SAFETY DATA SHEET

Date of issue/Date of revision 1 March 2022

Version13

Section 1. Identification

| Product code | : 00261594 |
|--|--|
| Product name | : SIGMARINE 48 RAL 5019 |
| CAS number | : Not applicable. |
| EC number | : Mixture. |
| Product type | : Liquid. |
| Relevant identified uses | of the substance or mixture and uses advised against |
| Product use | Coating. Professional applications, Used by spraying. |
| Uses advised against | : Product is not intended, labelled or packaged for consumer use. |
| Supplier's details | : PPG Yung Chi Coatings Co. Ltd Lot 219, Amata Street, Long Binh IZ Bien Hoa City, Dong Nai Province Vietnam Tel : +84 61 3936121/22 |
| Emergency telephone number (with hours of operation) | : CHEMTREC +(84)-444581938 (CCN 17704) |

Section 2. Hazards identification

| Classification of the substance or mixture | FLAMMABLE LIQUIDS - Category 3 SKIN IRRITATION - Category 3 EYE IRRITATION - Category 2A CARCINOGENICITY - Category 1 SPECIFIC TARGET ORGAN TOXICITY (SINGLE EXPOSURE) (Narcotic effects) - Category 3 SPECIFIC TARGET ORGAN TOXICITY (REPEATED EXPOSURE) - Category 1 AQUATIC TOXICITY (ACUTE) - Category 2 AQUATIC TOXICITY (CHRONIC) - Category 2 Percentage of the mixture consisting of ingredient(s) of unknown hazards to the |
|--|--|
| <u>GHS label elements</u> Hazard pictograms | AQUATIC TOXICITY (CHRONIC) - Category 2 Percentage of the mixture consisting of ingredient(s) of unknown hazards to the aquatic environment: 50.4% |
| Signal word | : Danger |

Product code 00261594

Product name SIGMARINE 48 RAL 5019

Section 2. Hazards identification

| Hazard statements | ammable liquid and vapor. auses mild skin irritation. auses serious eye irritation. lay cause drowsiness or dizziness. lay cause cancer. auses damage to organs through prolonged or repeated exposure. (central ervous system (CNS)) oxic to aquatic life with long lasting effects. | I |
|---|--|------------------------------------|
| Precautionary statements | | |
| Prevention | btain special instructions before use. Do not handle until all safety precauti ave been read and understood. Wear protective gloves, protective clothing ye or face protection. Keep away from heat, hot surfaces, sparks, open flar nd other ignition sources. No smoking. Use only outdoors or in a well-ventil rea. Avoid release to the environment. Do not breathe vapor. Do not eat, o moke when using this product. Wash thoroughly after handling. | ⊨and mes lated |
| Response | ollect spillage. IF exposed or concerned: Get medical advice or attention. IHALED: Remove person to fresh air and keep comfortable for breathing. OISON CENTER or doctor if you feel unwell. IF ON SKIN (or hair): Take or nediately all contaminated clothing. Rinse skin with water. If skin irritation et medical advice or attention. IF IN EYES: Rinse cautiously with water for inutes. Remove contact lenses, if present and easy to do. Continue rinsing ritation persists: Get medical advice or attention. | Call a ff occurs: several |
| Storage | tore locked up. Store in a well-ventilated place. Keep container tightly close | ed. |
| Disposal | ispose of contents and container in accordance with all local, regional, national international regulations. | onal |
| Routes of entry | ot available. | |
| Other hazards which do not result in classification | rolonged or repeated contact may dry skin and cause irritation. | |

