# **SAFETY DATA SHEET**

Date of issue 7/10/2020 (month/day/year)

Version 10

## Section 1. Chemical product and company identification

| Α. | Product name<br>Product code     |      | SIGMADUR 550 BASE BS 08E51-69<br>00371090  |
|----|----------------------------------|------|--|
| в. | Relevant identified uses         | of t | he substance or mixture and uses advised against   |
|    | Product use                      | 1    | Professional applications, Used by spraying.   |
|    | Use of the substance/<br>mixture | -    | Coating.   |
|    | Uses advised against             | :    | Product is not intended, labelled or packaged for consumer use.  |
| C. | Supplier's information           | :    | PPG SSC<br>(680-090)<br>19, Yeocheon-ro 217beon-gil, Nam-gu,<br>Ulsan, Korea<br>Tel: +82-52-210-8222<br>Korea.MSDS@PPG.COM |
|    | Emergency telephone<br>number:   | :    | +82-52-210-8222  |

## Section 2. Hazards identification

| A. Hazard classification | : FLAMMABLE LIQUIDS - Category 3                                      |
|--------------------------|---|
|                          | SKIN CORROSION/IRRITATION - Category 2                                |
|                          | SERIOUS EYE DAMAGE/ EYE IRRITATION - Category 2                       |
|                          | SKIN SENSITIZATION - Category 1                                       |
|                          | CARCINOGENICITY - Category 2  |
|                          | SPECIFIC TARGET ORGAN TOXICITY (SINGLE EXPOSURE) (Narcotic effects) - |
|                          | Category 3  |
|                          | SPECIFIC TARGET ORGAN TOXICITY (REPEATED EXPOSURE) - Category 1       |

This product is classified in accordance with the Industrial Safety and Health Act and the Chemical Control Act.

#### B. GHS label elements, including precautionary statements

Symbol

Signal word

: Danger

Date of issue 7/10/2020 (month/day/year)

Product name SIGMADUR 550 BASE BS 08E51-69

## Section 2. Hazards identification

| Hazard statements                                     | <ul> <li>H226 - Flammable liquid and vapor.</li> <li>H315 - Causes skin irritation.</li> <li>H317 - May cause an allergic skin reaction.</li> <li>H319 - Causes serious eye irritation.</li> <li>H336 - May cause drowsiness or dizziness.</li> <li>H351 - Suspected of causing cancer.</li> <li>H372 - Causes damage to organs through prolonged or repeated exposure. (central nervous system (CNS), kidneys, liver)</li> </ul>   |
|---|---|
| Precautionary statements                              | i de la constante de la constan   |
| Prevention  | <ul> <li>P201 - Obtain special instructions before use.</li> <li>P280 - Wear protective gloves. Wear protective clothing. Wear eye or face protection.</li> <li>P210 - Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.</li> <li>P241 - Use explosion-proof electrical, ventilating or lighting equipment.</li> <li>P242 - Use non-sparking tools.</li> <li>P243 - Take action to prevent static discharges.</li> <li>P260 - Do not breathe vapor.</li> <li>P270 - Do not eat, drink or smoke when using this product.</li> <li>P264 - Wash thoroughly after handling.</li> </ul>                                     |
| Response  | <ul> <li>P312 - Call a POISON CENTER or doctor if you feel unwell.</li> <li>P308 + P313 - IF exposed or concerned: Get medical advice or attention.</li> <li>P362 + P364 - Take off contaminated clothing and wash it before reuse.</li> <li>P302 + P352 - IF ON SKIN: Wash with plenty of water.</li> <li>P333 + P313 - If skin irritation or rash occurs: Get medical advice or attention.</li> <li>P305 + P351 + P338 - IF IN EYES: Rinse cautiously with water for several minutes.</li> <li>Remove contact lenses, if present and easy to do. Continue rinsing.</li> <li>P337 + P313 - If eye irritation persists: Get medical advice or attention.</li> </ul> |
| Storage   | : P403 + P233 - Store in a well-ventilated place. Keep container tightly closed.<br>P403 + P235 - Keep cool.  |
| Disposal  | : P501 - Dispose of contents and container in accordance with all local, regional, national and international regulations.  |
| . Other hazards which do not result in classification | : Prolonged or repeated contact may dry skin and cause irritation.  |

## Section 3. Composition/information on ingredients

#### CAS number/other identifiers

#### CAS number

#### : Not applicable.

| Chemical name                          | Common name                       | Identifiers     | %          |
|--|-----------------------------------|-----------------|------------|
| <b>X</b> ylene                         | XYLENES                           | CAS: 1330-20-7  | 20 - <30   |
| titanium dioxide                       | TITANIUM DIOXIDE                  | CAS: 13463-67-7 | 5 - <10    |
| n-butyl acetate                        | N-BUTYL ACETATE                   | CAS: 123-86-4   | 5 - <10    |
| ethylbenzene                           | ETHYLBENZENE                      | CAS: 100-41-4   | 1 - <5     |

|---------|------|----------|

### Section 3. Composition/information on ingredients

sebacate

SEBACATE

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section. Non displayed substances are regarded as Business Confidential information.

