# Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II, as amended by UK REACH Regulation SI 2019/758

# SAFETY DATA SHEET

Date of issue/Date of revision

: 21 October 2023

Version

## SECTION 1: Identification of the substance/mixture and of the company/ undertaking

| 1.1 Product identifier           |   |
|----------------------------------|---|
| Product name                     | : AMERCOAT 385 BASE LEAF GREEN 6002                               |
| Product code                     | : 00288147  |
| Product description              | :   |
| Product type                     | : Liquid.   |
| Other means of<br>identification | : Not available.  |
| 1.2 Relevant identified uses     | s of the substance or mixture and uses advised against            |
| Product use                      | : Professional applications, Used by spraying.                    |
| Use of the substance/<br>mixture | : Coating.  |
| Uses advised against             | : Product is not intended, labelled or packaged for consumer use. |

## 1.3 Details of the supplier of the safety data sheet

PPG Coatings Belgium BV/SRL Tweemontstraat 104 B-2100 Deurne Belgium Telephone +32-33606311 Fax +32-33606435

e-mail address of person :

: Product.Stewardship.EMEA@ppg.com

## responsible for this SDS

## 1.4 Emergency telephone number

Supplier

+31 20 4075210

## **SECTION 2: Hazards identification**

## 2.1 Classification of the substance or mixture

Product definition : Mixture Classification according to UK CLP/GHS

Flam. Liq. 3, H226 Skin Irrit. 2, H315 Eye Irrit. 2, H319 Skin Sens. 1, H317 Aquatic Chronic 2, H411

The product is classified as hazardous according to UK CLP Regulation SI 2019/720 as amended.

See Section 16 for the full text of the H statements declared above.

See Section 11 for more detailed information on health effects and symptoms.

# 2.2 Label elements

Hazard pictograms

Signal word

: Warning

| Code<br>AMERCOA                   | : 00288147<br>T 385 BASE LEAF GREEN 6002 | Date of issue/Date of revision | : 21 October 2023 |
|-----------------------------------|--|--------------------------------|-------------------|
| SECTION 2: Hazards identification |  |                                |                   |

| Hazard statements   | Flammable liquid and vapour.<br>Causes skin irritation.<br>May cause an allergic skin reaction.<br>Causes serious eye irritation.<br>Toxic to aquatic life with long lasting effects.                        |      |
|---|--|------|
| Precautionary statements  |  |      |
| Prevention  | Wear protective gloves. Wear eye or face protection. Keep away from heat, he surfaces, sparks, open flames and other ignition sources. No smoking. Avoid release to the environment. Avoid breathing vapour. | ot   |
| Response  | Collect spillage.  |      |
| Storage   | Not applicable.  |      |
| Disposal  | Dispose of contents and container in accordance with all local, regional, national and international regulations.<br>P280, P210, P273, P261, P391, P501  | al   |
| Supplemental label elements   | Contains epoxy constituents. May produce an allergic reaction.   |      |
| Annex XVII - Restrictions<br>on the manufacture,<br>placing on the market and<br>use of certain dangerous<br>substances, mixtures and<br>articles | Not applicable.  |      |
| Special packaging requirem  | <u>its</u>   |      |
| Containers to be fitted<br>with child-resistant<br>fastenings   | Not applicable.  |      |
| Tactile warning of danger   | Not applicable.  |      |
| 2.3 Other hazards   |  |      |
| Product meets the criteria<br>for PBT or vPvB according<br>to Regulation (EC) No.<br>1907/2006, Annex XIII  | This mixture does not contain any substances that are assessed to be a PBT c vPvB.   | or a |
| Other hazards which do not result in classification   | Prolonged or repeated contact may dry skin and cause irritation.   |      |

|  |  |              | See Section 16 for<br>the full text of the H<br>statements declared<br>above.         |         |

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment, are PBTs, vPvBs or Substances of equivalent concern, or have been assigned a workplace exposure limit and hence require reporting in this section. <u>Type</u>

[1] Substance classified with a health or environmental hazard

[2] Substance with a workplace exposure limit

Occupational exposure limits, if available, are listed in Section 8.

