## **SAFETY DATA SHEET**

Date of issue/Date of revision

: 19 November 2021 Version : 2.01

## SECTION 1: Identification of the substance/mixture and of the company/ undertaking

| U U                           |  |
|-------------------------------|--|
| 1.1 Product identifier        |  |
| Product name                  | : SIGMAFAST 205 LT HARDENER                          |
| Product code                  | : 000001072993                                       |
| Product type                  | : Liquid.  |
| Other means of identification | on   |
| 00314462; 00317934; 00320     | 425; 00347847  |
|                               |  |
| 1.2 Relevant identified uses  | of the substance or mixture and uses advised against |
| Product use                   | : Professional applications, Used by spraying.       |
| Use of the substance/         | : Coating.   |

#### **Uses advised against** : Product is not intended, labelled or packaged for consumer use.

#### 1.3 Details of the supplier of the safety data sheet

mixture

| Sigma Paint Saudi Arabia Ltd.<br>PO Box 7509<br>Dammam 31472<br>Saudi Arabia<br>Tel: 00966 138 47 31 00<br>Fax: 00966 138 47 17 34 |                             |
|--|-----------------------------|
| e-mail address of person responsible for this SDS  | : ndpic@sfda.gov.sa         |
| 1.4 Emergency telephone<br>number  | : 00966 138473100 extn 1001 |

## **SECTION 2: Hazards identification**

#### 2.1 Classification of the substance or mixture

Product definition : Mixture Classification according to Regulation (EC) No. 1272/2008 [CLP/GHS]

Flam. Liq. 3, H226 Skin Corr. 1C, H314 Eye Dam. 1, H318 Skin Sens. 1, H317 STOT SE 3, H335 Aquatic Chronic 2, H411

The product is classified as hazardous according to Regulation (EC) 1272/2008 as amended.

See Section 16 for the full text of the H statements declared above.

See Section 11 for more detailed information on health effects and symptoms.

#### 2.2 Label elements

| Code : 000001072993   | No. 1907/2006 (REACH), Annex II<br>Date of issue/Date of revision : 19 November 2021  |
|---|---|
| SIGMAFAST 205 LT HARDEN   |   |
| SECTION 2: Hazards  | identification  |
| Hazard pictograms   |   |
| Signal word   | : Danger  |
| Hazard statements   | <ul> <li>Flammable liquid and vapour.</li> <li>Causes severe skin burns and eye damage.</li> <li>May cause an allergic skin reaction.</li> <li>May cause respiratory irritation.</li> <li>Toxic to aquatic life with long lasting effects.</li> </ul> |
| Precautionary statements  |   |
| Prevention  | : Wear protective gloves, protective clothing and eye or face protection. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Avoid release to the environment.  |
| Response  | : Collect spillage. IF INHALED: Immediately call a POISON CENTER or doctor.   |
| Storage   | : Store in a well-ventilated place. Keep container tightly closed.  |
| Disposal  | : Not applicable.   |
| Hazardous ingredients   | <ul> <li>xylene</li> <li>Fatty acids, C18-unsatd., dimers, oligomeric reaction products with tall-oil fatty acids<br/>and triethylenetetramine</li> <li>2,4,6-tris(dimethylaminomethyl)phenol</li> <li>3,6-diazaoctanethylenediamin</li> </ul>        |
| Supplemental label elements   | : Not applicable.   |
| Annex XVII - Restrictions<br>on the manufacture,<br>placing on the market and<br>use of certain dangerous<br>substances, mixtures and<br>articles | : Not applicable.   |
| Special packaging requirem  | nents   |
| Containers to be fitted<br>with child-resistant<br>fastenings   | : Not applicable.   |
| Tactile warning of danger   | : Not applicable.   |
| 2.3 Other hazards   |   |
| Product meets the criteria<br>for PBT or vPvB   | : This mixture does not contain any substances that are assessed to be a PBT or a vPvB.   |
| Other hazards which do not result in classification   | : Causes digestive tract burns. Prolonged or repeated contact may dry skin and cause irritation.  |
| <b>SECTION 3: Compos</b>  | sition/information on ingredients   |
| 3.2 Mixtures  | : Mixture   |

: Mixture

Code : 000001072993 SIGMAFAST 205 LT HARDENER Date of issue/Date of revision

: 19 November 2021

### **SECTION 3: Composition/information on ingredients**

| Product/ingredient name  | Identifiers   | % by weight | <u>Classification</u><br>Regulation (EC) No.<br>1272/2008 [CLP]   | Туре    |

#### See Section 16 for the full text of the H statements declared above.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment, are PBTs, vPvBs or Substances of equivalent concern, or have been assigned a workplace exposure limit and hence require reporting in this section.

