# Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II, as amended by UK REACH Regulation SI 2019/758

# **SAFETY DATA SHEET**

Date of issue/Date of revision

: 30 December 2022 Version

: 1.02

# SECTION 1: Identification of the substance/mixture and of the company/ undertaking

| 1.1 Product identifier           |   |
|----------------------------------|---|
| Product name                     | : SIGMACOVER 246/410/430/620 HARDENER                             |
| Product code                     | : 00327794  |
| Product description              | :   |
| Product type                     | : Liquid.   |
| Other means of<br>identification | : Not available.  |
| 1.2 Relevant identified uses     | of the substance or mixture and uses advised against              |
| Product use                      | : Professional applications, Used by spraying.                    |
| Use of the substance/<br>mixture | : Coating.  |
| Uses advised against             | : Product is not intended, labelled or packaged for consumer use. |

#### 1.3 Details of the supplier of the safety data sheet

PPG Coatings Belgium BV/SRL Tweemontstraat 104 B-2100 Deurne Belgium Telephone +32-33606311 Fax +32-33606435

e-mail address of person : Product.Stewardship.EMEA@ppg.com

responsible for this SDS

**1.4 Emergency telephone number** 

Supplier

+31 20 4075210

# **SECTION 2: Hazards identification**

2.1 Classification of the substance or mixture

Product definition : Mixture Classification according to UK CLP/GHS

Fam. Liq. 3, H226 Skin Corr. 1B, H314 Eye Dam. 1, H318 Skin Sens. 1, H317 Repr. 2, H361fd STOT SE 3, H335 STOT RE 2, H373 Aquatic Acute 1, H400 Aquatic Chronic 1, H410

The product is classified as hazardous according to UK CLP Regulation SI 2019/720 as amended.

See Section 16 for the full text of the H statements declared above.

See Section 11 for more detailed information on health effects and symptoms.

### 2.2 Label elements

|  | Conforms to Regulation (EC) No | 1907/2006 (REACH), Annex II, as amended I | by UK REACH Regulation SI 2019/758 |

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment, are PBTs, vPvBs or Substances of equivalent concern, or have been assigned a workplace exposure limit and hence require reporting in this section. Xylene: Several REACH registrations cover the REACH registered substance with xylene isomers, ethylbenzene (and toluene). The other REACH Registrations include: 01-2119555267-33 reaction mass of ethylbenzene and m-xylene and p-xylene, 01-2119486136-34 Aromatic hydrocarbons, C8, 01-2119539452-40 reaction mass of ethylbenzene and xylene. Type

[1] Substance classified with a health or environmental hazard

[2] Substance with a workplace exposure limit

[3] Substance of equivalent concern

Occupational exposure limits, if available, are listed in Section 8.

SUB codes represent substances without registered CAS Numbers.

| SIGMACOVE | R 246/410/430/620 HARDENER |                                |                    |

# **SECTION 4: First aid measures**

| 4.1 Description of first aid n | neasures  |
|--------------------------------|---|
| Eye contact                    | : Check for and remove any contact lenses. Immediately flush eyes with running water for at least 15 minutes, keeping eyelids open. Seek immediate medical attention.   |
| Inhalation                     | <ul> <li>Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is<br/>irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained<br/>personnel.</li> </ul>  |
| Skin contact                   | <ul> <li>Remove contaminated clothing and shoes. Wash skin thoroughly with soap and water<br/>or use recognised skin cleanser. Do NOT use solvents or thinners.</li> </ul>  |
| Ingestion                      | <ul> <li>If swallowed, seek medical advice immediately and show the container or label. Keep<br/>person warm and at rest. Do NOT induce vomiting.</li> </ul>  |
| Protection of first-aiders     | : No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. |

