# SAFETY DATA SHEET

**AMERCOAT 385 BASE WHITE** 

Date of issue 29 June 2021

Version 24

# 1. Product and company identification

| Product name | : AMERCOAT 385 BASE WHITE |
|--------------|---------------------------|
| Product code | : 00313206                |
| Product type | : Liquid.                 |

| Relevant identified uses of the substance or mixture and uses advised against |  |  |
|---|--|--|
| Product use   | : Professional applications, Used by spraying.   |  |
| Use of the substance/<br>mixture  | : Coating.   |  |
| Uses advised against  | : Not applicable.  |  |
| Supplier's details  | : PPG PMC Japan Co., Ltd.<br>8F, Shintetsu Bldg., 1-1, Daikaidori 1-chome, Kobe 652-0803<br>Tel : +81 78 574 2777<br>Fax : +81 78 576 0035 |  |
| Emergency telephone<br>number   | : 078 574 2777   |  |

# 2. Hazards identification

| GHS Classification | <ul> <li>► AMMABLE LIQUIDS - Category 3<br/>SKIN IRRITATION - Category 2<br/>EYE IRRITATION - Category 2A<br/>SKIN SENSITIZATION - Category 1<br/>CARCINOGENICITY - Category 1A<br/>SPECIFIC TARGET ORGAN TOXICITY (SINGLE EXPOSURE) - Category 1<br/>SPECIFIC TARGET ORGAN TOXICITY (REPEATED EXPOSURE) - Category 1<br/>AQUATIC HAZARD (ACUTE) - Category 2<br/>AQUATIC HAZARD (LONG-TERM) - Category 2</li> </ul> |
|--------------------|--|
| GHS label elements |  |
| Hazard pictograms  |  |
| Signal word        | : Danger   |
| Hazard statements  | <ul> <li>Flammable liquid and vapor.<br/>Causes skin irritation.<br/>May cause an allergic skin reaction.<br/>Causes serious eye irritation.<br/>May cause cancer.<br/>Causes damage to organs. (respiratory system)<br/>Causes damage to organs through prolonged or repeated exposure. (respiratory system)<br/>Toxic to aquatic life with long lasting effects.</li> </ul>  |

# 2. Hazards identification

| Precautionary statements                            |   |   |
|---|---|---|
| Prevention  | : | Øbtain special instructions before use. Do not handle until all safety precautions have been read and understood. Wear protective gloves, protective clothing and eye or face protection. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Avoid release to the environment. Do not breathe vapor. Do not eat, drink or smoke when using this product. Wash thoroughly after handling. Contaminated work clothing should not be allowed out of the workplace. |
| Response  | : | Collect spillage. IF exposed or concerned: Call a POISON CENTER or doctor. IF<br>ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with<br>water. IF ON SKIN: Wash with plenty of water. If skin irritation or rash occurs: Get<br>medical advice or attention. IF IN EYES: Rinse cautiously with water for several<br>minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye<br>irritation persists: Get medical advice or attention.             |
| Storage   | : | Store locked up.  |
| Disposal  | : | Dispose of contents and container in accordance with all local, regional, national and international regulations.   |
| Other hazards which do not result in classification | : | Frolonged or repeated contact may dry skin and cause irritation.  |

### 3. Composition/information on ingredients

### Substance/mixture

: Mixture

#### **CAS number/other identifiers**

| CAS number  | : Not applicable. |
|-------------|-------------------|
| CSCL number | : Not available.  |

