# **SAFETY DATA SHEET**

Date of issue 16 January 2025

Version 6.01

## Section 1. Product and company identification

| Product name                  |
|-------------------------------|
| Product code                  |
| Other means of identification |
| Product type                  |

: SIGMADUR 550 AZUL RAL 5011

: 5500121L.20

**1** : Not available.

: Liquid.

#### Relevant identified uses of the substance or mixture and uses advised against

#### **Identified uses**

Coating. Paints. Painting-related materials.

| Uses advised against | Reason |
|----------------------|--------|
| Not applicable.      |        |

| Supplier's details:        |  |
|----------------------------|--|
| Supplier                   | <ul> <li>PPG Industrial do Brasil – Tintas e Vernizes Ltda</li> <li>Via Anhanguera KM 106, Bairro Sao Judas Tadeu</li> <li>Sumare / SP, Brasil</li> <li>55 19 2103-6000 (Recepção e Portaria)</li> </ul> |

| Storage   | :   | Store in a well-ventilated place. K   |  |   |                                |
| Disposal  | :   | Dispose of contents and containe and international regulations.   | r in accordance with all lo  | ocal, regional, r   | national                       |
| Other hazards which do not result in classification | :   | Prolonged or repeated contact ma  | ay dry skin and cause irrit  | ation.  |                                |

## Section 3. Composition/information on ingredients

#### Substance/mixture Other means of identification

**CAS number** 

: Mixture

: Not available.

#### **CAS number/other identifiers**

: Not applicable.

| Ingredient name                                 | %          | CAS number |
|---|------------|------------|
| xylene  | 20 - <30   | 1330-20-7  |
| barium sulfate                                  | 20 - <30   | 7727-43-7  |
| n-butyl acetate                                 | 5 - <7     | 123-86-4   |
| ethylbenzene                                    | 3 - <5     | 100-41-4   |
| 2-methoxy-1-methylethyl acetate                 | 1 - <2     | 108-65-6   |
| Silica, vitreous                                | 1 - <2     | 60676-86-0 |
| calcium carbonate                               | 1 - <2     | 471-34-1   |
| titanium dioxide                                | 1 - <2     | 13463-67-7 |
| bis(1,2,2,6,6-pentamethyl-4-piperidyl) sebacate | 0.2 - <0.5 | 41556-26-7 |
| toluene   | 0.1 - <0.2 | 108-88-3   |

Date of issue

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

SUB codes represent substances without registered CAS Numbers.

## Section 4. First aid measures

| <b>Description of necessary firs</b>      | <u>t a</u> | <u>id measures</u>  |
|---|------------|---|
| Eye contact                               | :          | Remove contact lenses, irrigate copiously with clean, fresh water, holding the eyelids apart for at least 10 minutes and seek immediate medical advice.   |
| Inhalation                                | :          | Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel.  |
| Skin contact                              | 1          | Remove contaminated clothing and shoes. Wash skin thoroughly with soap and water or use recognized skin cleanser. Do NOT use solvents or thinners.  |
| Ingestion                                 | :          | If swallowed, seek medical advice immediately and show this container or label.<br>Keep person warm and at rest. Do NOT induce vomiting.  |
| Indication of immediate medi              | ica        | l attention and special treatment needed, if necessary  |
| Notes to physician<br>Specific treatments |            | In case of inhalation of decomposition products in a fire, symptoms may be delayed.<br>The exposed person may need to be kept under medical surveillance for 48 hours.<br>No specific treatment.  |
| Protection of first-aiders                | :          | No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. |
| Potential acute health effects            |            |   |
| Eye contact                               | :          | Causes serious eye irritation.  |
| Inhalation                                | 1          | Harmful if inhaled. May cause respiratory irritation.   |

English (US)

| Code        | 5500121L. | 20                         | Date of issue | 16 January 2025 | Version | 6.01 |

| Product nam | e         | SIGMADUR 550 AZUL RAL 5011 |               |                 |         |      |

## Section 4. First aid measures

- Skin contact Ingestion
- May be harmful in contact with skin. Causes skin irritation. Defatting to the skin.
  No known significant effects or critical hazards.

