# **SAFETY DATA SHEET**

Date of issue/Date of revision

: 7 November 2021 Version : 4

# SECTION 1: Identification of the substance/mixture and of the company/ undertaking

| 1.1 Product identifier  |   |
|---|---|
| Product name  | : SIGMASHIELD 1200 LT HARDENER YELLOW                             |
| Product code  | : 00241643  |
| Product type  | : Liquid.   |
| Other means of identification   | on  |
| Not available.  |   |
| 1.2 Relevant identified uses  | of the substance or mixture and uses advised against              |
| Product use   | : Professional applications, Used by spraying.                    |
| Use of the substance/<br>mixture  | : Coating.  |
| Uses advised against  | : Product is not intended, labelled or packaged for consumer use. |
| 1.3 Details of the supplier of  | the safety data sheet   |
| Sigma Paint Saudi Arabia Ltd<br>PO Box 7509<br>Dammam 31472<br>Saudi Arabia<br>Tel: 00966 138 47 31 00<br>Fax: 00966 138 47 17 34 |   |
| e-mail address of person  | : ndpic@sfda.gov.sa   |

1.4 Emergency telephone : 00966 138473100 extn 1001 number

# **SECTION 2: Hazards identification**

### 2.1 Classification of the substance or mixture

Product definition : Mixture <u>Classification according to Regulation (EC) No. 1272/2008 [CLP/GHS]</u>

Acute Tox. 4, H302 Acute Tox. 3, H311 Acute Tox. 3, H331 Skin Corr. 1A, H314 Eye Dam. 1, H318 Skin Sens. 1, H317 Aquatic Chronic 2, H411

responsible for this SDS

The product is classified as hazardous according to Regulation (EC) 1272/2008 as amended.

See Section 16 for the full text of the H statements declared above.

See Section 11 for more detailed information on health effects and symptoms.

### 2.2 Label elements

| Code : 00241643   | Date of issue/Date of revision : 7 November 2021   |
|---|--|
| SIGMASHIELD 1200 LT HARD  | ENER YELLOW  |
| SECTION 2: Hazards  | identification   |
| Hazard pictograms   |  |
| Signal word   | : Danger   |
| Hazard statements   | <ul> <li>Harmful if swallowed.</li> <li>Toxic in contact with skin or if inhaled.</li> <li>Causes severe skin burns and eye damage.</li> <li>May cause an allergic skin reaction.</li> <li>Toxic to aquatic life with long lasting effects.</li> </ul> |
| Precautionary statements  |  |
| Prevention  | : Wear protective gloves, protective clothing and eye or face protection. Avoid release to the environment.  |
| Response  | : Collect spillage. IF INHALED: Immediately call a POISON CENTER or doctor. IF SWALLOWED: Immediately call a POISON CENTER or doctor. IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water.                     |
| Storage   | : Not applicable.  |
| Disposal  | : Not applicable.  |
| Hazardous ingredients   | <ul> <li>2,2'-dimethyl-4,4'-methylenebis(cyclohexylamine)</li> <li>N-(3-(trimethoxysilyl)propyl)ethylenediamine</li> <li>2,4,6-tris(dimethylaminomethyl)phenol</li> <li>3-aminopropyldimethylamine</li> </ul>  |
| Supplemental label elements   | : Not applicable.  |
| Annex XVII - Restrictions<br>on the manufacture,<br>placing on the market and<br>use of certain dangerous<br>substances, mixtures and<br>articles | : Not applicable.  |
| Special packaging requirem  | <u>ents</u>  |
| Containers to be fitted<br>with child-resistant<br>fastenings   | : Not applicable.  |
| Tactile warning of danger   | : Not applicable.  |
| 2.3 Other hazards   |  |
| Product meets the criteria<br>for PBT or vPvB   | : This mixture does not contain any substances that are assessed to be a PBT or a vPvI   |
| Other hazards which do not result in classification   | : None known.  |

3.2 Mixtures

: Mixture

Date of issue/Date of revision

### : 7 November 2021

SIGMASHIELD 1200 LT HARDENER YELLOW

### See Section 16 for the full text of the H statements declared above.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment, are PBTs, vPvBs or Substances of equivalent concern, or have been assigned a workplace exposure limit and hence require reporting in this section.

<u>Type</u>

[1] Substance classified with a health or environmental hazard

[2] Substance with a workplace exposure limit

[3] Substance meets the criteria for PBT according to Regulation (EC) No. 1907/2006, Annex XIII

[4] Substance meets the criteria for vPvB according to Regulation (EC) No. 1907/2006, Annex XIII

[5] Substance of equivalent concern

[6] Additional disclosure due to company policy

Occupational exposure limits, if available, are listed in Section 8.

