| Prevention                     | : | Obtain special instructions before use. Do not handle until all safety precautions<br>have been read and understood. Wear protective gloves, protective clothing and<br>eye or face protection. Wear respiratory protection. Use only outdoors or in a well-<br>ventilated area. Do not breathe vapor. Do not eat, drink or smoke when using this<br>product. Wash thoroughly after handling. Contaminated work clothing should not<br>be allowed out of the workplace.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| Response                       | : | IF exposed or concerned: Get medical advice or attention. IF INHALED: Remove<br>person to fresh air and keep comfortable for breathing. Call a POISON CENTER or<br>doctor if you feel unwell. If experiencing respiratory symptoms: Call a POISON<br>CENTER or doctor. IF SWALLOWED: Call a POISON CENTER or doctor if you<br>feel unwell. Rinse mouth. Take off contaminated clothing and wash it before reuse.<br>IF ON SKIN: Wash with plenty of water. If skin irritation or rash occurs: Get medical<br>advice or attention. IF IN EYES: Rinse cautiously with water for several minutes.<br>Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation<br>persists: Get medical advice or attention.                                                                                                                                                                                                                                    |
| Storage                        | : | Store locked up. Store in a well-ventilated place. Keep container tightly closed.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| Disposal                       | : | Dispose of contents and container in accordance with all local, regional, national and international regulations.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| Supplemental label<br>elements | : | Moisture-sensitive material. Skin contact to isocyanate monomer may lead to<br>allergic lung reaction. Based on the properties of the isocyanate components and<br>considering toxicological data on similar mixtures, this mixture may cause acute<br>irritation and/or sensitization of the respiratory system, leading to an asthmatic<br>condition, wheezing and tightness of the chest. Sensitized persons may<br>subsequently show asthmatic symptoms when exposed to atmospheric<br>concentrations well below the OEL. Repeated exposure may lead to permanent<br>respiratory disability. Persons with a history of skin sensitization problems or asthma,<br>allergies or chronic or recurrent respiratory disease should not be employed in any<br>process in which this product is used. Emits toxic fumes when heated.<br>Percentage of the mixture consisting of ingredient(s) of unknown acute toxicity:<br>3.9% (oral), 27.4% (dermal), 60.8% (inhalation) |

### Section 3. Composition/information on ingredients

| -2-uretidinone; isocyanate mixed isomers or mixture; 4,4-MDI Uretidinone Trimer |  |
|---------------------------------------------------------------------------------|--|
|                                                                                 |  |

\*Ranges if listed above for hazardous ingredient(s) are prescribed ranges. The actual concentration(s) or actual concentration range(s) are being withheld as a trade secret.

SUB codes represent substances without registered CAS Numbers.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

### Section 4. First-aid measures

If ingestion, irritation, any type of overexposure or symptoms of overexposure occur during or persists after use of this product, contact a POISON CONTROL CENTER, EMERGENCY ROOM OR PHYSICIAN immediately; have Safety Data Sheet information available. Never give anything by mouth to an unconscious or convulsing person.

#### Description of necessary first aid measures

| Eye contact  | <ul> <li>Remove contact lenses, irrigate copiously with clean, fresh water, holding the<br/>eyelids apart for at least 10 minutes and seek immediate medical advice.</li> </ul>                  |
|--------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Inhalation   | : Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. |
| Skin contact | <ul> <li>Remove contaminated clothing and shoes. Wash skin thoroughly with soap and<br/>water or use recognized skin cleanser. Do NOT use solvents or thinners.</li> </ul>                       |
| Ingestion    | <ul> <li>If swallowed, seek medical advice immediately and show this container or label.<br/>Keep person warm and at rest. Do NOT induce vomiting.</li> </ul>                                    |