#### See toxicological information (Section 11)

## Section 5. Fire-fighting measures

| Extinguishing media                            |   |
|--|---|
| Suitable extinguishing media                   | : Use dry chemical, CO <sub>2</sub> , water spray (fog) or foam.  |
| Unsuitable extinguishing media                 | : Do not use water jet.   |
| Specific hazards arising from the chemical     | : Flammable liquid and vapor. Runoff to sewer may create fire or explosion hazard.<br>In a fire or if heated, a pressure increase will occur and the container may burst,<br>with the risk of a subsequent explosion. This material is harmful to aquatic life with<br>long lasting effects. Fire water contaminated with this material must be contained<br>and prevented from being discharged to any waterway, sewer or drain. |
| Hazardous thermal decomposition products       | : Decomposition products may include the following materials:<br>carbon oxides<br>nitrogen oxides<br>sulfur oxides<br>metal oxide/oxides  |
| Special protective actions for fire-fighters   | : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.  |
| Special protective equipment for fire-fighters | <ul> <li>Fire-fighters should wear appropriate protective equipment and self-contained<br/>breathing apparatus (SCBA) with a full face-piece operated in positive pressure<br/>mode.</li> </ul>   |

# Section 6. Accidental release measures

| Personal precautions, protec   | ive equipment and emergency procedures  |
|--------------------------------|---|
| For non-emergency<br>personnel | : No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilled material. Shut off all ignition sources.<br>No flares, smoking or flames in hazard area. Avoid breathing vapor or mist.<br>Provide adequate ventilation. Wear appropriate respirator when ventilation is<br>inadequate. Put on appropriate personal protective equipment. |
| For emergency responders       | : If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".   |
| Environmental precautions      | Avoid dispersal of spilled material and runoff and contact with soil, waterways,<br>drains and sewers. Inform the relevant authorities if the product has caused<br>environmental pollution (sewers, waterways, soil or air). Water polluting material.<br>May be harmful to the environment if released in large quantities.   |

#### Methods and materials for containment and cleaning up

Large spill
 Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

## Section 7. Handling and storage

| Precautions for safe : handling                                      | Put on appropriate personal protective equipment (see Section 8). Avoid exposure -<br>obtain special instructions before use. Avoid exposure during pregnancy. Do not<br>handle until all safety precautions have been read and understood. Do not get in<br>eyes or on skin or clothing. Do not ingest. Avoid breathing vapor or mist. Avoid<br>release to the environment. Use only with adequate ventilation. Wear appropriate<br>respirator when ventilation is inadequate. Do not enter storage areas and confined<br>spaces unless adequately ventilated. Keep in the original container or an approved<br>alternative made from a compatible material, kept tightly closed when not in use.<br>Store and use away from heat, sparks, open flame or any other ignition source.<br>Use explosion-proof electrical (ventilating, lighting and material handling)<br>equipment. Use only non-sparking tools. Take precautionary measures against<br>electrostatic discharges. Empty containers retain product residue and can be<br>hazardous. Do not reuse container. |
|--|---|
| Conditions for safe storage, :<br>including any<br>incompatibilities | Do not store above the following temperature: 50°C (122°F). Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Eliminate all ignition sources. Separate from oxidizing materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.   |

## Section 8. Exposure controls/personal protection

<u>Control parameters</u> <u>Occupational exposure limits</u>

# Section 8. Exposure controls/personal protection

| Ingredient name                          | Exposure limits  |                      |  |  |
|--|--|----------------------|--|--|
| ₩ylene                                   | Ministry of Labor and Employment (Br<br>11/2001) [Xylenes (o-, m-, p- isomers)]<br>TWA 8 hours: 78 ppm.<br>TWA 8 hours: 340 mg/m <sup>3</sup> .  | TWA 8 hours: 78 ppm. |  |  |
| barium sulfate                           | <b>ACGIH TLV (United States, 7/2023)</b><br>TWA 8 hours: 5 mg/m <sup>3</sup> . Form: Inhalable<br>fraction.  |                      |  |  |
| n-butyl acetate                          | ACGIH TLV (United States, 7/2023) [Bu<br>acetates]<br>STEL 15 minutes: 150 ppm.  | tyl                  |  |  |