### SUB codes represent substances without registered CAS Numbers.

# SECTION 4: First aid measures

# 4.1 Description of first aid measures Eye contact : Check for and remove any contact lenses. Immediately flush eyes with running water for at least 15 minutes, keeping eyelids open. Seek immediate medical attention. Inhalation : Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. Skin contact : Remove contaminated clothing and shoes. Wash skin thoroughly with soap and water or use recognised skin cleanser. Do NOT use solvents or thinners. English (GB) United Arab Emirates 3/14

| Conforms to Regulation (EC                   | ) No. 1907/2006 (REACH), Annex II   |
|--|---|
| Code : 00241643                              | Date of issue/Date of revision : 7 November 2021  |
| SIGMASHIELD 1200 LT HAR                      | DENER YELLOW  |
| SECTION 4: First aid                         | l measures  |
| Ingestion                                    | : If swallowed, seek medical advice immediately and show the container or label. Keep person warm and at rest. Do NOT induce vomiting.  |
| Protection of first-aiders                   | : No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. |
|  | ns and effects, both acute and delayed  |
| Potential acute health effect<br>Eye contact | : Causes serious eye damage.  |
| Inhalation                                   | : Toxic if inhaled.   |
| Skin contact                                 | : Causes severe burns. Toxic in contact with skin. May cause an allergic skin reaction.   |
| Ingestion                                    | : Harmful if swallowed.   |
| Over-exposure signs/symp                     |   |
| Eye contact                                  | : Adverse symptoms may include the following:<br>pain<br>watering<br>redness  |
| Inhalation                                   | : No specific data.   |
| Skin contact                                 | : Adverse symptoms may include the following:<br>pain or irritation<br>redness<br>blistering may occur  |
| Ingestion                                    | : Adverse symptoms may include the following:<br>stomach pains  |
| 4.3 Indication of any immed                  | iate medical attention and special treatment needed   |
| Notes to physician                           | : In case of inhalation of decomposition products in a fire, symptoms may be delayed.<br>The exposed person may need to be kept under medical surveillance for 48 hours.  |
| Specific treatments                          | : No specific treatment.  |
| <b>SECTION 5: Firefigh</b>                   | ting measures   |
| 5.1 Extinguishing media                      |   |
| Suitable extinguishing                       | : Use an extinguishing agent suitable for the surrounding fire.   |

| media                          |               |
|--------------------------------|---------------|
| Unsuitable extinguishing media | : None known. |

# 5.2 Special hazards arising from the substance or mixture

| Hazards from the substance or mixture | : In a fire or if heated, a pressure increase will occur and the container may burst. This material is toxic to aquatic life with long lasting effects. Fire water contaminated with this material must be contained and prevented from being discharged to any waterway, sewer or drain. |
|---------------------------------------|---|
| Hazardous combustion products         | : Decomposition products may include the following materials:<br>carbon oxides<br>nitrogen oxides<br>metal oxide/oxides<br>Formaldehyde.  |

# 5.3 Advice for firefighters

# **SECTION 6: Accidental release measures**

| 6.1 Personal precautions, pr   | otective equipment and emergency procedures   |
|--------------------------------|---|
| For non-emergency<br>personnel | : No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilt material. Do not breathe vapour or mist.<br>Provide adequate ventilation. Wear appropriate respirator when ventilation is<br>inadequate. Put on appropriate personal protective equipment.  |
| For emergency responders       | <ul> <li>If specialised clothing is required to deal with the spillage, take note of any information<br/>in Section 8 on suitable and unsuitable materials. See also the information in "For non-<br/>emergency personnel".</li> </ul>  |
| 6.2 Environmental precautions  | : Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). Water polluting material. May be harmful to the environment if released in large quantities. Collect spillage.  |
| 6.3 Methods and material fo    | r containment and cleaning up   |
| Small spill                    | : Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.   |
| Large spill                    | : Stop leak if without risk. Move containers from spill area. Approach the release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations. Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spill product. |
| 6.4 Reference to other         | : See Section 1 for emergency contact information.  |

# **SECTION 7: Handling and storage**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

See Section 13 for additional waste treatment information.

# 7.1 Precautions for safe handling

sections

Protective measures : Fut on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Do not get in eyes or on skin or clothing. Do not breathe vapour or mist. Do not ingest. Avoid release to the environment. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container.

See Section 8 for information on appropriate personal protective equipment.

| Conforms to Regulation (E  | C) No. 1907/2006 (REACH   | ), Annex II   |  |

| Industrial sector specific | : Not available. |
| solutions                  |                  |

# **SECTION 8: Exposure controls/personal protection**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

# 8.1 Control parameters

### **Occupational exposure limits**

| Product/ingredient name                |   | Exposure limit values                   |  |
|--|---|---|--|
| penzyl alcohol                         |   | IPEL (-).<br>TWA: 5 ppm<br>STEL: 10 ppm |  |
| Recommended monitoring :<br>procedures | If this product contains ingredients with exposure limits, personal, workplace<br>atmosphere or biological monitoring may be required to determine the effectiveness of<br>the ventilation or other control measures and/or the necessity to use respiratory<br>protective equipment. Reference should be made to monitoring standards, such as the<br>following: European Standard EN 689 (Workplace atmospheres - Guidance for the<br>assessment of exposure by inhalation to chemical agents for comparison with limit<br>values and measurement strategy) European Standard EN 14042 (Workplace<br>atmospheres - Guide for the application and use of procedures for the assessment of<br>exposure to chemical and biological agents) European Standard EN 482 (Workplace<br>atmospheres - General requirements for the performance of procedures for the<br>measurement of chemical agents) Reference to national guidance documents for<br>methods for the determination of hazardous substances will also be required. |   |  |
| 8.2 Exposure controls                  |   |   |  |
| Appropriate engineering :<br>controls  | : Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits.   |   |  |
| Individual protection measures         | 2   |   |  |

