# **SAFETY DATA SHEET**

Date of issue/Date of revision

: 28 October 2022

Version : 1.01

Europe

## SECTION 1: Identification of the substance/mixture and of the company/ undertaking

| 1.1 Product identifier | 1.1 | Prod | luct ic | lentifie | r |
|------------------------|-----|------|---------|----------|---|
|------------------------|-----|------|---------|----------|---|

| Product name | : SIGMAFAST 205 BASE GREY 522890 |
|--------------|----------------------------------|
| Product code | : 00269840                       |
|              |                                  |

Other means of identification

Not available.

| 1.2 Relevant identified uses of the substance or mixture and uses advised against |   |  |
|---|---|--|
| Product use   | : Professional applications, Used by spraying.                    |  |
| Use of the substance/<br>mixture  | : Coating.  |  |
| Uses advised against  | : Product is not intended, labelled or packaged for consumer use. |  |

## 1.3 Details of the supplier of the safety data sheet

PPG Coatings Belgium BV/SRL Tweemontstraat 104 B-2100 Deurne Belgium Telephone +32-33606311 Fax +32-33606435

e-mail address of person responsible for this SDS

: Product.Stewardship.EMEA@ppg.com

## 1.4 Emergency telephone number

## **Supplier**

+31 20 4075210

## **SECTION 2: Hazards identification**

# 2.1 Classification of the substance or mixture Product definition : Mixture Classification according to Regulation (EC) No. 1272/2008 [CLP/GHS] Flam. Liq. 3, H226 Skin Irrit. 2, H315 Eye Irrit. 2, H319 Skin Sens. 1, H317 Aquatic Chronic 3, H412 The product is classified as hazardous according to Regulation (EC) 1272/2008 as amended. See Section 16 for the full text of the H statements declared above.

See Section 11 for more detailed information on health effects and symptoms.

Europe

| Code : 00269840                | Date of issue/Date of revision | : 28 October 2022 |
|--------------------------------|--------------------------------|-------------------|
| SIGMAFAST 205 BASE GREY 522890 |                                |                   |

## **SECTION 2: Hazards identification**

| 2.2 Label elements  |   |
|---|---|
| Hazard pictograms   |   |
|   |   |
| Signal word   | : Warning   |
| Hazard statements   | <ul> <li>Flammable liquid and vapour.</li> <li>Causes skin irritation.</li> <li>May cause an allergic skin reaction.</li> <li>Causes serious eye irritation.</li> <li>Harmful to aquatic life with long lasting effects.</li> </ul> |
| Precautionary statements  |   |
| Prevention  | : Wear protective gloves. Wear eye or face protection. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Avoid release to the environment. Avoid breathing vapour.                     |
| Response  | : Take off contaminated clothing and wash it before reuse.  |
| Storage   | : Not applicable.   |
| Disposal  | <ul> <li>Dispose of contents and container in accordance with all local, regional, national and international regulations.</li> <li>P280, P210, P273, P261, P362 + P364, P501</li> </ul>  |
| Hazardous ingredients   | : Epoxy Resin (700 <mw<=1100)<br>epoxy resin (MW <math>\leq</math> 700)</mw<=1100)<br>  |
| Supplemental label elements   | : Contains epoxy constituents. May produce an allergic reaction.  |
| Annex XVII - Restrictions<br>on the manufacture,<br>placing on the market and<br>use of certain dangerous<br>substances, mixtures and<br>articles | : Not applicable.   |
| Special packaging requirem  | ients   |
| Containers to be fitted<br>with child-resistant<br>fastenings   | : Not applicable.   |
| Tactile warning of danger   | : Not applicable.   |
| 2.3 Other hazards   |   |
| Product meets the criteria for PBT or vPvB  | : This mixture does not contain any substances that are assessed to be a PBT or a vPvB.   |
| Other hazards which do not result in classification   | : Prolonged or repeated contact may dry skin and cause irritation.  |

Code : 00269840

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment, are PBTs, vPvBs or Substances of equivalent concern, or have been assigned a workplace exposure limit and hence require reporting in this section.