Section 3. Composition/information on ingredients

Substance/mixture : Mixture

CAS number/other identifiers

| CAS number: Not applicable.EC number: Mixture. | | | |
|--|------------|------------------|-----------|
| Ingredient name | CAS number | Chemical formula | % |
| Aphtha (petroleum), hydrodesulfurized heavy | 64742-82-1 | - | ≥10 - ≤25 |
| Naphtha (petroleum), hydrotreated heavy | 64742-48-9 | - | ≤12 |
| nonane | 111-84-2 | C9-H20 | ≤3 |
| Talc , not containing asbestiform fibres | 14807-96-6 | 3Mg-O.4Si-O2. | ≤3 |
| | | H2-0 | |
| 1,2,4-trimethylbenzene | 95-63-6 | C9-H12 | ≤2.7 |
| Hydrocarbons, C10-C13, n-alkanes, isoalkanes, | 64742-48-9 | - | ≤3 |
| cyclics, < 2% aromatics | | | |
| xylene | 1330-20-7 | C8-H10 | ≤1.5 |
| 2-ethylhexanoic acid, zirconium salt | 22464-99-9 | C8-H15-O2.xZr | <3 |
| calcium bis(2-ethylhexanoate) | 136-51-6 | C8H16O2.1/2Ca | ≤0.3 |
| 2-butanone oxime | 96-29-7 | C4-H9-N-O | ≤0.3 |

There are no ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Section 3. Composition/information on ingredients

SUB codes represent substances without registered CAS Numbers.

Occupational exposure limits, if available, are listed in Section 8.

Section 4. First aid measures

| Description of necess | ary first aid measures |
|-----------------------|--|
| Eye contact | Remove contact lenses, irrigate copiously with clean, fresh water, holding the eyelids apart for at least 10 minutes and seek immediate medical advice. |
| Inhalation | Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. |
| Skin contact | : Remove contaminated clothing and shoes. Wash skin thoroughly with soap and water or use recognized skin cleanser. Do NOT use solvents or thinners. |
| Ingestion | If swallowed, seek medical advice immediately and show this container or label. Keep person warm and at rest. Do NOT induce vomiting. |

Most important symptoms/effects, acute and delayed

| Potential acute health effect | <u>1</u> | |
|---------------------------------|---|--------|
| Eye contact | : Causes serious eye irritation. | |
| Inhalation | : Can cause central nervous system (CNS) depression. May cause drowsiness of dizziness. | or |
| Skin contact | : Causes mild skin irritation. Defatting to the skin. | |
| Ingestion | : Can cause central nervous system (CNS) depression. | |
| <u>Over-exposure signs/symp</u> | u <u>ms</u> | |
| Eye contact | : Adverse symptoms may include the following: pain or irritation watering redness | |
| Inhalation | : Adverse symptoms may include the following: nausea or vomiting headache drowsiness/fatigue dizziness/vertigo unconsciousness | |
| Skin contact | : Adverse symptoms may include the following: irritation redness dryness cracking | |
| Ingestion | : No specific data. | |
| Indication of immediate med | al attention and special treatment needed, if necessary | |
| Notes to physician | : Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled. | |
| Specific treatments | : No specific treatment. | |
| Protection of first-aiders | : No action shall be taken involving any personal risk or without suitable training. is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. | e า |

Section 4. First aid measures

See toxicological information (Section 11)

Section 5. Fire-fighting measures

| Extinguishing media | |
|--|---|
| Suitable extinguishing media | : Use dry chemical, CO ₂ , water spray (fog) or foam. |
| Unsuitable extinguishing media | : Do not use water jet. |
| Specific hazards arising from the chemical | : Flammable liquid and vapor. Runoff to sewer may create fire or explosion hazard. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion. This material is toxic to aquatic life with long lasting effects. Fire water contaminated with this material must be contained and prevented from being discharged to any waterway, sewer or drain. |
| Hazardous thermal decomposition products | : Decomposition products may include the following materials: carbon oxides metal oxide/oxides |
| Special protective actions for fire-fighters | : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool. |
| Special protective equipment for fire-fighters | : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. |

Section 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures

| For non-emergency personnel | : | No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Shut off all ignition sources. No flares, smoking or flames in hazard area. Avoid breathing vapor or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment. |
|--------------------------------|-----|---|
| For emergency responders | : | If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel". |
| Environmental precautions | : | Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). Water polluting material. May be harmful to the environment if released in large quantities. Collect spillage. |
| Methods and materials for co | ont | ainment and cleaning up |
| Small spill | : | Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor. |