### 4.2 Most important symptoms and effects, both acute and delayed

| Potential acute health effects |     |   |
|--------------------------------|-----|---|
| Eye contact                    | :   | Causes serious eye damage.  |
| Inhalation                     | :   | May cause respiratory irritation.   |
| Skin contact                   | :   | Causes severe burns. Defatting to the skin. May cause an allergic skin reaction.  |
| Ingestion                      | :   | Corrosive to the digestive tract. Causes burns.   |
| Over-exposure signs/sympt      | on  | <u>15</u>   |
| Eye contact                    | :   | Adverse symptoms may include the following:<br>pain<br>watering<br>redness  |
| Inhalation                     | :   | Adverse symptoms may include the following:<br>respiratory tract irritation<br>coughing<br>reduced foetal weight<br>increase in foetal deaths<br>skeletal malformations                                     |
| Skin contact                   | :   | Adverse symptoms may include the following:<br>pain or irritation<br>redness<br>dryness<br>cracking<br>blistering may occur<br>reduced foetal weight<br>increase in foetal deaths<br>skeletal malformations |
| Ingestion                      | :   | Adverse symptoms may include the following:<br>stomach pains<br>reduced foetal weight<br>increase in foetal deaths<br>skeletal malformations  |
| 4.3 Indication of any immedia  | ate | medical attention and special treatment needed  |
| Notes to physician             | ;   | In case of inhalation of decomposition products in a fire, symptoms may be delayed.<br>The exposed person may need to be kept under medical surveillance for 48 hours.                                      |
| Specific treatments            | :   | No specific treatment.  |

| Code : 00327794<br>SIGMACOVER 246/410/430/                 | 620 HARDENER   | Date of issue/Date of revision  | : 30 December 2022   |
|--|--|---|--|
| SECTION 5: Firefigh  | iting measure  | es s  |  |
| 5.1 Extinguishing media<br>Suitable extinguishing<br>media | : Use dry chemi  | cal, CO <sub>2</sub> , water spray (fog) or foam.   |  |
| Unsuitable extinguishing media                             | : Do not use wa  | ter jet.  |  |
| 5.2 Special hazards arising                                | from the substance   | e or mixture  |  |
| Hazards from the substance or mixture                      | In a fire or if he<br>the risk of a su<br>long lasting eff | uid and vapour. Runoff to sewer may crea<br>eated, a pressure increase will occur and t<br>ibsequent explosion. This material is very<br>fects. Fire water contaminated with this m<br>from being discharged to any waterway, s | the container may burst, with<br>toxic to aquatic life with<br>aterial must be contained |
| Hazardous combustion products                              | : Decomposition<br>carbon oxides<br>nitrogen oxides        |   | rials:   |

| 5.3 Advice for firefighters                     |   |  |
|---|---|--|
| Special protective actions<br>for fire-fighters | - | Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool. |
| Special protective equipment for fire-fighters  | : | Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.  |

# **SECTION 6: Accidental release measures**

| 6.1 Personal precautions, | , protective equipment and emergency procedures                                       |
|---------------------------|---|
| For non-emergency         | : No action shall be taken involving any personal risk or without suitable training.  |
| personnel                 | Evacuate surrounding areas. Keep unnecessary and unprotected personnel from           |
|                           | entering. Do not touch or walk through spilt material. Shut off all ignition sources. |

|                          |   | No flares, smoking or flames in hazard area. Do not breathe vapour or mist.     |  |
|--------------------------|---|---|--|
|                          |   | Provide adequate ventilation. Wear appropriate respirator when ventilation is   |  |
|                          |   | inadequate. Put on appropriate personal protective equipment.                   |  |
| For emergency responders | ; | If specialised clothing is required to deal with the spillage, take note of any |  |
|                          |   | information in Castion 0 on avitable and unavitable materials. Cas also the     |  |

information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".

: Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains 6.2 Environmental precautions and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). Water polluting material. May be harmful to the environment if released in large quantities. Collect spillage.

#### 6.3 Methods and material for containment and cleaning up

| Small spill | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.  |
|-------------|---|
| Large spill | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach the release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilt product. Note: see Section 1 for |

SIGMACOVER 246/410/430/620 HARDENER

### SECTION 6: Accidental release measures

emergency contact information and Section 13 for waste disposal.

6.4 Reference to other<br/>sections: See Section 1 for emergency contact information.<br/>See Section 8 for information on appropriate personal protective equipment.<br/>See Section 13 for additional waste treatment information.

