## SECTION 1: Identification of the substance/mixture and of the company/ undertaking

1.1 Product identifier

Product name : SIGMACOVER 456 HS BASE (LEAD FREE COLOURS)
Product code : 00326453
Product type : Liquid.
Other means of : Not available.
identification
1.2 Relevant identified uses of the substance or mixture and uses advised against

Product use : Professional applications, Used by spraying.
Use of the substancel : Coating.
mixture
Uses advised against : Product is not intended, labelled or packaged for consumer use.

### 1.3 Details of the supplier of the safety data sheet

PPG Coatings Belgium BV/SRL
Tweemontstraat 104
B-2100 Deurne
Belgium
Telephone +32-33606311
Fax +32-33606435
e-mail address of person : Product.Stewardship.EMEA@ppg.com
responsible for this SDS
1.4 Emergency telephone number

Supplier
+31 204075210

## SECTION 2: Hazards identification

2.1 Classification of the substance or mixture

Product definition
: Mixture
Classification according to UK CLP/GHS
Flam. Liq. 3, H226
Skin Irrit. 2, H315
Eye Irrit. 2, H319
Skin Sens. 1, H317
STOT RE 2, H373
Aquatic Chronic 2, H411
The product is classified as hazardous according to UK CLP Regulation SI 2019/720 as amended.
See Section 16 for the full text of the H statements declared above.
See Section 11 for more detailed information on health effects and symptoms.
2.2 Label elements

Hazard pictograms

Signal word Warning
Code : $00326453 \quad$ Date of issue/Date of revision : 20 December 2023

SIGMACOVER 456 HS BASE (LEAD FREE COLOURS)

## SECTION 2: Hazards identification

## Hazard statements <br> Precautionary statements

Prevention

Response
Storage
Disposal

Supplemental label elements

Annex XVII - Restrictions on the manufacture, placing on the market and use of certain dangerous substances, mixtures and articles
Special packaging requirements
Containers to be fitted : Not applicable.
with child-resistant
fastenings
Tactile warning of danger : Not applicable.

### 2.3 Other hazards

Product meets the criteria : This mixture does not contain any substances that are assessed to be a PBT or a for PBT or vPvB according vPvB.
: Flammable liquid and vapour.
Causes skin irritation.
May cause an allergic skin reaction. Causes serious eye irritation.
May cause damage to organs through prolonged or repeated exposure.
Toxic to aquatic life with long lasting effects.
: Wear protective gloves. Wear eye or face protection. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Avoid release to the environment. Do not breathe vapour.
: Collect spillage.
: Not applicable.
: Dispose of contents and container in accordance with all local, regional, national and international regulations.
P280, P210, P273, P260, P391, P501
: Contains epoxy constituents. May produce an allergic reaction.
Warning! Hazardous respirable droplets may be formed when sprayed. Do not breathe spray or mist.
: Not applicable.
to Regulation (EC) No. 1907/2006, Annex XIII
Other hazards which do : Prolonged or repeated contact may dry skin and cause irritation. not result in classification

## SECTION 3: Composition/information on ingredients

3.2 Mixtures : Mixture

| Product/ingredient name | Identifiers | \% | Classification | Type |
| :---: | :---: | :---: | :---: | :---: |

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment, are PBTs, vPvBs or Substances of equivalent concern, or have been assigned a workplace exposure limit and hence require reporting in this section.
Xylene: Several REACH registrations cover the REACH registered substance with xylene isomers, ethylbenzene (and toluene). The other REACH Registrations include: 01-2119555267-33 reaction mass of ethylbenzene and $m$-xylene and $p$ xylene, 01-2119486136-34 Aromatic hydrocarbons, C8, 01-2119539452-40 reaction mass of ethylbenzene and xylene.
Type
[1] Substance classified with a health or environmental hazard
[2] Substance with a workplace exposure limit
This mixture contains $\geq 1 \%$ of titanium dioxide. The Annex VI classification of titanium dioxide does not apply to this mixture according to Note 10.
Occupational exposure limits, if available, are listed in Section 8.
SUB codes represent substances without registered CAS Numbers.

| Code : 00326453 | Date of issue/Date of revision | $: 20$ December 2023 |
| :--- | ---: | ---: |
| SIGMACOVER 456 HS BASE (LEAD FREE COLOURS) |  |  |