Xylene: Several REACH registrations cover the REACH registered substance with xylene isomers, ethylbenzene (and toluene). The other REACH Registrations include: 01-2119555267-33 reaction mass of ethylbenzene and m-xylene and p-xylene, 01-2119486136-34 Aromatic hydrocarbons, C8, 01-2119539452-40 reaction mass of ethylbenzene and xylene.

<u>Type</u>

M Substance classified with a health or environmental hazard

[2] Substance with a workplace exposure limit

Occupational exposure limits, if available, are listed in Section 8.

#### SUB codes represent substances without registered CAS Numbers.

| Code : 00269840                | Date of issue/Date of revision | : 28 October 2022 |  |
|--------------------------------|--------------------------------|-------------------|--|
| SIGMAFAST 205 BASE GREY 522890 |                                |                   |  |

## **SECTION 4: First aid measures**

## 4.1 Description of first aid measures

| Eye contact                | : Remove contact lenses, irrigate copiously with clean, fresh water, holding the eyelids apart for at least 10 minutes and seek immediate medical advice.   |
|----------------------------|---|
| Inhalation                 | <ul> <li>Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is<br/>irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained<br/>personnel.</li> </ul>                                      |
| Skin contact               | : Remove contaminated clothing and shoes. Wash skin thoroughly with soap and water<br>or use recognised skin cleanser. Do NOT use solvents or thinners.   |
| Ingestion                  | : If swallowed, seek medical advice immediately and show the container or label. Keep person warm and at rest. Do NOT induce vomiting.  |
| Protection of first-aiders | : No action shall be taken involving any personal risk or without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. |

## 4.2 Most important symptoms and effects, both acute and delayed

| Potential acute health       | effects   |
|------------------------------|---|
| Eye contact                  | : Causes serious eye irritation.  |
| Inhalation                   | : No known significant effects or critical hazards.   |
| Skin contact                 | : Causes skin irritation. Defatting to the skin. May cause an allergic skin reaction.         |
| Ingestion                    | : No known significant effects or critical hazards.   |
| <u>Over-exposure signs/s</u> | symptoms  |
| Eye contact                  | : Adverse symptoms may include the following:<br>pain or irritation<br>watering<br>redness    |
| Inhalation                   | : No specific data.   |
| Skin contact                 | : Adverse symptoms may include the following:<br>irritation<br>redness<br>dryness<br>cracking |
| Ingestion                    | : No specific data.   |

## 4.3 Indication of any immediate medical attention and special treatment needed

| Notes to physician  | <ul> <li>Treat symptomatically. Contact poison treatment specialist immediately if large<br/>quantities have been ingested or inhaled.</li> </ul> |
|---------------------|---|
| Specific treatments | : No specific treatment.  |

## SECTION 5: Firefighting measures

| 5.1 Extinguishing media<br>Suitable extinguishing<br>media | : Use dry chemical, CO <sub>2</sub> , water spray (fog) or foam. |
|--|--|
| Unsuitable extinguishing media                             | : Do not use water jet.  |

## 5.2 Special hazards arising from the substance or mixture

| 2020/878                                       |  |
|--|--|
| Code : 00269840<br>SIGMAFAST 205 BASE GREY     | Date of issue/Date of revision         : 28 October 2022           Y 522890  |
| SECTION 5: Firefight                           | ting measures  |
| Hazards from the substance or mixture          | : Flammable liquid and vapour. Runoff to sewer may create fire or explosion hazard. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion. This material is harmful to aquatic life with long lasting effects. Fire water contaminated with this material must be contained and prevented from being discharged to any waterway, sewer or drain. |
| Hazardous combustion products                  | : Decomposition products may include the following materials:<br>carbon oxides<br>halogenated compounds<br>metal oxide/oxides  |
| 5.3 Advice for firefighters                    |  |
| Special precautions for<br>fire-fighters       | : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.   |
| Special protective equipment for fire-fighters | : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. Clothing   |

for fire-fighters (including helmets, protective boots and gloves) conforming to European

standard EN 469 will provide a basic level of protection for chemical incidents.