| Ingredient name                                   | %          | CAS number | CSCL                     |
|---|------------|------------|--------------------------|
| s-[4-(2,3-epoxipropoxi)phenyl]propane             | 25 - <50   | 1675-54-3  | 4-209; 7-1279;<br>7-1283 |
| Talc (containing no asbestos or quartz)           | 15 - <20   | 14807-96-6 | Not available.           |
| titanium dioxide (excluding nanoparticle)         | 12.5 - <15 | 13463-67-7 | 1-558; 5-5225            |
| Methyl n-pentyl ketone                            | 5 - <7     | 110-43-0   | 2-542                    |
| Solvent naphtha (petroleum), light aromatic       | 3 - <5     | 64742-95-6 | Not available.           |
| 1,2,4-Trimethylbenzene                            | 2 - <3     | 95-63-6    | 3-3427; 3-7              |
| Solvent naphtha (petroleum), heavy arom           | 1 - <2     | 64742-94-5 | Not available.           |
| Octadecanamide, N,N'-1,6-hexanediylbis            | 1 - <2     | 55349-01-4 | 2-3055                   |
| [12-hydroxy-                                      |            |            |                          |
| Naphthalene                                       | 0.2 - <0.5 | 91-20-3    | 4-311                    |
| Xylene  | 0.1 - <0.2 | 1330-20-7  | 3-3; 3-60                |
| Silica silicon dioxide containing crystalline and | 0.1 - <0.2 | 7631-86-9  | 1-548                    |
| amorphous   |            |            |                          |

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

SUB codes represent substances without registered CAS Numbers.

Version 24

4. First aid measures

| Description of necess | sary first aid measures  |
|-----------------------|--|
| Eye contact           | <ul> <li>Remove contact lenses, irrigate copiously with clean, fresh water, holding the<br/>eyelids apart for at least 10 minutes and seek immediate medical advice.</li> </ul>                  |
| Inhalation            | : Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. |
| Skin contact          | <ul> <li>Remove contaminated clothing and shoes. Wash skin thoroughly with soap and<br/>water or use recognized skin cleanser. Do NOT use solvents or thinners.</li> </ul>                       |
| Ingestion             | : If swallowed, seek medical advice immediately and show this container or label.<br>Keep person warm and at rest. Do NOT induce vomiting.   |

| Most important symptoms/e       | ts, acute and delayed  |    |
|---------------------------------|--|----|
| Potential acute health effe     |  |    |
| Eye contact                     | Causes serious eye irritation.   |    |
| Inhalation                      | No known significant effects or critical hazards.  |    |
| Skin contact                    | Causes damage to organs following a single exposure in contact with skin. Cause skin irritation. Defatting to the skin. May cause an allergic skin reaction.   | es |
| Ingestion                       | Causes damage to organs following a single exposure if swallowed.  |    |
| <u>Over-exposure signs/symp</u> | <u>IS</u>  |    |
| Eye contact                     | Adverse symptoms may include the following:<br>pain or irritation<br>watering<br>redness   |    |
| Inhalation                      | No specific data.  |    |
| Skin contact                    | Adverse symptoms may include the following:<br>irritation<br>redness<br>dryness<br>cracking  |    |
| Ingestion                       | No specific data.  |    |
|                                 |  |    |
|                                 | attention and special treatment needed, if necessary   |    |
| Notes to physician              | In case of inhalation of decomposition products in a fire, symptoms may be delayed.<br>The exposed person may need to be kept under medical surveillance for 48 hours  |    |
| Specific treatments             | No specific treatment.   |    |
| Protection of first-aiders      | No action shall be taken involving any personal risk or without suitable training. If<br>is suspected that fumes are still present, the rescuer should wear an appropriate<br>mask or self-contained breathing apparatus. It may be dangerous to the person<br>providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing<br>thoroughly with water before removing it, or wear gloves. | it |

See toxicological information (Section 11)

| 5. Fire-fighting m             | easures  |
|--------------------------------|--|
| Extinguishing media            |  |
| Suitable extinguishing media   | : Use dry chemical, CO <sub>2</sub> , water spray (fog) or foam. |
| Unsuitable extinguishing media | : Do not use water jet.  |

| 85 BASE WHITE   |
|---|
|   |
| asures  |
| : Flammable liquid and vapor. Runoff to sewer may create fire or explosion hazard. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion. This material is toxic to aquatic life with long lasting effects. Fire water contaminated with this material must be contained and prevented from being discharged to any waterway, sewer or drain. |
| : Decomposition products may include the following materials:<br>carbon oxides<br>nitrogen oxides<br>metal oxide/oxides   |
| : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.  |
| : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.   |
|   |

