SAFETY DATA SHEET

Date of issue 24 November 2022

Version 13.01

Section 1. Product and company identification

Product name Product code Other means of identification Product type : SIGMARINE 48 BASE L

- : 00204608
- : Not available.
- : Liquid.

Relevant identified uses of the substance or mixture and uses advised against

Identified uses

Coating. Paints. Painting-related materials.

| Uses advised against | Reason |
|----------------------|--------|
| Not applicable. | |

| Supplier's details: | |
|----------------------------|---|
| Supplier | PPG Industries Colombia Ltda Calle 51 # 40-13 Municipio de Itagüí Antioquia, Colombia (57) (4) 3787400 (Porteria) |
| Email address: | : HazComLatam@ppg.com |
| Emergency telephone number | : Colombia: 01 8000 916012 (CISPROQUIM) + 571 288 6012 (CISPROQUIM) Ecuador: 1800-59-3005 (CISPROQUIM) Peru: 080-050-847 (CISPROQUIM) |

Section 2. Hazards identification

| Classification of the | : FLAMMABLE LIQUIDS - Category 3 |
|------------------------------|---|
| substance or mixture | SKIN IRRITATION - Category 3 |
| | CARCINOGENICITY - Category 1B |
| | TOXIC TO REPRODUCTION - Category 2 |
| | SPECIFIC TARGET ORGAN TOXICITY (SINGLE EXPOSURE) (Narcotic effects) - |
| | Category 3 |
| | SPECIFIC TARGET ORGAN TOXICITY (REPEATED EXPOSURE) - Category 1 |
| | AQUATIC HAZARD (ACUTE) - Category 2 |
| | AQUATIC HAZARD (LONG-TERM) - Category 2 |
| | |

Date of issue

| Section 2. Hazards | s i | dentification |
|---|-----|--|
| Target organs | : | Contains material which causes damage to the following organs: brain, central nervous system (CNS). Contains material which may cause damage to the following organs: blood, kidneys, lungs, the nervous system, liver, cardiovascular system, upper respiratory tract, skin, eye, lens or cornea. |
| | | Percentage of the mixture consisting of ingredient(s) of unknown hazards to the aquatic environment: 39.8% |
| GHS label elements | | |
| Hazard pictograms | : | |
| Signal word | : | Danger |
| Hazard statements | : | Flammable liquid and vapor. Causes mild skin irritation. May cause drowsiness or dizziness. May cause cancer. Suspected of damaging fertility or the unborn child. Causes damage to organs through prolonged or repeated exposure. (central nervous system (CNS)) Toxic to aquatic life with long lasting effects. |
| Precautionary statements | | |
| Prevention | : | Obtain special instructions before use. Wear protective gloves, protective clothing and eye or face protection. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Use explosion-proof electrical, ventilating or lighting equipment. Use non-sparking tools. Take action to prevent static discharges. Avoid release to the environment. Do not breathe vapor. Do not eat, drink or smoke when using this product. |
| Response | : | Collect spillage. IF exposed or concerned: Get medical advice or attention. IF INHALED: Call a POISON CENTER or doctor if you feel unwell. |
| Storage | : | Store in a well-ventilated place. Keep container tightly closed. Keep cool. |
| Disposal | : | Dispose of contents and container in accordance with all local, regional, national and international regulations. |
| Other hazards which do not result in classification | : | Prolonged or repeated contact may dry skin and cause irritation. |

Section 3. Composition/information on ingredients

| Substance/mixture | : Mixture |
|----------------------------------|------------------|
| Other means of identification | : Not available. |

| CAS number/other identifiers | | |
|------------------------------|---|-----------------|
| CAS number | : | Not applicable. |