<u>Type</u>

[1] Substance classified with a health or environmental hazard

[2] Substance with a workplace exposure limit

[3] Substance meets the criteria for PBT according to Regulation (EC) No. 1907/2006, Annex XIII

[4] Substance meets the criteria for vPvB according to Regulation (EC) No. 1907/2006, Annex XIII

[5] Substance of equivalent concern

[6] Additional disclosure due to company policy

Occupational exposure limits, if available, are listed in Section 8.

#### SUB codes represent substances without registered CAS Numbers.

## **SECTION 4: First aid measures**

| 4.1 Description of first aid n | neasures  |
|--------------------------------|---|
| Eye contact                    | : Check for and remove any contact lenses. Immediately flush eyes with running water for at least 15 minutes, keeping eyelids open. Seek immediate medical attention.   |
| Inhalation                     | : Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is<br>irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained<br>personnel.  |
| Skin contact                   | <ul> <li>Remove contaminated clothing and shoes. Wash skin thoroughly with soap and water<br/>or use recognised skin cleanser. Do NOT use solvents or thinners.</li> </ul>  |
| Ingestion                      | <ul> <li>If swallowed, seek medical advice immediately and show the container or label. Keep person warm and at rest. Do NOT induce vomiting.</li> </ul>  |
| Protection of first-aiders     | : No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. |

#### 4.2 Most important symptoms and effects, both acute and delayed

|                              | ts   |
|------------------------------|--|
| Eye contact                  | : Causes serious eye damage.   |
| Inhalation                   | : May cause respiratory irritation.  |
| Skin contact                 | : Causes severe burns. Defatting to the skin. May cause an allergic skin reaction.   |
| Ingestion                    | : Corrosive to the digestive tract. Causes burns.  |
| Over-exposure signs/symp     | <u>ioms</u>  |
| Eye contact                  | : Adverse symptoms may include the following:<br>pain<br>watering<br>redness   |
| Inhalation                   | : Adverse symptoms may include the following:<br>respiratory tract irritation<br>coughing  |
| Skin contact                 | : Adverse symptoms may include the following:<br>pain or irritation<br>redness<br>dryness<br>cracking<br>blistering may occur  |
| Ingestion                    | : Adverse symptoms may include the following: stomach pains  |
| 4.3 Indication of any immedi | ate medical attention and special treatment needed   |
| Notes to physician           | : In case of inhalation of decomposition products in a fire, symptoms may be delayed.<br>The exposed person may need to be kept under medical surveillance for 48 hours. |
| Specific treatments          | : No specific treatment.   |

## SECTION 5: Firefighting measures

| 5.1 Extinguishing media        |  |
|--------------------------------|--|
| Suitable extinguishing media   | : Use dry chemical, CO <sub>2</sub> , water spray (fog) or foam. |
| Unsuitable extinguishing media | : Do not use water jet.  |

#### 5.2 Special hazards arising from the substance or mixture

| English (GB) | United Arab Emirates |
|--------------|----------------------|
|--------------|----------------------|

| Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II |  |  |
|---|--|--|
| Code : 000001072993   | Date of issue/Date of revision : 19 November 2021  |  |
| SIGMAFAST 205 LT HARDEN                                     | ER   |  |
| SECTION 5: Firefight  | ing measures   |  |
| Hazards from the substance or mixture                       | : Flammable liquid and vapour. Runoff to sewer may create fire or explosion hazard. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion. This material is toxic to aquatic life with long lasting effects. Fire water contaminated with this material must be contained and prevented from being discharged to any waterway, sewer or drain. |  |
| Hazardous combustion products                               | : Decomposition products may include the following materials:<br>carbon oxides<br>nitrogen oxides  |  |
| 5.3 Advice for firefighters                                 |  |  |
| Special precautions for<br>fire-fighters                    | : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.   |  |
| Special protective<br>equipment for fire-fighters           | : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. Clothing for fire-fighters (including helmets, protective boots and gloves) conforming to European standard EN 469 will provide a basic level of protection for chemical incidents.  |  |

## **SECTION 6: Accidental release measures**

| 6.1 Personal precautions, pro   | tective equipment and emergency procedures   |
|---------------------------------|--|
| For non-emergency<br>personnel  | : No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilt material. Shut off all ignition sources. No<br>flares, smoking or flames in hazard area. Do not breathe vapour or mist. Provide<br>adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put<br>on appropriate personal protective equipment.  |
| For emergency responders        | : If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".  |
| 6.2 Environmental precautions   | : Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). Water polluting material. May be harmful to the environment if released in large quantities. Collect spillage.   |
| 6.3 Methods and material for    | containment and cleaning up  |
| Small spill                     | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.   |
| Large spill                     | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach the release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations. Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilt product. |
| 6.4 Reference to other sections | : See Section 1 for emergency contact information.<br>See Section 8 for information on appropriate personal protective equipment.<br>See Section 13 for additional waste treatment information.  |

