# SAFETY DATA SHEET

The information in this Safety Data Sheet is required pursuant to GHS UN rev. 7

Date of issue/Date of revision 5 October 2023 Version 8

### Section 1. Identification

| Product code                                    | : 00334744  |
|---|---|
| Product name                                    | : AMERCOAT 5450 BLACK   |
| Product type                                    | : Liquid.   |
| Other means of identification<br>Not available. |   |
| Relevant identified uses of th                  | e substance or mixture and uses advised against   |
| Product use                                     | Coating.<br>Professional applications, Used by spraying.  |
| Uses advised against                            | : Product is not intended, labelled or packaged for consumer use.   |
| Company/undertaking<br>identification           | <ul> <li>PPG Industries Sales, Inc. and PPG Coatings (Philippines), Inc.<br/>3rd Floor First Life Center</li> <li>174 Salcedo St., Legaspi Village</li> <li>Makati City 1229, Philippines</li> <li>Tel # 00632- 752-6773/ Fax # 00632-752-6771</li> </ul> |
| Emergency telephone<br>number                   | : CHEMTREC +(63) 2-395-3308 (CCN 17704)   |

### Section 2. Hazards identification

| Classification of the | : FLAMMABLE LIQUIDS - Category 3   |
|-----------------------|--|
| substance or mixture  | ACUTE TOXICITY (dermal) - Category 5   |
|                       | ACUTE TOXICITY (inhalation) - Category 4   |
|                       | SKIN CORROSION/IRRITATION - Category 2   |
|                       | SERIOUS EYE DAMAGE/ EYE IRRITATION - Category 2A   |
|                       | CARCINOGENICITY - Category 1B<br>TOXIC TO REPRODUCTION - Category 1B                                       |
|                       | SPECIFIC TARGET ORGAN TOXICITY (REPEATED EXPOSURE) - Category 1<br>AQUATIC HAZARD (ACUTE) - Category 3     |
|                       | AQUATIC HAZARD (LONG-TERM) - Category 3  |
|                       | Percentage of the mixture consisting of ingredient(s) of unknown acute dermal toxicity: 42.9%              |
|                       | Percentage of the mixture consisting of ingredient(s) of unknown acute inhalation toxicity: 86.7%          |
|                       | Percentage of the mixture consisting of ingredient(s) of unknown hazards to the aquatic environment: 61.1% |
| GHS label elements    |  |
| Hazard pictograms     |  |
|                       | <u> </u>   |
|                       |  |

Product code 00334744 Product name AMERCOAT 5450 BLACK

### Section 2. Hazards identification

| Signal word                | : | Danger  |
|----------------------------|---|---|
| Hazard statements          | : | <ul> <li>May be harmful in contact with skin.</li> <li>Causes skin irritation.</li> <li>Causes serious eye irritation.</li> <li>Harmful if inhaled.</li> <li>May cause cancer.</li> <li>May damage fertility or the unborn child.</li> <li>Causes damage to organs through prolonged or repeated exposure. (central nervous system (CNS))</li> <li>Harmful to aquatic life with long lasting effects.</li> </ul>  |
| Precautionary statements   |   |   |
| Prevention                 | : | Obtain special instructions before use. Do not handle until all safety precautions<br>have been read and understood. Wear protective gloves, protective clothing and<br>eye or face protection. Keep away from heat, hot surfaces, sparks, open flames<br>and other ignition sources. No smoking. Use only outdoors or in a well-ventilated<br>area. Avoid release to the environment. Do not breathe vapor. Do not eat, drink or<br>smoke when using this product. Wash thoroughly after handling.   |
| Response                   | : | IF exposed or concerned: Get medical advice or attention. IF INHALED: Remove<br>person to fresh air and keep comfortable for breathing. Call a POISON CENTER or<br>doctor if you feel unwell. IF ON SKIN (or hair): Take off immediately all<br>contaminated clothing. Rinse skin with water. IF ON SKIN: Call a POISON<br>CENTER or doctor if you feel unwell. Wash with plenty of water. If skin irritation<br>occurs: Get medical advice or attention. IF IN EYES: Rinse cautiously with water for<br>several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.<br>If eye irritation persists: Get medical advice or attention. |
| Storage                    | : | Store locked up.  |
| Disposal                   | : | Dispose of contents and container in accordance with all local, regional, national and international regulations.   |
| Other hazarde which do not |   | Prolonged or repeated contact may dry skin and cause irritation   |