Occupational exposure limits, if available, are listed in Section 8.

SUB codes represent substances without registered CAS Numbers.

### Section 4. First aid measures

| Α. | Eye contact                | : | Remove contact lenses, irrigate copiously with clean, fresh water, holding the eyelids apart for at least 10 minutes and seek immediate medical advice.   |
|----|----------------------------|---|---|
| В. | Skin contact               | : | Remove contaminated clothing and shoes. Wash skin thoroughly with soap and water or use recognized skin cleanser. Do NOT use solvents or thinners.  |
| C. | Inhalation                 | : | Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel.  |
| D. | Ingestion                  | : | If swallowed, seek medical advice immediately and show this container or label.<br>Keep person warm and at rest. Do NOT induce vomiting.  |
| Е. | Notes to physician         | : | In case of inhalation of decomposition products in a fire, symptoms may be delayed.<br>The exposed person may need to be kept under medical surveillance for 48 hours.  |
|    | Specific treatments        | 1 | No specific treatment.  |
|    | Protection of first-aiders | : | No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. |

See toxicological information (Section 11)

### Section 5. Fire-fighting measures

| Α. | Extinguishing media                        |   |   |
|----|--|---|---|
|    | Suitable extinguishing media               | 1 | Use dry chemical, CO <sub>2</sub> , water spray (fog) or foam.  |
|    | Unsuitable<br>extinguishing media          | : | Do not use water jet.   |
| В. | Specific hazards arising from the chemical | : | Ammable liquid and vapor. Runoff to sewer may create fire or explosion hazard. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion. |
|    | Hazardous thermal decomposition products   | : | Decomposition products may include the following materials:<br>carbon oxides<br>nitrogen oxides<br>sulfur oxides<br>metal oxide/oxides  |

### Section 5. Fire-fighting measures

| С. | Special equipment for    | 1 | Fire-fighters should wear appropriate protective equipment and self-contained  |
|----|--------------------------|---|--|
|    | fire-fighting            |   | breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.  |
|    | Fire-fighting procedures | : | Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool. |

## Section 6. Accidental release measures

| A. Personal precautions,<br>protective equipment and<br>emergency procedures | : No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilled material. Shut off all ignition sources.<br>No flares, smoking or flames in hazard area. Avoid breathing vapor or mist. Provide<br>adequate ventilation. Wear appropriate respirator when ventilation is inadequate.<br>Put on appropriate personal protective equipment.  |
|--|--|
| B. Environmental precautions   | : Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).  |
| C. Methods and materials for   | containment and cleaning up  |
| Small spill  | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.   |
| Large spill  | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal. |

## Section 7. Handling and storage

| А. | Precautions for safe<br>handling | : Put on appropriate personal protective equipment (see Section 8). Eating, drinking<br>and smoking should be prohibited in areas where this material is handled, stored and<br>processed. Workers should wash hands and face before eating, drinking and<br>smoking. Remove contaminated clothing and protective equipment before entering<br>eating areas. Persons with a history of skin sensitization problems should not be<br>employed in any process in which this product is used. Do not get in eyes or on skin<br>or clothing. Do not ingest. Avoid breathing vapor or mist. Use only with adequate<br>ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter<br>storage areas and confined spaces unless adequately ventilated. Keep in the<br>original container or an approved alternative made from a compatible material, kept<br>tightly closed when not in use. Store and use away from heat, sparks, open flame or<br>any other ignition source. Use explosion-proof electrical (ventilating, lighting and<br>material handling) equipment. Use non-sparking tools. Take precautionary<br>measures against electrostatic discharges. To avoid fire or explosion, dissipate static<br>electricity during transfer by grounding and bonding containers and equipment before |

Product name SIGMADUR 550 BASE BS 08E51-69

### Section 7. Handling and storage

transferring material. Empty containers retain product residue and can be hazardous. Do not reuse container.

B. Conditions for safe storage, including any incompatibilities
 Store between the following temperatures: 0 to 35°C (32 to 95°F). Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Eliminate all ignition sources. Separate from oxidizing materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.

