# SAFETY DATA SHEET

Date of issue 2/24/2023 (month/day/year)

Version 8

### Section 1. Chemical product and company identification

| A. Product name | : PSX 700 BASE ALUMINIUM |
|-----------------|--------------------------|
| Product code    | : 00365376               |

#### B. Relevant identified uses of the substance or mixture and uses advised against

| Product use                         | : Professional applications, Used by spraying.  |
|-------------------------------------|---|
| Use of the substa<br>mixture        | nce/ : Coating.   |
| Uses advised aga                    | <b>inst</b> : Product is not intended, labelled or packaged for consumer use.             |
| C. Supplier's or Imp<br>information | (680-090)<br>19, Yeocheon-ro 217beon-gil, Nam-gu,<br>Ulsan, Korea<br>Tel: +82-52-210-8222 |
| Email Address                       | Korea.MSDS@PPG.COM  |
| Emergency telep<br>number:          | hone : +82-52-210-8222  |

### Section 2. Hazards identification

A. Hazard classification : FLAMMABLE LIQUIDS - Category 3 SKIN SENSITIZATION - Category 1 AQUATIC HAZARD (LONG-TERM) - Category 2 This product is classified in accordance with the Industrial Safety and Health Act and the Chemical Control Act.

B. GHS label elements, including precautionary statements

| Symbol                   |   |  |  |  |  |  |
|--------------------------|---|--|--|--|--|--|
| Signal word              | : | Warning  |  |  |  |  |
| Hazard statements        | : | H226 - Flammable liquid and vapor.<br>H317 - May cause an allergic skin reaction.<br>H411 - Toxic to aquatic life with long lasting effects. |  |  |  |  |
| Precautionary statements |   |  |  |  |  |  |

Date of issue 2/24/2023 (month/day/year)

Product name PSX 700 BASE ALUMINIUM

### Section 2. Hazards identification

|    | Prevention                           | : | <ul> <li>P280 - Wear protective gloves.</li> <li>P210 - Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.</li> <li>P241 - Use explosion-proof electrical, ventilating or lighting equipment.</li> <li>P242 - Use non-sparking tools.</li> <li>P243 - Take action to prevent static discharges.</li> <li>P273 - Avoid release to the environment.</li> <li>P261 - Avoid breathing vapor.</li> </ul> |
|----|--------------------------------------|---|---|
|    | Response                             | : | <ul> <li>P391 - Collect spillage.</li> <li>P362 + P364 - Take off contaminated clothing and wash it before reuse.</li> <li>P302 + P352 - IF ON SKIN: Wash with plenty of water.</li> <li>P333 + P313 - If skin irritation or rash occurs: Get medical advice or attention.</li> </ul>   |
|    | Storage                              | : | P403 + P235 - Store in a well-ventilated place. Keep cool.  |
|    | Disposal                             | : | P501 - Dispose of contents and container in accordance with all local, regional, national and international regulations.  |
| C. | Other hazards which do not result in | : | Prolonged or repeated contact may dry skin and cause irritation.  |

classification

# Section 3. Composition/information on ingredients

#### **CAS number/other identifiers**

CAS number

: Not applicable.

| Chemical name                            | Common name                              | Identifiers     | %        |
|--|--|-----------------|----------|
| 4-Isopropylidenedicyclohexanol,          | cyclohexanol, 4,4'-(1-methylethylidene)  | CAS: 30583-72-3 | 30 -     |
| oligomeric reaction products with        | bis-, polymer with (chloromethyl)oxirane |                 | <40      |
| 1-chloro-2,3-epoxypropane                |  |                 |          |
| Aluminium powder (stabilized)            | ALUMINUM POWDER                          | CAS: 7429-90-5  | 10 -<20  |
| Naphtha (petroleum), hydrotreated heavy  | NAPHTHA (PETROLEUM);                     | CAS: 64742-48-9 | 1 - <5   |
|  | HYDROTREATED HEAVY                       |                 |          |
| bis(1,2,2,6,6-pentamethyl-4-piperidyl)   | BIS(PENTAMETHYLPIPERIDYL)                | CAS: 41556-26-7 | 1 - <5   |
| sebacate                                 | SEBACATE                                 |                 |          |
| Solvent naphtha (petroleum), light       | SOLVENT NAPHTHA (PETROLEUM),             | CAS: 64742-95-6 | 1 - <5   |
| aromatic                                 | LIGHT AROMATIC                           |                 |          |
| methyl 1,2,2,6,6-pentamethyl-4-piperidyl | METHYL-(1,2,2,6,6-PENTAMETHYL-           | CAS: 82919-37-7 | 0.1 - <1 |
| sebacate                                 | 4-PIPERDIYL) SEBACATE                    |                 |          |
| Toluene                                  | TOLUENE                                  | CAS: 108-88-3   | 0.1 - <1 |

