# Section 2. Hazards identification

| Classification of the | : AMMABLE LIQUIDS - Category 3   |
|-----------------------|--|
|                       |  |
| substance or mixture  | ACUTE TOXICITY (oral) - Category 5   |
|                       | ACUTE TOXICITY (dermal) - Category 5   |
|                       | ACUTE TOXICITY (inhalation) - Category 4   |
|                       | SKIN CORROSION/IRRITATION - Category 2   |
|                       | SERIOUS EYE DAMAGE/ EYE IRRITATION - Category 2A   |
|                       | RESPIRATORY SENSITIZATION - Category 1   |
|                       | SKIN SENSITIZATION - Category 1  |
|                       | SPECIFIC TARGET ORGAN TOXICITY (SINGLE EXPOSURE) (Respiratory tract  |
|                       | irritation) - Category 3   |
|                       | AQUATIC TOXICITY (ACUTE) - Category 3  |
|                       | AQUATIC TOXICITY (CHRONIC) - Category 3  |
|                       | Percentage of the mixture consisting of ingredient(s) of unknown acute dermal toxicity: 1.3%               |
|                       | Percentage of the mixture consisting of ingredient(s) of unknown acute inhalation toxicity: 2.2%           |
|                       | Percentage of the mixture consisting of ingredient(s) of unknown hazards to the aquatic environment: 14.2% |
| GHS label elements    |  |

Product name SIGMADUR 188/520/550 HARDENER

### Section 2. Hazards identification

| Hazard pictograms                                   |   |
|---|---|
| Signal word   | : Danger  |
| Hazard statements                                   | <ul> <li>Fammable liquid and vapor.</li> <li>May be harmful if swallowed or in contact with skin.</li> <li>Causes skin irritation.</li> <li>May cause an allergic skin reaction.</li> <li>Causes serious eye irritation.</li> <li>Harmful if inhaled.</li> <li>May cause allergy or asthma symptoms or breathing difficulties if inhaled.</li> <li>May cause respiratory irritation.</li> <li>Harmful to aquatic life with long lasting effects.</li> </ul>   |
| Precautionary statements                            |   |
| Prevention  | : Wear protective gloves, protective clothing and eye or face protection. Wear respiratory protection. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Use explosion-proof electrical, ventilating or lighting equipment. Use non-sparking tools. Take action to prevent static discharges. Use only outdoors or in a well-ventilated area. Avoid release to the environment. Avoid breathing vapor. Wash thoroughly after handling. Contaminated work clothing should not be allowed out of the workplace.  |
| Response  | : IF INHALED: Remove person to fresh air and keep comfortable for breathing. Call<br>a POISON CENTER or doctor if you feel unwell. If experiencing respiratory<br>symptoms: Call a POISON CENTER or doctor. IF SWALLOWED: Call a POISON<br>CENTER or doctor if you feel unwell. IF ON SKIN (or hair): Take off immediately all<br>contaminated clothing. Rinse skin with water. IF ON SKIN: Call a POISON<br>CENTER or doctor if you feel unwell. Wash with plenty of water. If skin irritation or<br>rash occurs: Get medical advice or attention. IF IN EYES: Rinse cautiously with<br>water for several minutes. Remove contact lenses, if present and easy to do.<br>Continue rinsing. If eye irritation persists: Get medical advice or attention. |
| Storage   | : Store locked up. Store in a well-ventilated place. Keep container tightly closed. Keep cool.  |
| Disposal  | : Dispose of contents and container in accordance with all local, regional, national and international regulations.   |
| Other hazards which do not result in classification | : Prolonged or repeated contact may dry skin and cause irritation.  |