Product name SIGMARINE 48 RAL 5019

Section 6. Accidental release measures

Large spill

: Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with noncombustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

Section 7. Handling and storage

| Precautions for safe handling | 1 | |
|--|---|--|
| Protective measures | : | Fut on appropriate personal protective equipment (see Section 8). Avoid exposure - obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Do not get in eyes or on skin or clothing. Do not breathe vapor or mist. Do not ingest. Avoid release to the environment. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Take precautionary measures against electrostatic discharges. Empty containers retain product residue and can be hazardous. Do not reuse container. |
| | | Materials such as cleaning rags, paper wipes and protective clothing, which are contaminated with the product may spontaneously self-ignite some hours later. To avoid the risks of fires, all contaminated materials should be stored in purpose-built containers or in metal containers with tight-fitting, self-closing lids. Contaminated materials should be removed from the workplace at the end of each working day and be stored outside. |
| Advice on general occupational hygiene | : | Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures. |
| Conditions for safe storage, including any incompatibilities | : | Store between the following temperatures: 0 to 35°C (32 to 95°F). Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Eliminate all ignition sources. Separate from oxidizing materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use. |

Section 8. Exposure controls/personal protection

Control parameters

Occupational exposure limits

| Ingredient name | | Exposure limits |
|--|--|---|
| Monane | | Ministry of Health (Viet Nam, 6/2019). STEL: 300 mg/m ³ 15 minutes. |
| Talc , not containing asbestiform fibres | | Ministry of Health (Viet Nam, 6/2019). TWA: 3 mg/m ³ 8 hours. Form: inhalable |
| | | dust TWA: 1 mg/m ³ 8 hours. Form: respirable dust TWA: 2 mg/m ³ 8 hours. Form: total dust |
| 1,2,4-trimethylbenzene | | concentration ACGIH TLV (United States, 1/2021). TWA: 123 mg/m ³ 8 hours. |
| xylene | | TWA: 25 ppm 8 hours. Ministry of Health (Viet Nam, 6/2019). STEL: 300 mg/m ³ 15 minutes. |
| 2-ethylhexanoic acid, zirconium salt | | TWA: 100 mg/m ³ 8 hours. ACGIH TLV (United States, 1/2021). STEL: 10 mg/m ³ , (as Zr) 15 minutes. TWA: 5 mg/m ³ , (as Zr) 8 hours. |
| Recommended monitoring : procedures | atmosphere or biological monit of the ventilation or other contro protective equipment. Referen | ents with exposure limits, personal, workplace oring may be required to determine the effectiveness of measures and/or the necessity to use respiratory ce should be made to appropriate monitoring nal guidance documents for methods for the ostances will also be required. |
| Appropriate engineering : controls | ventilation or other engineering contaminants below any recom | ion. Use process enclosures, local exhaust controls to keep worker exposure to airborne mended or statutory limits. The engineering controls r dust concentrations below any lower explosive ntilation equipment. |
| Environmental exposure : controls | Emissions from ventilation or w they comply with the requireme cases, fume scrubbers, filters of | ork process equipment should be checked to ensure ents of environmental protection legislation. In some or engineering modifications to the process reduce emissions to acceptable levels. |
| ndividual protection measures | 2 | |
| Hygiene measures : | eating, smoking and using the Appropriate techniques should | e thoroughly after handling chemical products, before lavatory and at the end of the working period. be used to remove potentially contaminated clothing. efore reusing. Ensure that eyewash stations and workstation location. |
| Eye/face protection : | Chemical splash goggles. | |
| Skin protection | | |

Product name SIGMARINE 48 RAL 5019

Section 8. Exposure controls/personal protection

| • | • • |
|------------------------|---|
| Hand protection | : Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated. |
| Gloves | : For prolonged or repeated handling, use the following type of gloves: |
| | Recommended: polyvinyl alcohol (PVA), Viton® May be used: nitrile rubber |
| Body protection | : Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. When there is a risk of ignition from static electricity, wear anti-static protective clothing. For the greatest protection from static discharges, clothing should include anti-static overalls, boots and gloves. |
| Other skin protection | Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. |
| Respiratory protection | : Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator. If workers are exposed to concentrations above the exposure limit, they must use appropriate, certified respirators. Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. |

