SAFETY DATA SHEET

Section 1. Chemical product and company identification

A. Product name: HI-TEMP 1027 LIGHT GRAY
   Product code: 00329011

B. Relevant identified uses of the substance or mixture and uses advised against
   Product use: Professional applications, Used by spraying.
   Use of the substance/mixture: Coating.
   Uses advised against: Product is not intended, labelled or packaged for consumer use.

C. Supplier’s or Importer’s information
   : PPG SSC (680-090)
     19, Yeocheon-ro 217beon-gil, Nam-gu, Ulsan, Korea
     Tel: +82-52-210-8222
   Email Address: Korea.MSDS@PPG.COM
   Emergency telephone number: +82-52-210-8222

Section 2. Hazards identification

A. Hazard classification
   : FLAMMABLE LIQUIDS - Category 3
     CARCINOGENICITY - Category 1A
     SPECIFIC TARGET ORGAN TOXICITY (REPEATED EXPOSURE) - Category 2
     AQUATIC HAZARD (LONG-TERM) - Category 2
   This product is classified in accordance with the Industrial Safety and Health Act and the Chemical Control Act.

B. GHS label elements, including precautionary statements
   Symbol:
   Signal word: Danger
   Hazard statements:
   H226 - Flammable liquid and vapor.
   H350 - May cause cancer.
   H373 - May cause damage to organs through prolonged or repeated exposure.
   (central nervous system (CNS), kidneys, liver)
   H411 - Toxic to aquatic life with long lasting effects.

Precautionary statements
Section 2. Hazards identification

Prevention:
P202 - Do not handle until all safety precautions have been read and understood.
P280 - Wear protective gloves, protective clothing and eye or face protection.
P210 - Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.
P241 - Use explosion-proof electrical, ventilating or lighting equipment.
P242 - Use non-sparking tools.
P243 - Take action to prevent static discharges.
P273 - Avoid release to the environment.
P260 - Do not breathe vapor.

Response:
P391 - Collect spillage.
P308 + P313 - IF exposed or concerned: Get medical advice or attention.

Storage:
P403 + P235 - Store in a well-ventilated place. Keep cool.

Disposal:
P501 - Dispose of contents and container in accordance with all local, regional, national and international regulations.

C. Other hazards which do not result in classification:
Prolonged or repeated contact may dry skin and cause irritation.

Section 3. Composition/information on ingredients

CAS number/other identifiers:
CAS number:
Not applicable.

</tbody>
</table>

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.
Section 4. First aid measures

A. Eye contact
   Remove contact lenses, irrigate copiously with clean, fresh water, holding the eyelids apart for at least 10 minutes and seek immediate medical advice.

B. Skin contact
   Remove contaminated clothing and shoes. Wash skin thoroughly with soap and water or use recognized skin cleanser. Do NOT use solvents or thinners.

C. Inhalation
   Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel.

D. Ingestion
   If swallowed, seek medical advice immediately and show this container or label. Keep person warm and at rest. Do NOT induce vomiting.

E. Notes to physician
   Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.

   Specific treatments
   No specific treatment.

   Protection of first-aiders
   No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves.

Section 5. Fire-fighting measures

A. Extinguishing media
   Suitable extinguishing media
   Use dry chemical, CO₂, water spray (fog) or foam.

   Unsuitable extinguishing media
   Do not use water jet.

B. Specific hazards arising from the chemical
   Flammable liquid and vapor. Runoff to sewer may create fire or explosion hazard. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion. This material is toxic to aquatic life with long lasting effects. Fire water contaminated with this material must be contained and prevented from being discharged to any waterway, sewer or drain.

   Hazardous thermal decomposition products
   Decomposition products may include the following materials:
   - carbon oxides
   - phosphorus oxides
   - halogenated compounds
   - metal oxide/oxides
   - Formaldehyde.

C. Special equipment for fire-fighting
   Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

   Fire-fighting procedures
   Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.
Section 6. Accidental release measures

A. Personal precautions, protective equipment and emergency procedures

- No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Shut off all ignition sources. No flares, smoking or flames in hazard area. Avoid breathing vapor or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment.

B. Environmental precautions

- Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). Water polluting material. May be harmful to the environment if released in large quantities. Collect spillage.

C. Methods and materials for containment and cleaning up

Small spill

- Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.