| calcium carbonate                        | TWA 8 hours: 78 ppm.<br>TWA 8 hours: 340 mg/m <sup>3</sup> .<br><b>ACGIH TLV (United States)</b><br>TWA: 10 mg/m <sup>3</sup> . Form: Total dust.  |                      |  |  |
| titanium dioxide                         | TWA: 3 mg/m <sup>3</sup> . Form: Respirable.<br><b>ACGIH TLV (United States, 7/2023)</b><br>TWA 8 hours: 2.5 mg/m <sup>3</sup> . Form: respiral<br>fraction, finescale particles.  | ole                  |  |  |
| toluene                                  | Ministry of Labor and Employment (Br<br>11/2001) Absorbed through skin.<br>TWA 8 hours: 78 ppm.<br>TWA 8 hours: 290 mg/m <sup>3</sup> .  | azi                  |  |  |
| Recommended monitoring procedures        | Reference should be made to appropriate monitoring standards. Reference to ational guidance documents for methods for the determination of hazardous substances will also be required.   |                      |  |  |
| Appropriate engineering controls         | Jse only with adequate ventilation. Use process enclosures, local exhaust<br>rentilation or other engineering controls to keep worker exposure to airborne<br>contaminants below any recommended or statutory limits. The engineering cont<br>ilso need to keep gas, vapor or dust concentrations below any lower explosive<br>mits. Use explosion-proof ventilation equipment.          | trols                |  |  |
| Environmental exposure controls          | <ul> <li>Emissions from ventilation or work process equipment should be checked to ensur<br/>they comply with the requirements of environmental protection legislation. In some<br/>cases, fume scrubbers, filters or engineering modifications to the process<br/>equipment will be necessary to reduce emissions to acceptable levels.</li> </ul>                                      |                      |  |  |
| ndividual protection measur              |  |                      |  |  |
| Hygiene measures                         | Vash hands, forearms and face thoroughly after handling chemical products,<br>before eating, smoking and using the lavatory and at the end of the working peri<br>appropriate techniques should be used to remove potentially contaminated cloth<br>Vash contaminated clothing before reusing. Ensure that eyewash stations and<br>bafety showers are close to the workstation location. |                      |  |  |
| Eye protection<br><u>Skin protection</u> | Chemical splash goggles.   |                      |  |  |

# Section 8. Exposure controls/personal protection

| • • • • • • • • • • • • • • • • • • • | •   |
|---------------------------------------|---|
| Hand protection                       | : Chemical-resistant, impervious gloves complying with an approved standard should<br>be worn at all times when handling chemical products if a risk assessment indicates<br>this is necessary. Considering the parameters specified by the glove manufacturer,<br>check during use that the gloves are still retaining their protective properties. It<br>should be noted that the time to breakthrough for any glove material may be<br>different for different glove manufacturers. In the case of mixtures, consisting of<br>several substances, the protection time of the gloves cannot be accurately<br>estimated. |
| Body protection Other skin protection | <ul> <li>Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. When there is a risk of ignition from static electricity, wear anti-static protective clothing. For the greatest protection from static discharges, clothing should include anti-static overalls, boots and gloves.</li> <li>Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be</li> </ul>                   |
|                                       | approved by a specialist before handling this product.  |
| Respiratory protection                | : Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator. If workers are exposed to concentrations above the exposure limit, they must use appropriate, certified respirators. Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary.  |

#### Delayed and immediate effects and also chronic effects from short and long term exposure

| Conclusion/Summary                              | : There are no data available on the mixture itself. For many products, TiO2 is utilized as a raw material in a liquid coating formulation. In this case, the TiO2 particles are bound in a matrix with no meaningful potential for human exposure to unbound particles of TiO2 when the product is applied with a brush or roller. Sanding the coating surface or mist from spray applications may be harmful depending on the duration and level of exposure and require the use of appropriate personal protective equipment and/or engineering controls (see Section 8). Carbon black is utilized as a raw material in many liquid coating formulations. In this case, the carbon black particles are bound in a matrix with no meaningful potential for human exposure to unbound particles of carbon black when the product is applied with a brush or roller. Sanding the coating surface or mist from spray applications may be harmful depending on the duration and level of exposure and require the use of appropriate personal protective equipment and/or engineering controls (see Section 8). Most carbon blacks contain trace quantities of polyaromatic hydrocarbons (PAH). PAHs are not expected to be released in biological fluids and are therefore not likely available for biological activity. Exposure to component solvent vapor concentrations in excess of the stated occupational exposure limit may result in adverse health effects such as mucous membrane and respiratory system irritation and adverse effects on the kidneys, liver and central nervous system. Symptoms and signs include headache, dizziness, fatigue, muscular weakness, drowsiness and, in extreme cases, loss of consciousness. Solvents may cause some of the above effects by absorption through the skin. There is some evidence that repeated exposure to organic solvent vapors in combination with constant loud noise can cause greater hearing loss than expected from exposure to noise alone. If splashed in the eyes, the liquid may cause irritation and reversible damage. Ingestion may cause nausea, d |

#### Potential chronic health effects

Not available.

| General               | : Prolonged or repeated contact can defat the skin and lead to irritation, cracking and/<br>or dermatitis. |
|-----------------------|--|
| Carcinogenicity       | : Suspected of causing cancer. Risk of cancer depends on duration and level of exposure.                   |
| Mutagenicity          | : No known significant effects or critical hazards.  |
| Reproductive toxicity | : Suspected of damaging fertility or the unborn child.   |

#### Numerical measures of toxicity

#### Mobility in soil

Soil/water partition coefficient (Koc)

: Not available.

Other adverse effects

: No known significant effects or critical hazards.

## Section 13. Disposal considerations

: The generation of waste should be avoided or minimized wherever possible. **Disposal methods** Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and nonrecyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapor from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.
