# SAFETY DATA SHEET

Date of issue 3/3/2022 (month/day/year)

Version 17

## Section 1. Chemical product and company identification

A. Product name<br/>Product code: SIGMAGLIDE 890 BASE BLACK<br/>: 00242661

### B. Relevant identified uses of the substance or mixture and uses advised against

| Product use                             | : Professional applications, Used by spraying.   |
|---|--|
| Use of the substance/<br>mixture        | : Coating.   |
| Uses advised against                    | : Product is not intended, labelled or packaged for consumer use.  |
| C. Supplier's or Importer's information | : PPG SSC<br>(680-090)<br>19, Yeocheon-ro 217beon-gil, Nam-gu,<br>Ulsan, Korea<br>Tel: +82-52-210-8222<br>Karaa MSDS@DDC COM |
| Email Address                           | Korea.MSDS@PPG.COM   |
| Emergency telephone<br>number:          | : +82-52-210-8222  |

### Section 2. Hazards identification

A. Hazard classification : FLAMMABLE LIQUIDS - Category 3 CARCINOGENICITY - Category 1A SPECIFIC TARGET ORGAN TOXICITY (REPEATED EXPOSURE) - Category 2 AQUATIC HAZARD (LONG-TERM) - Category 3

This product is classified in accordance with the Industrial Safety and Health Act and the Chemical Control Act.

#### B. GHS label elements, including precautionary statements

Symbol

| Signal word              | : Danger   |
|--------------------------|--|
| Hazard statements        | <ul> <li>F226 - Flammable liquid and vapor.<br/>H350 - May cause cancer.<br/>H373 - May cause damage to organs through prolonged or repeated exposure.<br/>(central nervous system (CNS), kidneys, liver)<br/>H412 - Harmful to aquatic life with long lasting effects.</li> </ul> |
| Precautionary statements |  |

#### Korea (GHS) Page: 1/13

Product name SIGMAGLIDE 890 BASE BLACK

### Section 2. Hazards identification

| Prevention                | <ul> <li>202 - Do not handle until all safety precautions have been read and understood.<br/>P280 - Wear protective gloves, protective clothing and eye or face protection.<br/>P210 - Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.<br/>P241 - Use explosion-proof electrical, ventilating or lighting equipment.<br/>P242 - Use non-sparking tools.<br/>P243 - Take action to prevent static discharges.<br/>P273 - Avoid release to the environment.<br/>P260 - Do not breathe vapor.</li> </ul> |
|---------------------------|--|
| Response                  | : P308 + P313 - IF exposed or concerned: Get medical advice or attention.  |
| Storage                   | : P403 + P235 - Store in a well-ventilated place. Keep cool.   |
| Disposal                  | : P501 - Dispose of contents and container in accordance with all local, regional, national and international regulations.   |
| C. Other hazards which do | : Prolonged or repeated contact may dry skin and cause irritation.   |

c. Other nazards which do s not result in classification

### Section 3. Composition/information on ingredients

#### **CAS number/other identifiers**

CAS number

: Not applicable.

| Chemical name                | Common name | Identifiers     | %        |
|------------------------------|-------------|-----------------|----------|
| ristobalite (<10 microns)    |             | CAS: 14464-46-1 | 10 -<20  |
| cristobalite (>10 microns)   |             | CAS: 14464-46-1 | 10 -<20  |
| Xylene                       |             | CAS: 1330-20-7  | 1 - <5   |
| ethylbenzene                 |             | CAS: 100-41-4   | 0.1 - <1 |
| carbon black                 |             | CAS: 1333-86-4  | 0.1 - <1 |
| octamethylcyclotetrasiloxane |             | CAS: 556-67-2   | 0.1 - <1 |

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

### Section 4. First aid measures

| Α. | Eye contact  | : | Remove contact lenses, irrigate copiously with clean, fresh water, holding the eyelids apart for at least 10 minutes and seek immediate medical advice.  |
|----|--------------|---|--|
| В. | Skin contact | : | Remove contaminated clothing and shoes. Wash skin thoroughly with soap and water or use recognized skin cleanser. Do NOT use solvents or thinners.   |
| C. | Inhalation   | : | Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. |
| D. | Ingestion    | : | If swallowed, seek medical advice immediately and show this container or label.<br>Keep person warm and at rest. Do NOT induce vomiting.   |