Large spill

- Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

Section 7. Handling and storage

A. Precautions for safe handling

- Put on appropriate personal protective equipment (see Section 8). Avoid exposure - obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Do not get in eyes or on skin or clothing. Do not breathe vapor or mist. Do not ingest. Avoid release to the environment. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Take precautionary measures against electrostatic discharges. Empty containers retain product residue and can be hazardous. Do not reuse container.

B. Conditions for safe storage, including any incompatibilities

- Store between the following temperatures: 0 to 35°C (32 to 95°F). Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Eliminate all ignition sources. Separate from oxidizing materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.
## Section 8. Exposure controls/personal protection

### A. Occupational exposure limits

<table>

TWA: 10 ppm 8 hours. |
| crystalline silica, respirable powder (<10 microns) | Ministry of Employment and Labor (Republic of Korea, 1/2020).  
TWA: 0.05 mg/m³ 8 hours. Form: Respirable fraction |

### Recommended monitoring procedures

If this product contains ingredients with exposure limits, personal, workplace atmosphere or biological monitoring may be required to determine the effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment. Reference should be made to appropriate monitoring standards. Reference to national guidance documents for methods for the determination of hazardous substances will also be required.

### B. Appropriate engineering controls

Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapor or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.
Section 8. Exposure controls/personal protection

Environmental exposure controls: Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

C. Personal protective equipment

Respiratory protection: Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator. If workers are exposed to concentrations above the exposure limit, they must use appropriate, certified respirators. Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary.

Eye protection: Safety glasses with side shields.

Hand protection: Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated.

Gloves: For prolonged or repeated handling, use the following type of gloves:

- May be used: nitrile rubber
- Recommended: Chloroprene, polyvinyl alcohol (PVA), Viton®

Body protection: Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. When there is a risk of ignition from static electricity, wear anti-static protective clothing. For the greatest protection from static discharges, clothing should include anti-static overalls, boots and gloves.

Hygiene measures: Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

Section 9. Physical and chemical properties

The conditions of measurement of all properties are at standard temperature and pressure unless otherwise indicated.

A. Appearance

- Physical state: Liquid.
- Color: Grayish-white.

B. Odor: Hydrocarbon.

C. Odor threshold: Not available.

D. pH: Not applicable.

E. Melting/freezing point: Not available.

F. Boiling point/boiling range: >37.78°C (>100°F)

G. Flash point: Closed cup: 24°C (75.2°F)
Section 9. Physical and chemical properties

H. Evaporation rate : Not available.
I. Flammability (solid, gas) : Not available.
J. Lower and upper explosive (flammable) limits : Greatest known range: Lower: 4.2% Upper: 12.9% (dimethyl carbonate)

K. Vapor pressure

<table>

Q. Decomposition temperature : Not available.
R. Viscosity

Flow time (ISO 2431) : Kinematic (40°C (104°F)): >21 mm²/s (>21 cSt)
S. Molecular weight : Not applicable.

Section 10. Stability and reactivity

A. Chemical stability

Possibility of hazardous reactions : The product is stable.

Under normal conditions of storage and use, hazardous reactions will not occur.

B. Conditions to avoid : When exposed to high temperatures may produce hazardous decomposition products.

C. Incompatible materials : Keep away from the following materials to prevent strong exothermic reactions: oxidizing agents, strong alkalis, strong acids.

D. Hazardous decomposition products : Depending on conditions, decomposition products may include the following materials: carbon oxides phosphorus oxides halogenated compounds Formaldehyde. metal oxide/oxides
Section 11. Toxicological information

A. Information on the likely routes of exposure

Potential acute health effects

- **Inhalation**: No known significant effects or critical hazards.
- **Ingestion**: No known significant effects or critical hazards.
- **Skin contact**: Defatting to the skin. May cause skin dryness and irritation.
- **Eye contact**: No known significant effects or critical hazards.

Over-exposure signs/symptoms

- **Inhalation**: No specific data.
- **Ingestion**: No specific data.
- **Skin contact**: Adverse symptoms may include the following: irritation, dryness, cracking.
- **Eye contact**: No specific data.

## Section 11. Toxicological information

### Potential chronic health effects

**General**: May cause damage to organs through prolonged or repeated exposure. Prolonged or repeated contact can defat the skin and lead to irritation, cracking and/or dermatitis.