## SECTION 4: First aid measures

### 4.1 Description of first aid measures

| Eye contact | : Remove contact lenses, irrigate copiously with clean, fresh water, holding the eyelids apart for at least 10 minutes and seek immediate medical advice. <br> In case of accidental eye contact, avoid direct exposure to the sun or other sources of UV light as severe irritation including burns may result. These reactions can be delayed - get medical attention if pain, irritation or blistering occurs after contact. |
| :---: | :---: |
| Inhalation | Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. |
| Skin contact | : Remove contaminated clothing and shoes. Wash skin thoroughly with soap and water or use recognised skin cleanser. Do NOT use solvents or thinners. |
| Ingestion | : If swallowed, seek medical advice immediately and show the container or label. Keep person warm and at rest. Do NOT induce vomiting. |
| Protection of first-aiders | : No action shall be taken involving any personal risk or without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. |

4.2 Most important symptoms and effects, both acute and delayed

Potential acute health effects

| Eye contact | Causes serious eye irritation. |
| :---: | :---: |
| Inhalation | No known significant effects or critical hazards. |
| Skin contact | Causes skin irritation. Defatting to the skin. May |
| Ingestion | No known significant effects or critical hazards. |
| Over-exposure signs/symptoms |  |
| Eye contact | Adverse symptoms may include the following: pain or irritation watering redness |
| Inhalation | : No specific data. |
| Skin contact | Adverse symptoms may include the following: irritation redness dryness cracking |
| Ingestion | : No specific data. |

4.3 Indication of any immediate medical attention and special treatment needed

Notes to physician : Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.
Specific treatments : No specific treatment.

## SECTION 5: Firefighting measures

5.1 Extinguishing media
Suitable extinguishing
media

| Unsuitable extinguishing |
| :--- |
| media |

### 5.2 Special hazards arising from the substance or mixture

| Code : 00326453 | Date of issue/Date of revision | $: 20$ December 2023 |
| :--- | :--- | :--- |
| SIGMACOVER 456 HS BASE (LEAD FREE COLOURS) |  |  |

## SECTION 5: Firefighting measures

| Hazards from the <br> substance or mixture | $:$ <br>  <br>  <br>  <br>  <br> Hazardous combustion fire or if heated, a pressure increase will occur and the container may burst, with <br> the risk of a subsequent explosion. This material is toxic to aquatic life with long |
| :--- | :--- |
| lasting effects. Fire water contaminated with this material must be contained and  <br> products prevented from being discharged to any waterway, sewer or drain. |  |
|  | Decomposition products may include the following materials: <br> carbon oxides <br> phosphorus oxides <br> halogenated compounds |
| metal oxide/oxides |  |

### 5.3 Advice for firefighters

Special protective actions for fire-fighters

Special protective equipment for fire-fighters
: Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.
: Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

## SECTION 6: Accidental release measures

### 6.1 Personal precautions, protective equipment and emergency procedures

For non-emergency personnel
: No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilt material. Shut off all ignition sources. No flares, smoking or flames in hazard area. Avoid breathing vapour or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment.
For emergency responders : If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".

### 6.2 Environmental precautions <br> : Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). Water polluting material. May be harmful to the environment if released in large quantities. Collect spillage.

6.3 Methods and material for containment and cleaning up

Small spill

Large spill
: Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.
: Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach the release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with noncombustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilt product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

### 6.4 Reference to other sections

: See Section 1 for emergency contact information.
See Section 8 for information on appropriate personal protective equipment.
See Section 13 for additional waste treatment information.

| Code : 00326453 | Date of issue/Date of revision | $: 20$ December 2023 |
| :--- | :---: | :---: |

## SECTION 7: Handling and storage

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

### 7.1 Precautions for safe handling

Protective measures : Put on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Do not get in eyes or on skin or clothing. Do not breathe vapour or mist. Do not ingest. Avoid release to the environment. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Take precautionary measures against electrostatic discharges. Empty containers retain product residue and can be hazardous. Do not reuse container.

