### **SAFETY DATA SHEET**

Date of issue/Date of revision

: 20 December 2023 Version

| PDG |
|-----|
|     |

: 12.03

#### SECTION 1: Identification of the substance/mixture and of the company/ undertaking

| 1.1 Product identifier                            |   |
|---|---|
| Product name                                      | : SIGMA FLUORESCENT PAINT   |
| Product code                                      | : 00907724  |
| Other means of identification                     | on  |
| Not available.                                    |   |
| 1.2 Relevant identified uses                      | of the substance or mixture and uses advised against              |
| Product use                                       | : Professional applications, Used by spraying.                    |
| Use of the substance/<br>mixture                  | : Coating.  |
| Uses advised against                              | : Product is not intended, labelled or packaged for consumer use. |
| 1.3 Details of the supplier of                    | the safety data sheet   |
| Pittsburgh Paints Nigeria Lim                     |   |
| Nigeria   | top, Badagry Expressway, Orile Iganmu, Lagos                      |
| Tel: 00 234 (0) 8138672483                        |   |
| e-mail address of person responsible for this SDS | : PS.ACEMEA@ppg.com   |
| 1.4 Emergency telephone number                    | : 00234 127 173 85  |

### **SECTION 2: Hazards identification**

# 2.1 Classification of the substance or mixture Product definition : Mixture Classification according to Regulation (EC) No. 1272/2008 [CLP/GHS]

Flam. Liq. 3, H226 Carc. 1B, H350 STOT SE 3, H336 STOT RE 1, H372 Aquatic Chronic 2, H411

The product is classified as hazardous according to Regulation (EC) 1272/2008 as amended.

See Section 16 for the full text of the H statements declared above.

See Section 11 for more detailed information on health effects and symptoms.

2.2 Label elements Hazard pictograms : Signal word : Danger

| Code : 00907724         | Date of issue/Date of revision | : 20 December 2023 |
|-------------------------|--------------------------------|--------------------|
| SIGMA FLUORESCENT PAINT |                                |                    |

### **SECTION 2: Hazards identification**

|   | lacitation   |
|---|--|
| Hazard statements   | <ul> <li>Flammable liquid and vapour.</li> <li>May cause drowsiness or dizziness.</li> <li>May cause cancer.</li> <li>Causes damage to organs through prolonged or repeated exposure.</li> <li>Toxic to aquatic life with long lasting effects.</li> </ul> |
| Precautionary statements  |  |
| Prevention  | : Wear protective gloves, protective clothing and eye or face protection. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Avoid release to the environment.   |
| Response  | : Collect spillage.  |
| Storage   | : Store in a well-ventilated place. Keep container tightly closed.   |
| Disposal  | <ul> <li>Dispose of contents and container in accordance with all local, regional, national and<br/>international regulations.</li> <li>P280, P210, P273, P391, P403 + P233, P501</li> </ul>   |
| Hazardous ingredients   | : Fydrocarbons, C9-C12, n-alkanes, isoalkanes, cyclics, aromatics (2-25%)<br>butanone oxime  |
| Supplemental label elements   | : Repeated exposure may cause skin dryness or cracking.<br>Contains isobutyl methacrylate and butanone oxime. May produce an allergic reaction.  |
| Annex XVII - Restrictions<br>on the manufacture,<br>placing on the market and<br>use of certain dangerous<br>substances, mixtures and<br>articles | : Restricted to professional users.  |
| Special packaging requirem  | <u>ients</u>   |
| Containers to be fitted<br>with child-resistant<br>fastenings   | : Not applicable.  |
| Tactile warning of danger   | : Not applicable.  |
| 2.3 Other hazards   |  |
| Product meets the criteria<br>for PBT or vPvB   | : This mixture does not contain any substances that are assessed to be a PBT or a vPvB.  |
| Other hazards which do not result in classification   | : Prolonged or repeated contact may dry skin and cause irritation.   |

### **SECTION 3: Composition/information on ingredients**

| 3.2 Mixtures   | : Mixture  |           |  |   |         |
|--|--|-----------|--|---|---------|

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment, are PBTs, vPvBs or Substances of equivalent concern, or have been assigned a workplace exposure limit and hence require reporting in this section.

Туре

[1] Substance classified with a health or environmental hazard

[2] Substance with a workplace exposure limit

Occupational exposure limits, if available, are listed in Section 8.

SUB codes represent substances without registered CAS Numbers.