#### SUB codes represent substances without registered CAS Numbers.

## SECTION 4: First aid measures

## 4.1 Description of first aid measures

| an Booonphon of mot and m  |   |  |
|----------------------------|---|--|
| Eye contact                | Remove contact lenses, irrigate copiously with clean, fresh water, holding the eyelids apart for at least 10 minutes and seek immediate medical advice.   |  |
| Inhalation                 | Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel.  |  |
| Skin contact               | Remove contaminated clothing and shoes. Wash skin thoroughly with soap and water or use recognised skin cleanser. Do NOT use solvents or thinners.  |  |
| Ingestion                  | If swallowed, seek medical advice immediately and show the container or label. Keep person warm and at rest. Do NOT induce vomiting.  |  |
| Protection of first-aiders | No action shall be taken involving any personal risk or without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. |  |
|                            |   |  |

#### 4.2 Most important symptoms and effects, both acute and delayed

| Potential acute health effects |   |   |
|--------------------------------|---|---|
| Eye contact                    | : | Causes serious eye irritation.  |
| Inhalation                     | : | No known significant effects or critical hazards.                                   |
| Skin contact                   | 1 | Causes skin irritation. Defatting to the skin. May cause an allergic skin reaction. |
| Ingestion                      | 1 | No known significant effects or critical hazards.                                   |

English (GB)

| Code     | : 00288147               | Date of issue/Date of revision | : 21 October 2023 |
|----------|--------------------------|--------------------------------|-------------------|
| AMERCOAT | 385 BASE LEAF GREEN 6002 |                                |                   |

## SECTION 4: First aid measures

| Over-exposure signs/sy    | <u>mptoms</u>   |
|---------------------------|---|
| Eye contact               | : Adverse symptoms may include the following:<br>pain or irritation<br>watering<br>redness  |
| Inhalation                | : No specific data.   |
| Skin contact              | : Adverse symptoms may include the following:<br>irritation<br>redness<br>dryness<br>cracking   |
| Ingestion                 | : No specific data.   |
| 4.3 Indication of any imm | nediate medical attention and special treatment needed  |
| Notes to physician        | <ul> <li>Treat symptomatically. Contact poison treatment specialist immediately if large<br/>quantities have been ingested or inhaled.</li> </ul> |
| Specific treatments       | : No specific treatment.  |

# SECTION 5: Firefighting measures

| 5.1 Extinguishing media        |  |
|--------------------------------|--|
| Suitable extinguishing media   | : Use dry chemical, CO <sub>2</sub> , water spray (fog) or foam. |
| Unsuitable extinguishing media | : Do not use water jet.  |

## 5.2 Special hazards arising from the substance or mixture

| Hazards from the substance or mixture          | - | Flammable liquid and vapour. Runoff to sewer may create fire or explosion hazard.<br>In a fire or if heated, a pressure increase will occur and the container may burst, with<br>the risk of a subsequent explosion. This material is toxic to aquatic life with long<br>lasting effects. Fire water contaminated with this material must be contained and<br>prevented from being discharged to any waterway, sewer or drain. |
|--|---|--|
| Hazardous combustion products                  | : | Decomposition products may include the following materials:<br>carbon oxides<br>metal oxide/oxides   |
| 5.3 Advice for firefighters                    |   |  |
| Special protective actions for fire-fighters   | : | Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.   |
| Special protective equipment for fire-fighters | : | Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.  |

