SAFETY DATA SHEET

Date of issue/Date of revision 15 June 2022

Version 4

Section 1. Identification

| Product code | : 17000-157649/1L |
|----------------------------------|---|
| Product identifier | : PSX 700 COLORANT 64 YELLOW GREEN |
| | |
| Recommended use and res | <u>trictions</u> |
| Use of the substance/ mixture | : Coating. |
| Uses advised against | : Not applicable. |
| Supplier's details | : PPG Industries Australia Pty Limited (ABN 82 055 500 939) 14-20 McNaughton Rd CLAYTON Victoria 3168 Tel: (03) 9263 6000 Fax: (03) 9263 6970 |
| Emergency telephone number | : Australia 1800 883 254 / New Zealand 0800 000 096 For international shipping emergencies: 1-412-391-1618 |

Section 2. Hazard(s) identification

result in classification

| Classification of the substance or mixture | : REPRODUCTIVE TOXICITY - Category 1 | |
|--|--------------------------------------|--|
| GHS label elements Hazard pictograms | : | |
| | | |

| Signal word | - 1 | DANGER |
|-----------------------------|-----|---|
| Hazard statements | 4 | May damage fertility or the unborn child. |
| Precautionary statements | | |
| Prevention | ; | Do not handle until all safety precautions have been read and understood. Wear protective gloves, protective clothing and eye or face protection. |
| Response | : | F exposed or concerned: Get medical advice or attention. |
| Storage | : | Not applicable. |
| Disposal | ; | Dispose of contents and container in accordance with all local, regional, national and international regulations. |
| Supplemental label elements | : | Not applicable. |
| Other hazards which do not | : | None known. |

DANGER May damage fertility or the unborn child.

Section 3. Composition and ingredient information

Substance/mixture

: Mixture

CAS number/other identifiers

| CAS number | : Not applicable. |
|-----------------|-------------------|
| EC number | : Mixture. |
| Ingredient name | |

| Ingredient name | CAS number | % (w/w) | |
|-----------------|------------|---------|--|
| Fo luene | 108-88-3 | <1 | |

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment or have an OEL and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

SUB codes represent substances without registered CAS Numbers.

Section 4. First aid measures

Description of necessary first aid measures

| Eye contact | Remove contact lenses, irrigate copiously with clean, fresh water, holding the eyelids apart for at least 10 minutes and seek immediate medical advice. |
|--------------|--|
| Inhalation | Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. |
| Skin contact | Remove contaminated clothing and shoes. Wash skin thoroughly with soap and water or use recognised skin cleanser. Do NOT use solvents or thinners. |
| Ingestion | If swallowed, seek medical advice immediately and show the container or label. Keep person warm and at rest. Do NOT induce vomiting. |

Most important symptoms/effects, acute and delayed

Potential acute health effects

| r otoritiar addite rioutin erioote | ÷ | |
|------------------------------------|---|---|
| Eye contact | : | No known significant effects or critical hazards. |
| Inhalation | ÷ | No known significant effects or critical hazards. |
| Skin contact | ÷ | No known significant effects or critical hazards. |
| Ingestion | : | No known significant effects or critical hazards. |
| Over-exposure signs/sympto | m | <u>IS</u> |
| Eye contact | : | No specific data. |
| Inhalation | : | Adverse symptoms may include the following: reduced foetal weight increase in foetal deaths skeletal malformations |
| Skin contact | : | Adverse symptoms may include the following: reduced foetal weight increase in foetal deaths skeletal malformations |
| Ingestion | : | Adverse symptoms may include the following: reduced foetal weight increase in foetal deaths skeletal malformations |
| | | |

Indication of immediate medical attention and special treatment needed, if necessary

Section 4. First aid measures

| Notes to physician | : In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours. |
|----------------------------|---|
| Specific treatments | : No specific treatment. |
| Protection of first-aiders | : No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. |

See toxicological information (Section 11)

Section 5. Firefighting measures

| Extinguishing media | |
|--|---|
| Suitable extinguishing media | : Use an extinguishing agent suitable for the surrounding fire. |
| Unsuitable extinguishing media | : None known. |
| Specific hazards arising from the chemical | : \mathbf{M} a fire or if heated, a pressure increase will occur and the container may burst. |
| Hazardous thermal decomposition products | : Decomposition products may include the following materials: carbon oxides nitrogen oxides halogenated compounds metal oxide/oxides |
| Special protective actions for fire-fighters | : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. |
| Special protective equipment for fire-fighters | Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. |
| Hazchem code | : Not applicable. |