#### Most important symptoms/effects, acute and delayed

| Potential acute health effects |                                                                                                                               |    |
|--------------------------------|-------------------------------------------------------------------------------------------------------------------------------|----|
| Eye contact                    | uses serious eye irritation.                                                                                                  |    |
| Inhalation                     | mful if inhaled. May cause respiratory irritation. May cause allergy or asthm<br>nptoms or breathing difficulties if inhaled. | na |
| Skin contact                   | uses skin irritation. May cause an allergic skin reaction.                                                                    |    |
| Ingestion                      | mful if swallowed.                                                                                                            |    |
| Over-exposure signs/sympto     |                                                                                                                               |    |

| Inhalation                     | verse symptoms may include the following:<br>piratory tract irritation<br>ighing<br>eezing and breathing difficulties<br>hma  |    |
| Skin contact                   | verse symptoms may include the following:<br>ation<br>ness                                                                    |    |
| Ingestion                      | specific data.                                                                                                                |    |

#### Indication of immediate medical attention and special treatment needed, if necessary

#### Product name SL45 JS JOINT SEALANT CLEAR - A

### Section 4. First-aid measures

| Notes to physician         | : In case of inhalation of decomposition products in a fire, symptoms may be delayed.<br>The exposed person may need to be kept under medical surveillance for 48 hours.                                                                                                                                                                                                                            |
|----------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Specific treatments        | No specific treatment.                                                                                                                                                                                                                                                                                                                                                                              |
| Protection of first-aiders | : No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. |

### Section 5. Fire-fighting measures

| Extinguishing media                               |                                                                                                                                                                                                                         |
|---------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Suitable extinguishing media                      | : Use an extinguishing agent suitable for the surrounding fire.                                                                                                                                                         |
| Unsuitable extinguishing media                    | : None known.                                                                                                                                                                                                           |
| Specific hazards arising from the chemical        | : In a fire or if heated, a pressure increase will occur and the container may burst.                                                                                                                                   |
| Hazardous thermal decomposition products          | : Decomposition products may include the following materials:<br>carbon oxides<br>nitrogen oxides<br>Cyanate and isocyanate.<br>hydrogen cyanide                                                                        |
| Special protective actions for fire-fighters      | <ul> <li>Promptly isolate the scene by removing all persons from the vicinity of the incident if<br/>there is a fire. No action shall be taken involving any personal risk or without<br/>suitable training.</li> </ul> |
| Special protective<br>equipment for fire-fighters | : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.                                                   |

# Section 6. Accidental release measures

#### Personal precautions, protective equipment and emergency procedures

| For non-emergency<br>personnel | : | No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilled material. Avoid breathing vapor or<br>mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is<br>inadequate. Put on appropriate personal protective equipment. |
|--------------------------------|---|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| For emergency responders       | : | If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".                                                                                                                                                                                                      |
| Environmental precautions      | : | Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).                                                                                                                                                                                        |

#### Methods and materials for containment and cleaning up

Product name SL45 JS JOINT SEALANT CLEAR - A

## Section 6. Accidental release measures

| Small spill        | : Stop leak if without risk. Move containers from spill area. Dilute with water and mop<br>up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry<br>material and place in an appropriate waste disposal container. Dispose of via a<br>licensed waste disposal contractor.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
|--------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Large spill        | : Stop leak if without risk. Move containers from spill area. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.                                                                                                                                                                                                                                                                                                                                                                       |
| Special provisions | : Contain and collect spillage with non-combustible, absorbent material e.g. sand,<br>earth, vermiculite or diatomaceous earth and place in container for disposal<br>according to local regulations (see Section 13). Place in a suitable container. The<br>contaminated area should be cleaned immediately with a suitable decontaminant.<br>One possible (flammable) decontaminant comprises (by volume): water (45 parts),<br>ethanol or isopropyl alcohol (50 parts) and concentrated (d: 0,880) ammonia<br>solution (5 parts). A non-flammable alternative is sodium carbonate (5 parts) and<br>water (95 parts). Add the same decontaminant to the remnants and let stand for<br>several days until no further reaction in an unsealed container. Once this stage is<br>reached, close container and dispose of according to local regulations (see section<br>13). Do not allow to enter drains or watercourses. If the product contaminates lakes,<br>rivers, or sewers, inform the appropriate authorities in accordance with local<br>regulations. |

