| General                                             | :    | P103 - Read label before use.<br>P102 - Keep out of reach of children.<br>P101 - If medical advice is needed, have product container or label at hand.                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| Prevention                                          | :    | <ul> <li>P201 - Obtain special instructions before use.</li> <li>P202 - Do not handle until all safety precautions have been read and understood.</li> <li>P280 - Wear protective gloves, protective clothing and eye or face protection.</li> <li>P261 - Avoid breathing vapor.</li> <li>P264 - Wash thoroughly after handling.</li> </ul>                                                                                                                                                                                                                                                      |
| Response                                            | :    | <ul> <li>P308 + P313 - IF exposed or concerned: Get medical advice or attention.</li> <li>P362 + P364 - Take off contaminated clothing and wash it before reuse.</li> <li>P302 + P352 - IF ON SKIN: Wash with plenty of water.</li> <li>P333 + P313 - If skin irritation or rash occurs: Get medical advice or attention.</li> <li>P305 + P351 + P338 - IF IN EYES: Rinse cautiously with water for several minutes.</li> <li>Remove contact lenses, if present and easy to do. Continue rinsing.</li> <li>P337 + P313 - If eye irritation persists: Get medical advice or attention.</li> </ul> |
| Storage                                             | :    | P405 - Store locked up.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| Disposal                                            | :    | P501 - Dispose of contents and container in accordance with all local, regional, national and international regulations.                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| Other hazards which do not result in classification | :    | Sanding and grinding dusts may be harmful if inhaled. Repeated exposure to high vapor concentrations may cause irritation of the respiratory system and permanent brain and nervous system damage. Inhalation of vapor/aerosol concentrations above the recommended exposure limits causes headaches, drowsiness and nausea and may lead to unconsciousness or death. Emits toxic fumes when heated.                                                                                                                                                                                             |
| See toxicological information                       | n (S | Section 11)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

toxicological information (Section 11)

# **SECTION 3: Composition/information on ingredients**

| Substance/mixture                | : Mixture                                |
|----------------------------------|------------------------------------------|
| Product name                     | : SUPERCOAT EPOXY COATING STONE GRAY - A |
| Other means of<br>identification | : Not applicable.                        |

| Ingredient name                         | %           | CAS number |
|-----------------------------------------|-------------|------------|
| titanium dioxide                        | ≥20 - ≤50   | 13463-67-7 |
| bis-[4-(2,3-epoxipropoxi)phenyl]propane | ≥20 - ≤50   | 1675-54-3  |
| Epoxy resin (MW ≤ 700)                  | ≥10 - ≤20   | 25068-38-6 |
| 2,3-epoxypropyl neodecanoate            | ≥5.0 - ≤10  | 26761-45-5 |
| Isopropyl alcohol                       | ≥1.0 - ≤5.0 | 67-63-0    |
| aluminium hydroxide                     | ≥1.0 - ≤5.0 | 21645-51-2 |

Any concentration shown as a range is to protect confidentiality or is due to batch variation.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

# **SECTION 4: First aid measures**

| Description of necessary first aid measures |                                                                                                                                                                                                  |  |
|---------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
| Eye contact                                 | <ul> <li>Remove contact lenses, irrigate copiously with clean, fresh water, holding the<br/>eyelids apart for at least 10 minutes and seek immediate medical advice.</li> </ul>                  |  |
| Inhalation                                  | : Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. |  |
| Skin contact                                | <ul> <li>Remove contaminated clothing and shoes. Wash skin thoroughly with soap and<br/>water or use recognized skin cleanser. Do NOT use solvents or thinners.</li> </ul>                       |  |
| Ingestion                                   | <ul> <li>If swallowed, seek medical advice immediately and show this container or label.</li> <li>Keep person warm and at rest. Do NOT induce vomiting.</li> </ul>                               |  |

