## **SAFETY DATA SHEET**

Date of issue/Date of revision 20 March 2023 Version 3.02

# Section 1. Identification of the substance/mixture and of the company/undertaking

| Product code                     | : 00218685                        |
|----------------------------------|-----------------------------------|
| Product name                     | : SIGMALINE 855 REP BASE RAL 5022 |
| Other means of<br>identification | : Not available.                  |
| Product type                     | : Liquid.                         |

| Relevant identified uses of the substance or mixture and uses advised against |  |  |  |
|---|--|--|--|
| Product use   | Coating.<br>Professional applications, Used by spraying.   |  |  |
| Uses advised against  | : Product is not intended, labelled or packaged for consumer use.  |  |  |
| Supplier's details  | : PPG Coatings (Thailand) Co., Ltd.<br>15 Rama 9 Road, Kwaeng Huamark,<br>Khet Bangkapi, Bangkok 10240 Thailand<br>T: 662-319-4190 #224<br>F: 662-319-4189 |  |  |
| Emergency telephone<br>number (with hours of<br>operation)                    | : CHEMTREC 001-800-13-203-9987 (CCN 17704)   |  |  |

### Section 2. Hazards identification

| Classification of the substance or mixture | <ul> <li>FLAMMABLE LIQUIDS - Category 4         ACUTE TOXICITY (dermal) - Category 5         SKIN CORROSION/IRRITATION - Category 3         SKIN SENSITIZATION - Category 1B         Fercentage of the mixture consisting of ingredient(s) of unknown acute dermal toxicity: 37.5%     </li> </ul> |
|--|--|
|  | Percentage of the mixture consisting of ingredient(s) of unknown hazards to the aquatic environment: 55%   |

#### **GHS label elements**

### Section 2. Hazards identification

| Hazard pictograms          | : |   |
|----------------------------|---|---|
| Signal word                | : | Warning   |
| Hazard statements          | : | Combustible liquid.<br>May be harmful in contact with skin.<br>Causes mild skin irritation.<br>May cause an allergic skin reaction.   |
| Precautionary statements   |   |   |
| Prevention                 | : | Wear protective gloves, protective clothing and eye or face protection. Keep away from flames and hot surfaces. No smoking. Avoid breathing vapor. Contaminated work clothing should not be allowed out of the workplace. |
| Response                   | : | Wash contaminated clothing before reuse. IF ON SKIN: Call a POISON CENTER or doctor if you feel unwell. Wash with plenty of water. If skin irritation or rash occurs: Get medical advice or attention.                    |
| Storage                    | : | Store in a well-ventilated place. Keep cool.  |
| Disposal                   | : | Dispose of contents and container in accordance with all local, regional, national and international regulations.   |
| Other hazards which do not | : | None known.   |

result in classification

**CAS** number/other identifiers

### Section 3. Composition/information on ingredients

Substance/mixture

: Mixture

| <b>CAS number</b> : Not applicable.      |         |            |
|--|---------|------------|
| Ingredient name                          | %       | CAS number |
| <mark>ቓ</mark> arium sulfate             | 25- <50 | 7727-43-7  |
| Talc , not containing asbestiform fibres | 10- <20 | 14807-96-6 |
| Phenol, methylstyrenated                 | 5- <10  | 68512-30-1 |
| Propylidynetrimethanol, propoxylated     | 5- <10  | 25723-16-4 |

Occupational exposure limits, if available, are listed in Section 8.

SUB codes represent substances without registered CAS Numbers.

#### Section 4. First aid measures

#### **Description of necessary first aid measures** Eye contact : Remove contact lenses, irrigate copiously with clean, fresh water, holding the evelids apart for at least 10 minutes and seek immediate medical advice. Inhalation 2

Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel.

### Section 4. First aid measures

| Skin contact | : | Remove contaminated clothing and shoes. Wash skin thoroughly with soap and water or use recognized skin cleanser. Do NOT use solvents or thinners. |
|--------------|---|--|
| Ingestion    | 1 | If swallowed, seek medical advice immediately and show this container or label.<br>Keep person warm and at rest. Do NOT induce vomiting.           |

#### Most important symptoms/effects, acute and delayed

| most important symptoms/c     | needs, deute and delayed  |
|-------------------------------|---|
| Potential acute health effect | <u>zts</u>  |
| Eye contact                   | : No known significant effects or critical hazards.   |
| Inhalation                    | : No known significant effects or critical hazards.   |
| Skin contact                  | : May be harmful in contact with skin. Causes mild skin irritation. May cause an allergic skin reaction.  |
| Ingestion                     | : No known significant effects or critical hazards.   |
| Over-exposure signs/symp      | <u>toms</u>   |
| Eye contact                   | : Adverse symptoms may include the following:<br>pain or irritation<br>watering<br>redness  |
| Inhalation                    | : No specific data.   |
| Skin contact                  | : Adverse symptoms may include the following:<br>irritation<br>redness  |
| Ingestion                     | : No specific data.   |
| Indication of immediate med   | lical attention and special treatment needed, if necessary  |
| Notes to physician            | <ul> <li>Treat symptomatically. Contact poison treatment specialist immediately if large<br/>quantities have been ingested or inhaled.</li> </ul>   |
| Specific treatments           | : No specific treatment.  |
| Protection of first-aiders    | : No action shall be taken involving any personal risk or without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. |