Section 9. Physical and chemical properties

| Physical state: Liquid.Color: VariousOdor: Aromatic.Odor threshold: Not available.pH: Not applicable.Melting point: Not available.Boiling point: >37.78°C (>100°F)Flash point: Closed cup: 38.5°C (101.3°F)Evaporation rate: Not available.Flammability (solid, gas): Not available.Lower and upper explosive: Greatest known range: Lower: 0.6% Upper: 7% (Hydrocarbons, C10-C13, n- alkanes, isoalkanes, cyclics, < 2% aromatics) | <u>Appearance</u> | |

| | Decomposition temperature | : Not available. |

Section 9. Physical and chemical properties

Viscosity Viscosity : Kinematic (40°C): >21 mm²/s : 60 - 100 s (ISO 6mm)

Section 10. Stability and reactivity

| : No specific test data related to reactivity available for this product or its ingredients. |
|---|
| : The product is stable. |
| : Under normal conditions of storage and use, hazardous reactions will not occur. |
| : When exposed to high temperatures may produce hazardous decomposition products. |
| : Keep away from the following materials to prevent strong exothermic reactions: oxidizing agents, strong alkalis, strong acids. |
| : Evolves hydrogen on contact with water. Depending on conditions, decomposition products may include the following materials: carbon oxides metal oxide/oxides |
| |

Section 11. Toxicological information

Information on toxicological effects

Acute toxicity

| Product/ingredient name | Result | Species | Dose | Exposure |
|--|-----------------------|---------|-------------------------|----------|
| aphtha (petroleum), hydrodesulfurized heavy | LD50 Oral | Rat | >5000 mg/kg | - |
| Naphtha (petroleum), | LD50 Dermal | Rabbit | >5000 mg/kg | - |

Specific target organ toxicity (single exposure)

| Name | Category | Route of exposure | Target organs |
|--|------------|-------------------|---------------------------------|
| Naphtha (petroleum), hydrodesulfurized heavy | Category 3 | - | Narcotic effects |
| Naphtha (petroleum), hydrotreated heavy | Category 3 | - | Respiratory tract irritation |
| nonane | Category 3 | - | Narcotic effects |
| Talc , not containing asbestiform fibres | Category 3 | - | Respiratory tract irritation |
| 1,2,4-trimethylbenzene | Category 3 | - | Respiratory tract irritation |
| xylene | Category 3 | - | Respiratory tract irritation |
| 2-butanone oxime | Category 1 | - | upper respiratory tract |
| | Category 3 | | Narcotic effects |

Specific target organ toxicity (repeated exposure)

| Name | | Route of exposure | Target organs |
|--|------------|-------------------|---------------------------------|
| Maphtha (petroleum), hydrodesulfurized heavy | Category 1 | | central nervous system (CNS) |
| 2-butanone oxime | Category 2 | | blood system |

Aspiration hazard

| Name | Result |
|---|--|
| Naphtha (petroleum), hydrodesulfurized heavy Naphtha (petroleum), hydrotreated heavy | ASPIRATION HAZARD - Category 1 ASPIRATION HAZARD - Category 1 |
| nonane Hydrocarbons, C10-C13, n-alkanes, isoalkanes, cyclics, < 2% aromatics | ASPIRATION HAZARD - Category 1 ASPIRATION HAZARD - Category 1 |
| xylene | ASPIRATION HAZARD - Category 1 |

Information on the likely

: Not available.

routes of exposure

Section 11. Toxicological information

Potential acute health effects

| Eye contact | : Causes serious eye irritation. |
|--------------|---|
| Inhalation | : Can cause central nervous system (CNS) depression. May cause drowsiness or dizziness. |
| Skin contact | : Causes mild skin irritation. Defatting to the skin. |
| Ingestion | : Can cause central nervous system (CNS) depression. |