#### Most important symptoms/effects, acute and delayed

| Potential acute health effects |                                                                |  |
|--------------------------------|----------------------------------------------------------------|--|
| Eye contact                    | : Causes serious eye irritation.                               |  |
| Inhalation                     | : No known significant effects or critical hazards.            |  |
| Skin contact                   | : Causes skin irritation. May cause an allergic skin reaction. |  |
| Ingestion                      | : No known significant effects or critical hazards.            |  |

#### **Over-exposure signs/symptoms**

See toxicological information (Section 11)

#### Indication of immediate medical attention and special treatment needed, if necessary

| Notes to physician         | <ul> <li>Treat symptomatically. Contact poison treatment specialist immediately if large<br/>guantities have been ingested or inhaled.</li> </ul>                                                                                                               |
|----------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Specific treatments        | : No specific treatment.                                                                                                                                                                                                                                        |
| Protection of first-aiders | : No action shall be taken involving any personal risk or without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. |

# **SECTION 5: Firefighting measures**

| Extinguishing media                               |                                                                                                                                                                                                 |
|---------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Suitable extinguishing media                      | : Use an extinguishing agent suitable for the surrounding fire.                                                                                                                                 |
| Unsuitable extinguishing media                    | : None known.                                                                                                                                                                                   |
| Specific hazards arising from the chemical        | : In a fire or if heated, a pressure increase will occur and the container may burst.                                                                                                           |
| Hazardous thermal decomposition products          | : Decomposition products may include the following materials:<br>carbon oxides<br>halogenated compounds<br>metal oxide/oxides                                                                   |
| Special protective actions for fire-fighters      | : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.   |
| Special protective<br>equipment for fire-fighters | <ul> <li>Fire-fighters should wear appropriate protective equipment and self-contained<br/>breathing apparatus (SCBA) with a full face-piece operated in positive pressure<br/>mode.</li> </ul> |

# Product name SUPERCOAT EPOXY COATING STONE GRAY - A

# **SECTION 6: Accidental release measures**

| Personal precautions, protect  | ve equipment and emergency procedures                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
|--------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| For non-emergency<br>personnel | : No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilled material. Avoid breathing vapor or<br>mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is<br>inadequate. Put on appropriate personal protective equipment.                                                                                                                                                                                                                                                                        |
| For emergency responders       | : If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| Environmental precautions      | : Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| Methods and materials for co   | tainment and cleaning up                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| Small spill                    | : Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.                                                                                                                                                                                                                                                                                                                                                                                         |
| Large spill                    | : Stop leak if without risk. Move containers from spill area. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal. |

# **SECTION 7: Handling and storage**

| Precautions for safe handling             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
|-------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Protective measures                       | : Put on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Avoid exposure - obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Do not get in eyes or on skin or clothing. Do not ingest. Avoid breathing vapor or mist. If during normal use the material presents a respiratory hazard, use only with adequate ventilation or wear appropriate respirator. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container. |
| Special precautions                       | : Vapors may accumulate in low or confined areas or travel a considerable distance to a source of ignition and flash back. Vapors are heavier than air and may spread along floors. If this material is part of a multiple component system, read the Safety Data Sheet(s) for the other component or components before blending as the resulting mixture may have the hazards of all of its parts.                                                                                                                                                                                                                                                                                                                                                                                  |
| Advice on general<br>occupational hygiene | Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.                                                                                                                                                                                                                                                                                                                                                                                                                                      |

# **SECTION 7: Handling and storage**

|                   | : Do not store above the following temperature: 50°C (122°F). Store in accordance       |
|-------------------|-----------------------------------------------------------------------------------------|
| including any     | with local regulations. Store in original container protected from direct sunlight in a |
| incompatibilities | dry, cool and well-ventilated area, away from incompatible materials (see Section 10)   |
|                   | and food and drink. Store locked up. Keep container tightly closed and sealed until     |
|                   | ready for use. Containers that have been opened must be carefully resealed and          |
|                   | kept upright to prevent leakage. Do not store in unlabeled containers. Use              |
|                   | appropriate containment to avoid environmental contamination.                           |

