# Section 2. Hazard identification

| Health Hazards Not Otherwise Classified - Category 1 |
|--|
|--|

#### Product name SL85 JF JOINT FILLER HEATHER GRAY 1150 - B

### Section 2. Hazard identification

This product contains TiO2 which has been classified as a GHS Carcinogen Category 2 based on its IARC 2B classification. For many products, TiO2 is utilized as a raw material in a liquid coating formulation. In this case, the TiO2 particles are bound in a matrix with no meaningful potential for human exposure to unbound particles of TiO2 when the product is applied with a brush or roller. Sanding the coating surface or mist from spray applications may be harmful depending on the duration and level of exposure and require the use of appropriate personal protective equipment and/or engineering controls (see Section 8).

|                                | protective equipment and/or engineering controls (see Section 8).   |
|--------------------------------|---|
| GHS label elements             |   |
| Hazard pictograms              |   |
| Signal word                    | : Danger  |
| Hazard statements              | <ul> <li>Harmful if swallowed or in contact with skin.</li> <li>Causes severe skin burns and eye damage.</li> <li>Suspected of causing cancer.</li> <li>May cause damage to organs through prolonged or repeated exposure.</li> <li>Prolonged or repeated contact may dry skin and cause irritation.</li> </ul>   |
| Precautionary statements       |   |
| Prevention                     | : Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Wear protective gloves, protective clothing and eye or face protection. Do not breathe vapor. Do not eat, drink or smoke when using this product. Wash thoroughly after handling.   |
| Response                       | : IF exposed or concerned: Get medical advice or attention. IF INHALED: Remove<br>person to fresh air and keep comfortable for breathing. Immediately call a POISON<br>CENTER or doctor. IF SWALLOWED: Immediately call a POISON CENTER or<br>doctor. Rinse mouth. Do NOT induce vomiting. IF ON SKIN (or hair): Take off<br>immediately all contaminated clothing. Rinse skin with water. Immediately call a<br>POISON CENTER or doctor. Wash contaminated clothing before reuse. IF ON<br>SKIN: Call a POISON CENTER or doctor if you feel unwell. Wash with plenty of<br>water. IF IN EYES: Rinse cautiously with water for several minutes. Remove<br>contact lenses, if present and easy to do. Continue rinsing. Immediately call a<br>POISON CENTER or doctor. |
| Storage                        | : Store locked up.  |
| Disposal                       | : Dispose of contents and container in accordance with all local, regional, national and international regulations.   |
| Supplemental label<br>elements | <ul> <li>Trimethoxysilanes are capable of forming methanol if hydrolyzed or ingested. If swallowed, methanol may be harmful or fatal or cause blindness. Repeated exposure to high vapor concentrations may cause irritation of the respiratory system and permanent brain and nervous system damage. Inhalation of vapor/aerosol concentrations above the recommended exposure limits causes headaches, drowsiness and nausea and may lead to unconsciousness or death. Avoid contact with skin and clothing. Wash thoroughly after handling. Emits toxic fumes when heated.</li> <li>Percentage of the mixture consisting of ingredient(s) of unknown acute toxicity: 5.3% (oral), 33.3% (dermal), 94.8% (inhalation)</li> </ul>                                    |

# Section 3. Composition/information on ingredients

| Substance/mixture             | : Mixture                                    |
|-------------------------------|--|
| Product name                  | : SL85 JF JOINT FILLER HEATHER GRAY 1150 - B |
| Other means of identification | : Not available.                             |

| [3-(2,3-epoxypropoxy)propyl]<br>trimethoxysilane | Oxirane, 2-[[3-(trimethoxysilyl)propoxy]<br>methyl]-; Silane, trimethoxy[3-<br>(oxiranylmethoxy)propyl]-; 3-<br>(2,3-Epoxypropoxy)propyltrimethoxysilane;<br> | 0.5 - 1.5* | 2530-83-8 |

\*Ranges if listed above for hazardous ingredient(s) are prescribed ranges. The actual concentration(s) or actual concentration range(s) are being withheld as a trade secret.