## **SECTION 6: Accidental release measures**

| 6.1 Personal precautions, pro   | otective equipment and emergency procedures   |                                  |
|---------------------------------|---|----------------------------------|
| For non-emergency<br>personnel  | : No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilt material. Shut off all ignition sources<br>flares, smoking or flames in hazard area. Avoid breathing vapour or mist. Provic<br>adequate ventilation. Wear appropriate respirator when ventilation is inadequate<br>on appropriate personal protective equipment.  | s. No<br>le                      |
| For emergency responders        | : If specialised clothing is required to deal with the spillage, take note of any inform Section 8 on suitable and unsuitable materials. See also the information in "For remergency personnel".  |                                  |
| 6.2 Environmental precautions   | : Avoid dispersal of spilt material and runoff and contact with soil, waterways, drain sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). Water polluting material. May be harm the environment if released in large quantities.   |                                  |
| 6.3 Methods and material for    | containment and cleaning up   |                                  |
| Small spill                     | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools explosion-proof equipment. Dilute with water and mop up if water-soluble. Alterr or if water-insoluble, absorb with an inert dry material and place in an appropriate disposal container. Dispose of via a licensed waste disposal contractor.  | natively,                        |
| Large spill                     | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools explosion-proof equipment. Approach the release from upwind. Prevent entry in sewers, water courses, basements or confined areas. Wash spillages into an eff treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous ear place in container for disposal according to local regulations. Dispose of via a lice waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilt product. | to<br>luent<br>arth and<br>ensed |
| 6.4 Reference to other sections | : See Section 1 for emergency contact information.<br>See Section 8 for information on appropriate personal protective equipment.<br>See Section 13 for additional waste treatment information.   |                                  |
| English (GB)                    | Europe  | 5/17                             |

SIGMAFAST 205 BASE GREY 522890

## **SECTION 7: Handling and storage**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### 7.1 Precautions for safe handling

| Protective measures  | : Put on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Do not get in eyes or on skin or clothing. Do not ingest. Avoid breathing vapour or mist. Avoid release to the environment. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Take precautionary measures against electrostatic discharges. Empty containers retain product residue and can be hazardous. Do not reuse container. |
|--|---|
| Advice on general<br>occupational hygiene                              | : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.   |
| 7.2 Conditions for safe<br>storage, including any<br>incompatibilities | : Store between the following temperatures: 0 to 35°C (32 to 95°F). Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Eliminate all ignition sources. Separate from oxidising materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.   |

## 7.3 Specific end use(s)

See Section 1.2 for Identified uses.

## **SECTION 8: Exposure controls/personal protection**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

## 8.1 Control parameters

#### **Occupational exposure limits**

| Product/ingredient name | Exposure limit values  |  |
|-------------------------|--|--|
| xylene                  | EU OEL (Europe, 10/2019). [xylene, mixed isomers] Absorbed<br>through skin.<br>STEL: 442 mg/m <sup>3</sup> 15 minutes.<br>STEL: 100 ppm 15 minutes.<br>TWA: 221 mg/m <sup>3</sup> 8 hours. |  |
| 2-methylpropan-1-ol     | TWA: 50 ppm 8 hours.<br><b>ACGIH TLV (United States, 1/2021).</b><br>TWA: 152 mg/m <sup>3</sup> 8 hours.   |  |
| ethylbenzene            | TWA: 50 ppm 8 hours.<br><b>EU OEL (Europe, 10/2019). Absorbed through skin.</b><br>STEL: 884 mg/m <sup>3</sup> 15 minutes.   |  |
| English (GB)            | Europe 6/17  |  |

| Code :      | 00269840                            | Date of issue/Date of revision  | : 28 October 2022 |
|-------------|-------------------------------------|---|-------------------|
| SIGMAFAST 2 | 205 BASE GREY 522890                |   |                   |
| SECTION     | 8: Exposure controls/pers           | sonal protection  |                   |
|             |                                     | STEL: 200 ppm 15 minutes.<br>TWA: 442 mg/m <sup>3</sup> 8 hours.<br>TWA: 100 ppm 8 hours. |                   |
| Recommend   | ed monitoring : If this product con | tains ingredients with exposure limits, per   | sonal workplace   |