## **SECTION 6: Accidental release measures**

| 6.1 Personal precautions, prote  | ctive equipment and emergency procedures   |
|----------------------------------|--|
| For non-emergency :<br>personnel | No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilt material. Shut off all ignition sources.<br>No flares, smoking or flames in hazard area. Avoid breathing vapour or mist.<br>Provide adequate ventilation. Wear appropriate respirator when ventilation is<br>inadequate. Put on appropriate personal protective equipment. |
| For emergency responders :       | If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".  |

| English (GB) | United Kingdom (UK) | 4/16 |
|--------------|---------------------|------|
|              |                     |      |

| Code : 00288147      |                | Date of issue/Date of revision | : 21 October 2023 |
|----------------------|----------------|--------------------------------|-------------------|
| AMERCOAT 385 BASE LI | EAF GREEN 6002 |                                |                   |

## **SECTION 6: Accidental release measures**

| 6.2 Environmental precautions   | : Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains<br>and sewers. Inform the relevant authorities if the product has caused environmental<br>pollution (sewers, waterways, soil or air). Water polluting material. May be harmful<br>to the environment if released in large quantities. Collect spillage.  |
|---------------------------------|--|
| 6.3 Methods and material for    | r containment and cleaning up  |
| Small spill                     | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.   |
| Large spill                     | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach the release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilt product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal. |
| 6.4 Reference to other sections | : See Section 1 for emergency contact information.<br>See Section 8 for information on appropriate personal protective equipment.<br>See Section 13 for additional waste treatment information.  |

## **SECTION 7: Handling and storage**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

## 7.1 Precautions for safe handling

| Protective measures                    | : Put on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Do not get in eyes or on skin or clothing. Do not ingest. Avoid breathing vapour or mist. Avoid release to the environment. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Take precautionary measures against electrostatic discharges. Empty containers retain product residue and can be hazardous. Do not reuse container. |
|--|---|
| Advice on general occupational hygiene | : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hydene measures.  |

#### 7.2 Conditions for safe storage, including any incompatibilities

Storage temperature: 0 to 35°C (32 to 95°F). Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Eliminate all ignition sources. Separate from oxidising materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.

|   | Soil                   | 3.13 mg/kg      | Equilibrium Partitioning |
|   | Sewage Treatment Plant | 463 mg/l        | Assessment Factors       |

#### 8.2 Exposure controls

| English (GB) | United |
|--------------|--------|
|--------------|--------|

| Code : 00288147                        | Date of issue/Date of revision : 21 October 2023   |
|--|--|
| AMERCOAT 385 BASE LEAF                 |  |
| SECTION 8: Exposu                      | re controls/personal protection  |
| Appropriate engineering controls       | : Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapour or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.   |
| Individual protection measured         | ures   |
| Hygiene measures                       | : Wash hands, forearms and face thoroughly after handling chemical products, before<br>eating, smoking and using the lavatory and at the end of the working period.<br>Appropriate techniques should be used to remove potentially contaminated clothing.<br>Contaminated work clothing should not be allowed out of the workplace. Wash<br>contaminated clothing before reusing. Ensure that eyewash stations and safety<br>showers are close to the workstation location.  |
| Eye/face protection<br>Skin protection | : Chemical splash goggles.   |
| Hand protection                        | : Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated. When prolonged or frequently repeated contact may occur, a glove with a protection class of 6 (breakthrough time greater than 480 minutes according to EN 374) is recommended. When only brief contact is expected, a glove with a protection class of 2 or higher (breakthrough time greater than 30 minutes according to EN 374) is recommended. The user must check that the final choice of type of glove selected for handling this product is the most appropriate and takes into account the particular conditions of use, as included in the user's risk assessment. butyl rubber |
| Body protection                        | : Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. When there is a risk of ignition from static electricity, wear anti-static protective clothing. For the greatest protection from static discharges, clothing should include anti-static overalls, boots and gloves.  |
| Other skin protection                  | : Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.  |
| Respiratory protection                 | : Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator. If workers are exposed to concentrations above the exposure limit, they must use appropriate, certified respirators. Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Wear a respirator conforming to EN140. Filter type: organic vapour (Type A) and particulate filter P3   |
| Environmental exposure controls        | : Emissions from ventilation or work process equipment should be checked to ensure<br>they comply with the requirements of environmental protection legislation. In some<br>cases, fume scrubbers, filters or engineering modifications to the process equipment<br>will be necessary to reduce emissions to acceptable levels.  |

## **SECTION 9: Physical and chemical properties**

The conditions of measurement of all properties are at standard temperature and pressure unless otherwise indicated.