Section 6. Accidental release measures

| Personal precautions, protect | iv | e equipment and emergency procedures | |
|--|----|---|--|
| For non-emergency personnel | : | No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilt material. Avoid breathing vapour or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment. | |
| For emergency responders | : | If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel". | |
| Environmental precautions | : | Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). | |
| Methods and material for containment and cleaning up | | | |
| Small spill | : | Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor. | |

Australia GHS Page: 3/11

Product name PSX 700 COLORANT 64 YELLOW GREEN

Section 6. Accidental release measures

Large spill : Stop leak if without risk. Move containers from spill area. Approach the release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spill product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

Section 7. Handling and storage

| Precaut | ions i | for sat | fe I | nand | ing |
|----------------|--------|---------|------|------|-----|
| | | | | | |

Protective measures
: Fut on appropriate personal protective equipment (see Section 8). Avoid exposure - obtain special instructions before use. Avoid exposure during pregnancy. Do not handle until all safety precautions have been read and understood. Do not get in eyes or on skin or clothing. Do not ingest. Avoid breathing vapour or mist. If during normal use the material presents a respiratory hazard, use only with adequate ventilation or wear appropriate respirator. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container.
: Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before

- occupational hygiene handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.
- Conditions for safe storage, including any incompatibilities : Store between the following temperatures: 0 to 35°C (32 to 95°F). Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.

Section 8. Exposure controls and personal protection

Control parameters

Occupational exposure limits

| toluene | Safe Work Australia (Australia, 12/2019). |
|---------|---|
| | Absorbed through skin. |
| | STEL: 574 mg/m ³ 15 minutes. |
| | STEL: 150 ppm 15 minutes. |
| | TWA: 191 mg/m ³ 8 hours. |
| | TWA: 50 ppm 8 hours. |

Appropriate engineering controls

: If user operations generate dust, fumes, gas, vapour or mist, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits.

For products that are sprayed, where practicable use a spray booth designed and maintained in accordance with AS/ NZS 4114.

Product name PSX 700 COLORANT 64 YELLOW GREEN

| Section 8. Expos | ontrols and persona | I protection |
|---------------------------------|--|--|
| Environmental exposure controls | ey comply with the requirements of | ocess equipment should be checked to ensure environmental protection legislation. In some neering modifications to the process e emissions to acceptable levels. |
| Individual protection meas | | |
| Hygiene measures | ting, smoking and using the lavator propriate techniques should be use | bughly after handling chemical products, before y and at the end of the working period. ed to remove potentially contaminated clothing. eusing. Ensure that eyewash stations and tation location. |
| Eye/face protection | fety glasses with side shields. | |
| Skin protection | | |
| Hand protection | worn at all times when handling ch s is necessary. Considering the pa eck during use that the gloves are s ould be noted that the time to break ferent for different glove manufactu | s complying with an approved standard should emical products if a risk assessment indicates rameters specified by the glove manufacturer, still retaining their protective properties. It through for any glove material may be rers. In the case of mixtures, consisting of he of the gloves cannot be accurately |
| Body protection | | body should be selected based on the task d and should be approved by a specialist |
| Other skin protection | | nal skin protection measures should be formed and the risks involved and should be ing this product. |
| Respiratory protection | zards of the product and the safe w orkers are exposed to concentration propriate, certified respirators. Use | n known or anticipated exposure levels, the rorking limits of the selected respirator. If is above the exposure limit, they must use a properly fitted, air-purifying or air-fed d standard if a risk assessment indicates this is |
| Restrictions on use | t applicable. | |

References: Eye protectors should conform to AS/NZS 1336 and AS/NZS 1337. Chemical-resistant gloves should conform to AS/NZS 2161.1. Respiratory protection should conform to AS/NZS 1715 and AS/NZS 1716. Occupational footwear should conform to AS/NZS 2210.