### SECTION 7: Handling and storage

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### 7.1 Precautions for safe handling

| Protective measures                    | : Put on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Avoid exposure - obtain special instructions before use. Avoid exposure during pregnancy. Do not handle until all safety precautions have been read and understood. Do not get in eyes or on skin or clothing. Do not breathe vapour or mist. Do not ingest. Avoid release to the environment. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Take precautionary measures against electrostatic discharges. Empty containers retain product residue and can be hazardous. Do not reuse container. |
|--|--|
| Advice on general occupational hygiene | : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.  |

#### 7.2 Conditions for safe storage, including any incompatibilities

Store between the following temperatures: 0 to 35°C (32 to 95°F). Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Eliminate all ignition sources. Separate from oxidising materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.

#### 7.3 Specific end use(s)

See Section 1.2 for Identified uses.

# **SECTION 8: Exposure controls/personal protection**

#### 8.1 Control parameters

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

| 8.2 Exposure controls            |     |   |
|----------------------------------|-----|---|
| Appropriate engineering controls | :   | Use only with adequate ventilation. Use process enclosures, local exhaust ventilation<br>or other engineering controls to keep worker exposure to airborne contaminants below<br>any recommended or statutory limits. The engineering controls also need to keep gas,<br>vapour or dust concentrations below any lower explosive limits. Use explosion-proof<br>ventilation equipment.  |
| Individual protection measu      | res |   |
| Hygiene measures                 | :   | Wash hands, forearms and face thoroughly after handling chemical products, before<br>eating, smoking and using the lavatory and at the end of the working period.<br>Appropriate techniques should be used to remove potentially contaminated clothing.<br>Contaminated work clothing should not be allowed out of the workplace. Wash<br>contaminated clothing before reusing. Ensure that eyewash stations and safety<br>showers are close to the workstation location. |
| Eye/face protection              | 1   | Chemical splash goggles and face shield.  |
| Skin protection                  |     |   |
| Hand protection                  | :   |   |

#### SIGMACOVER 246/410/430/620 HARDENER

# **SECTION 8: Exposure controls/personal protection**

|                                 | Chemical-resistant, impervious gloves complying with an approved standard should be<br>worn at all times when handling chemical products if a risk assessment indicates this is<br>necessary. Considering the parameters specified by the glove manufacturer, check<br>during use that the gloves are still retaining their protective properties. It should be<br>noted that the time to breakthrough for any glove material may be different for different<br>glove manufacturers. In the case of mixtures, consisting of several substances, the<br>protection time of the gloves cannot be accurately estimated. When prolonged or<br>frequently repeated contact may occur, a glove with a protection class of 6<br>(breakthrough time greater than 480 minutes according to EN 374) is recommended.<br>When only brief contact is expected, a glove with a protection class of 2 or higher<br>(breakthrough time greater than 30 minutes according to EN 374) is recommended.<br>The user must check that the final choice of type of glove selected for handling this<br>product is the most appropriate and takes into account the particular conditions of use,<br>as included in the user's risk assessment.<br>butyl rubber |
|---------------------------------|--|
| Body protection                 | : Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. When there is a risk of ignition from static electricity, wear anti-static protective clothing. For the greatest protection from static discharges, clothing should include anti-static overalls, boots and gloves.  |
| Other skin protection           | : Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.  |
| Respiratory protection          | : Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator. If workers are exposed to concentrations above the exposure limit, they must use appropriate, certified respirators. Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Wear a respirator conforming to EN140. Filter type: organic vapour (Type A) and particulate filter P3   |
| Environmental exposure controls | : Emissions from ventilation or work process equipment should be checked to ensure<br>they comply with the requirements of environmental protection legislation. In some<br>cases, fume scrubbers, filters or engineering modifications to the process equipment<br>will be necessary to reduce emissions to acceptable levels.  |

# **SECTION 9: Physical and chemical properties**

The conditions of measurement of all properties are at standard temperature and pressure unless otherwise indicated.

There are no data available on the mixture itself.