# Section 3. Composition/information on ingredients

Substance/mixture

: Mixture

Version 7

Product name SIGMADUR 188/520/550 HARDENER

### Section 3. Composition/information on ingredients

| Hazardous ingredients                       | Concentration % | CAS number |
|---|-----------------|------------|
| Hexamethylene diisocyanate, oligomers       | 50 - 100        | 28182-81-2 |
| (isocyanurate type)                         |                 |            |
| xylene                                      | 10 - <20        | 1330-20-7  |
| n-butyl acetate                             | 3 - <5          | 123-86-4   |
| ethylbenzene                                | 1 - <3          | 100-41-4   |
| Solvent naphtha (petroleum), light aromatic | 1 - <3          | 64742-95-6 |
| 1,2,4-trimethylbenzene                      | 1 - <3          | 95-63-6    |
| hexamethylene-di-isocyanate                 | 0.1 - <0.3      | 822-06-0   |
| Hazardous ingredients                       | Concentration % | CAS number |
| Hexamethylene diisocyanate, oligomers       | 50 - 100        | 28182-81-2 |
| (isocyanurate type)                         |                 |            |
| xylene                                      | 10 - <20        | 1330-20-7  |
| n-butyl acetate                             | 3 - <5          | 123-86-4   |
| ethylbenzene                                | 1 - <3          | 100-41-4   |
| Solvent naphtha (petroleum), light aromatic | 1 - <3          | 64742-95-6 |
| 1,2,4-trimethylbenzene                      | 1 - <3          | 95-63-6    |
| hexamethylene-di-isocyanate                 | 0.1 - <0.3      | 822-06-0   |

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

SUB codes represent substances without registered CAS Numbers.

### Section 4. First aid measures

| Description of necessary fi | r <mark>st aid measures</mark>   |
|-----------------------------|--|
| Inhalation                  | <ul> <li>Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is<br/>irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by<br/>trained personnel.</li> </ul> |
| Ingestion                   | : If swallowed, seek medical advice immediately and show this container or label.<br>Keep person warm and at rest. Do NOT induce vomiting.   |
| Skin contact                | : Remove contaminated clothing and shoes. Wash skin thoroughly with soap and water or use recognized skin cleanser. Do NOT use solvents or thinners.   |
| Eye contact                 | <ul> <li>Remove contact lenses, irrigate copiously with clean, fresh water, holding the<br/>eyelids apart for at least 10 minutes and seek immediate medical advice.</li> </ul>  |
| Most important symptoms/    | effects, acute and delayed   |
| Potential acute health effe | <u>cts</u>   |
| Eye contact                 | : 🖉auses serious eye irritation.   |
| Inhalation                  | <ul> <li>Harmful if inhaled. May cause respiratory irritation. May cause allergy or asthma<br/>symptoms or breathing difficulties if inhaled.</li> </ul>   |
| Skin contact                | <ul> <li>May be harmful in contact with skin. Causes skin irritation. Defatting to the skin.<br/>May cause an allergic skin reaction.</li> </ul>   |
| Ingestion                   | : $\mathbf{M}$ ay be harmful if swallowed.   |

### Over-exposure signs/symptoms

Product name SIGMADUR 188/520/550 HARDENER

# Section 4. First aid measures

| Eye contact                | : Adverse symptoms may include the following:<br>pain or irritation<br>watering<br>redness  |
|----------------------------|---|
| Inhalation                 | : Adverse symptoms may include the following:<br>respiratory tract irritation<br>coughing<br>wheezing and breathing difficulties<br>asthma  |
| Skin contact               | : Adverse symptoms may include the following:<br>irritation<br>redness<br>dryness<br>cracking   |
| Ingestion                  | : No specific data.   |
| Indication of immediate me | dical attention and special treatment needed, if necessary  |
| Notes to physician         | : In case of inhalation of decomposition products in a fire, symptoms may be delayed.<br>The exposed person may need to be kept under medical surveillance for 48 hours.  |
| Specific treatments        | : No specific treatment.  |
| Protection of first-aiders | : No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing |

See toxicological information (Section 11)

