinguishing media                      | : Use dry chemical, CO <sub>2</sub> , water spray (fog) or foam.  |
| Unsuitable extinguishing media                    | : Do not use water jet.   |
| 5.2 Special hazards arising f                     | from the substance or mixture   |
| Hazards from the substance or mixture             | : Flammable liquid and vapour. Runoff to sewer may create fire or explosion hazard. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion. This material is very toxic to aquatic life with long lasting effects. Fire water contaminated with this material must be contained and prevented from being discharged to any waterway, sewer or drain. |
| Hazardous combustion products                     | : Decomposition products may include the following materials:<br>carbon oxides<br>metal oxide/oxides  |
| 5.3 Advice for firefighters                       |   |
| Special precautions for<br>fire-fighters          | : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.  |
| Special protective<br>equipment for fire-fighters | : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. Clothing for fire-fighters (including helmets, protective boots and gloves) conforming to European standard EN 469 will provide a basic level of protection for chemical incidents.   |

## SECTION 6: Accidental release measures

|   |  | English (GB)   | Nigeria   | 5/16                             |
|---|--|--|---|----------------------------------|
| Small spill   | explosion-proof<br>or if water-insolu  | equipment. Dilute with water   | m spill area. Use spark-proof<br>and mop up if water-soluble.<br>material and place in an appro<br>waste disposal contractor.   | Alternatively,                   |
| 6.3 Methods and material for                                    | containment and c  | leaning up   |   |                                  |
| 6.2 Environmental precautions                                   | sewers. Inform pollution (sewers   | the relevant authorities if the  | d contact with soil, waterways<br>product has caused environm<br>ter polluting material. May be<br>s. Collect spillage.   | ental                            |
| For emergency responders  |  | able and unsuitable materials  | the spillage, take note of any<br>s. See also the information in  |                                  |
| 6.1 Personal precautions, pro<br>For non-emergency<br>personnel | : No action shall b<br>Evacuate surrou<br>entering. Do no<br>flares, smoking<br>adequate ventila | e taken involving any person<br>nding areas. Keep unnecess<br>touch or walk through spilt n<br>or flames in hazard area. Ave | al risk or without suitable train<br>sary and unprotected personn<br>naterial. Shut off all ignition so<br>bid breathing vapour or mist.<br>rator when ventilation is inade | el from<br>ources. No<br>Provide |
|   |  |  |   |                                  |

| Code : 00425230        | Date of issue/Date of revision | : 14 December 2024 |
|------------------------|--------------------------------|--------------------|
| PPG VIKOTE 56 (TINTED) |                                |                    |

### **SECTION 6: Accidental release measures**

| Large spill                     | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach the release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations. Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilt product. |
|---------------------------------|--|
| 6.4 Reference to other sections | : See Section 1 for emergency contact information.<br>See Section 8 for information on appropriate personal protective equipment.<br>See Section 13 for additional waste treatment information.  |

### **SECTION 7: Handling and storage**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

### 7.1 Precautions for safe handling

| Protective measures  | : Put on appropriate personal protective equipment (see Section 8). Avoid exposure -<br>obtain special instructions before use. Avoid contact during pregnancy or while nursing.<br>Do not handle until all safety precautions have been read and understood. Do not get in<br>eyes or on skin or clothing. Do not ingest. Avoid breathing vapour or mist. Avoid<br>release to the environment. Use only with adequate ventilation. Wear appropriate<br>respirator when ventilation is inadequate. Do not enter storage areas and confined<br>spaces unless adequately ventilated. Keep in the original container or an approved<br>alternative made from a compatible material, kept tightly closed when not in use. Store<br>and use away from heat, sparks, open flame or any other ignition source. Use<br>explosion-proof electrical (ventilating, lighting and material handling) equipment. Use<br>only non-sparking tools. Take precautionary measures against electrostatic discharges.<br>Empty containers retain product residue and can be hazardous. Do not reuse container. |
|--|---|
| Advice on general<br>occupational hygiene                              | : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.   |
| 7.2 Conditions for safe<br>storage, including any<br>incompatibilities | : Store between the following temperatures: 0 to 35°C (32 to 95°F). Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Eliminate all ignition sources. Separate from oxidising materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.  |

### 7.3 Specific end use(s)

See Section 1.2 for Identified uses.