SUB codes represent substances without registered CAS Numbers.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

### Section 4. First-aid measures

If ingestion, irritation, any type of overexposure or symptoms of overexposure occur during or persists after use of this product, contact a POISON CONTROL CENTER, EMERGENCY ROOM OR PHYSICIAN immediately; have Safety Data Sheet information available. Never give anything by mouth to an unconscious or convulsing person.

#### Description of necessary first aid measures

| Eye contact  | : Check for and remove any contact lenses. Immediately flush eyes with running water for at least 15 minutes, keeping eyelids open. Seek immediate medical attention.                            |
|--------------|--|
| Inhalation   | : Remove to fresh air. Keep person warm and at rest. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. |
| Skin contact | : Remove contaminated clothing and shoes. Wash skin thoroughly with soap and water or use recognized skin cleanser. Do NOT use solvents or thinners.   |
| Ingestion    | : If swallowed, seek medical advice immediately and show this container or label.<br>Keep person warm and at rest. Do NOT induce vomiting.   |

#### Most important symptoms/effects, acute and delayed

| Potential acute health eff | ects |   |
|----------------------------|------|---|
| Eye contact                | :    | Causes serious eye damage.  |
| Inhalation                 | - 1  | No known significant effects or critical hazards.                         |
| Skin contact               | :    | Causes severe burns. Harmful in contact with skin. Defatting to the skin. |
| Ingestion                  | :    | Harmful if swallowed.   |

#### Product name SL85 JF JOINT FILLER HEATHER GRAY 1150 - B

# Section 4. First-aid measures

| Over-exposure signs/symptoms              |   |  |
|---|---|--|
|   |   |  |
| Eye contact                               | : Adverse symptoms may include the following:<br>pain<br>watering<br>redness  |  |
| Inhalation                                | : No specific data.   |  |
| Skin contact                              | : Adverse symptoms may include the following:<br>pain or irritation<br>redness<br>dryness<br>cracking<br>blistering may occur   |  |
| Ingestion                                 | : Adverse symptoms may include the following:<br>stomach pains  |  |
| Indication of immediate med               | lical attention and special treatment needed, if necessary  |  |
| Notes to physician<br>Specific treatments | <ul> <li>In case of inhalation of decomposition products in a fire, symptoms may be delayed.<br/>The exposed person may need to be kept under medical surveillance for 48 hours.</li> <li>No specific treatment.</li> </ul>   |  |
| opeonie ireatinents                       |   |  |
| Protection of first-aiders                | : No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. |  |

See toxicological information (Section 11)

# Section 5. Fire-fighting measures

|  | -   |
|--|---|
| Extinguishing media                            |   |
| Suitable extinguishing media                   | : Use an extinguishing agent suitable for the surrounding fire.   |
| Unsuitable extinguishing media                 | : None known.   |
| Specific hazards arising<br>from the chemical  | : In a fire or if heated, a pressure increase will occur and the container may burst.   |
| Hazardous thermal decomposition products       | : Decomposition products may include the following materials:<br>carbon oxides<br>nitrogen oxides<br>metal oxide/oxides   |
| Special protective actions for fire-fighters   | : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. |
| Special protective equipment for fire-fighters | : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.                         |

Canada

Product name SL85 JF JOINT FILLER HEATHER GRAY 1150 - B

# Section 6. Accidental release measures

| Personal precautions, protective equipment and emergency procedures |     |   |
|---|-----|---|
| For non-emergency<br>personnel                                      | :   | No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilled material. Do not breathe vapor or<br>mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is<br>inadequate. Put on appropriate personal protective equipment.   |
| For emergency responders  | :   | If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".   |
| Environmental precautions   | :   | Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).   |
| Methods and materials for co  | ont | ainment and cleaning up   |
| Small spill   | :   | Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.   |
| Large spill   | :   | Stop leak if without risk. Move containers from spill area. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilled product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal. |