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

## Section 4. First aid measures

Product name PSX 700 BASE ALUMINIUM

| Α. | Eye contact                | : | Remove contact lenses, irrigate copiously with clean, fresh water, holding the eyelids apart for at least 10 minutes and seek immediate medical advice.   |
|----|----------------------------|---|---|
| В. | Skin contact               | : | Remove contaminated clothing and shoes. Wash skin thoroughly with soap and water or use recognized skin cleanser. Do NOT use solvents or thinners.  |
| C. | Inhalation                 | : | Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel.  |
| D. | Ingestion                  | : | If swallowed, seek medical advice immediately and show this container or label.<br>Keep person warm and at rest. Do NOT induce vomiting.  |
| Ε. | Notes to physician         | : | In case of inhalation of decomposition products in a fire, symptoms may be delayed.<br>The exposed person may need to be kept under medical surveillance for 48 hours.  |
|    | Specific treatments        | 1 | No specific treatment.  |
|    | Protection of first-aiders | : | No action shall be taken involving any personal risk or without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. |

See toxicological information (Section 11)

# Section 5. Fire-fighting measures

|    |  |   | -   |
|----|--|---|---|
| Α. | Extinguishing media                        |   |   |
|    | Suitable extinguishing media               | : | Use dry chemical, CO <sub>2</sub> , water spray (fog) or foam.  |
|    | Unsuitable<br>extinguishing media          | : | Do not use water jet.   |
| Β. | Specific hazards arising from the chemical | : | Flammable liquid and vapor. Runoff to sewer may create fire or explosion hazard.<br>In a fire or if heated, a pressure increase will occur and the container may burst, with<br>the risk of a subsequent explosion. This material is toxic to aquatic life with long<br>lasting effects. Fire water contaminated with this material must be contained and<br>prevented from being discharged to any waterway, sewer or drain. |
|    | Hazardous thermal decomposition products   | : | Decomposition products may include the following materials:<br>carbon oxides<br>nitrogen oxides<br>halogenated compounds<br>metal oxide/oxides  |
| C. | Special equipment for fire-fighting        | : | Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.   |
|    | Fire-fighting procedures                   | : | Promptly isolate the scene by removing all persons from the vicinity of the incident if<br>there is a fire. No action shall be taken involving any personal risk or without<br>suitable training. Move containers from fire area if this can be done without risk.<br>Use water spray to keep fire-exposed containers cool.   |
|    |  |   |   |

Product name PSX 700 BASE ALUMINIUM

## Section 6. Accidental release measures

| A. Personal precautions,<br>protective equipment and<br>emergency procedures | :  | No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilled material. Shut off all ignition sources.<br>No flares, smoking or flames in hazard area. Avoid breathing vapor or mist.<br>Provide adequate ventilation. Wear appropriate respirator when ventilation is<br>inadequate. Put on appropriate personal protective equipment.   |
|--|----|---|
| B. Environmental precautions   | :  | Avoid dispersal of spilled material and runoff and contact with soil, waterways,<br>drains and sewers. Inform the relevant authorities if the product has caused<br>environmental pollution (sewers, waterways, soil or air). Water polluting material.<br>May be harmful to the environment if released in large quantities. Collect spillage.   |
| C. Methods and materials for   | СС | ontainment and cleaning up  |
| Small spill  | :  | Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble.<br>Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.   |
| Large spill  | :  | Stop leak if without risk. Move containers from spill area. Use spark-proof tools<br>and explosion-proof equipment. Approach release from upwind. Prevent entry into<br>sewers, water courses, basements or confined areas. Wash spillages into an<br>effluent treatment plant or proceed as follows. Contain and collect spillage with non-<br>combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth<br>and place in container for disposal according to local regulations (see Section 13).<br>Dispose of via a licensed waste disposal contractor. Contaminated absorbent<br>material may pose the same hazard as the spilled product. Note: see Section 1 for<br>emergency contact information and Section 13 for waste disposal. |

# Section 7. Handling and storage

| Α. | Precautions for safe handling                                      | : | Fut on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Do not get in eyes or on skin or clothing. Do not ingest. Avoid breathing vapor or mist. Avoid release to the environment. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Take precautionary measures against electrostatic discharges. Empty containers retain product residue and can be hazardous. Do not reuse container. |
|----|--|---|--|
| В. | Conditions for safe<br>storage, including any<br>incompatibilities | : | Store between the following temperatures: 0 to 35°C (32 to 95°F). Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Eliminate all ignition sources. Separate from oxidizing materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.   |