Version 13.01

Section 3. Composition/information on ingredients

| Ingredient name | % | CAS number |
|---|------------|------------|
| Naphtha (petroleum), hydrodesulfurized heavy | 20 - <30 | 64742-82-1 |
| titanium dioxide | 15 - <20 | 13463-67-7 |
| nonane | 3 - <5 | 111-84-2 |
| 1,2,4-trimethylbenzene | 2 - <3 | 95-63-6 |
| Talc , not containing asbestiform fibres | 2 - <3 | 14807-96-6 |
| xylene | 1 - <2 | 1330-20-7 |
| 2-ethylhexanoic acid, zirconium salt | 1 - <2 | 22464-99-9 |
| Hydrocarbons, C10-C13, n-alkanes, isoalkanes, cyclics, < 2% aromatics | 1 - <2 | 64742-48-9 |
| calcium bis(2-ethylhexanoate) | 0.2 - <0.5 | 136-51-6 |
| neodecanoic acid, cobalt salt | 0.2 - <0.5 | 27253-31-2 |
| ethylbenzene | 0.2 - <0.5 | 100-41-4 |
| 2-butanone oxime | 0.1 - <0.2 | 96-29-7 |
| cumene | 0.1 - <0.2 | 98-82-8 |

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

SUB codes represent substances without registered CAS Numbers.

Section 4. First aid measures

Description of necessary first aid measures

| beeding tion of heededdary hi | |
|---|---|
| Eye contact | Remove contact lenses, irrigate copiously with clean, fresh water, holding the eyelids apart for at least 10 minutes and seek immediate medical advice. |
| Inhalation | : Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. |
| Skin contact | : Remove contaminated clothing and shoes. Wash skin thoroughly with soap and water or use recognized skin cleanser. Do NOT use solvents or thinners. |
| Ingestion | : If swallowed, seek medical advice immediately and show this container or label. Keep person warm and at rest. Do NOT induce vomiting. |
| Indication of immediate me | dical attention and special treatment needed, if necessary |
| Notes to physician Specific treatments | Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled. No specific treatment. |
| Protection of first-aiders | : No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. |
| Potential acute health effec | t <u>s</u> |
| Eye contact | : No known significant effects or critical hazards. |
| Inhalation | : Can cause central nervous system (CNS) depression. May cause drowsiness or dizziness. |
| Skin contact | : Causes mild skin irritation. Defatting to the skin. |
| Ingestion | : Can cause central nervous system (CNS) depression. |

See toxicological information (Section 11)

SIGMARINE 48 BASE L

Date of issue

Section 5. Fire-fighting measures

| Extinguishing media | |
|---|---|
| Suitable extinguishing media | : Use dry chemical, CO ₂ , water spray (fog) or foam. |
| Unsuitable extinguishing media | : Do not use water jet. |
| Specific hazards arising from the chemical | : Flammable liquid and vapor. Runoff to sewer may create fire or explosion hazard. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion. This material is toxic to aquatic life with long lasting effects. Fire water contaminated with this material must be contained and prevented from being discharged to any waterway, sewer or drain. |
| Hazardous thermal decomposition products | : Decomposition products may include the following materials: carbon oxides metal oxide/oxides |
| Special protective actions for fire-fighters | : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool. |
| Special protective equipment for fire-fighters | Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. |

Section 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures

contractor.

| For non-emergency personnel | No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled material. Shut off all ignition sources. No flares, smoking or flames in hazard area. Avoid breathing vapor or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment. If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the |
|--------------------------------|---|
| | information in "For non-emergency personnel". |
| Environmental precautions | Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). Water polluting material. May be harmful to the environment if released in large quantities. Collect spillage. |
| Methods and materials for co | ntainment and cleaning up |
| Small spill | Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal |

Section 6. Accidental release measures

| Large spill | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools |
|-------------|--|
| | and explosion-proof equipment. Approach release from upwind. Prevent entry into |
| | sewers, water courses, basements or confined areas. Wash spillages into an |
| | effluent treatment plant or proceed as follows. Contain and collect spillage with non- |
| | combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth |
| | and place in container for disposal according to local regulations (see Section 13). |
| | Dispose of via a licensed waste disposal contractor. Contaminated absorbent |
| | material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal. |
| | energeney contact montation and boolion to for whole disposal. |

Section 7. Handling and storage

| Precautions for safe handling | Put on appropriate personal protective equipment (see Section 8). Avoid exposure - obtain special instructions before use. Avoid exposure during pregnancy. Do not handle until all safety precautions have been read and understood. Do not get in eyes or on skin or clothing. Do not breathe vapor or mist. Do not ingest. Avoid release to the environment. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Take precautionary measures against electrostatic discharges. Empty containers retain product residue and can be hazardous. Do not reuse container. |
|--|--|
| | Materials such as cleaning rags, paper wipes and protective clothing, which are contaminated with the product may spontaneously self-ignite some hours later. To avoid the risks of fires, all contaminated materials should be stored in purpose-built containers or in metal containers with tight-fitting, self-closing lids. Contaminated materials should be removed from the workplace at the end of each working day and be stored outside. |
| Conditions for safe storage, : including any incompatibilities | Store between the following temperatures: 0 to 35°C (32 to 95°F). Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Eliminate all ignition sources. Separate from oxidizing materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use. |