# Section 7. Handling and storage

| Precautions for safe handling             |   |
|---|---|
| Protective measures                       | Put on appropriate personal protective equipment (see Section 8). Avoid exposure -<br>obtain special instructions before use. Do not handle until all safety precautions<br>have been read and understood. Do not get in eyes or on skin or clothing. Do not<br>breathe vapor or mist. Do not ingest. If during normal use the material presents a<br>respiratory hazard, use only with adequate ventilation or wear appropriate respirator.<br>Keep in the original container or an approved alternative made from a compatible<br>material, kept tightly closed when not in use. Empty containers retain product<br>residue and can be hazardous. Do not reuse container. |
| Special precautions                       | : Vapors may accumulate in low or confined areas or travel a considerable distance to<br>a source of ignition and flash back. Vapors are heavier than air and may spread<br>along floors. If this material is part of a multiple component system, read the Safety<br>Data Sheet(s) for the other component or components before blending as the<br>resulting mixture may have the hazards of all of its parts.   |
| Advice on general<br>occupational hygiene | Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.   |

|   | particulate matter.  |
| [3-(2,3-epoxypropoxy)propyl]trimethoxysilane  | None.  |

Consult local authorities for acceptable exposure limits.

### Section 8. Exposure controls/personal protection

| Recommended monitoring procedures  | :   | Reference should be made to appropriate monitoring standards. Reference to national guidance documents for methods for the determination of hazardous substances will also be required.   |  |  |  |  |  |  |
|------------------------------------|-----|---|--|--|--|--|--|--|
| Appropriate engineering controls   | :   | If user operations generate dust, fumes, gas, vapor or mist, use process enclosures,<br>local exhaust ventilation or other engineering controls to keep worker exposure to<br>airborne contaminants below any recommended or statutory limits.  |  |  |  |  |  |  |
| Environmental exposure<br>controls | :   | Emissions from ventilation or work process equipment should be checked to en<br>they comply with the requirements of environmental protection legislation. In so<br>cases, fume scrubbers, filters or engineering modifications to the process<br>equipment will be necessary to reduce emissions to acceptable levels.   |  |  |  |  |  |  |
| Individual protection measured     | res |   |  |  |  |  |  |  |
| Hygiene measures                   | :   | Wash hands, forearms and face thoroughly after handling chemical products, before<br>eating, smoking and using the lavatory and at the end of the working period.<br>Appropriate techniques should be used to remove potentially contaminated clothing.<br>Wash contaminated clothing before reusing. Ensure that eyewash stations and<br>safety showers are close to the workstation location.   |  |  |  |  |  |  |
| Eye/face protection                | 1   | Chemical splash goggles and face shield.  |  |  |  |  |  |  |
| Skin protection                    |     |   |  |  |  |  |  |  |
| Hand protection                    | :   | Chemical-resistant, impervious gloves complying with an approved standard should<br>be worn at all times when handling chemical products if a risk assessment indicates<br>this is necessary. Considering the parameters specified by the glove manufacturer,<br>check during use that the gloves are still retaining their protective properties. It<br>should be noted that the time to breakthrough for any glove material may be<br>different for different glove manufacturers. In the case of mixtures, consisting of<br>several substances, the protection time of the gloves cannot be accurately<br>estimated. |  |  |  |  |  |  |
| Body protection                    | :   | Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.   |  |  |  |  |  |  |
| Other skin protection              |     | Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.   |  |  |  |  |  |  |
| Respiratory protection             | :   | Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator. If workers are exposed to concentrations above the exposure limit, they must use appropriate, certified respirators. Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary.  |  |  |  |  |  |  |