#### See toxicological information (Section 11)

### Section 5. Fire-fighting measures

| Extinguishing media                        |   |
|--|---|
| Suitable extinguishing media               | : Use dry chemical, CO <sub>2</sub> , water spray (fog) or foam.  |
| Unsuitable extinguishing media             | : Do not use water jet.   |
| Specific hazards arising from the chemical | : Combustible liquid. Runoff to sewer may create fire or explosion hazard. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion. |

Product name SIGMALINE 855 REP BASE RAL 5022 Section 5 Fire-fighting measures

| occurred in the ingiting inclusions      |   |  |
|--|---|--|
| Hazardous thermal decomposition products | : Decomposition products may include the following materials:<br>carbon oxides<br>sulfur oxides<br>metal oxide/oxides |  |
| Special protective actions               | : Promptly isolate the scene by removing all persons from the vicinity of the incident if                             |  |

| for fire-fighters                              | there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool. |
|--|--|
| Special protective equipment for fire-fighters | : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure  |

### Section 6. Accidental release measures

#### Personal precautions, protective equipment and emergency procedures

mode.

| For non-emergency<br>personnel | : | No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilled material. Shut off all ignition sources.<br>No flares, smoking or flames in hazard area. Avoid breathing vapor or mist.<br>Provide adequate ventilation. Wear appropriate respirator when ventilation is<br>inadequate. Put on appropriate personal protective equipment. |
|--------------------------------|---|---|
| For emergency responders       | : | If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".   |
| Environmental precautions      | : | Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused   |

environmental pollution (sewers, waterways, soil or air).

#### Methods and materials for containment and cleaning up

| Small spill | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.   |
|-------------|--|
| Large spill | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal. |

### Section 7. Handling and storage

| Precautions for safe<br>handling                                   | : | Fut on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Do not get in eyes or on skin or clothing. Do not ingest. Avoid breathing vapor or mist. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Empty containers retain product residue and can be hazardous. Do not reuse container. |
|--|---|--|
| Conditions for safe storage,<br>including any<br>incompatibilities | : | Store between the following temperatures: 0 to 35°C (32 to 95°F). Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Eliminate all ignition sources. Separate from oxidizing materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.   |

### Section 8. Exposure controls/personal protection

#### **Control parameters**

#### **Occupational exposure limits**

| Ingredient name  | Exposure limits   |  |  |
|--|---|--|--|
| parium sulfate   | Ministry of Labor (Thailand, 8/2017).<br>[barium sulfate]<br>TWA: 5 mg/m <sup>3</sup> 8 hours. Form: Respirable<br>dust<br>TWA: 15 mg/m <sup>3</sup> 8 hours. Form: inhalable<br>dust   |  |  |
| Talc , not containing asbestiform fibres   | Ministry of Labor (Thailand, 8/2017). [talc<br>containing no asbestos fibres]<br>TWA: 2 mg/m <sup>3</sup> 8 hours. Form: Respirable<br>dust   |  |  |
| Recommended monitoring : Reference should be made to appropriate monitoring standards. Reference to national guidance documents for methods for the determination of hazardous substances will also be required. |   |  |  |
| controls ventilation or other eng<br>contaminants below an<br>also need to keep gas  | Use only with adequate ventilation. Use process enclosures, local exhaust<br>ventilation or other engineering controls to keep worker exposure to airborne<br>contaminants below any recommended or statutory limits. The engineering controls<br>also need to keep gas, vapor or dust concentrations below any lower explosive<br>limits. Use explosion-proof ventilation equipment. |  |  |