### 9.1 Information on basic physical and chemical properties

| Appearance      |                  |

## AMERCOAT 385 BASE LEAF GREEN 6002

## **SECTION 13: Disposal considerations**

```
Special precautions

: This material and its container

taken when handling emption

Empty containers or liners may

residues may create a highly

container. Do not cut, weld of

thoroughly internally. Avoid of
```

This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapour from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.

## **SECTION 14: Transport information**

## **Additional information**

ADR/RID: The environmentally hazardous substance mark is not required when transported in sizes of ≤5 L or<br/>≤5 kg.Tunnel code: (D/E)ADN: The environmentally hazardous substance mark is not required when transported in sizes of ≤5 L or<br/>≤5 kg.IMDG: The marine pollutant mark is not required when transported in sizes of ≤5 L or ≤5 kg.IATA: The environmentally hazardous substance mark may appear if required by other transportation<br/>regulations.

**14.6 Special precautions for : Transport within user's premises:** always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

14.7 Transport in bulk : Not available. according to IMO instruments

## **SECTION 15: Regulatory information**

15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture
UK (GB)/REACH
Annex XIV - List of substances subject to authorisation
Annex XIV
None of the components are listed.
Substances of very high concern

| Code     | : 00288147               | Date of issue/Date of revision | : 21 October 2023 |

| AMERCOAT | 385 BASE LEAF GREEN 6002 |                                |                   |

## **SECTION 15: Regulatory information**

None of the components are listed.

Ozone depleting substances

Not listed.

Annex XVII - Restrictions : Not applicable. on the manufacture, placing on the market and use of certain dangerous substances, mixtures and articles

#### Seveso Directive

This product is controlled under the Seveso Directive.

#### Danger criteria

Category P5c E2

## **SECTION 16: Other information**

Indicates information that has changed from previously issued version.

| Abbreviations and | : ATE = Acute Toxicity Estimate   |
|-------------------|---|
| acronyms          | GB CLP = UK CLP (EC No 1272/2008) on the Classification, Labelling and        |
| -                 | Packaging of Substances and Mixtures as amended by (EU Exit) Regulations 2019 |
|                   | No. 720 and amendments  |
|                   | DMEL = Derived Minimal Effect Level   |

|                   | SGG = Segregation Group   |
|                   | vPvB = Very Persistent and Very Bioaccumulative                               |

#### Procedure used to derive the classification

| Classification          | Justification         |
|-------------------------|-----------------------|
| Flam. Liq. 3, H226      | On basis of test data |
| Skin Irrit. 2, H315     | Calculation method    |
| Eye Irrit. 2, H319      | Calculation method    |
| Skin Sens. 1, H317      | Calculation method    |
| Aquatic Chronic 2, H411 | Calculation method    |

## Full text of abbreviated H statements

| H226 | Flammable liquid and vapour.                            |
|------|---|
| H302 | Harmful if swallowed.                                   |
| H304 | May be fatal if swallowed and enters airways.           |
| H315 | Causes skin irritation.                                 |
| H317 | May cause an allergic skin reaction.                    |
| H319 | Causes serious eye irritation.                          |
| H331 | Toxic if inhaled.                                       |
| H332 | Harmful if inhaled.                                     |
| H335 | May cause respiratory irritation.                       |
| H336 | May cause drowsiness or dizziness.                      |
| H350 | May cause cancer.                                       |
| H351 | Suspected of causing cancer.                            |
| H400 | Very toxic to aquatic life.                             |
| H410 | Very toxic to aquatic life with long lasting effects.   |
| H411 | Toxic to aquatic life with long lasting effects.        |
| H413 | May cause long lasting harmful effects to aquatic life. |
|      |   |