Section 8. Exposure controls/personal protection

<u>Control parameters</u> <u>Occupational exposure limits</u>

13.01

Version

Section 8. Exposure controls/personal protection

| Ingredient name | | Exposure limits |
|--|---|---|
| Manium dioxide | | ACGIH TLV (United States, 1/2022). TWA: 2.5 mg/m ³ 8 hours. Form: respirable |
| nonane | | fraction, finescale particles ACGIH TLV (United States, 1/2022). TWA: 200 ppm 8 hours. |
| 1,2,4-trimethylbenzene | | TWA: 1050 mg/m ³ 8 hours. ACGIH TLV (United States, 1/2022). TWA: 10 ppm 8 hours. |
| Talc , not containing asbestife | orm fibres | ACGIH TLV (United States, 1/2022). TWA: 2 mg/m ³ 8 hours. Form: Respirable |
| xylene | | ACGIH TLV (United States, 1/2022). [xylene] STEL: 651 mg/m ³ 15 minutes. TWA: 434 mg/m ³ 8 hours. TWA: 20 ppm 8 hours. |
| 2-ethylhexanoic acid, zirconiu | ım salt | ACGIH TLV (United States, 1/2022). [Zirconium and compounds] STEL: 10 mg/m ³ , (as Zr) 15 minutes. TWA: 5 mg/m ³ , (as Zr) 8 hours. |
| Recommended monitoring procedures | | opriate monitoring standards. Reference to nethods for the determination of hazardous |
| Appropriate engineering controls | ventilation or other engineering cor contaminants below any recommen | Use process enclosures, local exhaust ntrols to keep worker exposure to airborne nded or statutory limits. The engineering contro st concentrations below any lower explosive tion equipment |
| Environmental exposure controls | : Emissions from ventilation or work they comply with the requirements cases, fume scrubbers, filters or er | process equipment should be checked to ensure of environmental protection legislation. In some agineering modifications to the process uce emissions to acceptable levels. |
| dividual protection measur | es | |
| Hygiene measures | before eating, smoking and using t Appropriate techniques should be u Wash contaminated clothing before safety showers are close to the wo | oroughly after handling chemical products, he lavatory and at the end of the working period used to remove potentially contaminated clothing e reusing. Ensure that eyewash stations and rkstation location. |
| Eye protection <u>Skin protection</u> | : Safety glasses with side shields. | |
| Hand protection | be worn at all times when handling this is necessary. Considering the check during use that the gloves an should be noted that the time to bre different for different glove manufa | ves complying with an approved standard should chemical products if a risk assessment indicate parameters specified by the glove manufacturer re still retaining their protective properties. It eakthrough for any glove material may be cturers. In the case of mixtures, consisting of time of the gloves cannot be accurately |

Version

Section 8. Exposure controls/personal protection

| Gloves | : For prolonged or repeated handling, use the following type of gloves: |
|------------------------|--|
| | Recommended: polyvinyl alcohol (PVA), Viton® May be used: nitrile rubber |
| Body protection | : Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. When there is a risk of ignition from static electricity, wear anti-static protective clothing. For the greatest protection from static discharges, clothing should include anti-static overalls, boots and gloves. |
| Other skin protection | : Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. |
| Respiratory protection | : Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator. If workers are exposed to concentrations above the exposure limit, they must use appropriate, certified respirators. Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. |