# Section 7. Handling and storage

#### Precautions for safe handling

| Protective measures                    | his<br>res<br>all<br>or<br>ver<br>orig<br>tigl | t on appropriate personal protective equipment (see Section 8). Persons with a<br>story of skin sensitization problems or asthma, allergies or chronic or recurrent<br>spiratory disease should not be employed in any process in which this product is<br>ed. Avoid exposure - obtain special instructions before use. Do not handle until<br>safety precautions have been read and understood. Do not get in eyes or on skin<br>clothing. Do not breathe vapor or mist. Do not ingest. Use only with adequate<br>ntilation. Wear appropriate respirator when ventilation is inadequate. Keep in the<br>ginal container or an approved alternative made from a compatible material, kept<br>htly closed when not in use. Empty containers retain product residue and can be<br>zardous. Do not reuse container. |
|----------------------------------------|------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Special precautions                    | a s<br>alo<br>Da                               | pors may accumulate in low or confined areas or travel a considerable distance to<br>source of ignition and flash back. Vapors are heavier than air and may spread<br>ong floors. If this material is part of a multiple component system, read the Safety<br>ta Sheet(s) for the other component or components before blending as the<br>sulting mixture may have the hazards of all of its parts.                                                                                                                                                                                                                                                                                                                                                                                                              |
| Advice on general occupational hygiene | hai<br>eat<br>eqi                              | ting, drinking and smoking should be prohibited in areas where this material is<br>ndled, stored and processed. Workers should wash hands and face before<br>ting, drinking and smoking. Remove contaminated clothing and protective<br>uipment before entering eating areas. See also Section 8 for additional<br>ormation on hygiene measures.                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

# Section 7. Handling and storage

| Conditions for safe storage,<br>including any<br>incompatibilities | with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. |
|--------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                                    | appropriate containment to avoid environmental contamination.<br>Precautions should be taken to minimize exposure to atmospheric humidity or water.<br>CO <sub>2</sub> will be formed, which, in closed containers, could result in pressurization.                                                                                                                                                                                                                                       |

Consult local authorities for acceptable exposure limits.

#### Product name SL45 JS JOINT SEALANT CLEAR - A

# Section 8. Exposure controls/personal protection

|                                   |     | • •                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
|-----------------------------------|-----|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Recommended monitoring procedures | :   | Reference should be made to appropriate monitoring standards. Reference to national guidance documents for methods for the determination of hazardous substances will also be required.                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| Appropriate engineering controls  | :   | Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits.                                                                                                                                                                                                                                                                                                                                                                                                         |
| Environmental exposure controls   | :   | Emissions from ventilation or work process equipment should be checked to ensure<br>they comply with the requirements of environmental protection legislation. In some<br>cases, fume scrubbers, filters or engineering modifications to the process<br>equipment will be necessary to reduce emissions to acceptable levels.                                                                                                                                                                                                                                                                                           |
| Individual protection measur      | res |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| Hygiene measures                  | :   | Wash hands, forearms and face thoroughly after handling chemical products, before<br>eating, smoking and using the lavatory and at the end of the working period.<br>Appropriate techniques should be used to remove potentially contaminated clothing.<br>Contaminated work clothing should not be allowed out of the workplace. Wash<br>contaminated clothing before reusing. Ensure that eyewash stations and safety<br>showers are close to the workstation location.                                                                                                                                               |
| Eye/face protection               | 1   | Chemical splash goggles.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| Skin protection                   |     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| Hand protection                   | :   | Chemical-resistant, impervious gloves complying with an approved standard should<br>be worn at all times when handling chemical products if a risk assessment indicates<br>this is necessary. Considering the parameters specified by the glove manufacturer,<br>check during use that the gloves are still retaining their protective properties. It<br>should be noted that the time to breakthrough for any glove material may be<br>different for different glove manufacturers. In the case of mixtures, consisting of<br>several substances, the protection time of the gloves cannot be accurately<br>estimated. |
| Gloves                            | 1   | butyl rubber                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| Body protection                   | :   | Personal protective equipment for the body should be selected based on the task<br>being performed and the risks involved and should be approved by a specialist<br>before handling this product.                                                                                                                                                                                                                                                                                                                                                                                                                       |
| Other skin protection             | :   | Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.                                                                                                                                                                                                                                                                                                                                                                                                       |
| Respiratory protection            | :   | Use an air-fed respirator unless a site-specific assessment determines that an air-<br>fed respirator is not necessary, in which case the results of the risk assessment<br>should be utilized to determine whether respiratory protection is necessary and what<br>type of protection is appropriate. Respirator selection must be based on known or<br>anticipated exposure levels, the hazards of the product and the safe working limits<br>of the selected respirator.                                                                                                                                             |
| Restrictions on use               | :   | Persons with a history of asthma, allergies or chronic or recurrent respiratory disease should not be employed in any process in which this product is used.                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