Korea (GHS) Page: 4/13

Product name PSX 700 BASE ALUMINIUM

# Section 8. Exposure controls/personal protection

### A. Occupational exposure limits

|    | Ingredient name                      |                                    | Exposure limits  |
|----|--------------------------------------|------------------------------------|--|
|    | Aluminium powder (stabiliz           | zed)                               | Ministry of Employment and Labor<br>(Republic of Korea, 1/2020).<br>TWA: 10 mg/m <sup>3</sup> 8 hours. Form: Dust<br>Ministry of Employment and Labor<br>(Republic of Korea, 1/2020).<br>STEL: 150 ppm 15 minutes.<br>TWA: 50 ppm 8 hours.   |
|    | Recommended<br>monitoring procedures | nat                                | erence should be made to appropriate monitoring standards. Reference to onal guidance documents for methods for the determination of hazardous stances will also be required.  |
| В. | Appropriate engineering controls     | ver<br>cor<br>als                  | only with adequate ventilation. Use process enclosures, local exhaust<br>tilation or other engineering controls to keep worker exposure to airborne<br>taminants below any recommended or statutory limits. The engineering controls<br>need to keep gas, vapor or dust concentrations below any lower explosive<br>s. Use explosion-proof ventilation equipment.  |
|    | Environmental<br>exposure controls   | the<br>cas                         | ssions from ventilation or work process equipment should be checked to ensure<br>comply with the requirements of environmental protection legislation. In some<br>es, fume scrubbers, filters or engineering modifications to the process<br>ipment will be necessary to reduce emissions to acceptable levels.  |
| c. | Personal protective equip            | oment                              |  |
|    | Respiratory protection               | : Re<br>ha<br>wo<br>ap<br>res      | spirator selection must be based on known or anticipated exposure levels, the<br>cards of the product and the safe working limits of the selected respirator. If<br>kers are exposed to concentrations above the exposure limit, they must use<br>propriate, certified respirators. Use a properly fitted, air-purifying or air-fed<br>pirator complying with an approved standard if a risk assessment indicates this is<br>cessary.  |
|    | Eye protection                       |                                    | ety glasses with side shields.   |
|    | Hand protection                      | be<br>thi<br>ch<br>sh<br>dif<br>se | emical-resistant, impervious gloves complying with an approved standard should<br>worn at all times when handling chemical products if a risk assessment indicates<br>is necessary. Considering the parameters specified by the glove manufacturer,<br>eck during use that the gloves are still retaining their protective properties. It<br>build be noted that the time to breakthrough for any glove material may be<br>erent for different glove manufacturers. In the case of mixtures, consisting of<br>eral substances, the protection time of the gloves cannot be accurately<br>imated. |
|    | Gloves                               | : bu                               | yl rubber  |
|    | Body protection                      | be<br>be<br>we                     | sonal protective equipment for the body should be selected based on the task<br>ng performed and the risks involved and should be approved by a specialist<br>ore handling this product. When there is a risk of ignition from static electricity,<br>ar anti-static protective clothing. For the greatest protection from static<br>charges, clothing should include anti-static overalls, boots and gloves.  |
|    | Hygiene measures                     | : Wa<br>ea<br>Ap<br>Co<br>co       | ish hands, forearms and face thoroughly after handling chemical products, before<br>ing, smoking and using the lavatory and at the end of the working period.<br>propriate techniques should be used to remove potentially contaminated clothing.<br>Intaminated work clothing should not be allowed out of the workplace. Wash<br>itaminated clothing before reusing. Ensure that eyewash stations and safety<br>owers are close to the workstation location.   |
|    |                                      |                                    | Korea (GHS) Page: 5/13   |

Product name PSX 700 BASE ALUMINIUM

### Section 9. Physical and chemical properties

The conditions of measurement of all properties are at standard temperature and pressure unless otherwise indicated.

| Α.             | Appearance  |       |  |           |                   |               |          |              |             |

# Section 10. Stability and reactivity

| Α.         | Chemical stability                  | : | The product is stable.   |
|------------|-------------------------------------|---|--|
|            | Possibility of hazardous reactions  | : | Under normal conditions of storage and use, hazardous reactions will not occur.  |
| В.         | Conditions to avoid                 | : | When exposed to high temperatures may produce hazardous decomposition products.  |
| <b>C</b> . | Incompatible materials              | : | Keep away from the following materials to prevent strong exothermic reactions: oxidizing agents, strong alkalis, strong acids.                               |
| D.         | Hazardous<br>decomposition products | : | Depending on conditions, decomposition products may include the following materials: carbon oxides nitrogen oxides halogenated compounds metal oxide/ oxides |