Section 9. Physical and chemical properties

| <u>Appearance</u> | | | |
|--|---|---------------------------|---------------------|
| Physical state | 1 | Liquid. | |
| Color | 4 | Various | |
| Odor | 4 | Aromatic. | |
| рН | 4 | Not applicable. | |
| Melting point | 1 | Not available. | |
| Boiling point | 1 | >37.78°C (>100°F) | |
| Flash point | 1 | Closed cup: 38.5°C (101.3 | °F) |
| Evaporation rate | 1 | Not available. | |
| Flammability (solid, gas) | 1 | Not available. | |
| Lower and upper explosive (flammable) limits | : | Not available. | |
| Vapor pressure | 1 | Not available. | |
| Vapor density | 1 | Not available. | |
| Relative density | 4 | 1.09 | |
| Colubility/icc) | | Media | Result |
| Solubility(ies) | : | cold water | Not soluble |
| Partition coefficient: n- octanol/water | : | Not applicable. | |
| Auto-ignition temperature | 1 | Not available. | |
| Decomposition temperature | 1 | Not available. | |
| Viscosity | : | Kinematic (40°C (104°F)): | >21 mm²/s (>21 cSt) |

24 November 2022

Section 10. Stability and reactivity

| Reactivity | : No specific test data related to reactivity available for this product or its ingredients. |
|------------------------------------|--|
| Chemical stability | : The product is stable. |
| Possibility of hazardous reactions | : Under normal conditions of storage and use, hazardous reactions will not occur. |
| Conditions to avoid | : When exposed to high temperatures may produce hazardous decomposition products. |
| Incompatible materials | : Keep away from the following materials to prevent strong exothermic reactions: oxidizing agents, strong alkalis, strong acids. |
| Hazardous decomposition products | : Depending on conditions, decomposition products may include the following materia carbon oxides metal oxide/oxides |

Section 11. Toxicological information

| Ingestion | : Can cause central nervous system (CNS) depression. |
|---------------------|---|
| Symptoms related to | the physical, chemical and toxicological characteristics |
| Eye contact | : Adverse symptoms may include the following: pain or irritation watering redness |
| Inhalation | : Adverse symptoms may include the following: nausea or vomiting headache drowsiness/fatigue dizziness/vertigo unconsciousness reduced fetal weight increase in fetal deaths skeletal malformations |
| Skin contact | : Adverse symptoms may include the following: irritation redness dryness cracking reduced fetal weight increase in fetal deaths skeletal malformations |
| Ingestion | : Adverse symptoms may include the following: reduced fetal weight increase in fetal deaths skeletal malformations |

Delayed and immediate effects and also chronic effects from short and long term exposure

| utilized as a raw material in a liquid coating formulation. In this case, the TiO2 particles are bound in a matrix with no meaningful potential for human exposure unbound particles of TiO2 when the product is applied with a brush or roller. Sanding the coating surface or mist from spray applications may be harmful depending on the duration and level of exposure and require the use of appropria personal protective equipment and/or engineering controls (see Section 8). Exposure to component solvent vapor concentrations in excess of the stated occupational exposure limit may result in adverse health effects such as mucous membrane and respiratory system irritation and adverse effects on the kidneys, I and central nervous system. Symptoms and signs include headache, dizziness, fatigue, muscular weakness, drowsiness and, in extreme cases, loss of consciousness. Solvents may cause some of the above effects by absorption through the skin. There is some evidence that repeated exposure to organic solv vapors in combination with constant loud noise can cause greater hearing loss th expected from exposure to noise alone. If splashed in the eyes, the liquid may cause irritation and reversible damage. Ingestion may cause nausea, diarrhea a vomiting. This takes into account, where known, delayed and immediate effects and also chronic effects of components from short-term and long-term exposure oral, inhalation and dermal routes of exposure and eye contact. |

Section 11. Toxicological information

| | - |
|--------------------------------|--|
| Potential immediate effects | : There are no data available on the mixture itself. |
| Potential delayed effects | : There are no data available on the mixture itself. |
| <u>Long term exposure</u> | |
| Potential immediate effects | : There are no data available on the mixture itself. |
| Potential delayed effects | : There are no data available on the mixture itself. |
| Potential chronic health eff | ects |
| Not available. | |
| General | : Causes damage to organs through prolonged or repeated exposure. Prolonged or repeated contact can defat the skin and lead to irritation, cracking and/or dermatitis. |
| | |

| | | repeated contact can defat the skin and lead to imitation, cracking and/or dermatitis |
|-----------------|---|---|
| Carcinogenicity | 1 | May cause cancer. Risk of cancer depends on duration and level of exposure. |
| Mutagenicity | 1 | No known significant effects or critical hazards. |

| Reproductive toxicity | : Suspected of damaging fertility or the unborn child. |
|-----------------------|--|
|-----------------------|--|