# 6. Accidental release measures

### Personal precautions, protective equipment and emergency procedures

| For non-emergency<br>personnel | : No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilled material. Shut off all ignition sources.<br>No flares, smoking or flames in hazard area. Avoid breathing vapor or mist. Provide<br>adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put<br>on appropriate personal protective equipment. |
|--------------------------------|---|
| For emergency responders       | : If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".   |
| Environmental precautions      | : Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains<br>and sewers. Inform the relevant authorities if the product has caused environmental<br>pollution (sewers, waterways, soil or air). Water polluting material. May be harmful to<br>the environment if released in large quantities. Collect spillage.   |

| Methods and materia | Is for containment and cleaning up   |
|---------------------|--|
| Small spill         | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.   |
| Large spill         | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal. |

### 7. Handling and storage

| Precautions for safe :<br>handling | Fut on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Avoid exposure - obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Do not get in eyes or on skin or clothing. Do not breathe vapor or mist. Do not ingest. Avoid release to the environment. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Take precautionary measures against electrostatic discharges. Empty containers retain product residue and can be hazardous. Do not reuse container. |
|------------------------------------|--|
| Conditions for safe storage :      | Store between the following temperatures: 0 to 35°C (32 to 95°F). Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Eliminate all ignition sources. Separate from oxidizing materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.  |

### 8. Exposure controls/personal protection

### **Control parameters**

#### **Occupational exposure limits**

| Ingredient name                           | Exposure limits  |  |  |  |
|---|--|--|--|--|
| ✓alc (containing no asbestos or quartz)   | Japan Society for Occupational Health<br>(Japan, 5/2020).<br>OEL-M: 0.5 mg/m <sup>3</sup> 8 hours. Form:<br>Respirable dust (Class 1 Dust)<br>OEL-M: 2 mg/m <sup>3</sup> 8 hours. Form: Total dust<br>(Class 1 Dust) |  |  |  |
| titanium dioxide (excluding nanoparticle) | Japan Society for Occupational Health<br>(Japan, 5/2020).<br>OEL-M: 1 mg/m <sup>3</sup> 8 hours. Form: Respirable<br>dust (Class 2 Dust)<br>OEL-M: 4 mg/m <sup>3</sup> 8 hours. Form: Total dust<br>(Class 2 Dust)   |  |  |  |
| 1,2,4-Trimethylbenzene                    | Japan Society for Occupational Health<br>(Japan, 5/2020).<br>OEL-M: 120 mg/m <sup>3</sup> 8 hours.<br>OEL-M: 25 ppm 8 hours.   |  |  |  |
| Naphthalene                               | <b>ISHL (Japan, 6/2020).</b><br>TWA: 10 ppm 8 hours.   |  |  |  |
| Xylene                                    | ISHL (Japan, 6/2020).<br>TWA: 50 ppm 8 hours.<br>Japan Society for Occupational Health<br>(Japan, 5/2020).<br>OEL-M: 50 ppm 8 hours.<br>OEL-M: 217 mg/m <sup>3</sup> 8 hours.  |  |  |  |