# Section 10. Stability and reactivity

| Reactivity                         | : No specific test data related to reactivity available for this product or its ingredients.  |
|------------------------------------|---|
| Chemical stability                 | : The product is stable.  |
| Possibility of hazardous reactions | : Under normal conditions of storage and use, hazardous reactions will not occur.   |
| Conditions to avoid                | : When exposed to high temperatures may produce hazardous decomposition products.<br>Refer to protective measures listed in sections 7 and 8. |
| Incompatible materials             | : Keep away from the following materials to prevent strong exothermic reactions: oxidizing agents, strong alkalis, strong acids.              |
| Hazardous decomposition products   | : Depending on conditions, decomposition products may include the following materials: carbon oxides nitrogen oxides metal oxide/oxides       |

Carcinogen Classification code:

#### Product name SL85 JF JOINT FILLER HEATHER GRAY 1150 - B

### Section 11. Toxicological information

| IARC: 1, 2A, 2B, 3, 4  |
|--|
| NTP: Known to be a human carcinogen; Reasonably anticipated to be a human carcinogen |
| OSHA: +  |
| Not listed/not regulated: -  |

#### Reproductive toxicity

**Conclusion/Summary** : There are no data available on the mixture itself.

#### **Teratogenicity**

**Conclusion/Summary** : There are no data available on the mixture itself.

#### Specific target organ toxicity (single exposure)

Not available.

#### Specific target organ toxicity (repeated exposure)

| Name                        |            | Route of<br>exposure | Target organs |
|-----------------------------|------------|----------------------|---------------|
| diethylmethylbenzenediamine | Category 2 | -                    | -             |

#### Target organs

: Contains material which causes damage to the following organs: brain, skin, eyes, central nervous system (CNS). Contains material which may cause damage to the following organs: lungs, the nervous system, upper respiratory tract.

#### **Aspiration hazard**

Not available.

#### Information on the likely routes of exposure

#### Potential acute health effects

| Eye contact  | : Causes serious eye damage.  |
|--------------|---|
| Inhalation   | : No known significant effects or critical hazards.                         |
| Skin contact | : Causes severe burns. Harmful in contact with skin. Defatting to the skin. |
| Ingestion    | : Harmful if swallowed.   |

#### **Over-exposure signs/symptoms**

| Eye contact  | : Adverse symptoms may include the following:<br>pain<br>watering<br>redness  |
|--------------|---|
| Inhalation   | : No specific data.   |
| Skin contact | : Adverse symptoms may include the following:<br>pain or irritation<br>redness<br>dryness<br>cracking<br>blistering may occur |
| Ingestion    | : Adverse symptoms may include the following: stomach pains   |

#### Delayed and immediate effects and also chronic effects from short and long term exposure

### Section 13. Disposal considerations

#### **Disposal methods**

: The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and nonrecyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

Disposal should be in accordance with applicable regional, national and local laws and regulations. Refer to Section 7: HANDLING AND STORAGE and Section 8: EXPOSURE CONTROLS/PERSONAL PROTECTION for additional handling information and protection of employees. Section 6. Accidental release measures

Version 2

#### Product name SL85 JF JOINT FILLER HEATHER GRAY 1150 - B

### Section 14. Transport information

Proof of classification statement

: Froduct classified as per the following sections of the Transportation of Dangerous Goods Regulations: 2.43-2.45 (Class 9), 2.7 (Marine pollutant mark).

# Section 15. Regulatory information

#### National Inventory List

Canada inventory ( DSL )

: At least one component is not listed in DSL but all such components are listed in NDSL.

### Section 16. Other information

```
Hazardous Material Information System (U.S.A.)
Health : 3 * Flammability : 1 Physical hazards : 0
(*) - Chronic effects
```

Caution: HMIS® ratings are based on a 0-4 rating scale, with 0 representing minimal hazards or risks, and 4 representing significant hazards or risks. Although HMIS® ratings and the associated label are not required on MSDSs or products leaving a facility under 29 CFR 1910.1200, the preparer may choose to provide them. HMIS® ratings are to be used with a fully implemented HMIS® program. HMIS® is a registered trademark and service mark of the American Coatings Association, Inc.

The customer is responsible for determining the PPE code for this material. For more information on HMIS® Personal Protective Equipment (PPE) codes, consult the HMIS® Implementation Manual.