result in classification

**Other hazards which do not** : Prolonged or repeated contact may dry skin and cause irritation.

### Section 3. Composition/information on ingredients

#### Substance/mixture

: Mixture

#### **CAS number/other identifiers**

| <b>CAS number</b> : Not applicable.         |            |            |
|---|------------|------------|
| Ingredient name                             | %          | CAS number |
| parium sulfate                              | 25 - <50   | 7727-43-7  |
| Solvent naphtha (petroleum), medium aliph.  | 10 - <20   | 64742-88-7 |
| Stoddard solvent                            | 5 - <10    | 8052-41-3  |
| Solvent naphtha (petroleum), light aromatic | 5 - <10    | 64742-95-6 |
| 1,2,4-trimethylbenzene                      | 3 - <5     | 95-63-6    |
| xylene                                      | 1 - <3     | 1330-20-7  |
| 2-ethylhexanoic acid, zirconium salt        | 1 - <3     | 22464-99-9 |
| 2-methoxy-1-methylethyl acetate             | 1 - <3     | 108-65-6   |
| 2-butanone oxime                            | 0.3 - <1   | 96-29-7    |
| cumene                                      | 0.1 - <0.3 | 98-82-8    |
|   | I          |            |

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

### Section 3. Composition/information on ingredients

SUB codes represent substances without registered CAS Numbers.

### Section 4. First aid measures

| Description of necessary fin | rst aid measures  |
|------------------------------|---|
| Eye contact                  | <ul> <li>Remove contact lenses, irrigate copiously with clean, fresh water, holding the<br/>eyelids apart for at least 10 minutes and seek immediate medical advice.</li> </ul>   |
| Inhalation                   | : Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel.  |
| Skin contact                 | <ul> <li>Remove contaminated clothing and shoes. Wash skin thoroughly with soap and<br/>water or use recognized skin cleanser. Do NOT use solvents or thinners.</li> </ul>  |
| Ingestion                    | : If swallowed, seek medical advice immediately and show this container or label.<br>Keep person warm and at rest. Do NOT induce vomiting.  |
| Most important symptoms/     | effects, acute and delayed  |
| Potential acute health effe  | <u>cts</u>  |
| Eye contact                  | : Causes serious eye irritation.  |
| Inhalation                   | : 📕 armful if inhaled.  |
| Skin contact                 | : May be harmful in contact with skin. Causes skin irritation. Defatting to the skin.   |
| Ingestion                    | : 📈 known significant effects or critical hazards.  |
| Over-exposure signs/sym      | <u>otoms</u>  |
| Eye contact                  | : Adverse symptoms may include the following:<br>pain or irritation<br>watering<br>redness  |
| Inhalation                   | : Adverse symptoms may include the following:<br>reduced fetal weight<br>increase in fetal deaths<br>skeletal malformations   |
| Skin contact                 | : Adverse symptoms may include the following:<br>irritation<br>redness<br>dryness<br>cracking<br>reduced fetal weight<br>increase in fetal deaths<br>skeletal malformations   |
| Ingestion                    | <ul> <li>Adverse symptoms may include the following:<br/>reduced fetal weight<br/>increase in fetal deaths<br/>skeletal malformations</li> </ul>  |
| Indication of immediate me   | dical attention and special treatment needed, if necessary  |
| Notes to physician           | <ul> <li>Treat symptomatically. Contact poison treatment specialist immediately if large<br/>quantities have been ingested or inhaled.</li> </ul>   |
| Specific treatments          | : No specific treatment.  |
| Protection of first-aiders   | : No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. |

