# SAFETY DATA SHEET

The information in this Safety Data Sheet is required pursuant to GHS UN rev. 7

Date of issue/Date of revision 16 December 2023 Version 7

# Section 1. Identification

| Product code                                    | : 00141111   |
|---|--|
| Product name                                    | : SIGMAGUARD CSF 575 BASE WHITE  |
| Product type                                    | : Liquid.  |
| Other means of identification<br>Not available. |  |
| Relevant identified uses of th                  | e substance or mixture and uses advised against  |
| Product use                                     | : Coating.<br>Professional applications, Used by spraying.   |
| Uses advised against                            | : Product is not intended, labelled or packaged for consumer use.                                      |
| Supplier's information                          | : PPG Asian Paints Private Limited<br>6A Shanti Nagar<br>Santa Cruz (East)<br>Mumbai - 400055<br>India |
| Emergency telephone<br>number:                  | : +91 22 6815 8700   |

# Section 2. Hazards identification

| Classification of the | : SKIN CORROSION/IRRITATION - Category 2   |
|-----------------------|--|
| substance or mixture  | SERIOUS EYE DAMAGE/EYE IRRITATION - Category 2A  |
|                       | SKIN SENSITISATION - Category 1  |
|                       | GERM CELL MUTAGENICITY - Category 2  |
|                       | SHORT-TERM (ACUTE) AQUATIC HAZARD - Category 2   |
|                       | LONG-TERM (CHRONIC) AQUATIC HAZARD - Category 2  |
|                       | Percentage of the mixture consisting of ingredient(s) of unknown hazards to the aquatic environment: 27.1% |
|                       |  |

Signal word Hazard statements

GHS label elements Hazard pictograms

- : Warning
- : Causes skin irritation. May cause an allergic skin reaction. Causes serious eye irritation. Suspected of causing genetic defects. Toxic to aquatic life with long lasting effects.

**Precautionary statements** 

### Section 2. Hazards identification

| Prevention | : Obtain special instructions before use. Do not handle until all safety precautions<br>have been read and understood. Wear protective gloves, protective clothing and<br>eye or face protection. Avoid release to the environment. Avoid breathing vapour.<br>Wash thoroughly after handling. Contaminated work clothing should not be allowed<br>out of the workplace.   |
|------------|--|
| Response   | : Collect spillage. IF exposed or concerned: Get medical advice or attention. Take<br>off contaminated clothing and wash it before reuse. IF ON SKIN: Wash with plenty<br>of water. If skin irritation or rash occurs: Get medical advice or attention. IF IN<br>EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if<br>present and easy to do. Continue rinsing. If eye irritation persists: Get medical<br>advice or attention. |
| Storage    | : Store locked up.   |
| Disposal   | : Dispose of contents and container in accordance with all local, regional, national and international regulations.  |

Other hazards which do not : None known. result in classification

# Section 3. Composition/information on ingredients

: Mixture

### CAS number/other identifiers

| CAS number : Not applicable.             |          |            |
|--|----------|------------|
| Ingredient name                          | %        | CAS number |
| s-[4-(2,3-epoxipropoxi)phenyl]propane    | 25 - <50 | 1675-54-3  |
| 2,3-epoxypropyl neodecanoate             | 10 - <20 | 26761-45-5 |
| Talc , not containing asbestiform fibres | 3 - <5   | 14807-96-6 |

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

SUB codes represent substances without registered CAS Numbers.

# Section 4. First aid measures

### Description of necessary first aid measures

| Eye contact  | <ul> <li>Remove contact lenses, irrigate copiously with clean, fresh water, holding the<br/>eyelids apart for at least 10 minutes and seek immediate medical advice.</li> </ul>  |
|--------------|--|
| Inhalation   | <ul> <li>Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is<br/>irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by<br/>trained personnel.</li> </ul> |
| Skin contact | : Remove contaminated clothing and shoes. Wash skin thoroughly with soap and water or use recognised skin cleanser. Do NOT use solvents or thinners.   |
| Ingestion    | : If swallowed, seek medical advice immediately and show the container or label.<br>Keep person warm and at rest. Do NOT induce vomiting.  |

| Most important symptoms/effects, acute and delayed |  |  |
|--|--|--|
| Potential acute health effects                     |  |  |
| Eye contact  | : Causes serious eye irritation.                               |  |
| Inhalation   | : No known significant effects or critical hazards.            |  |
| Skin contact                                       | : Causes skin irritation. May cause an allergic skin reaction. |  |