### Section 8. Exposure controls/personal protection

| Environmental exposure controls | :   | Emissions from ventilation or work process equipment should be checked to ensure<br>they comply with the requirements of environmental protection legislation. In some<br>cases, fume scrubbers, filters or engineering modifications to the process<br>equipment will be necessary to reduce emissions to acceptable levels.   |
|---------------------------------|-----|---|
| Individual protection measu     | res |   |
| Hygiene measures                | :   | Wash hands, forearms and face thoroughly after handling chemical products, before<br>eating, smoking and using the lavatory and at the end of the working period.<br>Appropriate techniques should be used to remove potentially contaminated clothing.<br>Contaminated work clothing should not be allowed out of the workplace. Wash<br>contaminated clothing before reusing. Ensure that eyewash stations and safety<br>showers are close to the workstation location.   |
| Eye protection                  | 1   | Safety glasses with side shields.   |
| Skin protection                 |     |   |
| Hand protection                 | :   | Chemical-resistant, impervious gloves complying with an approved standard should<br>be worn at all times when handling chemical products if a risk assessment indicates<br>this is necessary. Considering the parameters specified by the glove manufacturer,<br>check during use that the gloves are still retaining their protective properties. It<br>should be noted that the time to breakthrough for any glove material may be<br>different for different glove manufacturers. In the case of mixtures, consisting of<br>several substances, the protection time of the gloves cannot be accurately<br>estimated. |
| Gloves                          |     | butyl rubber  |
| Body protection                 | :   | Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.   |
| Other skin protection           | :   | Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.   |
| Respiratory protection          | :   | Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator. If workers are exposed to concentrations above the exposure limit, they must use appropriate, certified respirators. Use a properly fitted, air-purifying or air-fed   |

### Section 9. Physical and chemical properties

necessary.

| Appearance     |   |
|----------------|---|
| Physical state | : Liquid.   |
| Color          | : Blue.   |
| Odor           | : 🗚 romatic. [Slight]   |
| Odor threshold | : Not available.  |
| рН             | : insoluble in water.   |
| Melting point  | <ul> <li>May start to solidify at the following temperature: -14°C (6.8°F) This is based on data for the following ingredient: Phenol, methylstyrenated. Weighted average: -18.21°C (-0.8°F)</li> </ul> |

respirator complying with an approved standard if a risk assessment indicates this is

### Section 9. Physical and chemical properties

| -  |   |  |  |
|--|---|--|--|
| Boiling point                                | : | >37.78°C (>100°F)  |  |
| Flash point                                  | : | Closed cup: 65°C (149°F)   |  |
| Evaporation rate                             | : | Not available.   |  |
| Flammability (solid, gas)                    | : | liquid   |  |
| Lower and upper explosive (flammable) limits | : | Not available.   |  |
| Vapor pressure                               | : | ➡ighest known value: <0.3 kPa (<2.3 mm Hg) (at 20°C) (Branched Polyalcohol with Ester and Ether Groups). Weighted average: 0.14 kPa (1.05 mm Hg) (at 20°C) |  |
| Relative density                             | : | 1.8  |  |
| Solubility(ies)                              |   | Media Result   |  |
|  |   | cold water Not soluble   |  |
| Partition coefficient: n-<br>octanol/water   | : | Not applicable.  |  |
| Auto-ignition temperature                    | : | west known value: 325°C (617°F) (Propylidynetrimethanol, propoxylated).  |  |
| Decomposition temperature                    | : | Stable under recommended storage and handling conditions (see Section 7).  |  |
| Viscosity                                    | : | Kinematic (40°C): >21 mm²/s  |  |
| Viscosity                                    | : | 60 - 100 s (ISO 6mm)   |  |
|  |   |  |  |

### Section 10. Stability and reactivity

| Reactivity                         | : No specific test data related to reactivity available for this product or its ingredients.  |
|------------------------------------|---|
| Chemical stability                 | : The product is stable.  |
| Possibility of hazardous reactions | : Under normal conditions of storage and use, hazardous reactions will not occur.   |
| Conditions to avoid                | : When exposed to high temperatures may produce hazardous decomposition products.   |
| Incompatible materials             | : Keep away from the following materials to prevent strong exothermic reactions: oxidizing agents, strong alkalis, strong acids.    |
| Hazardous decomposition products   | Pepending on conditions, decomposition products may include the following materials: carbon oxides sulfur oxides metal oxide/oxides |

### Section 11. Toxicological information

Information on toxicological effects Acute toxicity

### Section 11. Toxicological information

|                           | <u> </u>             |                             |                 |             |          |
|---------------------------|----------------------|-----------------------------|-----------------|-------------|----------|

| Conclusion/Summary        | : There a            | re no data available on the | mixture itself. |             |          |
| Specific target organ tox | <u>icity (single</u> | exposure)                   |                 |             |          |

| Name   | Category   | Route of exposure | Target organs                |
|--|------------|-------------------|------------------------------|
| <b>F</b> alc , not containing asbestiform fibres | Category 3 | -                 | Respiratory tract irritation |

Specific target organ toxicity (repeated exposure) Not available.

#### **Aspiration hazard**

Not available.

#### Information on the likely routes of exposure

: Not available.

#### Potential acute health effects

- : No known significant effects or critical hazards. Eye contact Inhalation
  - : No known significant effects or critical hazards.