Symptoms related to the physical, chemical and toxicological characteristics

| Eye contact | : Adverse symptoms may include the following: pain or irritation watering redness |
|--------------|---|
| Inhalation | : Adverse symptoms may include the following: nausea or vomiting headache drowsiness/fatigue dizziness/vertigo unconsciousness |
| Skin contact | : Adverse symptoms may include the following: irritation redness dryness cracking |
| Ingestion | : No specific data. |

Numerical measures of toxicity Acute toxicity estimates

Section 11. Toxicological information

| Route | ATE value |
|------------------------------|----------------|
| Oral | 85066.24 mg/kg |
| Dermal | 49900.05 mg/kg |
| Inhalation (gases) | 31174.92 ppm |
| Inhalation (vapors) | 70.24 mg/l |
| Inhalation (dusts and mists) | 12.6 mg/l |

Other information

Prolonged or repeated contact may dry skin and cause irritation. Repeated exposure to high vapor concentrations may cause irritation of the respiratory system and permanent brain and nervous system damage. Inhalation of vapor/aerosol concentrations above the recommended exposure limits causes headaches, drowsiness and nausea and may lead to unconsciousness or death. Avoid contact with skin and clothing.

Section 12. Ecological information

Toxicity

| Product/ingredient name | Result | Species | Exposure |
|--|----------------------|---------|----------|
| ✓ethylhexanoic acid, zirconium salt | Acute LC50 >100 mg/l | Fish | 96 hours |

| Product/ingredient name | LogPow | BCF | Potential |
|-------------------------|--------|-------------|-----------|
| nonane | 5.65 | - | high |
| 1,2,4-trimethylbenzene | 3.63 | 120.23 | low |
| xylene | 3.12 | 7.4 to 18.5 | low |
| 2-butanone oxime | 0.63 | 5.01 | low |

Mobility in soil

Soil/water partition coefficient (Koc)

: Not available.

Other adverse effects

: No known significant effects or critical hazards.

Section 13. Disposal considerations

 Disposal methods
 The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapor from product residues

Viet Nam Page: 11/13

Section 13. Disposal considerations

may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

Section 14. Transport information

| | UN | IMDG | ΙΑΤΑ |
|--------------------------------|--|--|--|
| | UN | IMDG | |
| UN number | UN1263 | UN1263 | UN1263 |
| UN proper shipping name | PAINT | PAINT | PAINT |
| Transport hazard class(es) | 3 | 3 | 3 |
| Packing group | III | III | III |
| Environmental hazards | Yes. The environmentally hazardous substance mark is not required. | Yes. | Yes. The environmentally hazardous substance mark is not required. |
| Marine pollutant substances | Not applicable. | (Naphtha (petroleum), hydrodesulfurized heavy, nonane) | Not applicable. |

Additional information

| UN | : None identified. |
|------|--|
| IMDG | : The marine pollutant mark is not required when transported in sizes of \leq 5 L or \leq 5 kg. |
| ΙΑΤΑ | : The environmentally hazardous substance mark may appear if required by other transportation regulations. |

Special precautions for user : Transport within user's premises: always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

Transport in bulk according : Not applicable. to IMO instruments

Section 15. Regulatory information

Safety, health and environmental regulations : No known specific national and/or regional regulations applicable to this product (including its ingredients).

specific for the product

| Ingredient name | Category | Notes |
|--|--|-------|
| benzene toluene xylene chromium antimony | Category 1 Category 2 Category 2 Category 2 Category 2 | |
| arsenic | Category 1 | |

Toxic classification (TCVN : 4 3164-79)

Section 15. Regulatory information

International regulations

Montreal Protocol

Not listed.

Stockholm Convention on Persistent Organic Pollutants

Not listed.

Section 16. Other information

| <u>History</u> | |
|--------------------------------|---|
| Date of issue/Date of revision | : 1 March 2022 |
| Date of previous issue | : 6/28/2021 |