## Section 4. First aid measures

| Ingestion                      | : No known significant effects or critical hazards.   |
|--------------------------------|---|
| <u>Over-exposure signs/sym</u> | <u>otoms</u>  |
| Eye contact                    | : Adverse symptoms may include the following:<br>pain or irritation<br>watering<br>redness  |
| Inhalation                     | : No specific data.   |
| Skin contact                   | : Adverse symptoms may include the following:<br>irritation<br>redness  |
| Ingestion                      | : No specific data.   |
| Indication of immediate me     | dical attention and special treatment needed, if necessary  |
| Notes to physician             | <ul> <li>Treat symptomatically. Contact poison treatment specialist immediately if large<br/>quantities have been ingested or inhaled.</li> </ul>   |
| Specific treatments            | No specific treatment.  |
| Protection of first-aiders     | : No action shall be taken involving any personal risk or without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. |

See toxicological information (Section 11)

# Section 5. Firefighting measures

| Extinguishing media                            |  |
|--|--|
| Suitable extinguishing media                   | : Use an extinguishing agent suitable for the surrounding fire.  |
| Unsuitable extinguishing media                 | : None known.  |
| Specific hazards arising from the chemical     | In a fire or if heated, a pressure increase will occur and the container may burst.<br>This material is toxic to aquatic life with long lasting effects. Fire water<br>contaminated with this material must be contained and prevented from being<br>discharged to any waterway, sewer or drain. |
| Hazardous thermal decomposition products       | : Decomposition products may include the following materials:<br>carbon oxides<br>halogenated compounds<br>metal oxide/oxides  |
| Special protective actions for fire-fighters   | <ul> <li>Promptly isolate the scene by removing all persons from the vicinity of the incident if<br/>there is a fire. No action shall be taken involving any personal risk or without<br/>suitable training.</li> </ul>  |
| Special protective equipment for fire-fighters | : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.  |

# Section 6. Accidental release measures

| Personal precautions, protective equipment and emergency procedures |   |  |
|---|---|--|
| For non-emergency<br>personnel                                      | : No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilt material. Avoid breathing vapour or<br>mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is<br>inadequate. Put on appropriate personal protective equipment. |  |

## Section 6. Accidental release measures

| For emergency responders      | : If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".   |
|-------------------------------|---|
| Environmental precautions     | : Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains<br>and sewers. Inform the relevant authorities if the product has caused environmental<br>pollution (sewers, waterways, soil or air). Water polluting material. May be harmful<br>to the environment if released in large quantities. Collect spillage.   |
| Methods and material for cont | ainment and cleaning up   |
| Small spill                   | : Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.   |
| Large spill                   | : Stop leak if without risk. Move containers from spill area. Approach the release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spill product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal. |

# Section 7. Handling and storage

### Precautions for safe handling

| Protective measures  | : | Put on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Avoid exposure - obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Do not get in eyes or on skin or clothing. Do not ingest. Avoid breathing vapour or mist. Avoid release to the environment. If during normal use the material presents a respiratory hazard, use only with adequate ventilation or wear appropriate respirator. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container. |
|--|---|---|
| Advice on general occupational hygiene                             | : | Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.   |
| Conditions for safe storage,<br>including any<br>incompatibilities | : | Store between the following temperatures: 0 to 35°C (32 to 95°F). Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.  |