**Carcinogenicity**: May cause cancer. Risk of cancer depends on duration and level of exposure.

**Mutagenicity**: No known significant effects or critical hazards.

**Reproductive toxicity**: No known significant effects or critical hazards.

### Additional information

Prolonged or repeated contact may dry skin and cause irritation. Sanding and grinding dusts may be harmful if inhaled. Repeated exposure to high vapor concentrations may cause irritation of the respiratory system and permanent brain and nervous system damage. Inhalation of vapor/aerosol concentrations above the recommended exposure limits causes headaches, drowsiness and nausea and may lead to unconsciousness or death. Contains a substance that may emit formaldehyde if stored beyond its shelf life and/or during cure at curing temperatures greater than 60C (140F). Avoid contact with skin and clothing.

Section 12. Ecological information

E. Other adverse effects: No known significant effects or critical hazards.

Section 13. Disposal considerations

A. Disposal methods: The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible.

B. Disposal precautions: This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapor from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible.

Additional information

UN: None identified.
IMDG: The marine pollutant mark is not required when transported in sizes of ≤5 L or ≤5 kg.
IATA: The environmentally hazardous substance mark may appear if required by other transportation regulations.

F. Special precaution which a user to be aware of or needs to comply with in connection with transport or tranportation

Transport within user’s premises: always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.
Section 14. Transport information

Transport in bulk according to IMO instruments  : Not applicable.

Section 15. Regulatory information

A. Regulation according to ISHA

ISHA article 117 (Harmful substances prohibited from manufacture)  : None of the components are listed.

ISHA article 118 (Harmful substances requiring permission)  : None of the components are listed.

Article 2 of Youth Protection Act on Substances Hazardous to Youth  : It is not allowed to sell to persons under the age of 19.

Exposure Limits of Chemical Substances and Physical Factors

The following components have an OEL:

- Mica-group minerals
- Titanium dioxide
- Xylene
- Zinc oxide
- Ethyl benzene
- Toluene
- Naphthalene
- Crystalline silica, respirable powder (<10 microns)

ISHA Enforcement Regs Annex 19 (Exposure standards established for harmful factors)  : The following components are listed: toluene

ISHA Enforcement Regs Annex 21 (Harmful factors subject to Work Environment Measurement)  : The following components are listed: mica, titanium dioxide, xylene, zinc oxide, ethyl benzene, toluene

ISHA Enforcement Regs Annex 22 (Harmful Factors Subject to Special Health Check-up)  : The following components are listed: mica, Xylene, Zinc oxide, Ethyl benzene, Toluene

Standard of Industrial Safety and Health Annex 12 (Hazardous substances subject to control)  : The following components are listed: mica, titanium dioxide, xylene, zinc and its compounds, ethyl benzene, toluene

B. Regulation according to Chemicals Control Act

CCA Article 11 (TRI)  : The following components are listed: Xylene including o-,m-,p- isomer, Zinc and its compounds, Zinc and its compounds, Ethylbenzene, Toluene, Naphthalene

Article 18 Prohibited (K-Reach Article 27)  : None of the components are listed.
Section 15. Regulatory information

- Article 19 Subject to authorization (K-Reach Article 25): None of the components are listed.
- Article 20 Restricted (K-Reach Article 27): None of the components are listed.
- Article 20 Toxic Chemicals (K-Reach Article 20): Not applicable.
- Korea inventory: All components are listed or exempted.
- CCA Article 39 (Accident Precaution Chemicals): None of the components are listed.

C. Dangerous Materials Safety Management Act
   - Class: Class 4 - Flammable Liquid
   - Item: 4. Class 2 petroleums - Water-insoluble liquid
   - Threshold: 1000 L
   - Danger category: III
   - Signal word: Contact with sources of ignition prohibited

D. Wastes regulation
   - Dispose of contents and container in accordance with all local, regional, national and international regulations.

E. Regulation according to other foreign laws
   - Safety, health and environmental regulations specific for the product: No known specific national and/or regional regulations applicable to this product (including its ingredients).

Section 16. Other information

A. References
   - Korean Ministry of Environment; Chemical Control Act
   - Korean Ministry of Labor; Industrial Safety and Health Act
   - NIER Notice
   - Registry of Toxic Effects of Chemical Substances (RTECS)