#### See toxicological information (Section 11)

### Section 5. Fire-fighting measures

| _  | _   |
|--|---|
| Extinguishing media                            |   |
| Suitable extinguishing media                   | : Use dry chemical, CO <sub>2</sub> , water spray (fog) or foam.  |
| Unsuitable extinguishing media                 | : Do not use water jet.   |
| Specific hazards arising from the chemical     | : Flammable liquid and vapor. Runoff to sewer may create fire or explosion hazard.<br>In a fire or if heated, a pressure increase will occur and the container may burst, with<br>the risk of a subsequent explosion. This material is harmful to aquatic life with long<br>lasting effects. Fire water contaminated with this material must be contained and<br>prevented from being discharged to any waterway, sewer or drain. |
| Hazardous thermal decomposition products       | : Decomposition products may include the following materials:<br>carbon oxides<br>sulfur oxides<br>halogenated compounds<br>metal oxide/oxides  |
| Special protective actions for fire-fighters   | : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.  |
| Special protective equipment for fire-fighters | : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.   |

# Section 6. Accidental release measures

#### Personal precautions, protective equipment and emergency procedures

|                                | material may pose the same hazard as the spilled product. Note: se  | e Section 1 for   |
|--------------------------------|---|---|
| Large spill                    | : Stop leak if without risk. Move containers from spill area. Use spark<br>explosion-proof equipment. Approach release from upwind. Preven<br>sewers, water courses, basements or confined areas. Wash spillage<br>effluent treatment plant or proceed as follows. Contain and collect s<br>combustible, absorbent material e.g. sand, earth, vermiculite or diate<br>and place in container for disposal according to local regulations (se<br>Dispose of via a licensed waste disposal contractor. Contaminated a | at entry into<br>es into an<br>pillage with non-<br>omaceous earth<br>e Section 13).<br>absorbent |
| Small spill                    | Stop leak if without risk. Move containers from spill area. Use spark<br>explosion-proof equipment. Dilute with water and mop up if water-so<br>Alternatively, or if water-insoluble, absorb with an inert dry material a<br>appropriate waste disposal container. Dispose of via a licensed was<br>contractor.   | oluble.<br>Ind place in an  |
| Methods and materials for co   | ntainment and cleaning up   |   |
| Environmental precautions      | : Avoid dispersal of spilled material and runoff and contact with soil, w<br>drains and sewers. Inform the relevant authorities if the product has<br>environmental pollution (sewers, waterways, soil or air). Water pollu<br>May be harmful to the environment if released in large quantities.   | caused  |
| For emergency responders       | <ul> <li>inadequate. Put on appropriate personal protective equipment.</li> <li>If specialized clothing is required to deal with the spillage, take note information in Section 8 on suitable and unsuitable materials. See a information in "For non-emergency personnel".</li> </ul>  | of any  |
| For non-emergency<br>personnel | : No action shall be taken involving any personal risk or without suitab<br>Evacuate surrounding areas. Keep unnecessary and unprotected per<br>entering. Do not touch or walk through spilled material. Shut off all<br>No flares, smoking or flames in hazard area. Avoid breathing vapor<br>Provide adequate ventilation. Wear appropriate respirator when ven   | ersonnel from<br>ignition sources.<br>or mist.  |

### Section 6. Accidental release measures

emergency contact information and Section 13 for waste disposal.

### Section 7. Handling and storage

| Protective measures  | : | Put on appropriate personal protective equipment (see Section 8). Avoid exposure -<br>obtain special instructions before use. Avoid exposure during pregnancy. Do not<br>handle until all safety precautions have been read and understood. Do not get in<br>eyes or on skin or clothing. Do not breathe vapor or mist. Do not ingest. Avoid<br>release to the environment. Use only with adequate ventilation. Wear appropriate<br>respirator when ventilation is inadequate. Do not enter storage areas and confined<br>spaces unless adequately ventilated. Keep in the original container or an approved<br>alternative made from a compatible material, kept tightly closed when not in use.<br>Store and use away from heat, sparks, open flame or any other ignition source. Use<br>explosion-proof electrical (ventilating, lighting and material handling) equipment.<br>Use only non-sparking tools. Take precautionary measures against electrostatic<br>discharges. Empty containers retain product residue and can be hazardous. Do not<br>reuse container.<br>Materials such as cleaning rags, paper wipes and protective clothing, which are<br>contaminated with the product may spontaneously self-ignite some hours later. To<br>avoid the risks of fires, all contaminated materials should be stored in purpose-built<br>containers or in metal containers with tight-fitting, self-closing lids. Contaminated<br>materials should be removed from the workplace at the end of each working day<br>and be stored outside. |
|--|---|---|
| Advice on general occupational hygiene                             | : | Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.   |
| Conditions for safe storage,<br>including any<br>incompatibilities | : | Store between the following temperatures: 0 to 35°C (32 to 95°F). Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Eliminate all ignition sources. Separate from oxidizing materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.   |