## Section 4. First aid measures

| Ε. | Notes to physician         | : | Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.   |
|----|----------------------------|---|---|
|    | Specific treatments        | 4 | No specific treatment.  |
|    | Protection of first-aiders | : | No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. |

See toxicological information (Section 11)

## Section 5. Fire-fighting measures

| Α. | Extinguishing media                        |   |  |
|----|--|---|--|
|    | Suitable extinguishing media               | : | Use dry chemical, CO <sub>2</sub> , water spray (fog) or foam.   |
|    | Unsuitable<br>extinguishing media          | : | Do not use water jet.  |
| В. | Specific hazards arising from the chemical | : | Fammable liquid and vapor. Runoff to sewer may create fire or explosion hazard.<br>In a fire or if heated, a pressure increase will occur and the container may burst, with<br>the risk of a subsequent explosion. This material is harmful to aquatic life with long<br>lasting effects. Fire water contaminated with this material must be contained and<br>prevented from being discharged to any waterway, sewer or drain. |
|    | Hazardous thermal decomposition products   | : | Decomposition products may include the following materials:<br>carbon oxides<br>metal oxide/oxides<br>Formaldehyde.  |
| C. | Special equipment for<br>fire-fighting     | : | Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.  |
|    | Fire-fighting procedures                   | : | Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.   |

### Section 6. Accidental release measures

| A. Personal precautions,<br>protective equipment and<br>emergency procedures | • | No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilled material. Shut off all ignition sources.<br>No flares, smoking or flames in hazard area. Avoid breathing vapor or mist.<br>Provide adequate ventilation. Wear appropriate respirator when ventilation is<br>inadequate. Put on appropriate personal protective equipment. |
|--|---|---|
| B. Environmental precautions   | : | Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). Water polluting material. May be harmful to the environment if released in large quantities.  |

### C. Methods and materials for containment and cleaning up

### Section 6. Accidental release measures

| Small spill | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.  |
|-------------|---|
| Large spill | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools<br>and explosion-proof equipment. Approach release from upwind. Prevent entry into<br>sewers, water courses, basements or confined areas. Wash spillages into an<br>effluent treatment plant or proceed as follows. Contain and collect spillage with non-<br>combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth<br>and place in container for disposal according to local regulations (see Section 13).<br>Dispose of via a licensed waste disposal contractor. Contaminated absorbent<br>material may pose the same hazard as the spilled product. Note: see Section 1 for<br>emergency contact information and Section 13 for waste disposal. |

## Section 7. Handling and storage

| Α. | Precautions for safe handling                                      | Let on appropriate personal protective equipment (see Section 8). Avoid exposure -<br>obtain special instructions before use. Do not handle until all safety precautions<br>have been read and understood. Do not get in eyes or on skin or clothing. Do not<br>breathe vapor or mist. Do not ingest. Avoid release to the environment. Use only<br>with adequate ventilation. Wear appropriate respirator when ventilation is<br>inadequate. Do not enter storage areas and confined spaces unless adequately<br>ventilated. Keep in the original container or an approved alternative made from a<br>compatible material, kept tightly closed when not in use. Store and use away from<br>heat, sparks, open flame or any other ignition source. Use explosion-proof electrical<br>(ventilating, lighting and material handling) equipment. Use only non-sparking tools.<br>Take precautionary measures against electrostatic discharges. Empty containers<br>retain product residue and can be hazardous. Do not reuse container. |
|----|--|--|
| В. | Conditions for safe<br>storage, including any<br>incompatibilities | : Store between the following temperatures: 0 to 35°C (32 to 95°F). Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Eliminate all ignition sources. Separate from oxidizing materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.  |

### Section 8. Exposure controls/personal protection

## A. Occupational exposure limits

| ristobalita (<10 miarana)  |  |
|----------------------------|--|
| ¢ristobalite (<10 microns) | Ministry of Employment and Labor           |
|                            | (Republic of Korea, 1/2020).               |
|                            | TWA: 0.05 mg/m <sup>3</sup> 8 hours. Form: |
|                            | Respirable fraction                        |
| cristobalite (>10 microns) | Ministry of Employment and Labor           |
|                            | (Republic of Korea, 1/2020).               |
|                            | TWA: 0.05 mg/m <sup>3</sup> 8 hours. Form: |
|                            | Respirable fraction                        |
| Xylene                     | Ministry of Employment and Labor           |
|                            | (Republic of Korea, 1/2020).               |