### **SECTION 4: First aid measures**

| 4.1 Description of first aid me | easures   |
|---------------------------------|---|
| Eye contact                     | : Remove contact lenses, irrigate copiously with clean, fresh water, holding the eyelids apart for at least 10 minutes and seek immediate medical advice.   |
| Inhalation                      | : Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel.  |
| Skin contact                    | : Remove contaminated clothing and shoes. Wash skin thoroughly with soap and water or use recognised skin cleanser. Do NOT use solvents or thinners.  |
| Ingestion                       | : If swallowed, seek medical advice immediately and show the container or label. Keep person warm and at rest. Do NOT induce vomiting.  |
| Protection of first-aiders      | : No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. |

| 4.2 Most important sy<br>Potential acute healt | mptoms and effects, both acute and delayed<br><u>h effects</u>  |
|--|---|
| Eye contact                                    | : No known significant effects or critical hazards.   |
| Inhalation                                     | <ul> <li>Can cause central nervous system (CNS) depression. May cause drowsiness or<br/>dizziness.</li> </ul> |
| Skin contact                                   | : Defatting to the skin. May cause skin dryness and irritation.   |
| Ingestion                                      | : Can cause central nervous system (CNS) depression.  |

SIGMA FLUORESCENT PAINT

#### **SECTION 4: First aid measures**

| Over-exposure signs/sy    | <u>imptoms</u>  |
|---------------------------|---|
| Eye contact               | : No specific data.   |
| Inhalation                | : Adverse symptoms may include the following:<br>nausea or vomiting<br>headache<br>drowsiness/fatigue<br>dizziness/vertigo<br>unconsciousness |
| Skin contact              | : Adverse symptoms may include the following:<br>irritation<br>dryness<br>cracking  |
| Ingestion                 | : No specific data.   |
| 4.3 Indication of any imm | nediate medical attention and special treatment needed  |
| Notes to physician        | : Treat symptomatically. Contact poison treatment specialist immediately if large   |

quantities have been ingested or inhaled.Specific treatments: No specific treatment.

### **SECTION 5: Firefighting measures**

| 5.1 Extinguishing media<br>Suitable extinguishing<br>media | : Use dry chemical, CO <sub>2</sub> , water spray (fog) or foam. |
|--|--|
| Unsuitable extinguishing media                             | : Do not use water jet.  |

#### 5.2 Special hazards arising from the substance or mixture

| Hazards from the substance or mixture          |  | water contaminated with this material must be contained and prevented |  |  |  |
|--|--|---|--|--|--|
| Hazardous combustion products                  | ecomposition products may include the following materials:<br>irbon oxides   |   |  |  |  |
| 5.3 Advice for firefighters                    |  |   |  |  |  |
| Special precautions for<br>fire-fighters       | omptly isolate the scene by removing all persons from the vicinity of the i<br>ere is a fire. No action shall be taken involving any personal risk or witho<br>aining. Move containers from fire area if this can be done without risk. Us<br>aray to keep fire-exposed containers cool.                             | ut suitable   |  |  |  |
| Special protective equipment for fire-fighters | re-fighters should wear appropriate protective equipment and self-contair<br>oparatus (SCBA) with a full face-piece operated in positive pressure mode<br>r fire-fighters (including helmets, protective boots and gloves) conforming<br>andard EN 469 will provide a basic level of protection for chemical incider | e. Clothing<br>⊨to Europear   |  |  |  |

Code : 00907724

Date of issue/Date of revision

: 20 December 2023

SIGMA FLUORESCENT PAINT

#### **SECTION 6: Accidental release measures**

| 6.1 Personal precautions, pro  | otective equipment and emergency procedures  |
|--------------------------------|--|
| For non-emergency<br>personnel | : No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilt material. Shut off all ignition sources. No<br>flares, smoking or flames in hazard area. Avoid breathing vapour or mist. Provide<br>adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put<br>on appropriate personal protective equipment. |
| For emergency responders       | : If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".  |
| 6.2 Environmental precautions  | : Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). Water polluting material. May be harmful to the environment if released in large quantities. Collect spillage.   |
| 6.3 Methods and material for   | containment and cleaning up  |
| Small spill                    | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.   |
| Large spill                    | : Stop leak if without risk. Move containers from spill area. Use spark-proof tools and  |

Stop leak if without risk. Move containers from spin area. Use spark-proof tools and explosion-proof equipment. Approach the release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations. Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilt product.

6.4 Reference to other: See Section 1 for emergency contact information.sections: See Section 8 for information on appropriate personal protective equipment.<br/>See Section 13 for additional waste treatment information.