# **SECTION 8: Exposure controls/personal protection**

#### Control parameters

#### **Occupational exposure limits**

| Ingredient name                         | Exposure limits                                    |
|-----------------------------------------|----------------------------------------------------|
| titanium dioxide                        | NOM-010-STPS-2014 (Mexico, 4/2016).                |
|                                         | TWA: 10 mg/m <sup>3</sup> 8 hours.                 |

| С    | = Ceiling Limit                       | STEL | = Short term exposure limit |
|------|---------------------------------------|------|-----------------------------|
| IPEL | = Internal Permissible Exposure Limit | TLV  | = Threshold Limit Value     |
|      |                                       | TWA  | = Time Weighted Average     |

#### Consult local authorities for acceptable exposure limits.

| Recommended monitoring a procedures   | Reference should be made to appropriate monitoring standards. Reference to national guidance documents for methods for the determination of hazardous substances will also be required.                                                                                                                                                                                                                                                                                   |
|---------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Appropriate engineering :<br>controls | If user operations generate dust, fumes, gas, vapor or mist, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits.                                                                                                                                                                                                                                  |
| Environmental exposure : controls     | Emissions from ventilation or work process equipment should be checked to ensure<br>they comply with the requirements of environmental protection legislation. In some<br>cases, fume scrubbers, filters or engineering modifications to the process<br>equipment will be necessary to reduce emissions to acceptable levels.                                                                                                                                             |
| Individual protection measures        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| Hygiene measures :                    | Wash hands, forearms and face thoroughly after handling chemical products, before<br>eating, smoking and using the lavatory and at the end of the working period.<br>Appropriate techniques should be used to remove potentially contaminated clothing.<br>Contaminated work clothing should not be allowed out of the workplace. Wash<br>contaminated clothing before reusing. Ensure that eyewash stations and safety<br>showers are close to the workstation location. |
| Eye/face protection :                 | Chemical splash goggles.                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| Skin protection                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

# Product name SUPERCOAT EPOXY COATING STONE GRAY - A

# **SECTION 8: Exposure controls/personal protection**

| Hand protection        | : Chemical-resistant, impervious gloves complying with an approved standard should<br>be worn at all times when handling chemical products if a risk assessment indicates<br>this is necessary. Considering the parameters specified by the glove manufacturer,<br>check during use that the gloves are still retaining their protective properties. It<br>should be noted that the time to breakthrough for any glove material may be<br>different for different glove manufacturers. In the case of mixtures, consisting of<br>several substances, the protection time of the gloves cannot be accurately<br>estimated. |
|------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Gloves                 | : butyl rubber                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| Body protection        | : Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.                                                                                                                                                                                                                                                                                                                                                                                                                             |
| Other skin protection  | <ul> <li>Appropriate footwear and any additional skin protection measures should be<br/>selected based on the task being performed and the risks involved and should be<br/>approved by a specialist before handling this product.</li> </ul>                                                                                                                                                                                                                                                                                                                                                                             |
| Respiratory protection | : Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator. If workers are exposed to concentrations above the exposure limit, they must use appropriate, certified respirators. Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary.                                                                                                                                                                                    |

# **SECTION 11: Toxicological information**

|                                |             | cause greater hearing loss than expected from exposure to noise alone. If splashed<br>in the eyes, the liquid may cause irritation and reversible damage. Ingestion may<br>cause nausea, diarrhea and vomiting. This takes into account, where known,<br>delayed and immediate effects and also chronic effects of components from short-<br>term and long-term exposure by oral, inhalation and dermal routes of exposure and<br>eye contact. |

#### Mobility in soil

Soil/water partition : Not available. coefficient (Koc)

Other adverse effects : No known significant effects or critical hazards.

### **SECTION 13: Disposal considerations**

 Disposal methods
 The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

Refer to Section 7: HANDLING AND STORAGE and Section 8: EXPOSURE CONTROLS/PERSONAL PROTECTION for additional handling information and protection of employees. Section 6. Accidental release measures