**Recommended monitoring** : If this product contains ingredients with exposure limits, personal, workplace atmosphere or biological monitoring may be required to determine the effectiveness of procedures the ventilation or other control measures and/or the necessity to use respiratory protective equipment. Reference should be made to monitoring standards, such as the following: European Standard EN 689 (Workplace atmospheres - Guidance for the assessment of exposure by inhalation to chemical agents for comparison with limit values and measurement strategy) European Standard EN 14042 (Workplace atmospheres - Guide for the application and use of procedures for the assessment of exposure to chemical and biological agents) European Standard EN 482 (Workplace atmospheres - General requirements for the performance of procedures for the measurement of chemical agents) Reference to national guidance documents for methods for the determination of hazardous substances will also be required.

#### **DNELs**

| Product/ingredient name     | Туре  | Exposure              | Value                        | Population                    | Effects              |

## 8.2 Exposure controls

| Appropriate engineering<br>controls | Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas vapour or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.   |  |
|-------------------------------------|---|--|
| Individual protection measur        | _   |  |
| Hygiene measures                    | : Wash hands, forearms and face thoroughly after handling chemical products, before<br>eating, smoking and using the lavatory and at the end of the working period.<br>Appropriate techniques should be used to remove potentially contaminated clothing.<br>Contaminated work clothing should not be allowed out of the workplace. Wash<br>contaminated clothing before reusing. Ensure that eyewash stations and safety<br>showers are close to the workstation location. |  |
| Eye/face protection                 | : Chemical splash goggles. Use eye protection according to EN 166.  |  |
| Skin protection                     |   |  |
| Hand protection                     | :   |  |

## **SECTION 8: Exposure controls/personal protection**

|                                 | Chemical-resistant, impervious gloves complying with an approved standard should be<br>worn at all times when handling chemical products if a risk assessment indicates this<br>is necessary. Considering the parameters specified by the glove manufacturer, check<br>during use that the gloves are still retaining their protective properties. It should be<br>noted that the time to breakthrough for any glove material may be different for different<br>glove manufacturers. In the case of mixtures, consisting of several substances, the<br>protection time of the gloves cannot be accurately estimated. When prolonged or<br>frequently repeated contact may occur, a glove with a protection class of 6<br>(breakthrough time greater than 480 minutes according to EN 374) is recommended.<br>When only brief contact is expected, a glove with a protection class of 2 or higher<br>(breakthrough time greater than 30 minutes according to EN 374) is recommended.<br>The user must check that the final choice of type of glove selected for handling this<br>product is the most appropriate and takes into account the particular conditions of use,<br>as included in the user's risk assessment. |
|---------------------------------|--|
| Gloves                          | : butyl rubber   |
| Body protection                 | : Personal protective equipment for the body should be selected based on the task<br>being performed and the risks involved and should be approved by a specialist before<br>handling this product. When there is a risk of ignition from static electricity, wear anti-<br>static protective clothing. For the greatest protection from static discharges, clothing<br>should include anti-static overalls, boots and gloves. Refer to European Standard EN<br>1149 for further information on material and design requirements and test methods.   |
| Other skin protection           | Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.  |
| Respiratory protection          | : Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator. If workers are exposed to concentrations above the exposure limit, they must use appropriate, certified respirators. Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Wear a respirator conforming to EN140. Filter type: organic vapour (Type A) and particulate filter P3   |
| Environmental exposure controls | : Emissions from ventilation or work process equipment should be checked to ensure<br>they comply with the requirements of environmental protection legislation. In some<br>cases, fume scrubbers, filters or engineering modifications to the process equipment<br>will be necessary to reduce emissions to acceptable levels.  |

## **SECTION 9: Physical and chemical properties**

The conditions of measurement of all properties are at standard temperature and pressure unless otherwise indicated.