Section 9. Physical and chemical properties

| Appearance | |
|---------------------------|-------------------------------|
| Physical state | : Liquid. |
| Colour | : Yellow. |
| Odour | : Aromatic. |
| Odour threshold | : Not available. |
| рН | : Not applicable. |
| Melting point | : Not available. |
| Boiling point | : >37.78°C (>100°F) |
| Flash point | : Closed cup: Not applicable. |
| Evaporation rate | : Not available. |
| Flammability (solid, gas) | : Not available. |
| | |

Australia GHS Page: 5/11

Section 9. Physical and chemical properties

| Lower and upper explosive (flammable) limits | 1 | Not available. |
|--|---|---|
| Vapour pressure | 1 | Not available. |
| Vapour density | 1 | Not available. |
| Relative density | 1 | 1.29 |
| Solubility | 1 | Insoluble in the following materials: cold water. |
| Partition coefficient: n- octanol/water | 1 | Not applicable. |
| Auto-ignition temperature | : | Not available. |
| Decomposition temperature | 1 | Not available. |
| Viscosity | : | 60 - 100 s (ISO 6mm) |

Section 10. Stability and reactivity

| Reactivity | : No specific test data related to reactivity available for this product or its ingredients. |
|------------------------------------|--|
| Chemical stability | : The product is stable. |
| Possibility of hazardous reactions | : Under normal conditions of storage and use, hazardous reactions will not occur. |
| Conditions to avoid | : Stable under recommended storage and handling conditions (see Section 7). When exposed to high temperatures may produce hazardous decomposition products. |
| Incompatible materials | : Keep away from the following materials to prevent strong exothermic reactions: oxidising agents, strong alkalis, strong acids. |
| Hazardous decomposition products | Depending on conditions, decomposition products may include the following materials: carbon oxides nitrogen oxides halogenated compounds metal oxide/ oxides |

Section 11. Toxicological information

Information on toxicological effects

Acute toxicity

| Product/ingredient name | Result | Species | Dose | Exposure |

| | | |

Product name PSX 700 COLORANT 64 YELLOW GREEN

Section 11. Toxicological information

| | | - |
|--------------------------------|------------|--|
| Skin contact | : | Adverse symptoms may include the following: reduced foetal weight increase in foetal deaths skeletal malformations |
| Ingestion | : | Adverse symptoms may include the following: reduced foetal weight increase in foetal deaths skeletal malformations |
| Delayed and immediate effect | <u>ts</u> | as well as chronic effects from short and long-term exposure |
| Conclusion/Summary | : | There are no data available on the mixture itself. Trimethoxysilanes are capable of forming methanol if hydrolyzed or ingested. If swallowed, methanol may be harmful or fatal or cause blindness. If splashed in the eyes, the liquid may cause irritation and reversible damage. Ingestion may cause nausea, diarrhea and vomiting. This takes into account, where known, delayed and immediate effects and also chronic effects of components from short-term and long-term exposure by oral, inhalation and dermal routes of exposure and eye contact. |
| <u>Short term exposure</u> | | |
| Potential immediate effects | 1 | There are no data available on the mixture itself. |
| Potential delayed effects | : | There are no data available on the mixture itself. |
| <u>Long term exposure</u> | | |
| Potential immediate effects | : | There are no data available on the mixture itself. |
| Potential delayed effects | 1 | There are no data available on the mixture itself. |
| Potential chronic health eff | <u>ect</u> | <u>S</u> |
| Not available. | | |
| General | : | No known significant effects or critical hazards. |
| Carcinogenicity | : | No known significant effects or critical hazards. |
| Mutagenicity | | No known significant effects or critical hazards. |
| Reproductive toxicity | | May damage fertility or the unborn child. |
| | | |

Other adverse effects

: No known significant effects or critical hazards.

Section 13. Disposal considerations

Disposal methods

: The generation of waste should be avoided or minimised wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.

Section 14. Transport information

| | ADG | IMDG | IATA |

Notice to reader

The information contained in this data sheet is based on present scientific and technical knowledge. The purpose of this information is to draw attention to the health and safety aspects concerning the products supplied by PPG, and to recommend precautionary measures for the storage and handling of the products. No warranty or guarantee is given in respect of the properties of the products. No liability can be accepted for any failure to observe the precautionary measures described in this data sheet or for any misuse of the products.