| SECTION 8: Exposu               | re | controls/personal protection  |
|---------------------------------|----|---|
| Hygiene measures                |    | Wash hands, forearms and face thoroughly after handling chemical products, before   |
|                                 |    | eating, smoking and using the lavatory and at the end of the working period.<br>Appropriate techniques should be used to remove potentially contaminated clothing.<br>Contaminated work clothing should not be allowed out of the workplace. Wash<br>contaminated clothing before reusing. Ensure that eyewash stations and safety<br>showers are close to the workstation location.  |
| Eye/face protection             | :  | Chemical splash goggles and face shield.  |
| Skin protection                 |    |   |
| Hand protection                 | :  | Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated. When prolonged or frequently repeated contact may occur, a glove with a protection class of 6 (breakthrough time greater than 480 minutes according to EN 374) is recommended. When only brief contact is expected, a glove with a protection class of 2 or higher (breakthrough time greater than 30 minutes according to EN 374) is recommended. The user must check that the final choice of type of glove selected for handling this product is the most appropriate and takes into account the particular conditions of use, as included in the user's risk assessment. |
| Gloves                          | 1  | nitrile neoprene  |
| Body protection                 | :  | Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.   |
| Other skin protection           |    | Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.   |
| Respiratory protection          | :  | Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator. If workers are exposed to concentrations above the exposure limit, they must use appropriate, certified respirators. Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary.  |
| Environmental exposure controls | :  | Emissions from ventilation or work process equipment should be checked to ensure<br>they comply with the requirements of environmental protection legislation. In some<br>cases, fume scrubbers, filters or engineering modifications to the process equipment<br>will be necessary to reduce emissions to acceptable levels.   |

# **SECTION 9: Physical and chemical properties**

The conditions of measurement of all properties are at standard temperature and pressure unless otherwise indicated.

# 9.1 Information on basic physical and chemical properties

| Physical state       : Liquid.         Colour       : Yellow.         Odour       : Amine-like.         Odour threshold       : Not available.         pH       : insoluble in water.         Melting point/freezing point       : May start to solidify at the following temperature: -7.1°C (19.2°F) This is based of data for the following ingredient: 2,2'-dimethyl-4,4'-methylenebis(cyclohexylamin Weighted average: -8.54°C (16.6°F)         Initial boiling point and boiling range       : >37.78°C         Flash point       : Closed cup: 107°C |                             | English (GB)                         | United Arab Emirates               | 7/14 |

|   | apor concentrations may cause irritation of the respiratory system and permanent brain and             |

Repeated exposure to high vapor concentrations may cause irritation of the respiratory system and permanent brain and nervous system damage. Inhalation of vapour/aerosol concentrations above the recommended exposure limits causes headaches, drowsiness and nausea and may lead to unconsciousness or death. Trimethoxysilanes are capable of forming methanol if hydrolyzed or ingested. If swallowed, methanol may be harmful or fatal or cause blindness. Contains a substance that may emit formaldehyde if stored beyond its shelf life and/or during cure at curing temperatures greater than 60C/140F.

# **12.3 Bioaccumulative potential**

| Product/ingredient name                          | LogPow | BCF | Potential |
|--|--------|-----|-----------|
| 2.2'-dimethyl-4,4'-methylenebis(cyclohexylamine) | 1.8    | -   | low       |
| benzyl alcohol                                   | 0.87   | -   | low       |
| 2,4,6-tris(dimethylaminomethyl)phenol            | 0.219  | -   | low       |
| 3-aminopropyldimethylamine                       | -0.352 | -   | low       |

| 12.4 Mobility in soil                  |                  |
|--|------------------|
| Soil/water partition coefficient (Koc) | : Not available. |
| Mobility                               | : Not available. |

### 12.5 Results of PBT and vPvB assessment

This mixture does not contain any substances that are assessed to be a PBT or a vPvB.

**12.6 Other adverse effects** : No known significant effects or critical hazards.

# **SECTION 13: Disposal considerations**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

# 13.1 Waste treatment methods

| Product             |   |  |
|---------------------|---|--|
| Methods of disposal | of this product, solutions and a<br>requirements of environmental<br>regional local authority requiren<br>via a licensed waste disposal o | d be avoided or minimised wherever possible. Disposal<br>ny by-products should at all times comply with the<br>protection and waste disposal legislation and any<br>nents. Dispose of surplus and non-recyclable products<br>ontractor. Waste should not be disposed of untreated to<br>it with the requirements of all authorities with jurisdiction. |
| Hazardous waste     | Yes.  |  |

**Hazardous waste** 

| <b>European</b> | waste | catalog | que | (EWC) |
|-----------------|-------|---------|-----|-------|
|                 |       |         |     |       |

| Waste code | Waste designation   |