Numerical measures of toxicity

Acute toxicity estimates

| Product/ingredient name | Oral (mg/ Dermal kg) (mg/kg) | | Inhalation (gases) (ppm) | Inhalation (vapors) (mg/l) | Inhalation (dusts and mists) (mg/l) | |
|-------------------------------|---------------------------------|---------|--------------------------------|----------------------------------|--|--|
| GMARINE 48 BASE L | 69533.9 | 31635.8 | 24696.4 | 59.5 | 11.2 | |
| nonane | N/A | N/A | 3200 | 16.79 | N/A | |
| 1,2,4-trimethylbenzene | 5000 | N/A | N/A | 18 | 1.5 | |
| xylene | 4300 | 1700 | N/A | 11 | 1.5 | |
| neodecanoic acid, cobalt salt | 1098 | N/A | N/A | N/A | N/A | |
| ethylbenzene | 3500 | 17800 | N/A | 17.8 | 1.5 | |
| 2-butanone oxime | 100 | 1100 | N/A | N/A | N/A | |
| cumene | 1400 | 12300 | N/A | 39 | N/A | |

Other information

: Not available.

Section 12. Ecological information

| Ecotoxicity | | | |
|---|--|---|----------------------|
| Product/ingredient name | Result | Species | Exposure |
| Manium dioxide 2-ethylhexanoic acid, zirconium salt | Acute LC50 >100 mg/l Fresh water Acute LC50 >100 mg/l | Daphnia - Daphnia magna Fish | 48 hours 96 hours |
| ethylbenzene | Acute EC50 1.8 mg/l Fresh water Chronic NOEC 1 mg/l Fresh water | Daphnia Daphnia - Ceriodaphnia dubia | 48 hours - |

Persistence/degradability

| Product/ingredient name | Test | Result | Dose | Inoculum |
|-------------------------|------|--------------------------|------|----------|
| ethylbenzene | - | 79 % - Readily - 10 days | - | - |

| English (US) | Colombia | 12/15 |

Section 12. Ecological information

| Product/ingredient name | Aquatic half-life | Photolysis | Biodegradability |
|-------------------------|-------------------|------------|------------------|
| x ylene | - | - | Readily |
| ethylbenzene | - | - | Readily |

Bioaccumulative potential

| Product/ingredient name | LogPow | BCF | Potential |
|-------------------------|--------|-------------|-----------|
| ronane | 5.65 | - | high |
| 1,2,4-trimethylbenzene | 3.63 | 120.23 | low |
| xylene | 3.12 | 7.4 to 18.5 | low |
| ethylbenzene | 3.6 | 79.43 | low |
| 2-butanone oxime | 0.63 | 5.01 | low |
| cumene | 3.55 | 35.48 | low |

Mobility in soil

| Soil/water | partition |
|-------------|--------------------|
| coefficient | (K _{oc}) |

: Not available.

Other adverse effects

: No known significant effects or critical hazards.

Section 13. Disposal considerations

: The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and nonrecyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapor from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

Section 14. Transport information

Section 14. Transport information

| | - | | | |
|-----------------------------|--|--|--|--|
| Environmental | Yes. The | Yes. The | Yes. | Yes. The |
| hazards | environmentally | environmentally | | environmentally |
| | hazardous substance mark is not required. | hazardous substance mark is not required. | | hazardous substance mark is not required. |
| Marine pollutant substances | Not applicable. | Not applicable. | (Naphtha (petroleum), hydrodesulfurized heavy, nonane) | Not applicable. |

Additional information

| UN | : None identified. |
|--------------------|--|
| Brazil | : None identified. |
| Risk number | : 30 |
| IMDG | : The marine pollutant mark is not required when transported in sizes of ≤5 L or ≤5 kg. |
| ΙΑΤΑ | : The environmentally hazardous substance mark may appear if required by other transportation regulations. |

Special precautions for user : Transport within user's premises: always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

Transport in bulk according : Not applicable. to IMO instruments

Section 15. Regulatory information

Safety, health and environmental regulations specific for the product : No known specific national and/or regional regulations applicable to this product (including its ingredients).

Section 16. Other information

| <u>History</u> | |