**Target organs** 

: Contains material which causes damage to the following organs: lungs, upper respiratory tract, eyes, nose/sinuses, throat. Contains material which may cause damage to the following organs: skin.

#### **Aspiration hazard**

Not available.

#### Information on the likely routes of exposure

#### Potential acute health effects

| Eye contact  | : Causes serious eye irritation.                                                                                                                         |
|--------------|----------------------------------------------------------------------------------------------------------------------------------------------------------|
| Inhalation   | <ul> <li>Harmful if inhaled. May cause respiratory irritation. May cause allergy or asthma<br/>symptoms or breathing difficulties if inhaled.</li> </ul> |
| Skin contact | : Causes skin irritation. May cause an allergic skin reaction.                                                                                           |
| Ingestion    | : Harmful if swallowed.                                                                                                                                  |

#### **Over-exposure signs/symptoms**

| Eye contact | : Adverse symptoms may include the following:<br>pain or irritation<br>watering<br>redness |

| Ingestion                      | : No specific data.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| Delayed and immediate effect   | ts and also chronic effects from short and long term exposure                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| Conclusion/Summary             | : There are no data available on the mixture itself. Skin contact to isocyanate monomer may lead to allergic lung reaction. Based on the properties of the isocyanate components and considering toxicological data on similar mixtures, this mixture may cause acute irritation and/or sensitization of the respiratory system, leading to an asthmatic condition, wheezing and tightness of the chest. Repeated exposure may lead to permanent respiratory disability. If splashed in the eyes, the liquid may cause irritation and reversible damage. Ingestion may cause nausea, diarrhea and vomiting. This takes into account, where known, delayed and immediate effects and also chronic effects of components from short-term and long-term exposure by oral, inhalation and dermal routes of exposure and eye contact. Exposure to amine vapor has been reported to cause transient corneal edema described as blue haze, halo effect, foggy or blurred vision for several hours. This condition is typically temporary and does not cause permanent visual effects. When the proper eye protection specified in Section 8 is worn, exposure is significantly reduced and the condition has not been observed. |
| <u>Short term exposure</u>     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| Potential immediate<br>effects | : There are no data available on the mixture itself.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

| General                        | : May cause damage to organs through prolonged or repeated exposure. Once sensitized, a severe allergic reaction may occur when subsequently exposed to very low levels.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| Carcinogenicity                | : Suspected of causing cancer. Risk of cancer depends on duration and level of exposure.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

# Section 13. Disposal considerations

2

Disposal methods

The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and nonrecyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty

Product name SL45 JS JOINT SEALANT CLEAR - A

### Section 13. Disposal considerations

containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

Disposal should be in accordance with applicable regional, national and local laws and regulations.

Refer to Section 7: HANDLING AND STORAGE and Section 8: EXPOSURE CONTROLS/PERSONAL PROTECTION for additional handling information and protection of employees. Section 6. Accidental release measures