### Section 11. Toxicological information

|                                | -  |     |
|--------------------------------|--|-----|
| Skin contact                   | May be harmful in contact with skin. Causes mild skin irritation. May cause an allergic skin reaction. | 1   |
| Ingestion                      | No known significant effects or critical hazards.  |     |
| Symptoms related to the phy    | al, chemical and toxicological characteristics   |     |
| Eye contact                    | Adverse symptoms may include the following:<br>pain or irritation<br>watering<br>redness               |     |
| Inhalation                     | No specific data.  |     |
| Skin contact                   | Adverse symptoms may include the following:<br>irritation<br>redness                                   |     |
| Ingestion                      | No specific data.  |     |
| Short term exposure            | and also chronic effects from short and long term exposure   |     |
| Potential immediate effects    | Not available.   |     |
| Potential delayed effects      | Not available.   |     |
| Long term exposure             |  |     |
| Potential immediate<br>effects | Not available.   |     |
| Potential delayed effects      | Not available.   |     |
| Potential chronic health eff   | <u>s</u>   |     |
| General                        | Since sensitized, a severe allergic reaction may occur when subsequently expo to very low levels.      | sed |
| Carcinogenicity                | No known significant effects or critical hazards.  |     |
| Mutagenicity                   | No known significant effects or critical hazards.  |     |
| Reproductive toxicity          | No known significant effects or critical hazards.  |     |

#### Numerical measures of toxicity

#### Acute toxicity estimates

| Route  | ATE value      |
|--------|----------------|
| Øral   | 14594.28 mg/kg |
| Dermal | 2693.39 mg/kg  |

#### Other information

Sanding and grinding dusts may be harmful if inhaled.

### Section 12. Ecological information

#### **Toxicity**

| Product/ingredient name                 | Result               | Species | Exposure |
|---|----------------------|---------|----------|
| ✔ropylidynetrimethanol,<br>propoxylated | Acute LC50 >100 mg/l | Fish    | 96 hours |
|   | <b>-</b>             |         |          |

#### Conclusion/Summary

: There are no data available on the mixture itself.

#### Persistence/degradability

Not available.

| Product/ingredient name  | Test              | Result              |            | Dose | Inoculum         |
|--|-------------------|---------------------|------------|------|------------------|
| ✔ropylidynetrimethanol,<br>propoxylated  | OECD 301A         | 84 % - Readily - 26 | days       | -    | -                |
| <b>Conclusion/Summary</b> : There are no data available on the mixture itself. |                   |                     |            |      |                  |
| Product/ingredient name  | Aquatic half-life |                     | Photolysis | S    | Biodegradability |
| Propylidynetrimethanol,<br>propoxylated  | -                 |                     | -          |      | Readily          |

#### **Bioaccumulative potential**

| Product/ingredient name              | LogPow      | BCF | Potential |
|--------------------------------------|-------------|-----|-----------|
| Phenol, methylstyrenated             | 3.627       | -   | low       |
| Propylidynetrimethanol, propoxylated | 0.01 to 1.5 | -   | low       |

| <u>Mobility in soil</u>                |   |
|--|---|
| Soil/water partition coefficient (Koc) | : Not available.                                    |
| Other adverse effects                  | : No known significant effects or critical hazards. |

### Section 13. Disposal considerations

| Disposal methods | : The generation of waste should be avoided or minimized wherever possible.<br>Disposal of this product, solutions and any by-products should at all times comply<br>with the requirements of environmental protection and waste disposal legislation and<br>any regional local authority requirements. Dispose of surplus and non-recyclable<br>products via a licensed waste disposal contractor. Waste should not be disposed of<br>untreated to the sewer unless fully compliant with the requirements of all authorities<br>with jurisdiction. Waste packaging should be recycled. Incineration or landfill<br>should only be considered when recycling is not feasible. This material and its<br>container must be disposed of in a safe way. Care should be taken when handling<br>emptied containers that have not been cleaned or rinsed out. Empty containers or<br>liners may retain some product residues. Vapor from product residues may create a<br>highly flammable or explosive atmosphere inside the container. Do not cut, weld or<br>grind used containers unless they have been cleaned thoroughly internally. Avoid<br>dispersal of spilled material and runoff and contact with soil, waterways, drains and |
|------------------|--|
|                  | dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.  |

### Section 14. Transport information

#### **Additional information**

| UN   | : None identified. |
|------|--------------------|
| IMDG | : None identified. |
| IATA | : None identified. |

Special precautions for user : Transport within user's premises: always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

Transport in bulk according : Not applicable. to IMO instruments

### Section 15. Regulatory information

| Harmful Chemicals List  | : Listed   |
|---|--|
| Safety, health and<br>environmental regulations<br>specific for the product | : No known specific national and/or regional regulations applicable to this product (including its ingredients). |
| International regulations   |  |
| Montreal Protocol   |  |
| Not listed.   |  |
| Stockholm Convention on Per<br>Not listed.                                  | ersistent Organic Pollutants   |