#### 9.1 Information on basic physical and chemical properties

| <u>Appearance</u>                          |   |
|--|---|
| Physical state                             | : Liquid.   |
| Colour                                     | : Grey.   |
| Odour                                      | : Aromatic.   |
| Odour threshold                            | : Not available.  |
| Melting point/freezing point               | May start to solidify at the following temperature: -45°C (-49°F) This is based on<br>data for the following ingredient: 1,2-Benzenedicarboxylic acid, di-C9-11-branched<br>alkyl esters, C10-rich. Weighted average: -89.85°C (-129.7°F) |
| Initial boiling point and<br>boiling range | : >37.78°C  |
| Flammability                               | : Not available.  |

## **SECTION 11: Toxicological information**

| Potential | chronic | health | effects |  |
|-----------|---------|--------|---------|--|
|           |         |        |         |  |

## Not available.

| <b>Conclusion/Summary</b> | : Not available.   |
|---------------------------|--|
| General                   | <ul> <li>Prolonged or repeated contact can defat the skin and lead to irritation, cracking and/or<br/>dermatitis. Once sensitized, a severe allergic reaction may occur when subsequently<br/>exposed to very low levels.</li> </ul> |
| Carcinogenicity           | : No known significant effects or critical hazards.  |
| Mutagenicity              | : No known significant effects or critical hazards.  |
| Reproductive toxicity     | : No known significant effects or critical hazards.  |
| Other information         | : Not available.   |

Prolonged or repeated contact may dry skin and cause irritation. Sanding and grinding dusts may be harmful if inhaled. Repeated exposure to high vapor concentrations may cause irritation of the respiratory system and permanent brain and nervous system damage. Inhalation of vapour/aerosol concentrations above the recommended exposure limits causes headaches, drowsiness and nausea and may lead to unconsciousness or death. Avoid contact with skin and clothing.

#### 11.2 Information on other hazards

**11.2.1 Endocrine disrupting properties** 

Not available.

#### 11.2.2 Other information

Not available.

## **SECTION 12: Ecological information**

#### 12.1 Toxicity

| Product/ingredient name               | Result                    | Species            | Exposure |
|---------------------------------------|---------------------------|--------------------|----------|
| <mark>e</mark> poxy resin (MW  ≤ 700) | Acute LC50 1.8 mg/l       | Daphnia            | 48 hours |
|                                       | Chronic NOEC 0.3 mg/l     | Daphnia            | 21 days  |
| 2-methylpropan-1-ol                   | Acute EC50 1100 mg/l      | Daphnia            | 48 hours |
| ethylbenzene                          | Acute EC50 1.8 mg/l Fresh | Daphnia            | 48 hours |

| Mobility                               | : Not available. |

#### 12.5 Results of PBT and vPvB assessment

This mixture does not contain any substances that are assessed to be a PBT or a vPvB.

## 12.6 Endocrine disrupting properties

Not available.

## 12.7 Other adverse effects

No known significant effects or critical hazards.

## **SECTION 13: Disposal considerations**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

## 13.1 Waste treatment methods

| Product             |   |
|---------------------|---|
| Methods of disposal | : The generation of waste should be avoided or minimised wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. |
| Hazardous waste     | : Yes.  |

#### European waste catalogue (EWC)

| Waste code          |  | Waste designation              |
|---------------------|--|--------------------------------|
| 08 01 11*           | waste paint and varnish containing organic solvents or other hazardous substances  |                                |
| Packaging           |  |                                |
| Methods of disposal | <ul> <li>The generation of waste should be avoided or minimised wherever possible. Waste<br/>packaging should be recycled. Incineration or landfill should only be considered when<br/>recycling is not feasible.</li> </ul> |                                |

## **SECTION 13: Disposal considerations**

Special precautions
 This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapour from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.