### 8 Exposure controls/personal protection

| Recommended monitoring procedures | : If this product contains ingredients with exposure limits, personal, workplace<br>atmosphere or biological monitoring may be required to determine the effectiveness<br>of the ventilation or other control measures and/or the necessity to use respiratory<br>protective equipment. Reference should be made to appropriate monitoring<br>standards. Reference to national guidance documents for methods for the<br>determination of hazardous substances will also be required.   |
|-----------------------------------|---|
| Appropriate engineering controls  | : Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapor or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.   |
| Environmental exposure controls   | : Emissions from ventilation or work process equipment should be checked to ensure<br>they comply with the requirements of environmental protection legislation. In some<br>cases, fume scrubbers, filters or engineering modifications to the process equipment<br>will be necessary to reduce emissions to acceptable levels.   |
| Individual protection measu       | ires  |
| Hygiene measures                  | : Wash hands, forearms and face thoroughly after handling chemical products, before<br>eating, smoking and using the lavatory and at the end of the working period.<br>Appropriate techniques should be used to remove potentially contaminated clothing.<br>Contaminated work clothing should not be allowed out of the workplace. Wash<br>contaminated clothing before reusing. Ensure that eyewash stations and safety<br>showers are close to the workstation location.   |
| Eye protection                    | : Chemical splash goggles.  |
| Skin protection                   |   |
| Hand protection                   | : Chemical-resistant, impervious gloves complying with an approved standard should<br>be worn at all times when handling chemical products if a risk assessment indicates<br>this is necessary. Considering the parameters specified by the glove manufacturer,<br>check during use that the gloves are still retaining their protective properties. It<br>should be noted that the time to breakthrough for any glove material may be<br>different for different glove manufacturers. In the case of mixtures, consisting of<br>several substances, the protection time of the gloves cannot be accurately<br>estimated. |
| Gloves                            | : butyl rubber  |
| Body protection                   | : Personal protective equipment for the body should be selected based on the task<br>being performed and the risks involved and should be approved by a specialist<br>before handling this product. When there is a risk of ignition from static electricity,<br>wear anti-static protective clothing. For the greatest protection from static<br>discharges, clothing should include anti-static overalls, boots and gloves.   |
| Other skin protection             | Appropriate footwear and any additional skin protection measures should be<br>selected based on the task being performed and the risks involved and should be<br>approved by a specialist before handling this product.   |
| Respiratory protection            | : Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator. If workers are exposed to concentrations above the exposure limit, they must use appropriate, certified respirators. Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary.  |

### 9. Physical and chemical properties

| Appearance       |   |
|------------------|---|
| Physical state   | : Liquid.   |
| Color            | : Gray.   |
| Odor             | : Aromatic.   |
| Boiling point    | : >37.78°C (>100°F)                                 |
| Flash point      | : Closed cup: 42°C (107.6°F)                        |
| Relative density | : 1.49  |
| Solubility       | : Insoluble in the following materials: cold water. |
| Viscosity        | : Not Applicable                                    |

# 10. Stability and reactivity

| -                                  | -   |
|------------------------------------|---|
| Reactivity                         | : No specific test data related to reactivity available for this product or its ingredients.  |
| Chemical stability                 | : The product is stable.  |
| Possibility of hazardous reactions | : Under normal conditions of storage and use, hazardous reactions will not occur.   |
| Conditions to avoid                | : When exposed to high temperatures may produce hazardous decomposition products.   |
| Incompatible materials             | : Keep away from the following materials to prevent strong exothermic reactions: oxidizing agents, strong alkalis, strong acids.        |
| Hazardous decomposition products   | : Depending on conditions, decomposition products may include the following materials: carbon oxides nitrogen oxides metal oxide/oxides |

# 11. Toxicological information

### Information on toxicological effects

| <u>Acute toxicity</u>                       |                                 |         |                         |            |

### **Information on the likely** : Not available.

routes of exposure

effects

| Eye contact              | : Causes serious eye irritation.  |
|--------------------------|---|
| Inhalation               | : No known significant effects or critical hazards.   |
| Skin contact             | : Causes damage to organs following a single exposure in contact with skin. Causes skin irritation. Defatting to the skin. May cause an allergic skin reaction. |
| Ingestion                | : Causes damage to organs following a single exposure if swallowed.   |
| Symptoms related to the  | physical, chemical and toxicological characteristics  |
| Eye contact              | : Adverse symptoms may include the following:   |
|                          | pain or irritation<br>watering  |
|                          | redness   |
| Inhalation               | : No specific data.   |
| Skin contact             | : Adverse symptoms may include the following:   |
|                          | irritation  |
|                          | redness<br>dryness  |
|                          | cracking  |
| Ingestion                | : No specific data.   |
| )elaved and immediate ef | fects and also chronic effects from short and long term exposure  |
| Short term exposure      |   |
| Potential immediate      | Not available.  |
| Fotential inimediate     |   |