Code : 000001072993 SIGMAFAST 205 LT HARDENER Date of issue/Date of revision

## **SECTION 7: Handling and storage**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### 7.1 Precautions for safe handling

| Protective measures  | : Put on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Do not get in eyes or on skin or clothing. Do not breathe vapour or mist. Do not ingest. Avoid release to the environment. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Take precautionary measures against electrostatic discharges. Empty containers retain product residue and can be hazardous. Do not reuse container. |
|--|--|
| Advice on general occupational hygiene                                 | : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.  |
| 7.2 Conditions for safe<br>storage, including any<br>incompatibilities | : Store between the following temperatures: 0 to 35°C (32 to 95°F). Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Eliminate all ignition sources. Separate from oxidising materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.   |
|  |  |

#### 7.3 Specific end use(s)

See Section 1.2 for Identified uses.

| Recommendations                      | : Not available. |
|--------------------------------------|------------------|
| Industrial sector specific solutions | : Not available. |

## **SECTION 8: Exposure controls/personal protection**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### 8.1 Control parameters

#### **Occupational exposure limits**

| Product/ingredient name | Exposure limit values  |      |  |  |  |

| <b>SECTION 8: Exposure</b>           | controls/personal protection   |  |  |  |  |
| Respiratory protection               | Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator. If workers are exposed to concentrations above the exposure limit, they must use appropriate, certified respirators. Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. |  |  |  |  |
| Environmental exposure :<br>controls | Emissions from ventilation or work process equipment should be checked to ensure<br>they comply with the requirements of environmental protection legislation. In some<br>cases, fume scrubbers, filters or engineering modifications to the process equipment<br>will be necessary to reduce emissions to acceptable levels.  |  |  |  |  |
| <b>SECTION 9: Physical</b> a         | and chemical properties  |  |  |  |  |
| The conditions of measurement of     | of all properties are at standard temperature and pressure unless otherwise indicated.   |  |  |  |  |
| 9.1 Information on basic physic      | cal and chemical properties  |  |  |  |  |

## **SECTION 9: Physical and chemical properties**

#### 9.2 Other information

No additional information.

| SECTION 10: Stability and reactivity     |   |  |  |  |
|--|---|--|--|--|
| 10.1 Reactivity                          | : No specific test data related to reactivity available for this product or its ingredients.  |  |  |  |
| 10.2 Chemical stability                  | : The product is stable.  |  |  |  |
| 10.3 Possibility of hazardous reactions  | : Under normal conditions of storage and use, hazardous reactions will not occur.   |  |  |  |
| 10.4 Conditions to avoid                 | : When exposed to high temperatures may produce hazardous decomposition products.<br>Refer to protective measures listed in sections 7 and 8. |  |  |  |
| 10.5 Incompatible materials              | : Keep away from the following materials to prevent strong exothermic reactions: oxidising agents, strong alkalis, strong acids.              |  |  |  |
| 10.6 Hazardous<br>decomposition products | : Depending on conditions, decomposition products may include the following materials: carbon oxides nitrogen oxides                          |  |  |  |

| Mobility                               | : Not available. |

#### 12.5 Results of PBT and vPvB assessment

This mixture does not contain any substances that are assessed to be a PBT or a vPvB.

**12.6 Other adverse effects** : No known significant effects or critical hazards.

### SECTION 13: Disposal considerations

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### 13.1 Waste treatment methods

**Product** 

| onforms to Regulation (E         | C) No. 1907/2006 (REACH), Annex II  |
|----------------------------------|---|
| ode : 0000010729                 | Date of issue/Date of revision: 19 November 2021  |
| IGMAFAST 205 LT HARDE            | ENER  |
| ECTION 13: Dispo                 | osal considerations   |
| Methods of disposal              | : The generation of waste should be avoided or minimised wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction.           |
| Hazardous waste                  | : Yes.  |
| European waste catalog           | lue (EWC)   |
| Waste code                       | Waste designation   |
| 08 01 11*                        | waste paint and varnish containing organic solvents or other hazardous substances   |
| Packaging<br>Methods of disposal | The generation of waste should be avoided or minimised wherever possible. Waste packaging should be recycled. Incineration or landfill should only be considered when   |
|                                  | recycling is not feasible.  |
| Type of packaging                | European waste catalogue (EWC)  |
| Container                        | 15 01 06 mixed packaging  |
| Special precautions              | : This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapour from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. |
