# **SAFETY DATA SHEET**

Date of issue/Date of revision

: 25 October 2023

Version

: 17

pPG

# SECTION 1: Identification of the substance/mixture and of the company/ undertaking

1.1 Product identifier	
Product name	: SIGMACOVER 300 HARDENER
Product code	: 00138920
Other means of identification	n

Not available.

number

#### 1.2 Relevant identified uses of the substance or mixture and uses advised against

Product use	: Professional applications, Used by spraying.
Use of the substance/ mixture	: Coating.
Uses advised against	: Product is not intended, labelled or packaged for consumer use.

#### **1.3 Details of the supplier of the safety data sheet**

Sigma Paints Egypt Villa#8, street 279 New Maadi, Cairo Egypt Tel: 00202 516 223 797 Fax: 00202 516 38 04 e-mail address of person responsible for this SDS	: PS.ACEMEA@ppg.com
1.4 Emergency telephone	: +20 2 6840902

## **SECTION 2: Hazards identification**

2.1 Classification of the substance or mixture Product definition : Mixture Classification according to Regulation (EC) No. 1272/2008 [CLP/GHS] Fam. Liq. 3, H226 Skin Irrit. 2, H315 Eye Dam. 1, H318 STOT SE 3, H335 STOT SE 3, H336 STOT RE 2, H373 The product is classified as hazardous according to Regulation (EC) 1272/2008 as amended.

See Section 16 for the full text of the H statements declared above.

See Section 11 for more detailed information on health effects and symptoms.

#### 2.2 Label elements

Code : 00138920	Date of issue/Date of revision         : 25 October 2023		
SIGMACOVER 300 HARDENE	.R		
SECTION 2: Hazards identification			
Hazard pictograms			
Signal word	: Danger		
Hazard statements	<ul> <li>Fammable liquid and vapour.</li> <li>Causes skin irritation.</li> <li>Causes serious eye damage.</li> <li>May cause respiratory irritation.</li> <li>May cause drowsiness or dizziness.</li> <li>May cause damage to organs through prolonged or repeated exposure.</li> </ul>		
Precautionary statements	, , , , , , , , , , , , , , , , , , , ,		
Prevention	: Wear protective gloves. Wear eye or face protection. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Do not breathe vapour.		
Response	: <b>IF</b> IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, i present and easy to do. Continue rinsing.		
Storage	: Store in a well-ventilated place. Keep container tightly closed.		
Disposal	<ul> <li>Image: Provide the provided and the provide</li></ul>		
Hazardous ingredients	: I methoxy-2-propanol 2-methylpropan-1-ol ethylbenzene xylene		
Supplemental label elements	: Not applicable.		
Annex XVII - Restrictions on the manufacture, placing on the market and use of certain dangerous substances, mixtures and articles	: Not applicable.		
Special packaging requirem	<u>ients</u>		
Containers to be fitted with child-resistant fastenings	: Not applicable.		
Tactile warning of danger	: Not applicable.		
2.3 Other hazards			
Product meets the criteria for PBT or vPvB	: This mixture does not contain any substances that are assessed to be a PBT or a vPv		
Other hazards which do not result in classification	: Prolonged or repeated contact may dry skin and cause irritation.		

Code : 00138920 SIGMACOVER 300 HARDENER Date of issue/Date of revision

: 25 October 2023

**SECTION 3: Composition/information on ingredients** 

#### 3.2 Mixtures

: Mixture

Product/ingredient name	Identifiers	%	Classification	Specific Conc. Limits, M-factors and ATEs	Туре
rethoxy-2-propanol	REACH #: 01-2119457435-35 EC: 203-539-1 CAS: 107-98-2 Index: 603-064-00-3	≥10 - ≤25	Flam. Liq. 3, H226 STOT SE 3, H336	-	[1] [2]

SIGMACOVER 300 HARDENER

# **SECTION 3: Composition/information on ingredients**

Occupational exposure limits, if available, are listed in Section 8.

SUB codes represent substances without registered CAS Numbers.

## **SECTION 4: First aid measures**

#### 4.1 Description of first aid measures

Eye contact	: Check for and remove any contact lenses. Immediately flush eyes with running water for at least 15 minutes, keeping eyelids open. Seek immediate medical attention.
Inhalation	<ul> <li>Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel.</li> </ul>
Skin contact	<ul> <li>Remove contaminated clothing and shoes. Wash skin thoroughly with soap and water or use recognised skin cleanser. Do NOT use solvents or thinners.</li> </ul>
Ingestion	<ul> <li>If swallowed, seek medical advice immediately and show the container or label. Keep person warm and at rest. Do NOT induce vomiting.</li> </ul>
Protection of first-aiders	: No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves.