### Section 8. Exposure controls/personal protection

#### A. Occupational exposure limits

| Ingredient name   | Exposure limits   |
|---|---|
| <b>X</b> ylene  | Ministry of Employment and Labor  |
|   | (Republic of Korea, 7/2018).  |
|   | STEL: 150 ppm 15 minutes.   |
|   | TWA: 100 ppm 8 hours.   |
| titanium dioxide  | Ministry of Employment and Labor  |
|   | (Republic of Korea, 7/2018).  |
|   | TWA: 10 mg/m <sup>3</sup> 8 hours. Form: total dust   |
|   | with less than 1% of free SiO2  |
| n-butyl acetate   | Ministry of Employment and Labor  |
|   | (Republic of Korea, 7/2018).  |
|   | STEL: 200 ppm 15 minutes.   |
|   | TWA: 150 ppm 8 hours.   |
| ethylbenzene  | Ministry of Employment and Labor  |
|   | (Republic of Korea, 7/2018).  |
|   | STEL: 125 ppm 15 minutes.   |
|   | TWA: 100 ppm 8 hours.   |
| iron hydroxide oxide yellow   | Ministry of Employment and Labor  |
|   | (Republic of Korea, 7/2018).  |
|   | _TWA: 5 mg/m³, (as Fe) 8 hours. Form:   |
|   | Fume  |
|   | TWA: 5 mg/m³, (as Fe) 8 hours.  |
| monitoring procedures atmosphere or long the ventilation protective equip standards. Reference of the ventilation protective equip standards. | ontains ingredients with exposure limits, personal, workplace<br>biological monitoring may be required to determine the effectiveness<br>of or other control measures and/or the necessity to use respiratory<br>ment. Reference should be made to appropriate monitoring<br>erence to national guidance documents for methods for the<br>f hazardous substances will also be required. |
| controls or other enginee   | dequate ventilation. Use process enclosures, local exhaust ventilation<br>ering controls to keep worker exposure to airborne contaminants<br>mmended or statutory limits. The engineering controls also need to   |

explosion-proof ventilation equipment.

keep gas, vapor or dust concentrations below any lower explosive limits. Use

## Section 8. Exposure controls/personal protection

|    | Environmental exposure controls | :  | Emissions from ventilation or work process equipment should be checked to ensure<br>they comply with the requirements of environmental protection legislation. In some<br>cases, fume scrubbers, filters or engineering modifications to the process equipment<br>will be necessary to reduce emissions to acceptable levels.  |
|----|---------------------------------|----|--|
| С. | Personal protective equip       | me | nt   |
|    | Respiratory protection          | :  | Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator. If workers are exposed to concentrations above the exposure limit, they must use appropriate, certified respirators. Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary.   |
|    | Eye protection                  | 1  | Chemical splash goggles.   |
|    | Hand protection                 | :  | Chemical-resistant, impervious gloves complying with an approved standard should<br>be worn at all times when handling chemical products if a risk assessment indicates<br>this is necessary. Considering the parameters specified by the glove manufacturer,<br>check during use that the gloves are still retaining their protective properties. It<br>should be noted that the time to breakthrough for any glove material may be different<br>for different glove manufacturers. In the case of mixtures, consisting of several<br>substances, the protection time of the gloves cannot be accurately estimated. |
|    | Gloves                          | 1  | butyl rubber   |
|    | Body protection                 | :  | Personal protective equipment for the body should be selected based on the task<br>being performed and the risks involved and should be approved by a specialist<br>before handling this product. When there is a risk of ignition from static electricity,<br>wear anti-static protective clothing. For the greatest protection from static discharges,<br>clothing should include anti-static overalls, boots and gloves.  |
|    | Hygiene measures                | :  | Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Contaminated work clothing should not be allowed out of the workplace. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.   |

## Section 9. Physical and chemical properties

| K. | Vapor pressure                             | 1 | Not available.                                    |
|----|--|---|---|
| Ε. | Solubility                                 | : | Insoluble in the following materials: cold water. |
|    | Solubility in water                        | : | Not available.                                    |
| Μ. | Vapor density                              | : | Not available.                                    |
| Ν. | Relative density                           | : | 1.33  |
| 0. | Partition coefficient: n-<br>octanol/water | : | Not available.                                    |
| Ρ. | Auto-ignition<br>temperature               | : | Not available.                                    |
| Q. | Decomposition<br>temperature               | : | Not available.                                    |
| R. | Viscosity                                  | : | Kinematic (40°C (104°F)): >0.21 cm²/s (>21 cSt)   |
| S. | Molecular weight                           | : | Not applicable.                                   |