### **11.** Toxicological information

| Potential delayed effects<br>Long term exposure | :   | Not available.   |
|---|-----|--|
| Potential immediate<br>effects                  | :   | Not available.   |
| Potential delayed effects                       | :   | Not available.   |
| Potential chronic health eff                    | ect | <u>s</u>   |
| General   | :   | Causes damage to organs through prolonged or repeated exposure. Prolonged or repeated contact can defat the skin and lead to irritation, cracking and/or dermatitis. Once sensitized, a severe allergic reaction may occur when subsequently exposed to very low levels. |
| Carcinogenicity                                 | :   | May cause cancer. Risk of cancer depends on duration and level of exposure.  |
| Mutagenicity                                    | :   | No known significant effects or critical hazards.  |
| Reproductive toxicity                           | :   | No known significant effects or critical hazards.  |

#### Other information

Prolonged or repeated contact may dry skin and cause irritation. Repeated exposure to high vapor concentrations may cause irritation of the respiratory system and permanent brain and nervous system damage. Inhalation of vapor/aerosol concentrations above the recommended exposure limits causes headaches, drowsiness and nausea and may lead to unconsciousness or death. Avoid contact with skin and clothing.

### 13. Disposal considerations

**Disposal methods** : The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and nonrecyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapor from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

# 14. Transport information

|                                | UN   | IMDG   | ΙΑΤΑ   |
|--------------------------------|--|--|--|
| UN number                      | UN1263   | UN1263   | UN1263   |

| Packing group                  |  |  | III  |
| Environmental<br>hazards       | Yes. The environmentally hazardous substance mark is not required. | Yes.   | Yes. The environmentally<br>hazardous substance mark is<br>not required. |
| Marine pollutant<br>substances | Not applicable.  | (bis-[4-(2,3-epoxipropoxi)<br>phenyl]propane, Solvent<br>naphtha (petroleum), light<br>aromatic) | Not applicable.  |

### Additional information

| UN   | : None identified.   |
|------|--|
| IMDG | : The marine pollutant mark is not required when transported in sizes of $\leq$ 5 L or $\leq$ 5 kg.        |
| ΙΑΤΑ | : The environmentally hazardous substance mark may appear if required by other transportation regulations. |

# **Special precautions for user** : **Transport within user's premises:** always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

# Transport in bulk according : Not applicable. to IMO instruments

### Poisonous and Deleterious Substances None of the components are listed.

Chemical Substances Control Law (CSCL)

### Product name AMERCOAT 385 BASE WHITE

### **15. Regulatory information**

| Ingredient name   | %        | Status              | Reference<br>number |
|---|----------|---------------------|---------------------|
| ♥olycondensate of 4,4'-isopropylidenediphenol and<br>1-chloro-2,3-epoxypropane (liquid only); bisphenol A type<br>epoxy resin | 32.25    | Priority assessment | 87                  |
| 1,2,4-Trimethylbenzene  | 2.074    | Priority assessment | 49                  |
| 1,3,5-Trimethylbenzene  | 0.34     | Priority assessment | 201                 |
| Naphthalene   | 0.20412  | Priority assessment | 76                  |
| Xylene  | 0.136    | Priority assessment | 125                 |
| Cumene  | 0.068    | Priority assessment | 126                 |
| Ethylbenzene  | 0.034    | Priority assessment | 50                  |
| Toluene   | 0.0068   | Priority assessment | 46                  |
| Benzene   | 0.00612  | Priority assessment | 45                  |
| Methyl isobutyl ketone  | 0.001845 | Priority assessment | 116                 |

High Pressure Gas Control : Not available. Law

### **Explosives Control Law**

None of the components are listed.

#### Law Concerning Prevention : Not available. of Pollution of the Ocean and Maritime Disaster

#### **Maritime Safety Law**

#### Notification Regulating Transportation of Dangerous Materials by Sea

None of the components are listed.

#### **Container class**

None of the components are listed.