4.2 Most important sym Potential acute health	ptoms and effects, both acute and de	elayed	
Eye contact	: Causes serious eye damage.		
Inhalation	, ,	stem (CNS) depression. May cause dr ory irritation.	owsiness or
Skin contact	: 🖉auses skin irritation. Defattir	ng to the skin.	
Ingestion	: Can cause central nervous sys	stem (CNS) depression.	
Over-exposure signs/s	symptoms		
Eye contact	: Adverse symptoms may inclu pain watering redness	de the following:	
Inhalation	: Adverse symptoms may inclu respiratory tract irritation coughing nausea or vomiting headache drowsiness/fatigue dizziness/vertigo unconsciousness	de the following:	
Skin contact	: Adverse symptoms may inclu pain or irritation redness dryness cracking blistering may occur	de the following:	
Ingestion	: Adverse symptoms may inclue stomach pains	de the following:	
4.3 Indication of any im	mediate medical attention and specia	I treatment needed	
Notes to physician		position products in a fire, symptoms m d to be kept under medical surveillance	
Specific treatments	: No specific treatment.		
	English (	GB) Egypt	4/15

SECTION 5: Firefighting measures		
SIGMACOVER 300 HARDENER		
Code : 00138920	Date of issue/Date of revision	: 25 October 2023

5.1 Extinguishing media		
Suitable extinguishing media	: Use dry chemical, CO <sub>2</sub> , water spray (fog) or foam.	
Unsuitable extinguishing media	: Do not use water jet.	
5.2 Special hazards arising f	rom the substance or mixture	
Hazards from the substance or mixture	: Flammable liquid and vapour. Runoff to sewer may create fire or explosion hazard. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion.	
Hazardous combustion products	: Decomposition products may include the following materials: carbon oxides nitrogen oxides	
5.3 Advice for firefighters		
Special precautions for fire-fighters	: Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.	
Special protective equipment for fire-fighters	: Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. Clothing for fire-fighters (including helmets, protective boots and gloves) conforming to European standard EN 469 will provide a basic level of protection for chemical incidents.	

# **SECTION 6: Accidental release measures**

#### 6.1 Personal precautions, protective equipment and emergency procedures

For non-emergency personnel	: No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilt material. Shut off all ignition sources. No flares, smoking or flames in hazard area. Do not breathe vapour or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment.
For emergency responders	: If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".
6.2 Environmental precautions	: Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).
6.3 Methods and material for	containment and cleaning up
Small spill	: Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.
Large spill	: Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach the release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations. Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilt product.
<ul><li>6.2 Environmental precautions</li><li>6.3 Methods and material for Small spill</li></ul>	<ul> <li>Section 8 on suitable and unsuitable materials. See also the information in "For non emergency personnel".</li> <li>Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains a sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).</li> <li><b>containment and cleaning up</b> <ul> <li>Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatio or if water-insoluble, absorb with an inert dry material and place in an appropriate wat disposal container. Dispose of via a licensed waste disposal contractor.</li> <li>Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. ### **SECTION 6: Accidental release measures**

2

6.4 Reference to other sections

See Section 1 for emergency contact information. See Section 8 for information on appropriate personal protective equipment. See Section 13 for additional waste treatment information.

## **SECTION 7: Handling and storage**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### 7.1 Precautions for safe handling

Protective measures	: Fut on appropriate personal protective equipment (see Section 8). Do not get in eyes or on skin or clothing. Do not breathe vapour or mist. Do not ingest. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Take precautionary measures against electrostatic discharges. Empty containers retain product residue and can be hazardous. Do not reuse container.
Advice on general occupational hygiene	: Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.
7.2 Conditions for safe storage, including any incompatibilities	: Store between the following temperatures: 0 to 35°C (32 to 95°F). Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Eliminate all ignition sources. Separate from oxidising materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.

#### 7.3 Specific end use(s)

See Section 1.2 for Identified uses.

## **SECTION 8: Exposure controls/personal protection**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### 8.1 Control parameters

#### **Occupational exposure limits**

Product/ingredient name	Exposure limit values		
✓-methoxy-2-propanol	ACGIH TLV (United States	s, 1/2022).	
	STEL: 369 mg/m <sup>3</sup> 15 minu	tes.	
	STEL: 100 ppm 15 minute		
	TWA: 184 mg/m <sup>3</sup> 8 hours.		
	TWA: 50 ppm 8 hours.		
2-methylpropan-1-ol	ACGIH TLV (United States	s, 1/2022).	
	TWA: 152 mg/m <sup>3</sup> 8 hours.		
	TWA: 50 ppm 8 hours.