Advice on general
occupational hygiene
: Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

### 7.2 Conditions for safe storage, including any incompatibilities

Store between the following temperatures: 0 to $35^{\circ} \mathrm{C}\left(32\right.$ to $\left.95^{\circ} \mathrm{F}\right)$. Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and wellventilated area, away from incompatible materials (see Section 10) and food and drink. Eliminate all ignition sources. Separate from oxidising materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.

### 7.3 Specific end use(s)

See Section 1.2 for Identified uses.

## SECTION 8: Exposure controls/personal protection

### 8.1 Control parameters

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).
Occupational exposure limits

| Product/ingredient name | Exposure limit values |
| :---: | :---: |

\subsection*{8.2 Exposure controls}

Appropriate engineering controls
: Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapour or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.

\section*{Individual protection measures}
: Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Contaminated work clothing should not be allowed out of the workplace. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.
Eye/face protection
: Chemical splash goggles.
Skin protection Hand protection
: Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated. When prolonged or frequently repeated contact may occur, a glove with a protection class of 6 (breakthrough time greater than 480 minutes according to EN 374) is recommended. When only brief contact is expected, a glove with a protection class of 2 or higher (breakthrough time greater than 30 minutes according to EN 374) is recommended. The user must check that the final choice of type of glove selected for handling this product is the most appropriate and takes into account the particular conditions of use, as included in the user's risk assessment.

SIGMACOVER 456 HS BASE (LEAD FREE COLOURS)

\section*{SECTION 8: Exposure controls/personal protection}
\begin{tabular}{|c|c|}
\hline & polyethylene butyl rubber \\
\hline Body protection & : Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. When there is a risk of ignition from static electricity, wear antistatic protective clothing. For the greatest protection from static discharges, clothing should include anti-static overalls, boots and gloves. \\
\hline Other skin protection & : Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. \\
\hline Respiratory protection & : Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator. If workers are exposed to concentrations above the exposure limit, they must use appropriate, certified respirators. Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Wear a respirator conforming to EN140. Filter type: organic vapour (Type A) and particulate filter P3 \\
\hline Environmental exposure controls & : Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels. \\
\hline
\end{tabular}

effects
Potential delayed effects : Not available.

## Potential chronic health effects

Not available.

Conclusion/Summary
General
: Not available.
: May cause damage to organs through prolonged or repeated exposure. Prolonged or repeated contact can defat the skin and lead to irritation, cracking and/or dermatitis. Once sensitized, a severe allergic reaction may occur when subsequently exposed to very low levels.
Carcinogenicity : No known significant effects or critical hazards.
Mutagenicity
Reproductive toxicity
: No known significant effects or critical hazards.
: No known significant effects or critical hazards.

Other information
: Not available.

### 12.4 Mobility in soil

Soil/water partition
: Not available.
coefficient (Koc)
Mobility : Not available.

### 12.5 Results of PBT and vPvB assessment

This mixture does not contain any substances that are assessed to be a PBT or a vPvB.
12.6 Other adverse effects : No known significant effects or critical hazards.

## SECTION 13: Disposal considerations

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

### 13.1 Waste treatment methods

## Product

Methods of disposal : The generation of waste should be avoided or minimised wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and nonrecyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction.
Hazardous waste : Yes.
Waste catalogue
Code : $00326453 \quad$ Date of issue/Date of revision : 20 December 2023

SIGMACOVER 456 HS BASE (LEAD FREE COLOURS)

## SECTION 13: Disposal considerations

| Waste code | Waste designation |
| :---: | :--- |
| 0801 11* | waste paint and varnish containing organic solvents or other hazardous substances |

## Packaging

Methods of disposal
: The generation of waste should be avoided or minimised wherever possible. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible.

| Type of packaging | Waste catalogue |  |
| :--- | :--- | :--- |
| Container | 150106 | mixed packaging |

Special precautions
: This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapour from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.

| 14.4 Packing group | III | III | III | III |
| 14.5 <br> Environmental hazards <br> Marine pollutant substances | Yes. <br> Not applicable. | Yes. <br> Not applicable. | Yes. <br> (trizinc bis (orthophosphate)) | Yes. The environmentally hazardous substance mark is not required. <br> Not applicable. |