## Section 8. Exposure controls/personal protection

|    | •                                    | · ·   |
|----|--------------------------------------|---|
|    | ethylbenzene                         | STEL: 150 ppm 15 minutes.<br>TWA: 100 ppm 8 hours.<br><b>Ministry of Employment and Labor</b>   |
|    | carbon black                         | (Republic of Korea, 1/2020).<br>STEL: 125 ppm 15 minutes.<br>TWA: 100 ppm 8 hours.<br>Ministry of Employment and Labor<br>(Republic of Korea, 1/2020).<br>TWA: 3.5 mg/m <sup>3</sup> 8 hours. Form: inhalabl<br>fraction  |
|    | Recommended<br>monitoring procedures | If this product contains ingredients with exposure limits, personal, workplace<br>atmosphere or biological monitoring may be required to determine the effectivene<br>of the ventilation or other control measures and/or the necessity to use respiratory<br>protective equipment. Reference should be made to appropriate monitoring<br>standards. Reference to national guidance documents for methods for the<br>determination of hazardous substances will also be required.   |
| в. | Appropriate engineering controls     | Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering control also need to keep gas, vapor or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.  |
|    | Environmental<br>exposure controls   | Emissions from ventilation or work process equipment should be checked to ensut<br>they comply with the requirements of environmental protection legislation. In som<br>cases, fume scrubbers, filters or engineering modifications to the process<br>equipment will be necessary to reduce emissions to acceptable levels.   |
| C. | Personal protective equip            | ient  |
|    | Respiratory protection               | : Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator. If workers are exposed to concentrations above the exposure limit, they must use appropriate, certified respirators. Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates thi necessary.  |
|    | Eye protection                       | : Safety glasses with side shields.   |
|    | Hand protection                      | : Chemical-resistant, impervious gloves complying with an approved standard shot<br>be worn at all times when handling chemical products if a risk assessment indica<br>this is necessary. Considering the parameters specified by the glove manufactur<br>check during use that the gloves are still retaining their protective properties. It<br>should be noted that the time to breakthrough for any glove material may be<br>different for different glove manufacturers. In the case of mixtures, consisting of<br>several substances, the protection time of the gloves cannot be accurately<br>estimated. |
|    | Gloves                               | : For prolonged or repeated handling, use the following type of gloves:<br>Recommended: polyvinyl alcohol (PVA), Viton®   |
|    |                                      | Not recommended: nitrile rubber   |
|    | Body protection                      | : Personal protective equipment for the body should be selected based on the task<br>being performed and the risks involved and should be approved by a specialist<br>before handling this product. When there is a risk of ignition from static electricity<br>wear anti-static protective clothing. For the greatest protection from static<br>discharges, clothing should include anti-static overalls, boots and gloves.  |
|    |                                      | Korea (GHS) Page: 5/  |

Product name SIGMAGLIDE 890 BASE BLACK

### Section 8. Exposure controls/personal protection

**Hygiene measures** 

: Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

## Section 9. Physical and chemical properties

: Liquid. : Black.

: Aromatic.

: Not available.

: Not applicable.

: Not available.

The conditions of measurement of all properties are at standard temperature and pressure unless otherwise indicated.

#### A. Appearance

| Physical state |  |
|----------------|--|
| Color          |  |

- B. Odor
- C. Odor threshold
- D. pH

Ι.

- E. Melting/freezing point
- F. Boiling point/boiling range
- : >37.78°C (>100°F)

: Closed cup: 56°C (132.8°F)

- G. Flash point
- H. Evaporation rate : Not available.