## Section 8. Exposure controls/personal protection

#### **Control parameters**

Occupational exposure limits

| Ingredient name                            | Exposure limits                                   |
|--|---|
| <b>p</b> arium sulfate                     | ACGIH TLV (United States, 1/2022).                |
|  | TWA: 5 mg/m <sup>3</sup> 8 hours. Form: Inhalable |
|  | fraction  |
| Solvent naphtha (petroleum), medium aliph. | ACGIH TLV (United States).                        |
|  | TWA: 400 ppm                                      |
| Stoddard solvent                           | TLV (Philippines, 4/2016).                        |
|  | TLV: 1150 mg/m <sup>3</sup> 8 hours.              |
|  | TLV: 200 ppm 8 hours.                             |
| 1,2,4-trimethylbenzene                     | ACGIH TLV (United States, 1/2022).                |
| •  | TWA: 10 ppm 8 hours.                              |
| xylene                                     | TLV (Philippines, 4/2016). [Xylene]               |

#### Section 8. Exposure controls/personal protection TLV: 0.1 mg/m<sup>3</sup> 8 hours. TLV (Philippines, 4/2016). [Zirconium 2-ethylhexanoic acid, zirconium salt cpds (as Zr)] TLV: 5 mg/m<sup>3</sup>, (as Zr) 8 hours. TLV (Philippines, 4/2016). Absorbed cumene through skin. TLV: 245 mg/m<sup>3</sup> 8 hours. TLV: 50 ppm 8 hours. **Recommended monitoring** : Reference should be made to appropriate monitoring standards. Reference to procedures national guidance documents for methods for the determination of hazardous substances will also be required. Appropriate engineering : Use only with adequate ventilation. Use process enclosures, local exhaust controls ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapor or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment. Emissions from ventilation or work process equipment should be checked to ensure **Environmental exposure** ÷ they comply with the requirements of environmental protection legislation. In some controls cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels. Individual protection measures : Wash hands, forearms and face thoroughly after handling chemical products, before **Hygiene measures** eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location. Safety eyewear complying with an approved standard should be used when a risk **Eye/face protection** 2 assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles. Skin protection : Chemical-resistant, impervious gloves complying with an approved standard should Hand protection be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated. Gloves : For prolonged or repeated handling, use the following type of gloves: Recommended: neoprene, natural rubber (latex), butyl rubber, polyvinyl alcohol (PVA), Viton® May be used: Chloroprene, nitrile rubber **Body protection** : Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. When there is a risk of ignition from static electricity, wear anti-static protective clothing. For the greatest protection from static discharges, clothing should include anti-static overalls, boots and gloves.

### Section 8. Exposure controls/personal protection

| Other skin protection  | : Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.  |
|------------------------|--|
| Respiratory protection | : Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use. |

### Section 9. Physical and chemical properties

The conditions of measurement of all properties are at standard temperature and pressure unless otherwise indicated.

| <u>Appearance</u>                                       |    |                      |                |           |          |      |                        |        |        |  |

### Section 10. Stability and reactivity

| Reactivity                         | : No specific test data related to reactivity available for this product or its ingredients  |
|------------------------------------|--|
| Chemical stability                 | : The product is stable.   |
| Possibility of hazardous reactions | : Under normal conditions of storage and use, hazardous reactions will not occur.  |
| Conditions to avoid                | : When exposed to high temperatures may produce hazardous decomposition products.  |
| Incompatible materials             | : Keep away from the following materials to prevent strong exothermic reactions: oxidizing agents, strong alkalis, strong acids.   |
| Hazardous decomposition products   | <ul> <li>Depending on conditions, decomposition products may include the following<br/>materials: carbon oxides sulfur oxides halogenated compounds metal oxide/<br/>oxides</li> </ul> |
| Hazardous polymerization           | : Under normal conditions of storage and use, hazardous polymerization will not occur.   |

#### Delayed and immediate effects and also chronic effects from short and long term exposure

| <u>Short term exposure</u>     |  |
|--------------------------------|--|
| Potential immediate effects    | : Not available.   |
| Potential delayed effects      | : Not available.   |
| Long term exposure             |  |
| Potential immediate<br>effects | : Not available.   |
| Potential delayed effects      | : Not available.   |
| Potential chronic health effe  | ects   |
| Not available.                 |  |
| General                        | : Causes damage to organs through prolonge<br>repeated contact can defat the skin and lead |

ed or repeated exposure. Prolonged or d to irritation, cracking and/or dermatitis.