### **SECTION 8: Exposure controls/personal protection**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

### 8.1 Control parameters

### **Occupational exposure limits**

| Product/ingredient                     | name   | E   | xposure limit values  |  |

|---|---|
| Hygiene measures                              | : Wash hands, forearms and face thoroughly after handling chemical products, before<br>eating, smoking and using the lavatory and at the end of the working period.<br>Appropriate techniques should be used to remove potentially contaminated clothing.<br>Wash contaminated clothing before reusing. Ensure that eyewash stations and safety<br>showers are close to the workstation location.   |
| Eye/face protection<br><u>Skin protection</u> | : Chemical splash goggles.  |
| Hand protection                               | : Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated. When prolonged or frequently repeated contact may occur, a glove with a protection class of 6 (breakthrough time greater than 480 minutes according to EN 374) is recommended. When only brief contact is expected, a glove with a protection class of 2 or higher (breakthrough time greater than 30 minutes according to EN 374) is recommended. The user must check that the final choice of type of glove selected for handling this product is the most appropriate and takes into account the particular conditions of use, as included in the user's risk assessment. |
| Gloves  | : For prolonged or repeated handling, use the following type of gloves:<br>May be used: nitrile rubber  |
|   | Recommended: polyvinyl alcohol (PVA), Viton®  |
| Body protection                               | : Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. When there is a risk of ignition from static electricity, wear antistatic protective clothing. For the greatest protection from static discharges, clothing should include anti-static overalls, boots and gloves. Refer to European Standard EN 1149 for further information on material and design requirements and test methods.   |
| Other skin protection                         | Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.   |
| <b>Respiratory protection</b>                 |   |
| Environmental exposure controls               | : Emissions from ventilation or work process equipment should be checked to ensure<br>they comply with the requirements of environmental protection legislation. In some<br>cases, fume scrubbers, filters or engineering modifications to the process equipment<br>will be necessary to reduce emissions to acceptable levels.   |

### **SECTION 9: Physical and chemical properties**

The conditions of measurement of all properties are at standard temperature and pressure unless otherwise indicated.

### 9.1 Information on basic physical and chemical properties

| <u>Appearance</u>                            |  |

| <b>Conclusion/Summary</b>      | : Not available.   |
| General                        | : Prolonged or repeated contact can defat the skin and lead to irritation, cracking and/or dermatitis. |
| Carcinogenicity                | : May cause cancer. Risk of cancer depends on duration and level of exposure.                          |
| Mutagenicity                   | : No known significant effects or critical hazards.  |
| Reproductive toxicity          | : May cause harm to breast-fed children.   |
| Other information              | : Not available.   |

Prolonged or repeated contact may dry skin and cause irritation. Repeated exposure to high vapor concentrations may cause irritation of the respiratory system and permanent brain and nervous system damage. Inhalation of vapour/aerosol concentrations above the recommended exposure limits causes headaches, drowsiness and nausea and may lead to unconsciousness or death. Avoid contact with skin and clothing.

#### 11.2 Information on other hazards

#### **11.2.1 Endocrine disrupting properties**

#### Not available.

#### **11.2.2 Other information**

Not available.

### **SECTION 12: Ecological information**

#### 12.1 Toxicity

| Product/ingredient name                   | Result                          | Species                         | Exposure             |
|---|---------------------------------|---------------------------------|----------------------|
| ₩ydrocarbons, C9, aromatics > 0.1% cumene | EC50 3.2 mg/l<br>LC50 9.2 mg/l  | Daphnia<br>Fish                 | 48 hours<br>96 hours |
| ethylbenzene                              | Acute EC50 1.8 mg/l Fresh water | Daphnia                         | 48 hours             |

### 12.6 Endocrine disrupting properties

Not available.

### 12.7 Other adverse effects

No known significant effects or critical hazards.

### **SECTION 13: Disposal considerations**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### 13.1 Waste treatment methods

| Product             |   |
|---------------------|---|
| Methods of disposal | : The generation of waste should be avoided or minimised wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. |
| Hazardous waste     | : Yes.  |

European waste catalogue (EWC)

| Waste code | Waste designation   |
|------------|---|
| 08 01 11*  | waste paint and varnish containing organic solvents or other hazardous substances |
| Packaging  | ·   |

Methods of disposal

: The generation of waste should be avoided or minimised wherever possible. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible.

| Type of packaging | European waste catalogue (EWC) |                 |

### **SECTION 13: Disposal considerations**

| Special precautions | : This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapour from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. |
|---------------------|---|
|                     |   |

### **SECTION 14: Transport information**

|                                    | ADR/RID         | IMDG  | IATA   |
|------------------------------------|-----------------|---|--|