ż

- Flammability (solid, gas) : Not available.
- J. Lower and upper explosive (flammable) limits
- K. Vapor pressure

|                 | Vapor Pressure at 20°C |      |        | Vapor pressure at 50°C |     |        |
|-----------------|------------------------|------|--------|------------------------|-----|--------|

Version 17

Product name SIGMAGLIDE 890 BASE BLACK

## Section 10. Stability and reactivity

| Α. | Chemical stability<br>Possibility of hazardous<br>reactions |   | The product is stable.<br>Under normal conditions of storage and use, hazardous reactions will not occur.                           |
|----|---|---|---|
| В. | Conditions to avoid   | : | When exposed to high temperatures may produce hazardous decomposition products.   |
| C. | Incompatible materials                                      | : | Keep away from the following materials to prevent strong exothermic reactions: oxidizing agents, strong alkalis, strong acids.      |
| D. | Hazardous<br>decomposition products                         | : | Depending on conditions, decomposition products may include the following materials: carbon oxides Formaldehyde. metal oxide/oxides |

## Section 11. Toxicological information

| A. Information on th routes of exposur |  |
|--|--|
| Potential acute heal                   | th effects   |
| Inhalation                             | : No known significant effects or critical hazards.                                |
| Ingestion                              | : No known significant effects or critical hazards.                                |
| Skin contact                           | : Defatting to the skin. May cause skin dryness and irritation.                    |
| Eye contact                            | : No known significant effects or critical hazards.                                |
| <u>Over-exposure sign</u>              | <u>s/symptoms</u>  |
| Inhalation                             | : No specific data.  |
| Ingestion                              | : No specific data.  |
| Skin contact                           | : Adverse symptoms may include the following:<br>irritation<br>dryness<br>cracking |
| Eye contact                            | : No specific data.  |

### B. Health hazards

#### Acute toxicity

| Product/ingredient name      | Result                | Species | Dose        | Exposure |

### Specific target organ toxicity (single exposure)

| Name   | Classification | Route of exposure | Target organs    |
|--------|----------------|-------------------|------------------|
| Xylene | Category 3     | -                 | Narcotic effects |

#### Specific target organ toxicity (repeated exposure)

| Name   | Classification | Route of exposure | Target organs                                      |
|--------|----------------|-------------------|--|
| Xylene | Category 1     |                   | central nervous<br>system (CNS),<br>kidneys, liver |

### Aspiration hazard

| Name         | Result                         |
|--------------|--------------------------------|
| ethylbenzene | ASPIRATION HAZARD - Category 1 |

#### Potential chronic health effects

| General                         | : May cause damage to organs through prolonged or repeated exposure. Prolonged or repeated contact can defat the skin and lead to irritation, cracking and/or dermatitis. |
|---------------------------------|---|
| Carcinogenicity<br>Mutagenicity | <ul> <li>May cause cancer. Risk of cancer depends on duration and level of exposure.</li> <li>No known significant effects or critical hazards.</li> </ul>                |

Korea (GHS) Page: 8/13

#### Product name SIGMAGLIDE 890 BASE BLACK

### Section 11. Toxicological information

**Reproductive toxicity** : No known significant effects or critical hazards.

### **Additional information**

Prolonged or repeated contact may dry skin and cause irritation. Sanding and grinding dusts may be harmful if inhaled. Repeated exposure to high vapor concentrations may cause irritation of the respiratory system and permanent brain and nervous system damage. Inhalation of vapor/aerosol concentrations above the recommended exposure limits causes headaches, drowsiness and nausea and may lead to unconsciousness or death. Contains a substance that may emit formaldehyde if stored beyond its shelf life and/or during cure at curing temperatures greater than 60C (140F). Avoid contact with skin and clothing.

| Chemical name                | Identifiers     | GHS Classification                        |
|------------------------------|-----------------|---|

Soil/water partition : Not available. coefficient (Koc)

E. <u>Other adverse effects</u> : No known significant effects or critical hazards.

## Section 13. Disposal considerations

- A. Disposal methods
   The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and nonrecyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible.
- B. Disposal precautions
   This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapor from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

### Section 14. Transport information

### **Additional information**

UN

: This class 3 viscous liquid is not subject to regulation in packagings up to 450 L according to 2.3.2.5.1.

Korea (GHS) Page: 10/13

### Section 14. Transport information

IMDG

: This class 3 viscous liquid is not subject to regulation in packagings up to 450 L according to 2.3.2.5.

IATA : None identified.

## F. Special precaution which a user to be aware of or needs to comply with in connection with transport or transportation

**Transport within user's premises:** always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

Transport in bulk according : Not applicable. to IMO instruments

## Section 15. Regulatory information