# Section 8. Exposure controls/personal protection

## Control parameters

### **Occupational exposure limits**

| Ingredient name                   |           |  | Exposure limits  |  |  |  |
|-----------------------------------|-----------|--|--|--|--|--|
| √alc , not containing asbestife   | orm       | n fibres   | ACGIH TLV (United States, 1/2023).<br>TWA: 2 mg/m <sup>3</sup> 8 hours. Form: Respirable   |  |  |  |
| Recommended monitoring procedures | :         |  | riate monitoring standards. Reference to nods for the determination of hazardous   |  |  |  |
| Appropriate engineering controls  |           | exposure to airborne contaminants be   | or other engineering controls to keep worker<br>slow any recommended or statutory limits.  |  |  |  |
| Environmental exposure controls   | :         | Emissions from ventilation or work process equipment should be checked to ensur<br>they comply with the requirements of environmental protection legislation. In some<br>cases, fume scrubbers, filters or engineering modifications to the process<br>equipment will be necessary to reduce emissions to acceptable levels. |  |  |  |  |
| Individual protection measur      | <u>es</u> |  |  |  |  |  |
| Hygiene measures                  | :         | eating, smoking and using the lavator<br>Appropriate techniques should be use<br>Contaminated work clothing should no  | bughly after handling chemical products, before<br>y and at the end of the working period.<br>In the end of the working period.<br>In the allowed out of the workplace. Wash<br>Ensure that eyewash stations and safety<br>ocation.  |  |  |  |
| Eye/face protection               | :         | assessment indicates this is necessar gases or dusts. If contact is possible,  | proved standard should be used when a risk<br>y to avoid exposure to liquid splashes, mists,<br>the following protection should be worn,<br>gher degree of protection: chemical splash   |  |  |  |
| Skin protection                   |           |  |  |  |  |  |
| Hand protection                   | :         | be worn at all times when handling ch<br>this is necessary. Considering the par<br>check during use that the gloves are s<br>should be noted that the time to break  | s complying with an approved standard should<br>emical products if a risk assessment indicates<br>rameters specified by the glove manufacturer,<br>still retaining their protective properties. It<br>athrough for any glove material may be<br>rers. In the case of mixtures, consisting of<br>the of the gloves cannot be accurately |  |  |  |
| Gloves                            | 4         | butyl rubber   |  |  |  |  |
| Body protection                   | :         |  | body should be selected based on the task<br>d and should be approved by a specialist  |  |  |  |
| Other skin protection             | :         | Appropriate footwear and any addition<br>selected based on the task being perfe<br>approved by a specialist before handli  | ormed and the risks involved and should be   |  |  |  |
| Respiratory protection            | :         | appropriate standard or certification.   | exposure, select a respirator that meets the<br>Respirators must be used according to a<br>ure proper fitting, training, and other important   |  |  |  |

# Section 9. Physical and chemical properties

The conditions of measurement of all properties are at standard temperature and pressure unless otherwise indicated.

| <u>Appearance</u>                                       |    |                        |                       |         |           |       |          |           |              |

| Reactivity                         | 1 | No specific test data related to reactivity available for this product or its ingredients. |
|------------------------------------|---|--|
| Chemical stability                 | : | The product is stable.   |
| Possibility of hazardous reactions | : | Under normal conditions of storage and use, hazardous reactions will not occur.            |
| Conditions to avoid                | : | When exposed to high temperatures may produce hazardous decomposition products.            |

# Section 10. Stability and reactivity

| Incompatible materials  | : | Keep away from the following materials to prevent strong exothermic reactions: oxidising agents, strong alkalis, strong acids.   |
|---|---|--|
| Hazardous decomposition<br>products<br>Hazardous polymerisation |   | Depending on conditions, decomposition products may include the following materials: carbon oxides halogenated compounds metal oxide/oxides Under normal conditions of storage and use, hazardous polymerisation will not occur. |

# Section 11. Toxicological information

### Information on toxicological effects

### Acute toxicity

| Product/ingredient name | Result                   | Species    | Dose                      | Exposure |
|-------------------------|--------------------------|------------|---------------------------|----------|
| s-[4-(2,3-epoxipropoxi) | LD50 Dermal              | Rabbit     | 23000 mg/kg               | -        |
| 2,3-epoxypropyl         | LD50 Oral<br>LD50 Dermal | Rat<br>Rat | 15000 mg/kg<br>3800 mg/kg | -        |
| neodecanoate            | LD50 Oral                | Rat        | 9.6 g/kg                  | -        |

### Conclusion/Summary

: There are no data available on the mixture itself.

### Irritation/Corrosion

| Product/ingredient name                     | Result                                | Species | Score | Exposure | Observation |
|---|---------------------------------------|---------|-------|----------|-------------|
| pis-[4-(2,3-epoxipropoxi)<br>phenyl]propane | Eyes - Mild irritant                  | Rabbit  | -     | 24 hours | -           |

#### **Mobility in soil**

Soil/water partition coefficient (Koc)

: Not available.

Other adverse effects

: No known significant effects or critical hazards.

### Section 13. Disposal considerations

**Disposal methods** 

: The generation of waste should be avoided or minimised wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.