## Section 11. Toxicological information

| A. Information on th routes of exposu |  |
|---------------------------------------|--|
| Potential acute heal                  | th effects   |
| Inhalation                            | : No known significant effects or critical hazards.  |
| Ingestion                             | : No known significant effects or critical hazards.  |
| Skin contact                          | : Defatting to the skin. May cause skin dryness and irritation. May cause an allergic skin reaction. |
| Eye contact                           | : No known significant effects or critical hazards.  |
| <u>Over-exposure sign</u>             | <u>s/symptoms</u>  |
| Inhalation                            | No specific data   |

| Inhalation   | : No specific data.   |
|--------------|---|
| Ingestion    | : No specific data.   |
| Skin contact | : Adverse symptoms may include the following:<br>irritation<br>redness<br>dryness<br>cracking |
| Eye contact  | : No specific data.   |
|              |   |

#### B. Health hazards

#### Acute toxicity

## Section 11. Toxicological information

#### Potential chronic health effects

| General               | <ul> <li>Prolonged or repeated contact can defat the skin and lead to irritation, cracking and/or<br/>dermatitis. Once sensitized, a severe allergic reaction may occur when subsequently<br/>exposed to very low levels.</li> </ul> |
|-----------------------|--|
| Carcinogenicity       | : No known significant effects or critical hazards.  |
| Mutagenicity          | : No known significant effects or critical hazards.  |
| Reproductive toxicity | : No known significant effects or critical hazards.  |

#### **Additional information**

Prolonged or repeated contact may dry skin and cause irritation. Repeated exposure to high vapor concentrations may cause irritation of the respiratory system and permanent brain and nervous system damage. Inhalation of vapor/aerosol concentrations above the recommended exposure limits causes headaches, drowsiness and nausea and may lead to unconsciousness or death. Trimethoxysilanes are capable of forming methanol if hydrolyzed or ingested. If swallowed, methanol may be harmful or fatal or cause blindness. Avoid contact with skin and clothing.

#### C. Bioaccumulative potential

| Product/ingredient name | LogP <sub>ow</sub> | BCF  | Potential |
|-------------------------|--------------------|------|-----------|
| Foluene                 | 2.73               | 8.32 | low       |

### D. <u>Mobility in soil</u>

Soil/water partition : Not available. coefficient (Koc)

E. <u>Other adverse effects</u> : No known significant effects or critical hazards.

### Section 13. Disposal considerations

| Α. | Disposal methods :     | The generation of waste should be avoided or minimized wherever possible.<br>Disposal of this product, solutions and any by-products should at all times comply<br>with the requirements of environmental protection and waste disposal legislation and<br>any regional local authority requirements. Dispose of surplus and non-recyclable<br>products via a licensed waste disposal contractor. Waste should not be disposed of<br>untreated to the sewer unless fully compliant with the requirements of all authorities<br>with jurisdiction. Waste packaging should be recycled. Incineration or landfill<br>should only be considered when recycling is not feasible. |
|----|------------------------|---|
| Β. | Disposal precautions : | This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapor from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.  |

| Environmental<br>hazards             | Yes. The environmentally<br>hazardous substance mark is<br>not required. | Yes.   | Yes. The environmentally<br>hazardous substance mark is<br>not required. |
| E. Marine<br>pollutant<br>substances | Not applicable.  | (bis(1,2,2,6,6-pentamethyl-<br>4-piperidyl) sebacate, Solvent<br>naphtha (petroleum), light<br>aromatic) | Not applicable.  |

#### **Additional information**

| UN   | : None identified.  |
|------|---|
| IMDG | : The marine pollutant mark is not required when transported in sizes of $\leq$ 5 L or $\leq$ 5 kg. |
| ΙΑΤΑ | : The environmentally hazardous substance mark may appear if required by other transportation       |
|      | regulations.  |

# F. Special precaution which a user to be aware of or needs to comply with in connection with transport or transportation

**Transport within user's premises:** always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

#### Transport in bulk according : Not applicable. to IMO instruments

### Section 15. Regulatory information

| Α. | Regulation according to ISHA   |   |  |  |
|----|--|---|--|--|
|    | ISHA article 117<br>(Harmful substances<br>prohibited from<br>manufacture) | : None of the components are listed.                    |  |  |
|    | ISHA article 118<br>(Harmful substances<br>requiring permission)           | : None of the components are listed.                    |  |  |
|    | Article 2 of Youth Protection<br>Act on Substances Hazardous<br>to Youth   | : It is not allowed to sell to persons under the age of |  |  |

#### **Exposure Limits of Chemical Substances and Physical Factors**