### Section 11. Toxicological information

Carcinogenicity Mutagenicity : May cause cancer. Risk of cancer depends on duration and level of exposure.

- : No known significant effects or critical hazards.
- Reproductive toxicity
- : May damage fertility or the unborn child.

#### Numerical measures of toxicity

#### Acute toxicity estimates

| Route                        | ATE value      |
|------------------------------|----------------|
| Oral                         | 63958.66 mg/kg |
| Dermal                       | 3075.35 mg/kg  |
| Inhalation (vapors)          | 40.01 mg/l     |
| Inhalation (dusts and mists) | 4.12 mg/l      |

#### Other information

Prolonged or repeated contact may dry skin and cause irritation. Sanding and grinding dusts may be harmful if inhaled. Repeated exposure to high vapor concentrations may cause irritation of the respiratory system and permanent brain and nervous system damage. Inhalation of vapor/aerosol concentrations above the recommended exposure limits causes headaches, drowsiness and nausea and may lead to unconsciousness or death. Avoid contact with skin and clothing.

### Section 12. Ecological information

## Section 12. Ecological information

| Mobility in soil<br>Soil/water partition<br>coefficient (Koc) | : Not available.                                    |
|---|---|
| Other adverse effects   | : No known significant effects or critical hazards. |

### Section 13. Disposal considerations

| <ul> <li>Disposal methods</li> <li>The generation of waste should be avoided or minimized wherever possible.<br/>Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapor from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or drind used containers unless they have been cleaned thoroughly internally. Avoid</li> </ul> | -                |  |

# **Special precautions for user** :**Transport within user's premises:** always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

Transport in bulk according : Not applicable. to IMO instruments

### Section 15. Regulatory information

International regulations

Montreal Protocol

Not listed.

#### Stockholm Convention on Persistent Organic Pollutants Not listed.

### Section 16. Other information

| <u>History</u>                 |  |
|--------------------------------|--|
| Date of issue/Date of revision | : 5 October 2023   |
| Date of previous issue         | : 7/5/2023   |
| Version                        | : 8  |
| Prepared by                    | : EHS  |
| ey to abbreviations            | : ATE = Acute Toxicity Estimate<br>BCF = Bioconcentration Factor<br>GHS = Globally Harmonized System of Classification and Labelling of Chemicals<br>IATA = International Air Transport Association<br>IBC = International Air Transport Association<br>IBC = International Maritime Dangerous Goods<br>LogPow = logarithm of the octanol/water partition coefficient<br>MARPOL = International Convention for the Prevention of Pollution From Ships,<br>1973 as modified by the Protocol of 1978. #### Procedure used to derive the classification

| Classification  | Justification         |
|---|-----------------------|
| AMMABLE LIQUIDS - Category 3                                    | On basis of test data |
| ACUTE TOXICITY (dermal) - Category 5                            | Calculation method    |
| ACUTE TOXICITY (inhalation) - Category 4                        | Calculation method    |
| SKIN CORROSION/IRRITATION - Category 2                          | Calculation method    |
| SERIOUS EYE DAMAGE/ EYE IRRITATION - Category 2A                | Calculation method    |
| CARCINOGENICITY - Category 1B                                   | Calculation method    |
| TOXIC TO REPRODUCTION - Category 1B                             | Calculation method    |
| SPECIFIC TARGET ORGAN TOXICITY (REPEATED EXPOSURE) - Category 1 | Calculation method    |
| AQUATIC HAZARD (ACUTE) - Category 3                             | Calculation method    |
| AQUATIC HAZARD (LONG-TERM) - Category 3                         | Calculation method    |