## Section 10. Stability and reactivity

| _  |                                     |   |   |
|----|-------------------------------------|---|---|
| Α. | Chemical stability                  | : | The product is stable.  |
|    | Possibility of hazardous reactions  | : | Under normal conditions of storage and use, hazardous reactions will not occur.   |
| В. | Conditions to avoid                 | : | When exposed to high temperatures may produce hazardous decomposition products.   |
| C. | Incompatible materials              | : | Keep away from the following materials to prevent strong exothermic reactions: oxidizing agents, strong alkalis, strong acids.                      |
| D. | Hazardous<br>decomposition products | : | Depending on conditions, decomposition products may include the following materials: carbon oxides nitrogen oxides sulfur oxides metal oxide/oxides |

## Section 11. Toxicological information

A. Information on the likely : Not available. routes of exposure

#### Potential acute health effects

| Inhalation                | : Can cause central nervous system (CNS) depression. May cause drowsiness or dizziness.   |
|---------------------------|---|
| Ingestion                 | : Can cause central nervous system (CNS) depression.  |
| Skin contact              | : 🖉 auses skin irritation. Defatting to the skin. May cause an allergic skin reaction.  |
| Eye contact               | : Causes serious eye irritation.  |
| <u>Over-exposure sign</u> | <u>s/symptoms</u>   |
| Inhalation                | : Adverse symptoms may include the following:<br>nausea or vomiting<br>headache<br>drowsiness/fatigue<br>dizziness/vertigo<br>unconsciousness |
| Ingestion                 | : No specific data.   |
|                           |   |

Version 10

Product name SIGMADUR 550 BASE BS 08E51-69

## Section 11. Toxicological information

| Skin contact | : Adverse symptoms may include the following:<br>irritation<br>redness<br>dryness<br>cracking |
|--------------|---|
| Eye contact  | : Adverse symptoms may include the following:<br>pain or irritation<br>watering<br>redness    |

#### B. Health hazards

### Section 11. Toxicological information

**Conclusion/Summary** : There are no data available on the mixture itself.

#### **Reproductive toxicity**

**Conclusion/Summary** : There are no data available on the mixture itself.

#### **Teratogenicity**

**Conclusion/Summary** : There are no data available on the mixture itself.

#### Specific target organ toxicity (single exposure)

| Name   | Classification                         | Route of exposure | Target organs   |
|--|--|-------------------|---|
| <mark>X</mark> ylene<br>n-butyl acetate<br>barium zinc sulfate sulfide | Category 3<br>Category 3<br>Category 3 | -                 | Narcotic effects<br>Narcotic effects<br>Respiratory tract<br>irritation |

#### Specific target organ toxicity (repeated exposure)

| Name   | Classification | Route of exposure | Target organs                                      |
|--------|----------------|-------------------|--|
| Xylene | Category 1     |                   | central nervous<br>system (CNS),<br>kidneys, liver |

#### **Aspiration hazard**

| Name         | Result                         |
|--------------|--------------------------------|
| ethylbenzene | ASPIRATION HAZARD - Category 1 |

#### Potential chronic health effects

| General               | : Causes damage to organs through prolonged or repeated exposure. Prolonged or repeated contact can defat the skin and lead to irritation, cracking and/or dermatitis. Once sensitized, a severe allergic reaction may occur when subsequently exposed to very low levels. |
|-----------------------|--|
| Carcinogenicity       | : Suspected of causing cancer. Risk of cancer depends on duration and level of exposure.   |
| Mutagenicity          | : No known significant effects or critical hazards.  |
| Teratogenicity        | : No known significant effects or critical hazards.  |
| Developmental effects | : No known significant effects or critical hazards.  |
| Fertility effects     | : No known significant effects or critical hazards.  |

#### **Additional information**

Prolonged or repeated contact may dry skin and cause irritation. Sanding and grinding dusts may be harmful if inhaled. Repeated exposure to high vapor concentrations may cause irritation of the respiratory system and permanent brain and nervous system damage. Inhalation of vapor/aerosol concentrations above the recommended exposure limits causes headaches, drowsiness and nausea and may lead to unconsciousness or death. Avoid contact with skin and clothing.

#### D. Mobility in soil

Soil/water partition : Not available. coefficient (K<sub>oc</sub>)

E. <u>Other adverse effects</u> : No known significant effects or critical hazards.

### Section 13. Disposal considerations

 A. Disposal methods
 The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible.

B. Disposal precautions
 This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapor from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

### Section 14. Transport information

## F. Special precaution which a user to be aware of or needs to comply with in connection with transport or transportation

**Transport within user's premises:** always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

#### Transport in bulk according : Not applicable.

to IMO instruments