#### **SECTION 7: Handling and storage**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### 7.1 Precautions for safe handling

| Protective measures                       | : Put on appropriate personal protective equipment (see Section 8). Avoid exposure -<br>obtain special instructions before use. Do not handle until all safety precautions have<br>been read and understood. Do not get in eyes or on skin or clothing. Do not breathe<br>vapour or mist. Do not ingest. Avoid release to the environment. Use only with<br>adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do<br>not enter storage areas and confined spaces unless adequately ventilated. Keep in the<br>original container or an approved alternative made from a compatible material, kept<br>tightly closed when not in use. Store and use away from heat, sparks, open flame or<br>any other ignition source. Use explosion-proof electrical (ventilating, lighting and<br>material handling) equipment. Use only non-sparking tools. Take precautionary<br>measures against electrostatic discharges. Empty containers retain product residue<br>and can be hazardous. Do not reuse container. |
|---|---|
| Advice on general<br>occupational hygiene | : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.   |

| Code : 00907724<br>SIGMA FLUORESCENT PA                                | Date of issue/Date of revision  | : 20 December 2023  |
|--|---|---|
| SECTION 7: Handli  | ng and storage  |   |
| 7.2 Conditions for safe<br>storage, including any<br>incompatibilities | : Store between the following temperatures: 0 to 35°C (32 to 95° with local regulations. Store in a segregated and approved are container protected from direct sunlight in a dry, cool and well-from incompatible materials (see Section 10) and food and drin Eliminate all ignition sources. Separate from oxidising materia closed and sealed until ready for use. Containers that have be carefully resealed and kept upright to prevent leakage. Do not containers. Use appropriate containment to avoid environmen Section 10 for incompatible materials before handling or use. | ea. Store in original<br>ventilated area, away<br>nk. Store locked up.<br>ls. Keep container tightly<br>een opened must be<br>store in unlabelled |

#### 7.3 Specific end use(s)

See Section 1.2 for Identified uses.

#### **SECTION 8: Exposure controls/personal protection**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### 8.1 Control parameters

#### **Occupational exposure limits**

| Product/ingredient  | name  | Exposure limit values  |  |  |  |  |
|---|---|--|--|--|--|--|
| ydrocarbons, C9-C12, n-alkar<br>cyclics, aromatics (2-25%)<br>isobutyl methacrylate<br>butanone oxime | nes, isoalkanes,  | ACGIH TLV (United States).<br>TWA: 100 ppm<br>IPEL (-).<br>TWA: 50 ppm<br>STEL: 75 ppm<br>IPEL (-).<br>TWA: 3 ppm<br>STEL: 9 ppm   |  |  |  |  |
| Recommended monitoring :<br>procedures  | Standard EN 689<br>by inhalation to c<br>strategy) Europe<br>application and u<br>biological agents<br>requirements for<br>agents) Referen  | d be made to monitoring standards, such as the following: European<br>9 (Workplace atmospheres - Guidance for the assessment of exposure<br>chemical agents for comparison with limit values and measurement<br>ean Standard EN 14042 (Workplace atmospheres - Guide for the<br>use of procedures for the assessment of exposure to chemical and<br>b) European Standard EN 482 (Workplace atmospheres - General<br>the performance of procedures for the measurement of chemical<br>nee to national guidance documents for methods for the determination<br>ostances will also be required. |  |  |  |  |
| 8.2 Exposure controls   |   |  |  |  |  |  |
| Appropriate engineering controls  | other engineering<br>recommended of   | equate ventilation. Use process enclosures, local exhaust ventilation or<br>g controls to keep worker exposure to airborne contaminants below any<br>r statutory limits. The engineering controls also need to keep gas,<br>oncentrations below any lower explosive limits. Use explosion-proof<br>ment.   |  |  |  |  |
| Individual protection measure   | <u>s</u>  |  |  |  |  |  |
| Hygiene measures  | Wash hands, forearms and face thoroughly after handling chemical products, before<br>eating, smoking and using the lavatory and at the end of the working period.<br>Appropriate techniques should be used to remove potentially contaminated clothing.<br>Wash contaminated clothing before reusing. Ensure that eyewash stations and safety<br>showers are close to the workstation location. |  |  |  |  |  |
| Eye/face protection<br><u>Skin protection</u>   | : Safety glasses w  | /ith side shields.   |  |  |  |  |

| Code : 00907724     |                   | Date of issue/Date of revision                | : 20 December 2023      |
|---------------------|-------------------|---|-------------------------|
| SIGMA FLUORESCENT P | AINT              |   |                         |
| Hand protection     | : Chemical-resist | ant, impervious gloves complying with an appr | oved standard should be |

| : Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated. When prolonged or frequently repeated contact may occur, a glove with a protection class of 6 (breakthrough time greater than 480 minutes according to EN 374) is recommended. When only brief contact is expected, a glove with a protection class of 2 or higher (breakthrough time greater than 30 minutes according to EN 374) is recommended. The user must check that the final choice of type of glove selected for handling this product is the most appropriate and takes into account the particular conditions of use, as included in the user's risk assessment. |
|---|
| : For prolonged or repeated handling, use the following type of gloves:   |
| Recommended: nitrile rubber, neoprene   |
| : Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. When there is a risk of ignition from static electricity, wear anti-static protective clothing. For the greatest protection from static discharges, clothing should include anti-static overalls, boots and gloves. Refer to European Standard EN 1149 for further information on material and design requirements and test methods.  |
| Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.   |
|   |
| : Emissions from ventilation or work process equipment should be checked to ensure<br>they comply with the requirements of environmental protection legislation. In some<br>cases, fume scrubbers, filters or engineering modifications to the process equipment<br>will be necessary to reduce emissions to acceptable levels.   |
|   |

#### **SECTION 9: Physical and chemical properties**

The conditions of measurement of all properties are at standard temperature and pressure unless otherwise indicated.

#### 9.1 Information on basic physical and chemical properties

#### Potential acute health effects

English (GB)

| Code : 00907724<br>SIGMA FLUORESCENT PAIN                  | Date of issue/Date of revision         : 20 December 2023  |
|--|--|
| SECTION 11: Toxicol  | ogical information   |
| Inhalation   | : Can cause central nervous system (CNS) depression. May cause drowsiness or dizziness.  |
| Ingestion  | : Can cause central nervous system (CNS) depression.   |
| Skin contact   | : Defatting to the skin. May cause skin dryness and irritation.  |
| Eye contact  | : No known significant effects or critical hazards.  |
| Symptoms related to the ph                                 | vsical, chemical and toxicological characteristics   |
| Inhalation   | : Adverse symptoms may include the following:<br>nausea or vomiting<br>headache<br>drowsiness/fatigue<br>dizziness/vertigo<br>unconsciousness                          |
| Ingestion  | : No specific data.  |
| Skin contact   | : Adverse symptoms may include the following:<br>irritation<br>dryness<br>cracking   |
| Eye contact  | : No specific data.  |
|  | cts as well as chronic effects from short and long-term exposure   |
| Short term exposure  |  |
| Potential immediate effects                                | : Not available.   |
| Potential delayed effects                                  | : Not available.   |
| Long term exposure<br>Potential immediate<br>effects       | : Not available.   |
| Potential delayed effects<br>Potential chronic health effe |  |
| Not available.   |  |
| Conclusion/Summary   | : Not available.   |
| General  | : Causes damage to organs through prolonged or repeated exposure. Prolonged or repeated contact can defat the skin and lead to irritation, cracking and/or dermatitis. |
| Carcinogenicity  | : May cause cancer. Risk of cancer depends on duration and level of exposure.  |
| Mutagenicity   | : No known significant effects or critical hazards.  |
| Reproductive toxicity                                      | : No known significant effects or critical hazards.  |
| Other information  | : Not available.   |

Prolonged or repeated contact may dry skin and cause irritation. Repeated exposure to high vapor concentrations may cause irritation of the respiratory system and permanent brain and nervous system damage. Inhalation of vapour/aerosol concentrations above the recommended exposure limits causes headaches, drowsiness and nausea and may lead to unconsciousness or death. Avoid contact with skin and clothing.

#### 11.2 Information on other hazards

11.2.1 Endocrine disrupting properties

Not available.

11.2.2 Other information

Not available.

#### 12.5 Results of PBT and vPvB assessment

This mixture does not contain any substances that are assessed to be a PBT or a vPvB.

#### 12.6 Endocrine disrupting properties

Not available.

#### 12.7 Other adverse effects

No known significant effects or critical hazards.

#### **SECTION 13: Disposal considerations**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### 13.1 Waste treatment methods

**Product** 

| ode : 00907724        | Date of issue/Date of revision : 20 December 2023   |
|-----------------------|---|
| IGMA FLUORESCENT P    | AINT  |
| ECTION 13: Disp       | osal considerations   |
| Methods of disposal   | : The generation of waste should be avoided or minimised wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction.           |
| Hazardous waste       | : Yes.  |
| European waste catalo | gue (EWC)   |

| Methods of disposal   | <ul> <li>The generation of waste should be avoided or minimised wherever possible. Waste<br/>packaging should be recycled. Incineration or landfill should only be considered when<br/>recycling is not feasible.</li> </ul>  |
| Type of packaging     | European waste catalogue (EWC)  |
| Container             | 15 01 06 mixed packaging  |
| Special precautions   | : This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapour from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. |