#### Specific target organ toxicity (single exposure)

| Product/ingredient name | Category                 | Route of exposure | Target organs                                       |
|-------------------------|--------------------------|-------------------|---|
| 2-methylpropan-1-ol     | Category 3               | -                 | Respiratory tract<br>irritation                     |
| xylene                  | Category 3<br>Category 3 | -                 | Narcotic effects<br>Respiratory tract<br>irritation |

#### Specific target organ toxicity (repeated exposure)

| Product/ingredient name | Category   | Route of exposure | Target organs  |
|-------------------------|------------|-------------------|----------------|
| ethylbenzene            | Category 2 | -                 | hearing organs |

#### **Aspiration hazard**

| Product/ingredient name | Result                         |
|-------------------------|--------------------------------|
| ethylbenzene            | ASPIRATION HAZARD - Category 1 |
| xylene                  | ASPIRATION HAZARD - Category 1 |

#### Information on likely routes : Not available.

of exposure

Potential acute health effects

- Eye contact : Causes serious eye damage.
- Inhalation : May cause respiratory irritation.
- **Skin contact** : Causes severe burns. Defatting to the skin. May cause an allergic skin reaction.
- : Corrosive to the digestive tract. Causes burns. Ingestion

# Symptoms related to the physical, chemical and toxicological characteristics

- Eye contact
- : Adverse symptoms may include the following: pain watering redness

#### **Ozone depleting substances**

Not listed.

#### Annex XVII - Restrictions : Not applicable. on the manufacture, placing on the market and use of certain dangerous substances, mixtures and articles

#### Seveso Directive

This product is controlled under the Seveso Directive.

### Danger criteria

| Category  |   |
|-----------|---|
| P5c<br>E1 |   |
|           | 1 |

# **SECTION 16: Other information**

Indicates information that has changed from previously issued version.

| Code : 00327794                     | Date of issue/Date of revision | : 30 December 2022 |
|-------------------------------------|--------------------------------|--------------------|
| SIGMACOVER 246/410/430/620 HARDENER |                                |                    |

# SECTION 16: Other information

| Abbreviations and | : ATE = Acute Toxicity Estimate   |
|-------------------|---|
|                   |   |
| acronyms          | GB CLP = UK CLP (EC No 1272/2008) on the Classification, Labelling and        |
|                   | Packaging of Substances and Mixtures as amended by (EU Exit) Regulations 2019 |
|                   | No. 720 and amendments  |
|                   | DMEL = Derived Minimal Effect Level   |
|                   | DNEL = Derived No Effect Level  |
|                   | EUH statement = GB CLP-specific Hazard statement                              |
|                   | N/A = Not available   |
|                   | PBT = Persistent, Bioaccumulative and Toxic                                   |
|                   | PNEC = Predicted No Effect Concentration                                      |
|                   | RRN = REACH Registration Number   |
|                   | SGG = Segregation Group   |
|                   | vPvB = Very Persistent and Very Bioaccumulative                               |

# Procedure used to derive the classification

| Classification          | Justification         |  |
|-------------------------|-----------------------|--|
| Mam. Liq. 3, H226       | On basis of test data |  |
| Skin Corr. 1B, H314     | Calculation method    |  |
| Eye Dam. 1, H318        | Calculation method    |  |
| Skin Sens. 1, H317      | Calculation method    |  |
| Repr. 2, H361fd         | Calculation method    |  |
| STOT SE 3, H335         | Calculation method    |  |
| STOT RE 2, H373         | Calculation method    |  |
| Aquatic Acute 1, H400   | Calculation method    |  |
| Aquatic Chronic 1, H410 | Calculation method    |  |

#### Full text of abbreviated H statements

| H225   | Highly flammable liquid and vapour.                                      |
|--------|--|
| H226   | Flammable liquid and vapour.   |
| H302   | Harmful if swallowed.  |
| H304   | May be fatal if swallowed and enters airways.                            |
| H312   | Harmful in contact with skin.  |
| H314   | Causes severe skin burns and eye damage.                                 |
| H315   | Causes skin irritation.  |
| H317   | May cause an allergic skin reaction.                                     |
| H318   | Causes serious eye damage.   |
| H319   | Causes serious eye irritation.   |
| H332   | Harmful if inhaled.  |
| H335   | May cause respiratory irritation.  |
| H336   | May cause drowsiness or dizziness.                                       |
| H361   | Suspected of damaging fertility or the unborn child.                     |
| H361fd | Suspected of damaging fertility. Suspected of damaging the unborn child. |
| H373   | May cause damage to organs through prolonged or repeated exposure.       |
| H400   | Very toxic to aquatic life.  |
| H410   | Very toxic to aquatic life with long lasting effects.                    |
| H411   | Toxic to aquatic life with long lasting effects.                         |
| H412   | Harmful to aquatic life with long lasting effects.                       |