# Section 5. Fire-fighting measures

| Extinguishing media                          |  |
|--|--|
| Suitable                                     | : Use dry chemical, CO <sub>2</sub> , water spray (fog) or foam.   |
| Not suitable                                 | : Do not use water jet.  |
| Specific hazards arising from the chemical   | : Fammable liquid and vapor. Runoff to sewer may create fire or explosion hazard.<br>In a fire or if heated, a pressure increase will occur and the container may burst, with<br>the risk of a subsequent explosion. This material is harmful to aquatic life with long<br>lasting effects. Fire water contaminated with this material must be contained and<br>prevented from being discharged to any waterway, sewer or drain. |
| Hazardous thermal decomposition products     | : Decomposition products may include the following materials:<br>carbon oxides<br>nitrogen oxides<br>Cyanate and isocyanate.<br>hydrogen cyanide   |
| Special protective actions for fire-fighters | : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.   |

thoroughly with water before removing it, or wear gloves.

Product name SIGMADUR 188/520/550 HARDENER

### Section 5. Fire-fighting measures

**Special protective** equipment for fire-fighters : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

### Section 6. Accidental release measures

| Personal precautions,<br>protective equipment and<br>emergency procedures | :   | No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilled material. Shut off all ignition sources.<br>No flares, smoking or flames in hazard area. Avoid breathing vapor or mist.<br>Provide adequate ventilation. Wear appropriate respirator when ventilation is<br>inadequate. Put on appropriate personal protective equipment.   |
|---|-----|---|
| Environmental precautions   | :   | Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). Water polluting material. May be harmful to the environment if released in large quantities.  |
| Methods and materials for co  | ont | ainment and cleaning up   |
| Large spill   | :   | Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.  |
| Small spill   | :   | Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.  |
| Special provisions  | :   | Contain and collect spillage with non-combustible, absorbent material e.g. sand,<br>earth, vermiculite or diatomaceous earth and place in container for disposal<br>according to local regulations (see Section 13). Place in a suitable container. The<br>contaminated area should be cleaned immediately with a suitable decontaminant.<br>One possible (flammable) decontaminant comprises (by volume): water (45 parts),<br>ethanol or isopropyl alcohol (50 parts) and concentrated (d: 0,880) ammonia<br>solution (5 parts). A non-flammable alternative is sodium carbonate (5 parts) and<br>water (95 parts). Add the same decontaminant to the remnants and let stand for<br>several days until no further reaction in an unsealed container. Once this stage is<br>reached, close container and dispose of according to local regulations (see section<br>13). Do not allow to enter drains or watercourses. If the product contaminates lakes,<br>rivers, or sewers, inform the appropriate authorities in accordance with local<br>regulations. |

Product name SIGMADUR 188/520/550 HARDENER

# Section 7. Handling and storage

| Precautions for safe : handling                                      | Put on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems or asthma, allergies or chronic or recurrent respiratory disease should not be employed in any process in which this product is used. Do not get in eyes or on skin or clothing. Do not ingest. Avoid breathing vapor or mist. Avoid release to the environment. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Take precautionary measures against electrostatic discharges. Empty containers retain product residue and can be hazardous. Do not reuse container. |
|--|---|
| Conditions for safe storage, :<br>including any<br>incompatibilities | Store between the following temperatures: 0 to $35^{\circ}$ C ( $32$ to $95^{\circ}$ F). Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Eliminate all ignition sources. Separate from oxidizing materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use. Precautions should be taken to minimize exposure to atmospheric humidity or water. $CO_2$ will be formed, which, in closed containers, could result in pressurization.   |

# Section 10. Stability and reactivity

| Chemical stability                 | : The product is stable.  |
|------------------------------------|---|
| Possibility of hazardous reactions | : Under normal conditions of storage and use, hazardous reactions will not occur.   |
| Conditions to avoid                | : In a fire, hazardous decomposition products may be produced.  |
| Incompatible materials             | : Keep away from: oxidizing agents, strong alkalis, strong acids, amines, alcohols, water. Uncontrolled exothermic reactions occur with amines and alcohols.                            |
| Hazardous decomposition products   | <ul> <li>Depending on conditions, decomposition products may include the following<br/>materials: Cyanate and isocyanate. carbon oxides nitrogen oxides hydrogen<br/>cyanide</li> </ul> |
| Hazardous polymerization           | : Under normal conditions of storage and use, hazardous polymerization will not occur.  |