Additional information

| ADR/RID | The environmentally hazardous substance mark is not required when transported in sizes of $\leq 5 \mathrm{~L}$ or $\leq 5 \mathrm{~kg}$. |
| :---: | :---: |
| Tunnel code | (D/E) |
| ADN | The environmentally hazardous substance mark is not required when transported in sizes of $\leq 5 \mathrm{~L}$ or $\leq 5 \mathrm{~kg}$. |
| IMDG | The marine pollutant mark is not required when transported in sizes of $\leq 5 \mathrm{~L}$ or $\leq 5 \mathrm{~kg}$. |
| IATA | The environmentally hazardous substance mark may appear if required by other transportation regulations. |

14.6 Special precautions for : Transport within user's premises: always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.
14.7 Transport in bulk : Not available.
: The environmentally hazardous substance mark is not required when transported in sizes of $\leq 5 \mathrm{~L}$ or $\leq 5 \mathrm{~kg}$.
: The environmentally hazardous substance mark is not required when transported in sizes of $\leq 5 \mathrm{~L}$ or $\leq 5 \mathrm{~kg}$.
: The marine pollutant mark is not required when transported in sizes of $\leq 5 \mathrm{~L}$ or $\leq 5 \mathrm{~kg}$.
: The environmentally hazardous substance mark may appear if required by other transportation regulations.

SIGMACOVER 456 HS BASE (LEAD FREE COLOURS)

## SECTION 15: Regulatory information

### 15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture

## UK (GB)/REACH

Annex XIV - List of substances subject to authorisation

## Annex XIV

None of the components are listed.

## Substances of very high concern

None of the components are listed.

## Ozone depleting substances

Not listed.
Annex XVII-Restrictions : Not applicable. on the manufacture, placing on the market and use of certain dangerous substances, mixtures and articles

## Seveso Directive

This product is controlled under the Seveso Directive.

## Danger criteria

| Category |
| :--- | :--- |
| P5c |
| E2 |

## National regulations

| Product/ingredient name | List name | Name on list | Classification | Notes |
| :--- | :--- | :--- | :--- | :--- |
| Quartz (SiO2) | UK Occupational <br> Exposure Limits EH40 <br> - WEL | silica, respirable <br> crystalline respirable <br> fraction | Carc. | - |

## SECTION 16: Other information

Indicates information that has changed from previously issued version.

## Abbreviations and

: ATE = Acute Toxicity Estimate
GB CLP = UK CLP (EC No 1272/2008) on the Classification, Labelling and Packaging of Substances and Mixtures as amended by (EU Exit) Regulations 2019
No. 720 and amendments
DMEL = Derived Minimal Effect Level
DNEL = Derived No Effect Level
EUH statement = GB CLP-specific Hazard statement
N/A = Not available
PBT = Persistent, Bioaccumulative and Toxic
PNEC = Predicted No Effect Concentration
RRN = REACH Registration Number
SGG = Segregation Group
$\mathrm{vPvB}=$ Very Persistent and Very Bioaccumulative

Procedure used to derive the classification

| Classification |  |
| :--- | :--- |
| Flam. Liq. 3, H226 | Justification |
| Skin Irrit. 2, H315 | On basis of test data |
| Eye Irrit. 2, H319 | Calculation method |
| Skin Sens. 1, H317 | Calculation method |
| STOT RE 2, H373 | Calculation method |
| Aquatic Chronic 2, H411 | Calculation method |

## SECTION 16: Other information

| H225 | Highly flammable liquid and vapour. |
| :--- | :--- |
| H226 | Flammable liquid and vapour. |
| H304 | May be fatal if swallowed and enters airways. |
| H312 | Harmful in contact with skin. |
| H315 | Causes skin irritation. |
| H317 | May cause an allergic skin reaction. |
| H318 | Causes serious eye damage. |
| H319 | Causes serious eye irritation. |
| H332 | Harmful if inhaled. |
| H335 | May cause respiratory irritation. |
| H336 | May cause drowsiness or dizziness. |
| H372 | Causes damage to organs through prolonged or repeated exposure. |
| H373 | May cause damage to organs through prolonged or repeated exposure. |
| H400 | Very toxic to aquatic life. |
| H410 | Very toxic to aquatic life with long lasting effects. |
| H411 | Toxic to aquatic life with long lasting effects. |
| H412 | Harmful to aquatic life with long lasting effects. |
| H413 | May cause long lasting harmful effects to aquatic life. |