Code : 00138920		Date of issue/Date of revision: 25 October 2023
SIGMACOVER 300 HARDENE	R	
xylene		Substances for which there is a Biological Exposure Index or Indices 2002 Adoption. TWA: 20 ppm 8 hours. ACGIH TLV (United States, 1/2022). [p-xylene and mixtures containing p-xylene] Ototoxicant. TWA: 20 ppm 8 hours.
Recommended monitoring procedures	Standard EN 66 by inhalation to strategy) Europ application and biological agen requirements for agents) Refere	uld be made to monitoring standards, such as the following: European 89 (Workplace atmospheres - Guidance for the assessment of exposure chemical agents for comparison with limit values and measurement bean Standard EN 14042 (Workplace atmospheres - Guide for the use of procedures for the assessment of exposure to chemical and ts) European Standard EN 482 (Workplace atmospheres - General or the performance of procedures for the measurement of chemical ence to national guidance documents for methods for the determination ubstances will also be required.
8.2 Exposure controls		
Appropriate engineering controls	other engineeri recommended	dequate ventilation. Use process enclosures, local exhaust ventilation of ng controls to keep worker exposure to airborne contaminants below any or statutory limits. The engineering controls also need to keep gas, concentrations below any lower explosive limits. Use explosion-proof pment.
Individual protection measu	<u>res</u>	
Hygiene measures	eating, smoking Appropriate teo Wash contamir	brearms and face thoroughly after handling chemical products, before g and using the lavatory and at the end of the working period. The should be used to remove potentially contaminated clothing. Thated clothing before reusing. Ensure that eyewash stations and safety pose to the workstation location.
Eye/face protection <u>Skin protection</u>	: Chemical splas	h goggles and face shield.
Hand protection	worn at all time necessary. Co during use that noted that the t glove manufact protection time frequently repe (breakthrough t When only brie (breakthrough t The user must product is the n	tant, impervious gloves complying with an approved standard should be s when handling chemical products if a risk assessment indicates this is nsidering the parameters specified by the glove manufacturer, check the gloves are still retaining their protective properties. It should be ime to breakthrough for any glove material may be different for different curers. In the case of mixtures, consisting of several substances, the of the gloves cannot be accurately estimated. When prolonged or ated contact may occur, a glove with a protection class of 6 time greater than 480 minutes according to EN 374) is recommended. f contact is expected, a glove with a protection class of 2 or higher time greater than 30 minutes according to EN 374) is recommended. check that the final choice of type of glove selected for handling this nost appropriate and takes into account the particular conditions of use, he user's risk assessment.
Gloves	: For prolonged of	or repeated handling, use the following type of gloves:
	Recommended May be used: n	: butyl rubber, polyvinyl alcohol (PVA), Viton® itrile rubber
Body protection	performed and handling this pr static protective should include	ctive equipment for the body should be selected based on the task being the risks involved and should be approved by a specialist before oduct. When there is a risk of ignition from static electricity, wear anti- e clothing. For the greatest protection from static discharges, clothing anti-static overalls, boots and gloves. Refer to European Standard EN rinformation on material and design requirements and test methods.

Conforms to Regulation (EC) 2020/878	No	. 1907/2006 (REACH), Annex II, as amended by Commissio	n Regulation (EU)
Code : 00138920		Date of issue/Date of revision	: 25 October 2023
SIGMACOVER 300 HARDENE	ER		
Other skin protection	:	Appropriate footwear and any additional skin protection measures based on the task being performed and the risks involved and specialist before handling this product.	
<b>Respiratory protection</b>	1		
Environmental exposure controls	:	Emissions from ventilation or work process equipment should they comply with the requirements of environmental protection cases, fume scrubbers, filters or engineering modifications to will be necessary to reduce emissions to acceptable levels.	n legislation. In some

# **SECTION 9: Physical and chemical properties**

The conditions of measurement of all properties are at standard temperature and pressure unless otherwise indicated.