# Section 11. Toxicological information

### Information on toxicological effects

### Acute toxicity

| Product/ingredient name                     | Result                          | Species      | Dose                    | Exposure |
|---|---------------------------------|--------------|-------------------------|----------|
| Hexamethylene                               | LD50 Dermal                     | Rabbit       | >2000 mg/kg             | -        |

#### Specific target organ toxicity (single exposure)

### Section 11. Toxicological information

| Name  | Category   | Route of exposure | Target organs                   |
|---|------------|-------------------|---------------------------------|
| Rexamethylene diisocyanate, oligomers (isocyanurate type) | Category 3 | -                 | Respiratory tract irritation    |
| xylene  | Category 3 | -                 | Respiratory tract<br>irritation |
| n-butyl acetate   | Category 3 | -                 | Narcotic effects                |
| Solvent naphtha (petroleum), light aromatic               | Category 3 | -                 | Narcotic effects                |
| 1,2,4-trimethylbenzene                                    | Category 3 | -                 | Respiratory tract irritation    |
| hexamethylene-di-isocyanate                               | Category 3 | -                 | Respiratory tract irritation    |

#### Specific target organ toxicity (repeated exposure)

| Name         |            | Route of exposure | Target organs  |
|--------------|------------|-------------------|----------------|
| ethylbenzene | Category 2 | -                 | hearing organs |

### Aspiration hazard

| Name         | Result   |
|--------------|--|
| ethylbenzene | ASPIRATION HAZARD - Category 1<br>ASPIRATION HAZARD - Category 1<br>ASPIRATION HAZARD - Category 1 |

### Information on the likely

: Not available.

### routes of exposure

| Potential acute health effects |   |  |
|--------------------------------|---|--|
| Inhalation                     | 1 | Harmful if inhaled. May cause respiratory irritation. May cause allergy or asthma symptoms or breathing difficulties if inhaled. |
| Ingestion                      | 1 | May be harmful if swallowed.   |

- Skin contact : May be harmful in contact with skin. Causes skin irritation. Defatting to the skin. May cause an allergic skin reaction.
- **Eye contact** : Causes serious eye irritation.

### Symptoms related to the physical, chemical and toxicological characteristics

| Eyes       | : Adverse symptoms may include the following:<br>pain or irritation<br>watering<br>redness   |
|------------|--|
| Inhalation | : Adverse symptoms may include the following:<br>respiratory tract irritation<br>coughing<br>wheezing and breathing difficulties<br>asthma |

Date of issue 28 March 2023

Version 7

### Section 11. Toxicological information

### Other information

Prolonged or repeated contact may dry skin and cause irritation. Repeated exposure to high vapor concentrations may cause irritation of the respiratory system and permanent brain and nervous system damage. Inhalation of vapor/aerosol concentrations above the recommended exposure limits causes headaches, drowsiness and nausea and may lead to unconsciousness or death. Based on the properties of the isocyanate components and considering toxicological data on similar mixtures, this mixture may cause acute irritation and/or sensitization of the respiratory system, leading to an asthmatic condition, wheezing and tightness of the chest. Sensitized persons may subsequently show asthmatic symptoms when exposed to atmospheric concentrations well below the OEL. Persons with a history of skin sensitization problems or asthma, allergies or chronic or recurrent respiratory disease should not be employed in any process in which this product is used. Repeated exposure may lead to permanent respiratory disability. Moisture-sensitive material. Avoid contact with skin and clothing.

### Section 12. Ecological information

Other adverse effects : No known significant effects or critical hazards.

# Section 13. Disposal considerations

| Disposal methods | : The generation of waste should be avoided or minimized wherever possible.  |
|------------------|--|
| Disposal methods | The generation of waste should be avoided or minimized wherever possible.<br>Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapor from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid |
|                  | dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.  |