#### 9.1 Information on basic physical and chemical properties

Physical state		Liquid.							
Colour	÷	Not available.							
Odour	÷	Aromatic.							
Odour threshold		Not available.							
Melting point/freezing point	•	May start to solidify at the following temperature: <-20.15°C (<-4.3°F) This is based on data for the following ingredient: 2,4,6-tris(dimethylaminomethyl)phenol. Weighted average: -92.33°C (-134.2°F)							
Initial boiling point and boiling range	:	>37.78°C							
Flammability	:	Not available.							
Upper/lower flammability or explosive limits	:	Greatest known rang	le: Lower:	1.48%	Upper:	13.74% (	1-met	hoxy-2-pr	opanol)

Not available.	
<b>Conclusion/Summary</b>	: Not available.
General	: May cause damage to organs through prolonged or repeated exposure. Prolonged or repeated contact can defat the skin and lead to irritation, cracking and/or dermatitis.
Carcinogenicity	: No known significant effects or critical hazards.
Mutagenicity	: No known significant effects or critical hazards.
Reproductive toxicity	: No known significant effects or critical hazards.
Other information	: Not available.

Prolonged or repeated contact may dry skin and cause irritation. Repeated exposure to high vapor concentrations may cause irritation of the respiratory system and permanent brain and nervous system damage. Inhalation of vapour/aerosol concentrations above the recommended exposure limits causes headaches, drowsiness and nausea and may lead to unconsciousness or death. Avoid contact with skin and clothing.

#### 11.2 Information on other hazards

**11.2.1 Endocrine disrupting properties** 

Not available.

#### 11.2.2 Other information

Not available.

12.1 Toxicity

## **SECTION 12: Ecological information**

Product/ingredient name	Result	Species	Exposure
✓-methoxy-2-propanol	Acute LC50 23300 mg/l	Daphnia	48 hours
	Acute LC50 >4500 mg/l	Fish	96 hours
	Fresh water		
2-methylpropan-1-ol	Acute EC50 1100 mg/l	Daphnia	48 hours
ethylbenzene	Acute EC50 1.8 mg/l Fresh	Daphnia	48 hours
	water		
	Chronic NOEC 1 mg/l Fresh	Daphnia -	-
	water	Ceriodaphnia dubia	
2,4,6-tris(dimethylaminomethyl)phenol	Acute LC50 175 mg/l	Fish	96 hours
	English (GB)	Egypt	11/15

S	SECTION 12: Ecological information				
	salicylic acid	Acute EC50 1147.57 mg/l Fresh water Chronic NOEC 5.6 mg/l Fresh water	Daphnia - Dap longispina - Na Daphnia - Dap magna - Neon	eonate ohnia	48 hours 21 days

Conclusion/Summary

: There are no data available on the mixture itself.

#### 12.2 Persistence and degradability

Product/ingredient name	Test	Result		Dose	Inoculum	
<b>e</b> thylbenzene	-	79 % - Readily - 10 days -		-	-	
Conclusion/Summary : There are no data available on the mixture itself.				·		
Product/ingredient name		Aquatic half-life	Photo	lysis	Biodegradability	
ethylbenzene xylene		-	- -		Readily Readily	

#### **12.3 Bioaccumulative potential**

Product/ingredient name	LogPow	BCF	Potential
✓-methoxy-2-propanol	<1	-	Low
2-methylpropan-1-ol	1	-	Low
ethylbenzene	3.6	79.43	Low
xylene	3.12	7.4 to 18.5	Low
2,4,6-tris(dimethylaminomethyl)phenol	0.219	-	Low
salicylic acid	2.21 to 2.26	-	Low

#### 12.4 Mobility in soil

Soil/water partition coefficient (Koc)	: Not available.
Mobility	: Not available.

#### 12.5 Results of PBT and vPvB assessment

This mixture does not contain any substances that are assessed to be a PBT or a vPvB.

#### 12.6 Endocrine disrupting properties

Not available.

#### 12.7 Other adverse effects

No known significant effects or critical hazards.

### **SECTION 13: Disposal considerations**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### 13.1 Waste treatment methods

Product

ode : 00138920	Date of issue/Date of revision : 25 October 2023
IGMACOVER 300 HARDE	NER
ECTION 13: Dispo	osal considerations
Methods of disposal	: The generation of waste should be avoided or minimised wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction.
Hazardous waste	: Yes.
European waste catalog	<u>lue (EWC)</u>
Waste code	Waste designation
08 01 11*	waste paint and varnish containing organic solvents or other hazardous substances
Packaging	
Methods of disposal	: The generation of waste should be avoided or minimised wherever possible. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible.
Type of packaging	European waste catalogue (EWC)
Container	15 01 06 mixed packaging
Special precautions	: This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapour from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.

	ADR/RID	IMDG	ΙΑΤΑ
